HARDWARE AND METAL

Vol. XXVII. PUBLISHED EVERY SATURDAY SINCE 1888 March 27
No. 13 THE MACLEAN PUBLISHING COMPANY, LIMITED 1915
PUBLICATION OFFICE: TORONTO, CANADA

THE room illustrated below is finished with

NEPONSET WALL BOARD

Substitute for Lath, Plaster and Wall Paper

For Walls and Ceilings

It shows clearly the cream white and plain oak finish—nothing else like it made in Canada.

When one of your customers finishes a room with NEPONSET Wall Board he is creating something that will advertise you every day in the year because NEPONSET Wall Board is DISTINCTIVE.

It is typical of the whole NEPONSET Line of Roofings, Building Papers, etc.

Write for samples and do not fail to get our full line proposition for 1915. It's the biggest proposition of the year.

BIRD & SON *(Est. 1795)*, **Heintzman Bldg., Hamilton, Ont.**

Combining Elegance and Utility

The Starrett Vernier Caliper is the recognized standard for fine measurements where a micrometer cannot be used. A machinist cannot measure any more accurately if he keeps the Starrett Vernier Caliper in the velvet case—but he keeps it in better condition and is more pleased with his possession. Moreover a machinist is more likely to buy the tool when it is shown him in the case than when shown alone.

Every hardware salesman should remember that a man whose work requires skill and accuracy is proud of his personal equipment. It is selected and paid for by him. That is why our vernier calipers, or micrometers or bevel protractors in their cases appeal to the pride of the mechanic. There is no extra charge for these cases with the vernier caliper —the retail prices including cases being as follows: 4″ $13.00, 6″ $15.00, 9″ $18.00, 12″ $20.00, 24″ $25.00.

PINK'S LUMBERING TOOLS

The Standard Tools in every province of the Dominion, New Zealand, Australia, etc.

We manufacture all kinds of lumber tools. Light and Durable.

LONG DISTANCE PHONE No. 87.

Send for Catalogue and Price List.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

THE THOS. PINK COMPANY, LIMITED
Manufacturers of Lumber Tools
PEMBROKE - - ONTARIO

It's a Pink anyway you take it, and it's the best Peavey made.

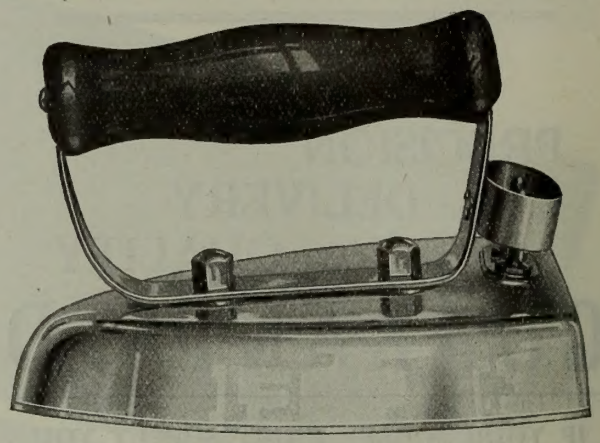
Sets the Pace for all Medium-Priced Irons

Handsome in appearance and durable in construction. Has the UNIVERSAL Heating Unit which is so wound as to radiate the heat over the entire ironing surface, conducting a greater amount to the point—the place where most heat is required.

The Terminal Plugs are equipped with seven points of contact; a seven-fold insurance on current connection. Arcing and other terminal troubles do not annoy users of UNIVERSAL Irons.

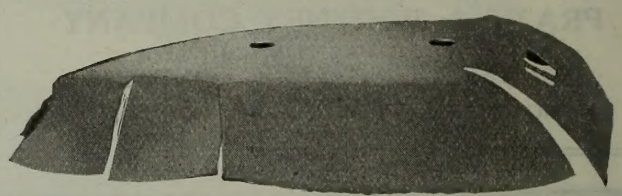
UNIVERSAL Electric Iron

No. E903—$3.00 Western Zone, $3.25



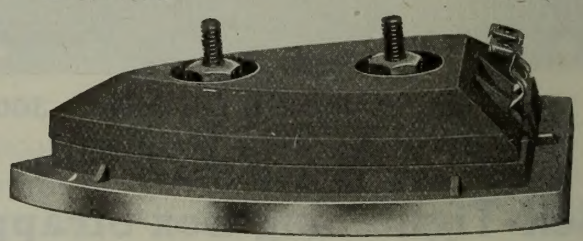
The Western Zone includes all territory west of Winnipeg.

An examination of the various parts of UNIVERSAL Irons, as illustrated, shows why they are "Universal" Favorites. They're made right, from plug to point and from handle to sole plate. Only thoroughly tested and rigidly inspected materials are used in their construction.

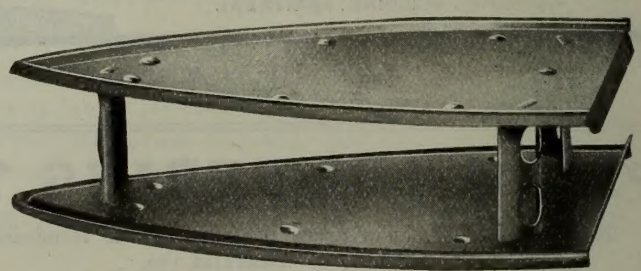


This is not a "bargain" iron—it is a standard article, sold at a standard price.

Each one carries the UNIVERSAL Guarantee.

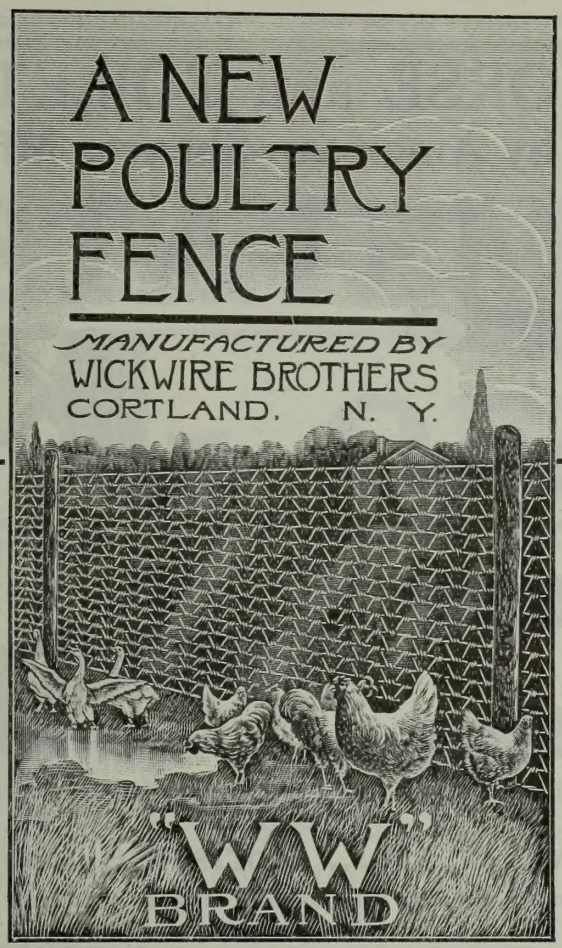


For prices, etc., write to your jobber, or direct to us.



The Hood.
Heavily nickel plated and beautifully finished. Has heat-proof handle which cannot work loose.

The Asbestos Barrier.
This blanket of asbestos keeps the heat from penetrating the upper part of the iron. The handle is always cool, no matter how long the current is on.



No Heat Escapes.
The pressure plate and the sole plate are so closely fitted together that they are practically one piece. The UNIVERSAL consumes less heat because there is no waste heat.

The Fire-Proof Stand.
Nickel plated and very strong. Lower plate always cool.

UNIVERSAL **LANDERS, FRARY & CLARK** UNIVERSAL

NEW BRITAIN CONNECTICUT

Most Practical—Durable—Economical Poultry Fencing on the Market

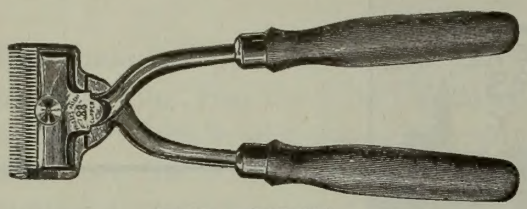
FEATURES:

Stretches tight to posts without varying the mesh. Horizontal Wires, which bear the strain, are two sizes heavier than the cross wires.

Galvanized After Weaving, securely soldering all intersections. Made full width and will remain so after being erected. Two grades—one-inch mess made from Nos. 19 and 21 wire; two-inch mesh, made from Nos. 18 and 20 wire. Full gauge wire and well constructed. All widths, 12 to 72-inch.

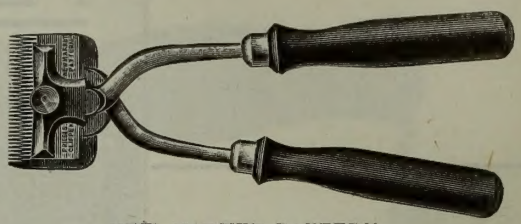
LEWIS BROS., LIMITED

AGENTS



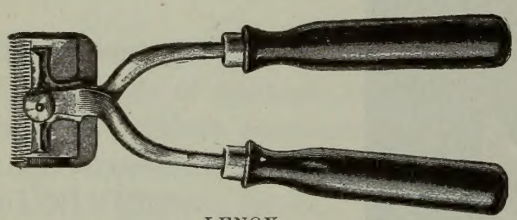
MONTREAL

PRIEST'S HORSE and TOILET CLIPPERS



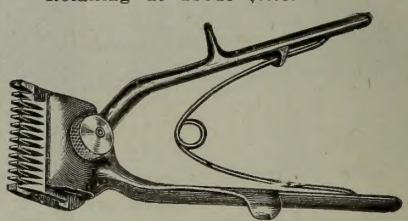
Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.



Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to **cut** hair, not break it off by main force.

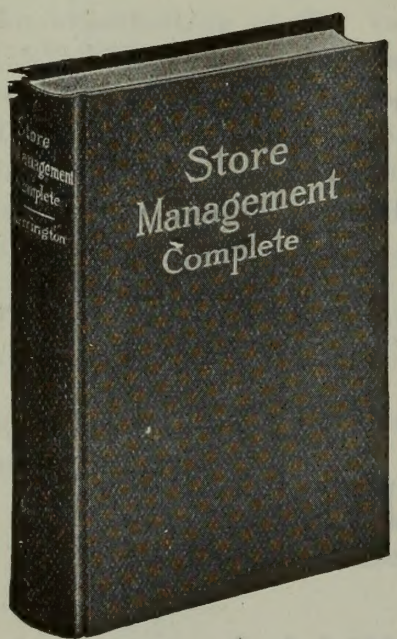
BALL BEARING
Retailing at about $2.50.



NEW MARKET PATTERN
Retailing at about $1.75.

LENOX
Retailing at about $1.50.

If you are not familiar with these goods, send for samples and compare them with others.



Hunter, Fetlock and Dog Clipper, retailing at about $1.50.

ARE YOU THE MAN AT THE HELM?

Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

MONTREAL TORONTO WINNIPEG

The Fight for Durability

Chapter XI.

Another effect of honeycombed ingot is shown in the above cut of a defective bar.

This bar has been rolled from an ingot which had blowholes close to the surface. Heating in the soaking pit has burned off the thin skin over these blowholes and left pits filled with mill scale.

Sometimes this skin does not burn off and the defect is not discovered.

If sheets of this character are galvanized, blisters will appear, due to the expansion of the gases.

If the holes are small and near the surface, the gases will sometimes force through, causing pin holes in the galvanized coating — tin plate or vitreous enamel.

ARMCO IRON
Resists Rust

The freedom from enclosed gases and honeycombed ingots makes American Ingot Iron the peerless sheet for galvanizing, tinning and enameling.

Great trouble is experienced in enameling steel because of this condition; vitreous enamel is applied at approximately 1600°F., and this heat causes the gases to burst through the sheet and the enamel, causing blisters and pin holes. The reasons for the unexcelled enameling properties of Armco-American Ingot Iron are the same which make it the most durable in exposed situations.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

Armco - American Ingot Iron Black and Galvanized Sheets, Roofing, Pipe, Gutter, Metal Lath and Terne Plate.

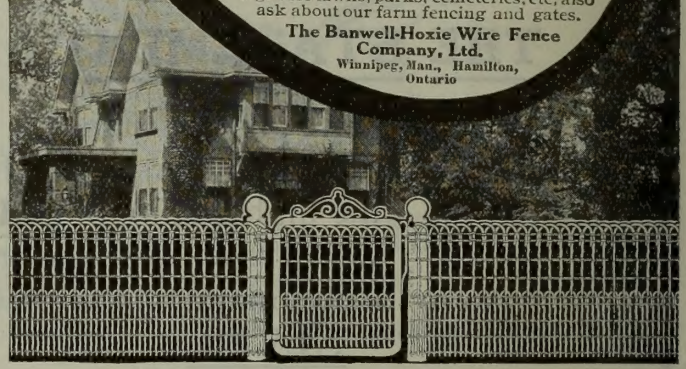
District Sales Offices at Chicago, Pittsburgh, Detroit, Cleveland, New York, St. Louis, and Cincinnati.

PEERLESS
Ornamental Fencing

IT is easy to explain the merits of Peerless Ornamental Fencing to a prospective customer. There are so many things in its favor. First, it is really an ornamental fence; second, it is an economical, and at the same time, durable fence; third, it beautifies home surroundings and presents a splendid appearance. Gate and fence match well together. Then, too, there is money in it for you.



Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire. Peerless fence is easy to erect, and will hold its shape for years to come.

Send for Dealers' Proposition

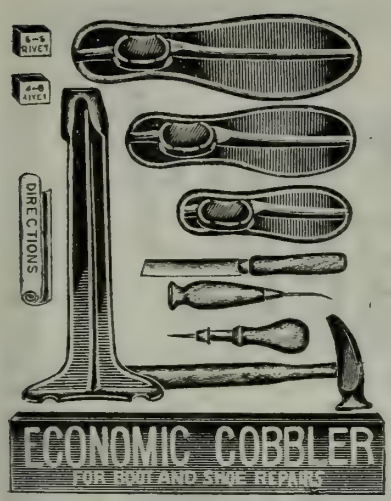
SALES OFFICES:

HAMILTON MONTREAL TORONTO WINNIPEG
VICTORIA VANCOUVER ST. JOHN HALIFAX

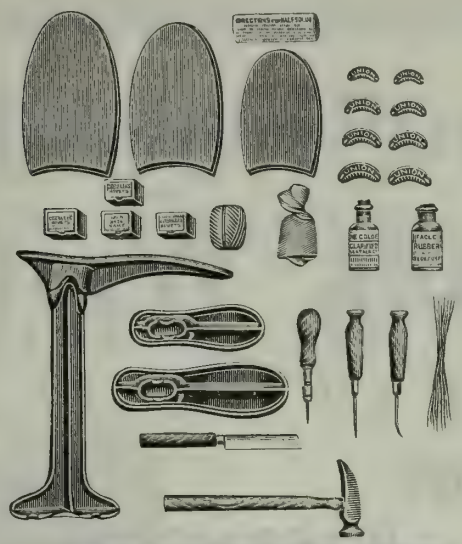
Keeping In Your Public's Eye and Mind

is half the battle; the other half is in carrying a message that it will listen to and heed.

The message starts 'way back in the shop—in a deserving product and good business methods—and this is the first, most important equipment of the fight for business.



The other half, without which any decisive victory is well-nigh impossible, is made comparatively simple by the fact that your particular public has been so sorted out and classified that you know exactly where to find it.



Your public, the few thousands who are of direct business value to you, are selected automatically from the millions who have no possible interest in your product, and, so far as your purposes are concerned, are brought together at regular intervals for deliberate and serious consideration of their business problems.

They are told, by those whose opinions they respect, how to do things better, quicker or cheaper. They are told how others in their line have profited by the adoption of new methods. They are given information of vital value—information for which they gladly pay; and then the opportunity is open to you—while the whole matter is fresh in their minds—to tell them just how your product fits into the plans presented.

There are few paid subscribers to any trade or technical publication who are not actual or potential buyers—few whose purchasing power or influence can be safely ignored, and few even of the few who "don't read advertisements" who are not influenced by them.

The subordinate of to-day is the department head of to-morrow, and the work of educating him is done while the work of convincing to-day's buyer is going on, for both are readers of a trade or technical paper.

COBBLERS' and Combination Outfits

You Can Save Money

These days by making your own bread.

And you needn't be afraid of the result—even if you never made a loaf of bread before in your life—if you use a

CANUCK BREAD MIXER

We can prove, by actual figures, from actual experiments we have made, that by using the CANUCK and producing clean, sweet, wholesome, home-made bread, in preference to buying the baker's factory product, you can effect

A Saving of 100%

This conclusion is based on a 5c loaf—and the percentage of profit to CANUCK users will exceed 100% in the same proportion that the bakers have advanced their 5c price in your locality.

Even with those who can afford to waive the consideration of price (and how many are really in a position to do so to-day?) the CANUCK still asserts its superiority, in that it offers a sanitary, cleanly, sure and certain method of perfect bread-making not obtainable by any other means.

CANUCK Bread excels in nutritious, health-giving, body-building qualities—has all the attributes essential as an ideal exponent of the "staff of life."

Bring your customers up to a realization of the value of good health, good appetite and good digestion, and the saving in household expenses effected by the presence in the kitchen of the CANUCK.

Vol. XXVII. MARCH 27, 1915 No. 13

At the Front With the Princess Pats

By GEORGE EUSTACE PEARSON.

George Eustace Pearson in the uniform of the Princess Patricia's Light Infantry.

EDITOR'S NOTE.—All readers of Hardware and Metal will remember George E. Pearson who acted as associate editor of this paper for some time. His duties took him to many sections of the country and in that way he became closely acquainted in the trade. When the war broke out, Mr. Pearson was one of the first to enlist. He went with the Princess Patricias to the front and has been serving in the trenches since the first of the year. His article, written for the most part in the trenches, will have a double interest for Hardware and Metal readers.

THE Princess Patricia's Canadian Light Infantry is a modern White Company, roving on that same soil that held its predecessor so many centuries ago. It is a reincarnation of the old spirit, but stirred this time to a nobler end and errand. A far cry from Black Simon and Big John with their bows of yew and ash to those who now lead the "Pats." But its aims only have altered; the spirit remains the same. And Sir Nigel with his lady's glove at helmet was never keener for the onslaught than those upon whom his mantle has settled to-day.

Now, Tommie likes nothing so much as being on the move; he cares not how he goes, nor why, nor where, provided always, of course, that he is not retiring; hence the frequent changes of camp of the Patricia's were invariably greeted with glad acclaim. Their camp history was much that of the Canadian contingent proper, up until they camped at Winchester where they lay alongside of and made further acquaintance with some of the regular regiments. There, in those sunken lanes, worn deep by the feet of centuries of patient toilers and sturdy men-of-arms, they renewed the spirit of their sires. And in the city those ancient archways and venerable flags, that once resounded to the clanging arms of Caesar's legionaries and Alfred's later Thanes, now echoed and re-echoed to the shouts of "Tipperary" and the creak of modern war equipment.

Rumor is a capricious dame and feeds on herself. At one and the same time, the Patricia's if all accounts going were to be believed, were going to return to Canada against a possible invasion there, were going to India, Egypt, Bermuda, Malta, the Gib, France, Belgium and the Kiel Canal. But finally, after four months of sticky mud and wet misery, four month of useless fret and wasted fire, came the great announcement, "Active Service"—where, no one asked nor cared. The word ran like wildfire through the ranks. Old "Sweats" became for the nonce patient with greener soldiers, old enemies called a halt on wordy war. With the serving out of live ammunition, identification tags and emergency rations, there stole over the camp that sublime peace that knows no words. Fatigue, usually to be avoided like unto a plague, became a pleasure in the sure knowledge that this was no ordinary camp breaking, but the precursor of camp in a gloriously muddy trench.

Nor could the discomfort of an all-night trip in an almost open cattle boat in a pouring rain mar their quiet content as they approached the land of action. Disembarkation was followed by a short night march which brought them to their temporary camp, which, wetly reminiscent of England as it was, and short as the night rations of grub and blankets were, they welcomed as part of the great game.

Instead of the dreaded wait, another night saw them once more en route and correspondingly happy. As they moved down through the streets of the ancient French seaport, at which the landing had been made, to the entraining point all reserve was thrown aside and a well-disciplined pandemonium — if such be possible—broke loose. The pipers endeavored to make themselves heard and gave expression to the bottled up yeast fermenting in their Scottish bosoms. All in vain; the men would be heard—and were. Mile after mile slipped away from under their feet. They chanted, sang and whooped for sheer joy. The wolves were out. Blood was in the air and the eager whelps were straining at their leashes. The Patricia's had struck the scent. It made one's blood tingle.

After the strenuous labor of juggling their impedimenta abroad the train, the men piled in at their side door and with pipe and story settled themselves down to the long journey ahead. At last the dim lights of strange and famous cities gave way to the misty dawn that showed quiet villages deserted except for some frantically waving women and their little broods; silent harbingers of war these.

Once more we were on the march and the Patricia's swung out into the winter night, this time through silent villages and country roads bordered by gaunt and leafless poplars that reared themselves wraith-like in the light of a watery moon that shone through the mist-ridden air. No sounds were heard as they swung on, save the muffled cadence of their feet and the desultory booming of distant guns. The dawn found them billeted at a straggling village in which the warm-hearted natives had sat up all night awaiting their ar-

rival with open doors and steaming coffee. Deep beds of straw in tile-thatched stable lofts replaced the muddy tents of other camps. Here, like the villages, they quickly fell into the ordinary routine of the day's work, despite the continual sound of that ominous firing and all that it presaged. Here all light pleasures were pushed aside in preparation for the hour of trial. Neither the village cabaret nor the smiling "jeune filles" could hold more than the moment's notice of these men who, be it said, have remembered Lord Kitchener's advice.

The dawn found them billeted at a straggling village in which the warm-hearted natives had sat up all night awaiting their arrival with open doors and steaming coffee.

A file of the "Pats" enjoying a few minutes' rest.

Three Week's Later.

Since the Patricia's first left that quiet village many things have happened. They have been through the fiery furnace, into which they went as a mass of rough metal of untried men and have come out the finely tempered steel of a cohesive fighting unit. The bell that from Winchester's old cathedral each noon tolls its daily dirge for the souls of departed warriors by land and sea has tolled for them.

Since that first night we have made many marches but always have been within sound of the guns. For two days we marched, circling and coming with each hour closer to the deep volume of the sound. The first day's trek took us through a country but little disturbed, to outward appearance at least, by the war. It was quite evident that something was afoot but there were no evidences of war's destruction. The uneven cobble stones of the road called forth many execrations from the tired men with their heavy packs. Everywhere we met groups of playing children, who, stopping for the moment to gaze at us, and catching sight of our badges, would break away shouting and, pounding on closed doors with tiny fists, would squeal: "Maman, Maman, ce sont les Canadiens!" Ever and anon there passed convoys of transports, empty and full, returning from and going to the sound of the guns, English, French and Belgian. The former were usually immense auto goods vans with an occasional admixture of wagons, the latter nondescript assemblages of two, three and four-wheeled carts drawn by a great variety of quadrupeds, varying from donkeys to massive Percherons. The handsome Frenchmen, striding along beside their loads, dressed in voluminous upturned blue coats with baggy red pantaloons, invariably showed their white teeth in a cheerful smile as they shouted greetings to us. And always there were the Red Cross vans, noiseless and easy, going slowly south.

At the roadside groups of Belgian soldiers stood aside from their road work, uniformed except for the addition of wooden shoes. The little fellows usually drew themselves to attention and one could hear the subdued murmur of the chorused words, "Kan-ada," as we passed.

The first night's billet brought us into the fringe of the earlier German invasion. On the outskirts of a popular city, which must perforce be nameless, a long line of deserted and water-filled trenches overlooking a muddy turnip field. It contained all that was mortal of three hundred of "Ours" who had given their lives in gaining these same trenches. The belfry of a beautiful church, commanding as it did the whole countryside below it, had housed the machine guns that had meted out their fate. Here the Germans had come and gone three times as the tide of invasion had rolled back and forth. Here we met our first spies, one of whom was in a peasant woman's garb. But we passed on before their ultimate fate was settled.

The stories we hear at our various billets varied, as they have since, of German methods. This man or woman was left unmolested by some unwelcome but courteous German; that one robbed and outraged. It all depended apparently upon the individual German soldier and the manner of the householder toward him. One astonishing fact we noticed, was the commonplace way in which the peasants continued about their ordinary duty, the work of the crops, and even to the minute detail of hedge trimming. Evidently no fear here of a German return.

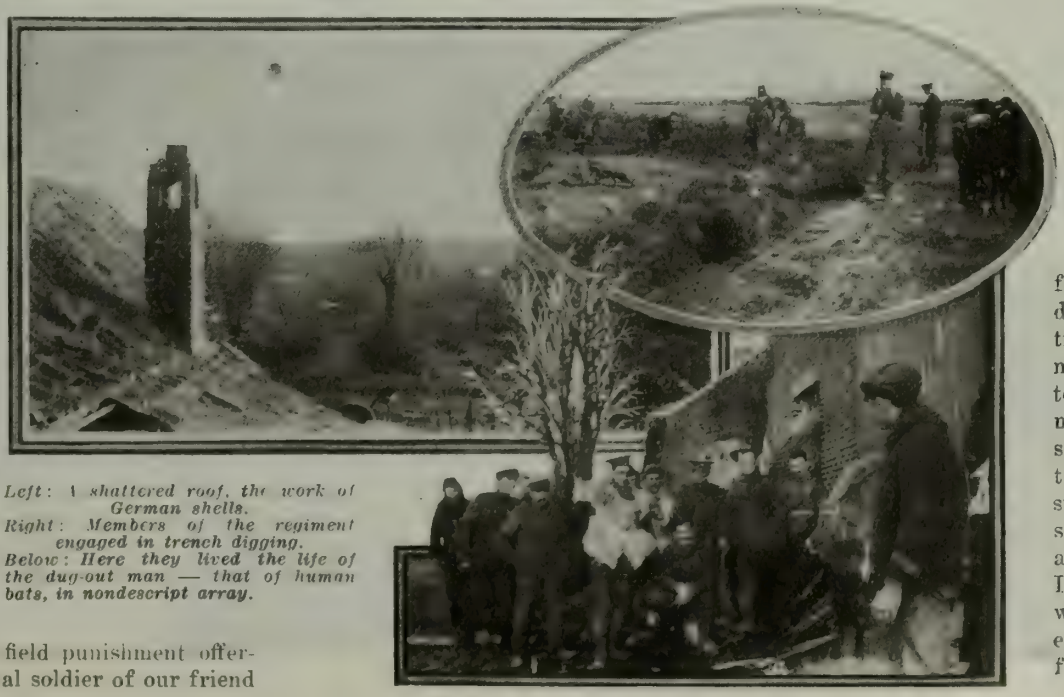
The next day was a repetition of the first except that there was more activity apparent as we neared the firing line. Also there were more evidences of destructive war. Nameless cities and hamlets that, always famous, have lately gained immortality in a night, came and went. As the day aged we began to pass rest camps, "dug-outs" and abandoned villages, that swarmed with "Terriers" and regulars, amongst all of whom our presence had an electrifying effect. Shouts of "Good Old Canada," "Pat's Pets" and so forth were bandied up and down the line of march.

The early afternoon saw us bivouacked in a muddy field, the sheltering hedges of which we sought against the presence of hostile aeroplanes, while we waited for darkness and the trenches, for, from this time on, in consideration of our close proximity to the actual theatre of operations, all movements had to be made after nightfall to avoid enemy reconnaissances. But even here we were treated to one of the most spectacular sights that even this, the most spectacular of wars, affords. From out of the hazy distance appeared a school of enemy aeroplanes, about a dozen. As they approached our nearby artillery opened fire and for fifteen minutes the planes manoeuvred up and down, this side and that, seeking a safe lane of approach, whilst all about them on both sides, over and under them, burst our shrapnel in so lively a fire that the planes were half

hidden by smoke. They were soon forced to withdraw.

As night fell quiet-voiced orders were given and, amidst perfect silence, the regiment formed up for its march to its maiden adventure. And here we were treated to our first sight of the German star shells which shot up from the vicinity of their trenches, breaking directly over the suspected area of our territory, illuminating the whole of it within one hundred yards brightly and semi-brightly over a much larger area. They resembled nothing so much as huge sky rockets, except that, as they broke, they took on a duller, yellow coloring and the form of a star.

The "relief" of the trenches is not the least dangerous part of the game and each party had its own adventures on the route to the comparative shelter of their frontage. The all-too-generous supply of mud and water about was bad enough in itself, but the presence of the star shells made it doubly so. Distant shells went unheeded but those falling close by made imperative demand for "bobbin' "; so "bob" the Patricia's did, flattening out in the muddy mess. Number one company in particular was so unfortunate as to fall heir to a star at a very inconvenient time, to wit, as they stood knee deep in a flooded field. But there was nothing for it, so with many a muttered interjection, down they went as if for a swim in the ice cold lake and none the less quickly for all their dislike of it. Situations sometimes arise in which neither command nor plea is necessary and this was one of them.



By day they slept and shaved and washed and cooked and strove courageously to rid themselves of the accumulated mud.

A snapshot of Mr. Pearson taken at Winchester.

In other parts of the movement the Patricia's made first acquaintance with the festive sniper, i. e., Germans who had crawled behind our line, there to lie under cover of hedge or ditch or in sheltered tree-tops and take toll of the unsuspecting men beneath. Apropos of snipers the story goes that a full course of sniping is the field punishment offered to the individual soldier of our friend the enemy for any misdemeanors while on active service. According to the tale, the guilty one is punished with ten-days' rations and 500 rounds and given the German equivalent to "Beat it." To add insult to injury the poor sniper must needs return his empty 500 to prove that his work was done. A truly German sample of factory efficiency and utilization of waste product. I tell the story for what it is worth.

All that long night the Patricia's played the game, than which no harder one exists—the waiting one. The conditions were such that only those who have endured them can have any adequate conception of what they really were. All at least knee deep, some waist deep in a thick, gluey, clayey mud and stagnant, putrid water, they passed the night in the rain unsheltered save by a rare bomb-proof — a bomb-proof in name if not in fact. Betimes they paid their devoirs to the unseen enemy and were repaid in kind. Here and there down that desperate line went the angry pop-pop of intermittent rifle-fire, like the windy slamming of many doors, occasionally to give way to noisy fusillades as one side or the other became angered at some hit or concentrated their fire on some special movement or the other. And always, at intervals only, for the night work exposes artillery positions, from overhead there came the heavy snap of the shells as they left the big guns, followed by an eerie wail like the wind in a mountain storm, a resonant boom and then—a shower of shrapnel, sometimes on the trenches of one or the other, sometimes directed at a distant battery. The whole pale fields of foetid water, ditch-like trenches and mud-bespattered haggard men lit up in spots now and then by the star shells, showed forth a terrestrial Inferno in which it seemed impossible for men to

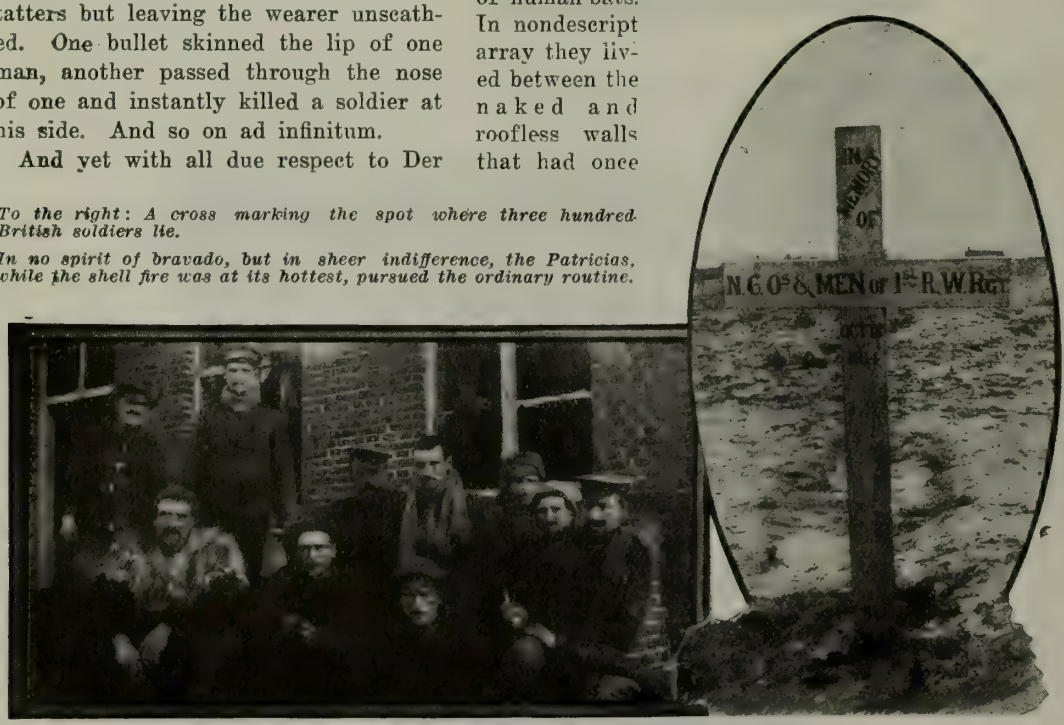
Right: Members of the regiment engaged in trench digging.
Below: Here they lived the life of the dug-out man — that of human bats, in nondescript array.

live, let alone fight. Their only consolation—and being human a great one it was—was that the Germans were as badly or perhaps worse off than they. The darkness, except at these rare intervals, was of that impenetrable inky quality that arises from a mixture of black night, steaming mist and drizzling rain over a heavily-wooded countryside. Although the moon was supposedly at its full it forgot, or else refused, its function as though a party to that vast conspiracy of darknes.

At last the morning, the "stand to arms" and with it strange sights, but not, as in some places—the good warm sun. As though its benignant influence might cheer, it carefully hides away and sends in its stead more rain. And so it always is in this land—rain, rain, night and day. Sometimes it just drizzles, at others it pours—but never the sun. One wonders if the sun is not the fable to these nations that snow is to the south sea islanders. Men look at one another seeking to descry well known features through the mud.

Soon, as in city factories and country farms, the real business of the day begins. A few experimental feelers and the daily artillery duel began, interspersed with sporadic shelling of the trenches; and so continued throughout the day with a heavier and more accurate rifle fire between the opposing trenches than was possible during the night. Many were the freak wounds and narrow escapes. Here a sergeant's stripe torn off by a splinter of shrapnel; there the handle of an entrenching tool shattered or a pack torn bodily from a man's shoulder, tearing coat to tatters but leaving the wearer unscathed. One bullet skinned the lip of one man, another passed through the nose of one and instantly killed a soldier at his side. And so on ad infinitum.

And yet with all due respect to Der Kaiser and his wonderful machine and wishing to incur no punishment for lese majeste, let it be said here that his gunners are rotten. There is no other word for it. Or at least this description applies to that part of them who held forth opposite the Patricia's. The noise of the bursting shells, the impact of them as they fell, the presence of flying splinters and gobs of mud was really most terrifying; but their ultimate results—nil, and out of all proportion to the energy expended.



With the dusk the heavier fire ceased but there continued a repetition of the previous night, a desultory rifle and artillery fire, the former at irregular intervals giving way to brisk and lengthy fusillades. Then came the heaviest task of all, the passing of the long night, the baling of water, the constant fight against the sucking mud and the utter weariness of mind and body, unrelieved by the external excitement of the heavy fire of the day. Men became dazed and did their duties in a well-disciplined but automatic manner, not knowing why or how they did them but just doing them.

The relief battalion took the pace of the Patricia's that night, the latter wet and mud-soaked, short some of their number, but still indomitable of spirit, stumbled on through the foetid mud. Their destination was a ruined and nameless village a short distance in the rear in which they were to do their time as supports for the brigade ere they moved still further in the rear for a well-earned rest on the reserve line.

Here for three days and nights they lived the life of the dug-out man—that of human bats. In nondescript array they lived between the naked and roofless walls that had once been homes but were now mere mockeries of that name. By day they slept and shaved and washed and cooked, and strove courageously to rid themselves of the accumulated mud. Failing that last they solved the problem as far as great coats were concerned by slicing off in jagged patterns the heavy skirts. The resultant patterns fitted in with their surroundings. Some favored a swallow-tail effect, some argued a short Cardigan quite au fait. Others claimed that that was decollete and clung to their mud-soaked skirts. Like bandits—a cross between cavemen and medieval men-at-arms—they appeared. Ragged and dirty and lacking any quantity of water to correct that last they skulked and prowled about seeking stray vegetables to eke out the perennial stew, dodging along the cover of shattered ruins of walls, intent on nothing but their bodily comfort, after so hard a punishment of it. At night those apparently lifeless ruins vomited out their dwellers, some to seek dug-outs, others to draw rations, something for one to do for all, until the very air hummed with their activities.

It was in this village that we picked up a straggler from another regiment who will be longer remembered by the favored few who saw and heard him than any of the stragglers who have joined us for a day and then gone on. He came strolling down the road, serene and unafraid, nondescript of apparel with turkey bag on his back, glancing now right, now left, as though he were some country visitor but newly arrived in a great metropolis. On closer inspection his uniform, or what once had been one, was seen to be in rags, particularly the back of it which had been badly torn by shell fire. To cap it all he wore for head gear an ancient and disreputable square-topped black derby. He was from a famous British regiment. His speech was fully as quaint as his clothes and he will never know the keen delight he furnished that small group as he retailed from his peculiar viewpoint his adventures during four troublous months of hard soldiering hereabouts. His description of a certain German charge that he had faced, and incidentally assisted in repulsing, was a masterpiece. "The funniest thing ever seen in m' life, chaps. Three short blasts on a bugle, 'Hoch! Hoch! Hoch!' All down the line like a flock of geese. Then them chaps sung

(Continued on page 40.)

To the right: A cross marking the spot where three hundred British soldiers lie.

In no spirit of bravado, but in sheer indifference, the Patricias, while the shell fire was at its hottest, pursued the ordinary routine.

A Strong Hardware Display

Fine Points of Window Trimming Demonstrated in Display Which Secured Second Prize in Hardware and Metal Christmas Contest.

IN announcing the results of Hardware and Metal's Christmas Window Contest, the statement was made that the windows submitted far outranked anything in the way of hardware trimming which had previously been seen. This broad statement will be more than justified by the illustration presented herewith—the window trimmed by Chas. H. Byford for the Bond Hardware Co., Guelph, which was awarded second prize in places over 5,000. Mr. Byford has a well-deserved reputation as a window trimmer, but it is doubtful if he has ever accomplished anything so complete and artistic in every detail as the trim in question.

This window is a splendid sample of a trim combining the two essentials of artistic arrangement and comprehensive display of goods. The first impression gained from the display is the extremely attractive setting and the unusual length to which the decorative schemes have been carried. The marbelized posts with large lights above are a distinct feature. At the same time, however, the strongest feature of the display is the large variety of goods shown in the window. Mr. Byford has made it a strong sales window, a factor which was helped to no small extent by the use of price cards on all the goods displayed.

A description of the trim will be of interest:

The background of this trim was made up of four 10 in. square pillars covered with onyx marble paper, which stood out with excellent effect. The two centre pillars were 6 feet high, on which were placed two 12 in. globes with 100 candle-power electric bulbs in each. The two outside pillars were 6 inches shorter, and on these the sign, "Season's Greetings" was placed. The sign was made of beaver board, 10 inches wide and 17 feet long, in scroll shape, painted white and edged with gold. The lettering was done in green, shaded with gold. The spaces between the pillars was filled in with beaver board cut out as shown in the photo. A strip 3 inches wide was fastened around the circular portion, thus setting the lattice work back. This was all finished in white and gold. Behind the lattice green sateen curtains were hung, which brought out with good effect the lattice-work, which was made in diamond shape. The base of the window was raised 6 inches and sloped towards the front, which was used to good advantage in displaying table cutlery, etc. The back portion of the display was arranged by two tiers of small boxes of equal sizes. Over the boxes white paper was first used and then white cheese-cloth was loosely arranged. Strings of holly were fastened along the edges of the tiers. Two vases of mums and two ferns in jardinieres on pedestals lent taste to the display. This window was given over almost entirely to silverware and case cutlery, each article being marked with a neat price ticket.

Window trimmed by Chas. H. Byford for the Bond Hardware Co., Guelph. Awarded second prize in Hardware and Metal's Christmas Window Contest for places over 5,000.

BINDER TWINE MENACE.

It Is Feared That Yucatan Supply May Be Interfered With.

It is feared that there may be serious interference with the shipments of Yucatan sisal hemp, from which much of the binder twine is made, required to bind the big crops of Canada and the United States. A committee of Yucatan citizens has appeared at Washington, D.C., saying that Carranza officials at the Port of Progreso were burning stores of sisal and threatening growers and shippers with heavy taxation under penalties because of refusal to accept a Carranza governor.

Recently a blockade was declared, cutting off shipments, but this was abandoned when the United States government gave notice that the cruiser DesMoines would be used if necessary to keep the port open, and it is understood that further steps will be taken to prevent interference with shipments.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, MARCH 27, 1915 No. 13

THE FARMER'S trade is the trade worth while these days.

* * *

PRICES CONTINUE upward on many lines. Early buying was good policy this year.

* * *

A GOOD AD. will go a long way to coax the reluctant dollar from the secluded sock.

* * *

IT IS AT SUCH times as this that the importance of buying becomes most clearly manifest.

* * *

WHEN THAT old remark is heard: "It doesn't pay to advertise," the fool-killer spits on his hands.

* * *

ETHELBERT EVERGREEN is feeling the pinch of circumstances. But in that respect Ethelbert need not feel lonesome.

* * *

WHEN HIS prospect has the money a good salesman can always sell a good article. Apply this truth to present conditions.

* * *

THE WORST fault to be found with some dealers is that they do not recognize the necessity of making special efforts to feature staple lines.

* * *

REPORTS FROM the Maritime Provinces with reference to business conditions are most optimistic. The West is also showing a better tone generally.

* * *

THE SALESMAN who could glibly roll off his tongue, "Good morning, I see Pryemysl has fallen," has every reason to count himself a linguist of parts.

* * *

WHEN YOU stop fighting your neighbor and combine your energies to defeat the common enemy you will make progress toward better local trade conditions.

* * *

ADVERTISE OF course, but advertise well and stick to facts. The public has been educated up to the point where only a well-designed and thoroughly businesslike ad. has any weight.

Daylight Saving

THE daylight saving idea is to be tried out again on a more practical basis in the West. It will be remembered that some years ago the plan was first suggested and was given a brief trial in a number of Ontario towns. Owing to opposition from various sources the idea was not given a very extended trial in any section; possibly in no case was the length of time sufficient to allow of safe conclusions being drawn.

The idea briefly was to open all business places an hour earlier during the summer months and to close an hour earlier. This would be accomplished simply by the expedient of setting the clocks ahead. The man who had been in the custom of getting up at six o'clock would get up at five, but his clock would tell him that it was six as usual; presumably he would go to bed an hour earlier also. There were numerous objections, of course. The question of railway time tables was a disturbing factor and it was feared that the travelling public would be considerably upset. The general opinion seemed to be that the idea might work out well if it were made general all over the country but that isolated communities could not be expected to make a success of it.

The idea is now being worked out in the West, notably in Regina. There is also an agitation in Saskatoon that the same plan be followed. These Western points can be expected to give the idea a fair trial and it will be interesting to watch the outcome of the experiment.

The Clean-up Campaign

IT is of double importance that the paint-up and clean-up idea should be pushed harder than ever this year. In the past the movement has had a distinct value from the standpoint of civic improvement. After the citizens of a city or town have carried out a week devoted to a general spring cleaning up the place is healthier and more attractive. The strongest evidence of the value of the idea is found in the fact that, where the plan has once been tried out, it immediately is made an annual custom. From the standpoint of the hardware men it has had a double significance as the movement has entailed a steady trade in paint. And that is where the idea becomes of double importance at the present time. During a period of uncertainty and partial retrenchment it is necessary to push paint sales if a good volume of business is desired. Procrastination in the painting of a house will frequently be construed into

an economy in the mind of a householder when he feels that economies are necessary. That it is not an economy but a most reckless form of extravagance, in view of the depreciation in property as a result, goes without saying; but the fact remains that, if times are not as good as they might be, the man who is going to create a big total of paint sales must keep everlastingly on the job.

That a wide extension of the paint-up and clean-up idea would help the trade this year goes without saying. For this reason alone, and quite without consideration of the more general benefits which can be urged, it would be advisable to encourage the paint-up and clean-up movement in every possible way.

Measuring Up To Capacity

IT'S a good thing to be discontented when it spurs a man on to greater endeavor. Keeping up to last year in sales is standing still, so the merchant should not be content unless his business increases. You cannot measure the value of inspiration that comes from constantly increasing sales. And the way to bring that about is application. Dig in and do it—then keep at it.

Perhaps you as a merchant do not know as much as you should about your own business. Do you? Take an inventory of yourself and your qualifications, as well as of your merchandise, and follow out the idea by extending the investigation to your staff. Perhaps some fault of your own is preventing a healthy flow of inspiration and interest in the business of your assistants. Personal stock-taking may show you that. Perhaps you have a drone or two in your employ—it will pay you to find that out. Get the best out of yourself and see that all about you measure up to capacity.

Conditions Brisk in the East

HARDWARE AND METAL has had considerable to say recently with reference to the prosperity felt in the farming communities. A fact which has not been touched upon perhaps as much as the situation warrants is the undoubted prosperity which is found in the Eastern Provinces of Canada. Close observers long ago came to the conclusion that business in the Maritime Provinces was on such a staple basis that spells of depression, which affected other parts of the country, had comparatively small effect there. While business in the Maritime Provinces has been less prone to spells of unusual prosperity, or, as it is generally termed "boom" times, they have escaped the undesirable consequences of the equally frequent lapses into periods of business stagnation which are a natural concomitant of the first condition.

At the present time business is perhaps better in the Maritime Provinces than in any other part of Canada. Representatives of the MacLean Publishing Co., who are covering that section of the country, send extremely optimistic reports of the conditions as they find them there. In one respect the situation is similar to that which exists in the other provinces; the prosperity is more marked in the rural districts. At that, conditions are reasonably brisk in the larger cities and town where manufacturing is the basis of employment.

Striking evidence of the conditions which actually prevail in the East is found in a news item published on another page in this issue. A hardware firm in Prince Edward Island held their annual meeting the other day and were able to introduce an annual report showing that business during the past twelve months had shown a good increase over the volume of the preceding year. Furthermore the statement prognosticated a continuation of this decidedly satisfactory situation. It was pointed out that conditions were basically sound and that, with the increased production expected in the rural districts, the situation would actually improve as time went on.

It is perhaps not unduly optimistic to express the belief that this condition will be reflected in a more or less degree in all provinces of the country. If crops are good this year there would be a marked improvement manifested in the late summer.

Dead Beatism

WHILE selling goods is the most important work of the retail dealer, there are other departments which must not be neglected if the business is to be successful. The collection of accounts is a work that must be diligently pursued at all times for if the money isn't coming in, it availeth little to urge the customer to purchase extra goods. The professional dead-beat we shall ever have with us. He employs "ways that are dark and tricks that are vain" to defeat the man from whom he buys his goods.

The story is told of a new arrival in a certain town going to the establishment of a clothier for a suit of clothes. The retailer looked him over and came to the conclusion that here was a pretty good acquisition to his list of customers. When the suit was ready, however, the newcomer gave a very plausible excuse that he was short of funds for the time being but that he would have the money at the end of the month. The clothier sized him up to be a man of his word and so without hesitation handed over the clothing.

The end of the month came and the dealer sent in his account. No response. Regularly the dunning letter went out for two or three months and there was still no reply. Then the dealer bethought himself of a brilliant idea. He would quote scripture and appeal to his higher nature. So with the next account he attached this postcript:

"You were naked and I clothed you."

Back came the reply by next mail, the first the clothier could get from the delinquent:

"You were a stranger and I took you in."

Whether we can set this down as gospel truth or not makes no difference to the point we desire to make. The dead-beat it out to make a living by questionable methods. His purposes should be defeated, and it is only by constant vigilance that the retailer can get the better of him. Chances are too freely taken by many and it is for this reason that the dead-beat has flourished so long. New credit applicants must be carefully scrutinized—and besides it is up to every dealer to get his money in regularly if he is going to do his share in keeping the wheels of business running properly.

Methods of a Quebec Merchant

Follows the Advertisement in the Trade Papers—Records of Clerks' Sales—Following-up Prospects—Mailing List for Prospective Paint Purchasers—Catering to the Farmers.

THE hardware store of Uldric Boucher, St. Hyacinthe, Que., visited recently by a Hardware and Metal representative, is clean and orderly and the lay-out of the store fixtures and stock is quite in keeping with the requirements of a modern hardware store.

There are silent salesmen in plenty, neatly trimmed. Stock boxes are sampled with excellent taste. Lacking the very latest tool wall-display cases, Mr. Boucher has arranged his stock of handsaws and other tools on the wall in a manner proving beyond question his faith in displays.

Silent Salesmen Indeed.

In the centre of the store, running towards the rear for nearly twenty feet, is a fairly low display table, carrying small household articles which women like to pick up because of their utility and cheapness. This table is fifteen or twenty feet from the doorway, located sufficiently distant so as not to be in the way of customers being served at the counter, but still near enough to attract attention.

Nearer the entrance, but kept well to right and left, are several tables for displaying enamel and aluminum ware, arranged with the same good taste, on several tiers. As is well known, these are good silent salesmen, and Mr. Boucher could not speak too highly of them as business-getters.

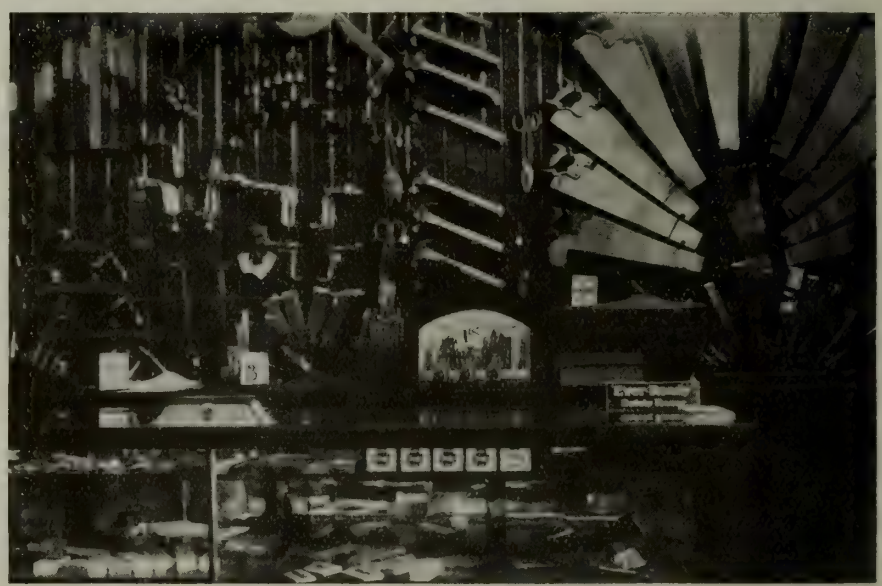
At the rear, he has built an office for himself and bookkeeper, which is airy and receives plenty of light from a rear window. The writer found a pile of trade papers and catalogs on his desk, the presence of which Mr. Boucher explained by the fact that he had been away several days. He intended going through every one of them carefully. Any article in the trade papers which he considers likely to be helpful, he marks. They are then passed on to the clerks for perusal, one of whom clips the special articles, and files them for reference. Catalogs are examined carefully and only those considered useful are filed.

Reader of Trade Papers.

It was observed by the writer that the advertising pages of a hardware trade paper lying on the table were clipped. "You will excuse me for saying it," said Mr. Boucher, "but I often find the advertising pages more interesting than the editorial. That is perhaps the chief reason why I buy the trade papers. Those clipped are the ones to which I have replied."

The conversation turned to the wonderful prosperity which St. Hyacinthe and other country towns in Quebec Province are enjoying. Reference was made to the fact that the farmers, while possessed of plenty of money, were exceedingly careful in their purchases.

"They are a careful class of people," said Mr. Boucher, "and are not likely to buy freely unless they are quite sure that you are perfectly honest. Our motto has been to sell the best goods, the right goods, and to explain exactly what they are for. When a farmer says, "I want such and such a thing," if we do not have an article that will suit his purpose, we will not sell him. Another dealer may, and if the article does not fill the bill, the farmer gives us credit for straightforwardness."



"Have you any methods for stirring up business?" the writer asked.

Follow-up System.

"Yes, we have a clerk who goes out in search of orders. When a man comes into the store for a stove or washing machine, or anything else, and does not buy, we take his name and follow him up and try and land his order. While the clerk is out, he secures orders for other lines, and often takes samples of special lines with him.

Selling Paint.

"We canvass paint prospects by letter. During the winter, if we hear a man say he expects to do painting in the spring, his name goes on oud follow-up file. Later it is sent to the paint manufacturer, who forwards his literature. Also, we write him personally. For a long time the farmers in this district have been users of white lead. We are changing that. To-day we sell more liquid paint than lead, except to the contractors."

View of tool department of the Boucher Hardware.

Clerks Who Are Salesmen

Mr. Boucher having referred to the fact that his business had shown a substantial increase every year, and that he had set a still higher mark to be reached this year, was asked what his clerks were doing to help attain this object. He replied:

"My clerks receive a record of their sales for each week, and at the end of every month they receive a statement showing the amount of business done that month, the month previous and during the corresponding month of the previous year. They understand that an increase right along is expected.

"One clerk in particular is going after business. He sells all that is asked for and always has something else to offer. He visits prospects after business hours

View of Boucher Hardware Store showing display stands for showing enamelware, etc.

if he thinks he can make a sale. We close early three nights per week. On these nights he solicits orders for electric lamps. It pays him, for he knows that his salary will go up in proportion to the increased business."

Mr. Boucher learned the hardware business in the store of S. Bourgeois et Cie., St. Hyacinthe. Later he was appointed hardware manager of a Montreal department store. Six years ago, in conjunction with his father and brother, he took hold of the present business, which is located in the same block as the store of his former employer.

GET A NEW VIEWPOINT ON YOUR WORK.

ONE of the best-known and most successful merchants in England, and in fact, in the world, is Henry G. Selfridge. Year by year his establishment in London shows advancement though when first established it labored under many difficulties. A few years ago he was a clerk in the store of Marshall Field & Co.

Here is an instance similar to many which might be related where a salesman in a comparatively short time rises to the head of an immense establishment.

Back of these cases of rather spectacular success there must be some reasons for such advancement. It cannot be attributed to luck or favoritism or any outside causes beyond the real worth of the man himself.

Too often the young salesman is apt to say to himself, "There isn't any chance for me here. So and so gets all the favors around here. A fellow never gets credit for doing anything better than it's been done before." In some instances such things may be true or again they may exist only in imagination. If favoritism is shown, it's up to the man to move on to some other place where real merit does count.

Get a Changed Viewpoint.

If such things are imaginary it is necessary to right-about-face and get a new viewpoint on things in general.

Every man has ambition of some kind as regards his future. Perhaps it is to become a topnotch salesman, perhaps a traveller on the road where retail experience is worth considerable, or, as in many cases, to own a business of his own.

Success Brings Success.

To any of these the best advice that could be given is to get with the successful man. By a first-hand study of the methods and principles of others an excellent groundwork is laid to guide in future years. One can see many a smart-appearing young fellow behind the counter in a store where the proprietor knows very little and cares less about merchandising. Sometimes such a beginner will rise in spite of his environment. But why labor under such a heavy handicap? Why not begin under the man who is progressive and who, in the language of the day, "knows his business."

First-hand Experience is the Best

It is all very well to teach salesmanship by mail, but theoretical knowledge alone does not go very far. In its place it is valuable but it should be subordinated to real practical demonstrations of how a thing should be done.

But salesmanship is not the only good quality that is necessary in the successful conduct of a business. The young man who is looking forward to a place of his own must know how to buy as well as how to sell, to take proper care of stock to handle men, to figure costs and profits (something which one man in fifty knows how to do properly), and all the other principles which can best be learnt by watching and working under the men who put these principles into daily practice. The writer remembers one man who to most of his staff seemed an unbearable crank about the proper handling and care of the stock. It was daily impressed upon the boys in the store that the stock was not an assembly of so much material of given sizes, weights and measures, but the means by which the busines was kept going, that paid their salaries and that deserved as much care and protection as the money it represented. It was hard

Conducting a Home Campaign

Many Battles to be Fought in Canada—Paint Will Play a Prominent Part in the Campaigns—Prospects for Spring Business Good in the Paint Line

WRITTEN FOR HARDWARE AND METAL BY A. T. BLACK.

ASK any hardware dealer what he considers to be the most interesting line of goods he has on his shelves and the one which affords him the greatest satisfaction in selling and invariably you will receive the answer: paints and varnishes. It is not difficult to reason why. In fact, there are scores of reasons why it should be so. Pleasure and Profit are two good reasons why he favors his paint business. Every dealer who is handling a good reputable high-grade line of paints and varnishes which are well advertised knows that it is the line which more than any other individual class of goods he has attracts the most people to his store. Therefore, many dealers consider their paint agency the most valuable asset of their business. The buying public are not slow to appreciate the attractiveness of a store where a good line of paint is kept, and it may just as truly be said that as men are judged by the company they keep, so stores are known by the paint they keep.

Paints and varnishes are profitable to the dealer for many reasons. There is absolutely no loss by waste or deterioration. Sales are readily made, and are clean cut. It's an easy stock to keep. Looks well on the shelves when kept properly and lends itself readily to making displays which promote its sale.

There is pleasure in selling good paints and varnishes from the fact that you know you are selling service and satisfaction, and with the knowledge that you are providing the user with a convenient means of making homes attractive or providing life insurance for some building which needs protection against the attacks of sun and rain and all the disintegrating elements.

It's good to know that each can is going to make brighter and cleaner and more sanitary some area in need of such influence. Good paint ready for the brush has been the means of converting into profitable channels a business which for ages has been an unprofitable undertaking.

The selling of lead and oil ever since Noah painted the ark, has been looked upon as almost a necessary evil. The growing popularity and influence of paint ready for the brush is lessening that evil more every day. There are some who still persist in arguing that the old way, grandfather's way, Methuselah's way, the old lead and oil by hand mixing process way is still the best way. In doing so they lay the charge that paint making and painting is the one and only business which has shown no progress or improvement since Noah stopped up the cracks (with lead and oil). Paints and varnishes are the most extensively advertised lines carried by the hardware trade. Their sale is promoted by the best studied out methods which comprise all kinds of trade pulling plans.

The great clean-up campaigns which have become national in their scope and

A. T. BLACK,

Manager Sales Promotion Department, The Martin-Senour Co., Ltd., Montreal.

which have done so much to make our cities and towns more healthful and beautiful have nearly all had their inception from the clean up and paint up advertising of the paint firms.

The best kind of a made-in-Canada campaign is just the campaign of making good goods at fair prices and being sure of letting Canadian buyers know of them by good advertising. That is the campaign that has in the past and will continue to keep the paint trade centred on made in Canada paint. This was forcibly brought to notice recently when at a meeting of publicity men in Montreal, speakers were allotted different lines of merchandise in which they were expected to gather data and try to show the necessity of boosting the Canadian made goods of this line. Paint was one of the lines which was slated for a place on the program but on investigation it was found that paint made in Canada so completely controled the field, it required no boosting. Of course every dealer who is successfully selling paint ready for the brush is co-operating and working hand in hand with the manufacturer in their sales promotion methods.

Paints are given a place of prominence in the store arrangements and are kept there permanently because the idea has long since vanished that paint is but a short season seller. It's an all-year-round seller, therefore it should be kept up in the front row.

Use the display matter provided in such conspicuous places as to draw attention, make window displays with the handsome trims provided for the purpose.

Hook up your store with the big national advertising campaigns being carried on. Provide mailing lists free from the names of those that have long since passed away and some who are still unborn.

Watch the building and alteration movements in your locality, and pass this information on to the firm whose goods you handle. Give a practical demonstration that you believe in the clean up and paint up movement and give your own business premises the benefit of your conviction. If you have a painter do the job, make him use the goods you sell ready for the brush. Make yourself and your salesmen thoroughly conversant with the full supply of literature bearing on paints and varnishes which contain a world of information as to how surfaces should be treated, and how different products should be applied. You will then be in a position to give the seeking customer proper advice and instruction and being able to render your customer this service will surely tend to strengthen their confidence in you and your store. The retailer who uses advertising supplied him by the manufacturer has a host of little salesmen working for him day and night. These little salesmen—good looking, quiet, efficient, know no hours and demand no pay.

Every show card, every window trim, every booklet should be as conscientiously put to work as a new hand hired at ten dollars per week. Give them a chance and they'll bring you business. Allow them to be neglected and they'll deteriorate into waste paper, useless and valueless.

Be the originator of a clean-up and paint-up movement in your city, town or village. They say that the manufacturers of weapons of war have used organized efforts to promote strife among nations. Then why should not the seller of paint declare war on dirt and filth and unsanitary conditions when he has the necessary weapons on his shelves in the shape of paints and varnishes to wage the fight.

We can't all go to fight the Empire's enemies, but we can all do our share in carrying on the campaign to make our home conditions brighter and better and more healthful.

This year more than any in the past we need to talk optimism. Talk business not war. War or no war, people must eat and wear clothes and incidentally paint their houses inside and out. Evidence there is aplenty that this is going to be a bumper paint year. It only remains for the aggressive dealer to go after this good, profitable, waiting business and it can be had.

The writer could not end this little talk more appropriately than by presenting the following entitled Optimism by the Martin-Senour Poet:

The sun will keep on shining,
The moon will come and go,
The wheat will keep on growing,
When Springtime melts the snow.

Folks will keep on eating,
And buying things to wear,
And French will keep on beating
The Germans everywhere.

Folks are now believing
The war is soon to end,
They know they're not deceiving,
And things are on the mend.

And folks will go on painting
To keep homes Spick and Span,
The "Clean Up—Paint Up" movement
Extends throughout the land.

Won Gilbert Trophy.

The Gilbert silver trophy, donated by the DuPont Powder Company, was won by E. J. Johnson at the match of the Dominion Cartridge Co. gun club at Brownsburg, Que., on Saturday, March 20th. Mr. Johnson made a total of 79 from scratch, the match being for 100 birds.

The mops, dusters and brooms are mobilizing for the spring housecleaning. For father, the melancholy days are here.

Pointers About Batteries

How Sun, Frost and Heat Affect Dry Batteries — Three Don'ts for Hardwaremen Who Stock Dry Batteries—How to Buy Them.

NOW commences the big season for batteries—a line which has developed practically in the past five years, and which, year by year, is becoming more important to the hardware dealer. It is a line which may give some trouble if not handled properly—yet a line about which only a few simple rules need be remembered. Perhaps for the benefit of those starting in the hardware business—and the number is quite large, despite the unusual conditions of the day—and for the benefit of the young clerks, to whom these goods will be new, something may well be said regarding the ordering and storing of dry cells.

Life of Cell Not Indefinite.

In the first place, the life of the dry cell is not indefinite. All makes are guaranteed, but only for some three months. Realizing that their future business depends upon giving satisfaction, the manufacturers are careful to see that the cells shipped to each dealer are fresh, but the dealer should make his plans for a rapid turnover of these lines. This means that he will sell the goods to his customers while they are still at the highest state of efficiency. After three months the battery will begin to lose power.

With the heavy work which is going to be done on the farms this year there seems little doubt that more batteries than usual will be required. Dealers, however, would do well to order well within their selling power, and to keep ordering as they see their stock diminishing.

Sun Kills a Dry Cell.

In a Winnipeg store recently an attractive display of dry cells was shown in one of the windows. It is a window with a western exposture, and all afternoon long the sun beats in through the plate glass. After a few days of this, the battery will be greatly reduced in power, for extremes of temperature have a big effect upon these lines. To make displays, dealers would do well to use only the cases, keeping the batteries in some moderate temperature. A basement is usually the best place to keep a reserved supply.

Very heavy frost is not likely from now on, yet in the West especially one more freeze up may be expected. Those ordering batteries, therefore, at this time will need to use precautions to make sure that these do not freeze. Only this week a Winnipeg handler of this line got a complaint that a shipment of batteries were absolutely dead. He had hardly answered this complaint when another letter came saying that the batteries had come back to life. He discovered that the batteries had been exposed, had become frozen, and that while frozen they gave off no current. Later they were placed in a warm spot and gradually thawed out. Then they again fulfilled their function. It is to be remembered, however, that a battery once frozen is never the same again. It will probably do good work, but its strength has been decreased and its life will not be as long.

The Three Great Don'ts.

These, then, are the three don'ts for buying and handling batteries.

Don't buy more than you can sell in one month or six weeks.

Don't let these batteries stand in the sun or any hot spot.

Don't let the battery get frozen.

If dealers and clerks alike keep these three points in mind, all the farmers, the automobile owners and the builders who secure batteries from them will get entire satisfaction, and this profitable business will continue.

GET A NEW VIEWPOINT ON YOUR WORK.

(Continued from page 33.)

then for many to understand the drilling they received almost daily but in after years when conducting establishments of their own they didn't drop all their profits at the clearance counter or tie them up in unsaleable, ill-kept stock.

Again, as stated before, there is the man whose ambition is altogether in the selling end, who is contented in working beneath some other direction and who does his best work when some other attends to the problems of management. To this man the advice of the man of big business is particularly applicable when he said: "Know your goods, know your customers, but first of all know yourself. To know your own limitations and possibilities, that is the first step toward success."

In this day when new lines are being constantly added to the retail store which require special knowledge and when the public are demanding the man who knows at least a little more than they do about the goods they are buying, it can be easily understood how each man must know his goods. By experience he will come to know his customers but it takes more effort than either to follow the latter portion of the advice and know one's limitations and possibilities.

Junior Clerk's Page

Didn't Have the Nerve

The Story of a Man Who Didn't Have the Nerve—Opportunity Comes and Demands a Display of Self-Confidence—The Danger of Falling Into a Rut.

IN the commercial career of almost every man sooner or later there comes a time when he must "travel on his nerve," as the saying is. A man will go along year after year, living a hum-drum life, and suddenly the great opportunity presents itself. Perhaps the things looks so big, the prospects so tempting, that its magnitude frightens, and it is passed by, never to come again, simply because the probable recipient of this favor of fate "didn't have the nerve."

A man of almost fifty years of age, a salesman in one of the big stores in our largest Canadian city, related the following experience which bears out the above statements:

"As you know, I am about fifty years old. I am earning thirty dollars per week, and am likely to earn just that so long as I can keep up my present efficiency. I have been with this firm for twenty-three years, and from present indications will likely be with them for a considerable length of time yet.

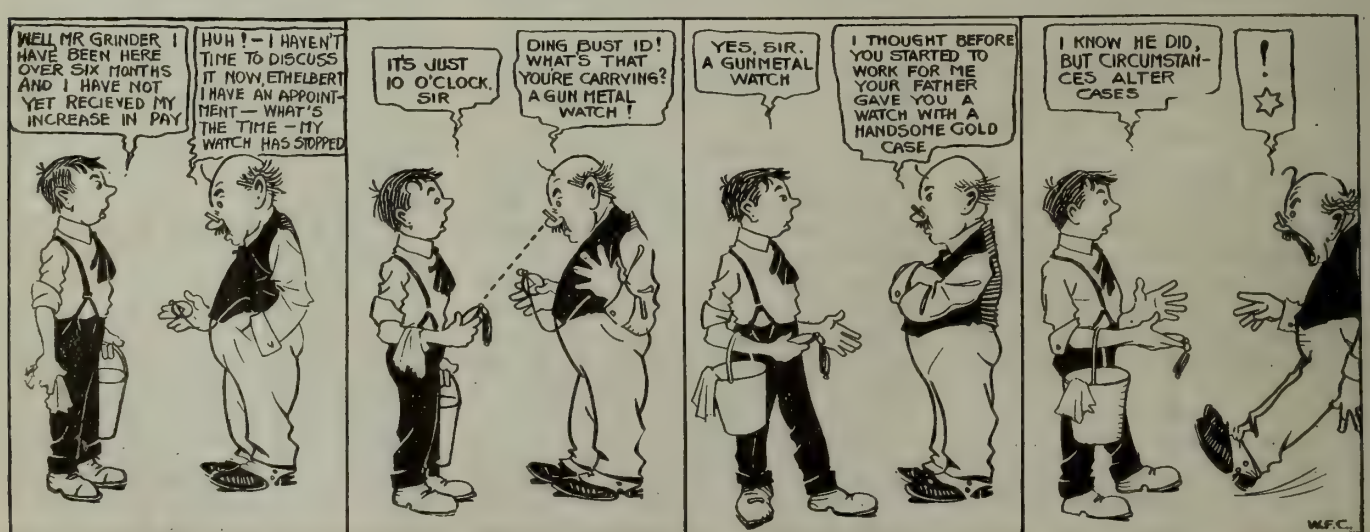
When Opportunity Knocked.

"Years ago, if my confidence in myself had been equal to my ability, I could have reasonably expected to be receiving three times my present salary, besides having a rich and varied experience behind me. Opportunity knocked particularly hard one time; in fact, had one foot on the threshold, but I couldn't summon enough courage to step out and meet him half-way.

"When I was thirty-two years old a firm in this same city offered me a position as head salesman of their staff, which even at that time was large. I had received a good training in my particular line, and can say truthfully that I was as good a salesman as could be found in the city. The position which was offered me entailed more or less executive work, and necessitated the handling of the other salesmen to some extent. Financially it was little better at the time than the position I already held, but the opportunities were almost unlimited. I thought the matter over for days. I had my wife and one child, and this naturally caused me to consider well before I acted. Had I been alone in the world I would have had no hesitation, and even to-day there is some crumb of comfort in the thought that I was acting with consideration of others as well as myself.

A Certainty for Uncertainty.

"But as I say, I weighed the matter pro and con, unable to arrive at a decision. The position I held was practically a sure thing, while that which I was contemplating was a gamble to some extent. If I could make it go all right, but if not, I would have to step down and out.



"Finally I went to my employers and laid the case before them, feeling that I might find a solution to my problem there.

"Courteously, but none the less plainly, they told me in effect that I would have to please myself. I knew what I had to deal with, and was best fitted to know what my capabilities were.

"I had half hoped that they would make some offer or intimate some future advancement, but in reality they had practically told me that my presence or absence would not cause any great worry, though they also told me that I was giving every satisfaction. I think it was this that finally decided me. It put a sort of fear into me that made me feel I ought to be thankful that I had anything to do. What I had was a certainty and I decided to turn down the offer that had been made me.

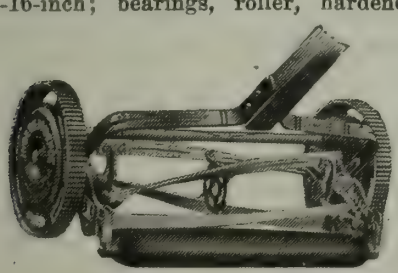
No. 8—Ethelbert Evergreen, the Junior Clerk. By Tom Bunt.

New Hardware Goods

Offered Canadian Hardwaremen

NEW PHILADELPHIA MOWERS.



The Philadelphia Lawn Mower Co., Philadelphia, Pa., have placed on the market two new lines of lawn mowers—the Independence, 9-inch wheel, 4 blades, and Overbrook, 8-inch wheel, 4 blades.

Overbrook Lawn Mower.

both roller bearing. The makers claim that roller bearings are superior, because there is a line contact the entire length of the bearing, whereas the ball bearings are a pin point contact, which in time, it is claimed, wears a ridge or gutter in the cone, and the cylinder and dead knives are thrown out of alignment.

The roller bearings are said to wear straight and evenly along their entire surface, and the wear can be easily taken up and the journals kept perfectly true. The specifications of the Independence mower, which is made in 14-16-18-inch, are: Drive wheels, 9 inches; diameter of cylinder, 5¾ inches; number of blades 4; single pinion-geared both sides; journal bearings, 13-16-inch; bearings, roller, hardened, tempered and ground; knives, stationary and spiral, vanadium steel. The specifications of the Overbrook mower are: Drive wheels, 8-inch; diameter of cylinder, 5⅛ inches; number of blades, 4; journal bearings, 13-16-inch; bearings, roller, hardened,

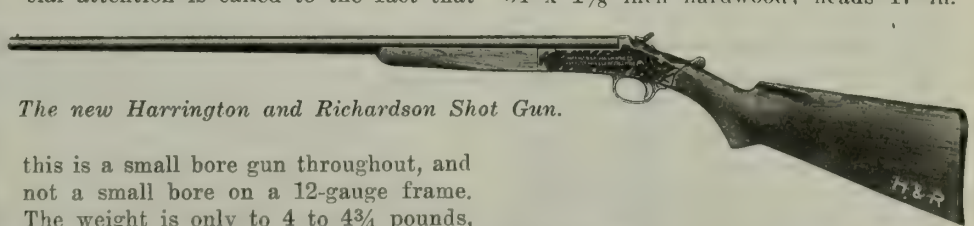
Independence Lawn Mower.

tempered and ground; knives, stationary and spiral; vanadium steel. The machine is made in three sizes, 12-14-16-inch.

VALVE GRINDING COMPOUND.

The Caborundum Company, Niagara Falls, New York, has recently placed upon the market a new combination can of valve grinding compound. The can is 1¾ inches high, having a base 2¼ inches in diameter. It is divided horizontally into two compartments. The upper compartment contains fine compound; the lower, coarse compound. The can may be opened from either top or bottom by means of a countersunk, air-tight friction cover.

Carborundum valve grinding compound is claimed to be a material for valve grinding. It cuts fast and clean, leaving a smooth, uniform surface. The coarse compound is used for roughing in

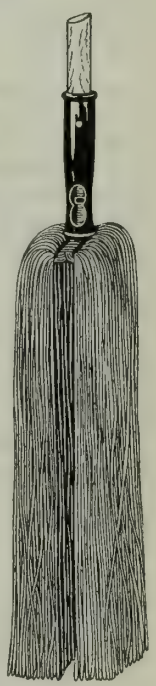


Valve Grinding Compound.

the valve; the fine compound gives the valve seat a perfectly true, polished surface. The can retails for 25 cents.

NEW SMALL BORE SHOTGUN.

A new model shotgun is announced by the Harrington & Richardson Arms Company, Worcester, Mass., adapted among other gauges and calibres to the new .410 shell and the .44 calibre cartridge. Especial attention is called to the fact that



The new Harrington and Richardson Shot Gun.

this is a small bore gun throughout, and not a small bore on a 12-gauge frame. The weight is only to 4 to 4¾ pounds, according to gauge and length of barrel. This new gun, known as Model 1915, is a three-piece gun, that is fitted with a snap fore-end, and the stock of black walnut, with pistol grip, is on new and distinctive lines. This model is made in both automatic and plain extractor styles, and is adapted for black and smokeless powder. The standard lengths of the barrel are: .24-gauge, 28 or 30-inch; .28-gauge, 26 or 28-inch; 45 calibre, 26-inch; .44 calibre, 26-inch; .410 calibre, 26-inch.

THE OHIO MOP.

Tarbox Brothers, Dundas street, Toronto, Ont., manufacturers of mops, dusters, etc., are offering to the trade a new product called the Ohio mop, grey string or Eureka yarn, shown in the accompanying illustration. The makers state that the Ohio style mops are much appreciated because the construction eliminates marring of the base of walls, desks or other furniture or floor. All metal fixtures are completely covered by fabric far back of the working faces. The heads and fillers are complete within themselves—having a bolt with nut that tightens by screwing the handle. This is said to be a very commendable feature because the same handle can be used many times and the necessity of shipping handles with each shipment of mop heads is thus eliminated. The handles are liberal in size and are said to be everlasting. The dimensions are handles, 54 x 1⅛ inch hardwood; heads 17 in. long, 16, 20 and 24 ozs. in weight. Full particulars can be secured by writing to the manufacturer.

The average man is a good bit like a pencil. To make his mark, he not only has to be sharp, but he has to be pushed.

Practical Course for Sheet Metal Workers

Article No. 23 of Series

By CHARLES SEIVERS

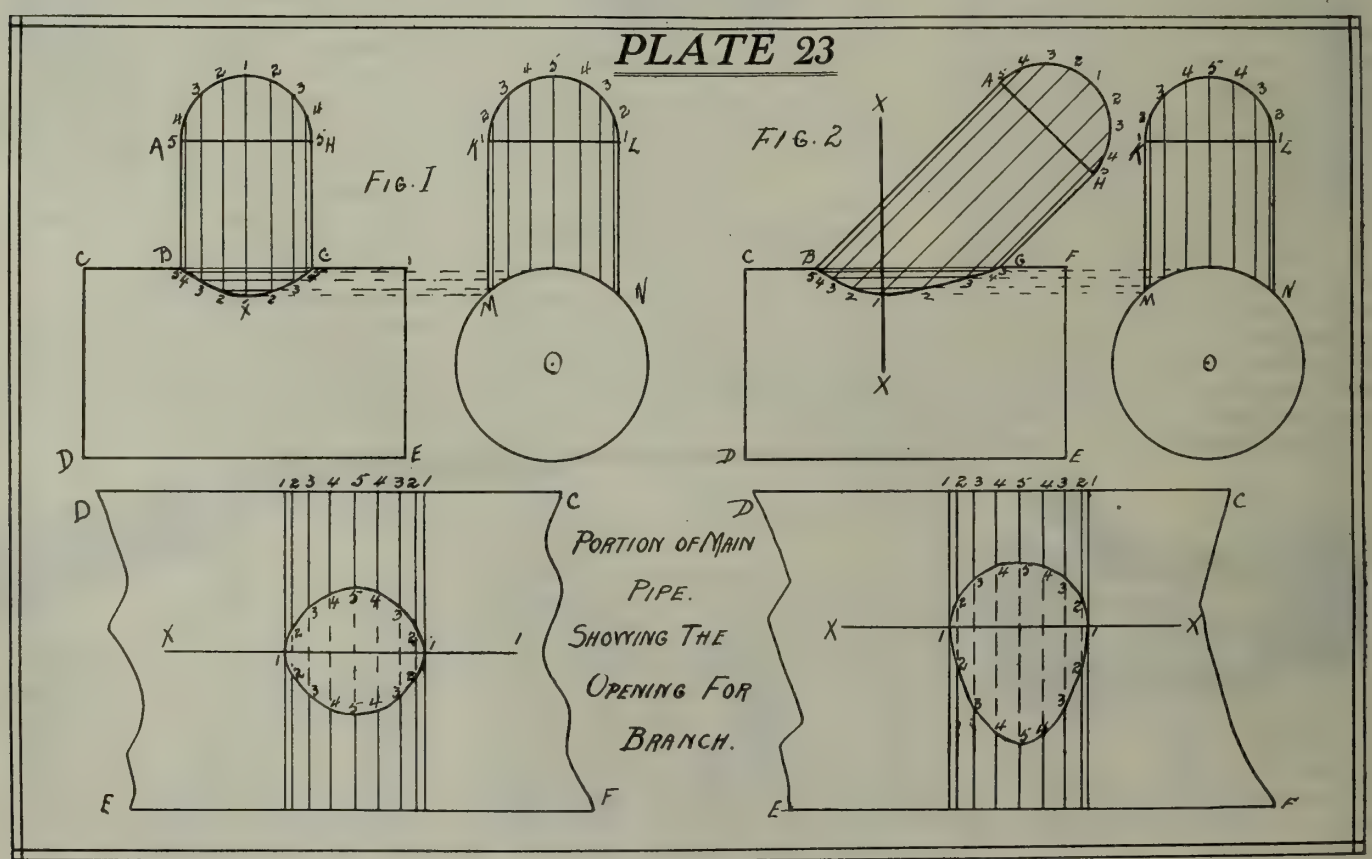
IN article and plate 20 we described how the patterns for the branches off a main pipe should be developed, and would that our readers refer to Plate 20 so as to see the relation between the two plates, viz., 20 and 23.

The plate accompanying this article shows the various diagrams necessary to develop the patterns for the holes in the main pipes. It will thus be seen that articles number 20 and 23 show the completed pipe and branch patterns.

In Fig. 1, to develop opening, lay out the portion of pipe as shown by D C E F, the distance between D E and C F being equal to distance between D E and C F on side elevation.

On the circumference of section at O, the spaces between M and N are the points where divisions of branch intersect; measure these spaces with dividers or compasses and set off on D C of main pipe, then draw lines from these points at right angles to D C, joining them to E F.

With the line I X on side elevation as a base to measure from, measure the distance from D C to I X, and set off on main portion of pipe as shown by X I; this gives a corresponding point on pattern from which to set off from. Now measure from the line I X on elevation to outer sides or points 5 on branch (in this case being a square branch, both sides are equal), and set off on both sides of line X I, on line drawn from points numbered 5. Now, measure off distances to the points 4, 3 and 2 and set off from X I in similar manner, the points I and X being on same line on elevation. The intersection on pattern is point required. A line drawn through to the points thus obtained will give outline of opening required.



While in this instance the centre line of branch has been used as a base line to work from, the point to keep in view is that while the spaces from M N on section give the points on the circumference, that the divisions from section of branch intersect, and the distance between 5-5 4-4, 3-3, 2-2 and point I at B X G of elevation is the width of the opening at each of these points.

In Fig. 2 the portion of main pipe and the spaces are laid out in same manner as described above. In setting off the distance between points, 5-5, 4-4, 3-3, 2-2 and point 1, we can work from line C D or from line F E, or any line between them drawn parallel to them, as X X.

If the line X X is used, the distance from C D to X X on elevation should be set off to correspond on the pattern, as shown by X X.

Takes New Position.

Peterboro, Ont.—J. C. Birmingham, one of the managers of the Peterborough Hardware Company, is going to leave the city about April 1, for Campbellford, where he has taken an important position with the Dickson Bridge Company, with whom he was connected before coming to Peterborough. During his stay of nearly two years in this city Mr. Birmingham has established a wide circle of friends for himself who will be sorry to see him go, but who will wish him all success.

Current News

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Business Changes.

Winnipeg, Man.—The hardware stock of estate of Linklater Bros. has been sold to C. Tadman.

Will Build Warehouse.

Welland, Ont.—The Electric Steel and Metals, Ltd., are enlarging their plant by adding a shipping and warehouse department building immediately south of the present works building. The warehouse will be one hundred feet long and thirty feet wide, and will be used exclusively for a storehouse.

To Build Factory.

Hamilton, Ont.—The Dominion Sheet Metal Company, a $300,000 concern, in which Ohio and Indiana bankers are interested, has decided to build a factory here, with a capacity of 15,000 tons a day. It will manufacture galvanized sheets of steel and iron. It will be managed by A. T. Enlow, Oshawa. It will be located in the east end.

In Temporary Quarters

Pembroke, Ont.—For the present time Messrs. Dew and Ryan are occupying a store in the Munro Block. They expect in a very few days to be doing business as usual. They were fortunate in saving part of their building and are able to supply some lines of heavy hardware to their customers. The tinsmith shop is intact.

Ontario Incorporations

McCormack Mfg. & Supply Co., capitalized at $40,000. Head office, Windsor; to carry on business as brass and iron founders, etc.

Ontario Flax Co., Ltd., capitalized at $40,000. Head office, Toronto, Ont.; to cultivate, treat and deal in flax, hemp and other fibres.

Fire Losses

Ottawa, Ont.—The Mulhall Hardware Co., have suffered damage from fire at their Bank street store. The loss is covered by insurance.

Yorkton, Sask.—F. S. Callacott, hardware dealer, has been burned out. The loss is estimated at $50,000, largely covered by insurance. The explosion of a barrel of oil started the fire.

M. A. Searle, hardware merchant of Perdue, Sask. has been unfortunate enough to be visited by fire, his stock and store being very badly damaged. The loss was covered by insurance, and Mr. Searle has already placed orders for a fresh stock and will immediately resume business.

Won City Championship.

London, Ont.—Hockey fans will have to hand it to Capt. Buchanan's McClary hockey club for winning the city hockey title from among the various city organizations, and going through the season with but one game lost chalked against them. Last night they outplayed the St. Andrew's Presbyterian Church, champions of the Church League, in a sudden-death game by 7 to 4, coming from behind and catching the Saints and secured the break of the game in the third period, when both sextets battled for nine minutes without being able to break the tie score.

Better Accommodation.

The problem of improving the hotel accommodation throughout the Province of Quebec was brought up at a meeting of the Montreal Chamber of Commerce by J. H. Paul Saucier, chairman of the Commercial Travellers' Committee. It was urged that steps be taken to have the control of the licensing of the country hotels under the control of the Provincial Government as in Ontario, and that the license be extended for some definite period. The present system of municipal annual control, it was contended, did not offer encouragement for investment in hotel property or improvements.

Dominion Incorporations.

Canada Iron Foundries, Ltd., capitalized at $4,500,000. Head office, Montreal, Que.

Beaver Mica Mining Co., capitalized at $50,000. Head office, Ottawa, Ont.

Canadian Horsehoe Co., Ltd., capitalized at $300,000. Head office, Hamilton, Ont.

The John Goodison Thresher Co., Ltd., capitalized at $1,000,000. Head office, Sarnia, Ont.

J. R. Myers & Sons, Ltd., capitalized at $50,000. Chief place of business, Stratford, Ont.; in the wholesale and retail hardware, plumbing, heating business, etc.

New Firm at Hamilton.

A new industry to be known as the Dominion Sheet Metal Co., Ltd., capitalized at $300,000, will locate at Hamilton to manufacture galvanized sheets, of which there was about 68,000 tons used in Canada last year.

The bulk of the stock in the new company is held by Ohio and Indiana parties, and the new factory will be managed by A. T. Enlow of Oshawa, Ont., who before going to Oshawa two years ago was connected with the Stark Rolling Mill Company and the Berger Mfg. Co. of Canton, Ohio.

A site of 4½ acres has been purchased in the east end of Hamilton and work will be started at once on the buildings. Employment will be given to about 100 people and the annual output at the start will, it is said, be 15,000 tons.

Western Notes.

Wm. Yendall, general manager of the Richards-Wilcox Canadian Co., Ltd., of London, Ont., was in Winnipeg this week on business. Mr. Yendall will go as far west as Edmonton before returning.

P. E. Ross, of Mussen & Ross, Wainwright, Alta., was in Winnipeg on business during the week.

Evidently W. T. Collins of Luvan, Sask., is finding things satisfactory in his locality. Mr. Collins has just been to Winnipeg making arrangements for the shipment of two Hupmobiles which he has sold for cash to some of his customers. Talking over conditions, Mr. Collins stated that last year he gave $4,000 credit, and all but $400 of this has already been completely cleaned up.

Agency in Winnipeg.

The Enterprise Foundry Co., Sackville, N.B., are now represented in Winnipeg by the O-Rib-O Manufacturing Co., 233 Stradbrooke Ave., and the latter firm is carrying a full stock of stoves, ranges, and furnaces for distribution in the Canadian North-west. J. Brockest, President of the O-Rib-O Mfg. Co. has had a very long experience in the stove and furnace business, having for many years been a member of the firm of

Clare & Brockest, from which he recently retired. Since then Mr. Brockest has associated his sons with him in business under the above firm name for the purpose of manufacturing galvanized garages, furnace pipes and fittings and many other lines of sheet metal goods.

They recently completed a fine new building at the above address.

Made-at-Home Window.

St. John, N.B., March 20.—An unusually interesting display was made this week in the hardware store of T. McAvity & Sons, in King street. Much has been said and written in favor of the "Made-in-Canada" movement, and the slogan has become universal throughout the Dominion, but this was a "Made-in-St. John" display, and it presented an appeal of much patriotic and civic interest. The display consisted entirely of articles produced in the company's big work shops and factory here and filled several windows.

In one window was shown a variety of iron body globe and gate valves; another displayed ship pumps of different kinds; in another was seen an exhibit of locomotive mountings, while still another contained an extensive display of brass finishings.

Business Changes.

Wilcox, Sask.—P. H. Tanton, hardware dealer ,has been succeeded by Tanton and Widmore.

Montreal, Que.—Dicatur Bull & Co., have started in business here in metals and shelf hardware.

Nokomis, Sask.—Mason and Durgan have taken over the hardware business of Rollins Bros.

Vancouver, B.C.—Anderson and Warnock, hardware dealers have dissolved partnership and S. H. Warnock will continue the business.

Weyburn, Sask.—D. W. Gallagher and G. Lythgoe, who have been in partnership in the plumbing business, have dissolved. The business will be continued by Mr. Lythgoe, who will vacate the premises now in occupation, having decided to erect a new building immediately alongside the present stand. Mr. Gallagher is not yet prepared to say anything regarding his plans for the future.

Business Has Been Good.

Charlottetown, P. E. I.—The annual meeting of the Rogers Hardware Company took place recently. The annual statement was presented to the shareholders and showed a very satisfactory increase of business over the preceding year. Since the reorganization which took place in November 1911, the volume of business has increased nearly 100 per cent., and notwithstanding the curtailment in business since war was declared every month showed an increase over the same month a year ago. During the past year many improvements have been made in the establishment and extra floor space had to be taken, and the selling and office staff increased.

The prospects of a large business for the ensuing year is assured, as the prices of all farm products will be maintained, and a much larger area of land will be put under cultivation. The following officers were elected:—George J. Rogers, president; Aeneas A. McDonald, K.C., vice-president; John M. Gillis, secretary-treasurer.

To Build Twine Factory.

A report from Calgary under date of March 13 states that with some 375 men in its employ, and with a payroll of some $220,000, The Western Canada Cordage Company, Limited, expects soon to make its appearance. Following the general shareholders meeting in February, at which time directors were elected, the directors got together on Friday and elected their officers as follows; President, E. H. Crandell; vice-president, H. A. Sinnot; second vice-president, J. W. Campbell; secretary-treasurer, C. H. Ley; and Messrs. R. J. Hutshings, T.M. Carlyle, August A. Olsen, Didsbur; Reginald W. Shaw, Millarville, and A. W. Knowles. The plant is expected to have a capacity of 27 tons per day of 10 hours, and will cater principally to the markets of Alberta and Saskatchewan. The greatest part of the raw material will come from the Philippines, Hawaiian Islands, New Zealand and the west coast of Mexico. As binder twine and cordage was imported from the United States last year to the extent of $4,027,309 worth, and as Calgary is ideally located for such an industry the men behind the proposition are confident of success.

AT THE FRONT WITH THE PRINCESS PATS.

(Continued from page 28.)

'Deutschland ueber alles' and on they come." Here he paused to laugh uproariously. We waited for him to proceed but he would tell no more of that charge, apparently thinking that he had told a lengthy and circumstantial tale.

All that has happend has necessarily brought to the fore many acts of pure and unadulterated heroism from totally unsuspected sources. The situation was so prolific of them as it always is amongst any body of men, that a recital of more than a few striking examples would be out of place here, even at the risk of not doing proper justice to many doers of great deeds. Under such a category comes the care of Lance-Corporal Fry, diminutive and boyish, fun-loving and irrepressible who, when the shell fire ceased on that first day, with last deep cannonade from the larger guns, volunteered to go to the support trenches for the badly needed rations and water for his comrades. He stood a moment on the rear parapet, a fair mark, and fell back into the arms of his comrades, mortally wounded. And stretcher-bearer Buller who, exhausted but uncomplaining, called on his last reserve of strength, carried to the rough dressing station, a mile in the rear and under fire in the early stagges of the journey, Capt. Newton who had received his death wound, turned over his charge to the medical officer and then—promtly collapsed in a faint.

And so the Patricia's in quiet faith, born of experience and resting upon the solid foundation of mutual self-confidence, go forward to whatever the future has in store for them, ready to do their "bit" in no spirit of bravado but of willing sacrifice.

DIDN'T HAVE THE NERVE.

(Continued from page 36.)

"Since that time the firm who made the offer have grown enormously. At that time they were conducting a wholesale business in a small way as well as their retail business. Since then the wholesale end has expanded, till it dwarfs the retail side in comparison. After my refusal they brought in a man who proved successful, and on the expansion of their wholesale business was made sales manager at that end and occupies that position to-day.

Short on Self-Reliance.

"Without trying to pat myself on the back, I knew and know now that I could have successfully handled the place. I was strong on ability, but weak on self-reliance. Since then I have had other opportunities, but they never have shaped up as the opportunity.

"Even yet when I think of it, I console myself by thinking I tried to do my best for my family and wouldn't exchange a certainty for an uncertainty. Even at that my wife was favorable to the new venture, and pointed out that she was ready to make sacrifices should events make such necessary. The plain truth of the matter was that I simply didn't have the nerve. Even then I had fallen into a rut and to a certain extent have never risen out of it. I only hope that my own experience will show some other younger man that when the real opportunity comes that is the time to summon all the nerve available and reach out to grasp it. Caution is a mighty good asset, but even that can be pushed too far, and what is needed at times is a generous supply of confidence."

Weekly Market Reports

Statements From Buying Centres

The Markets at a Glance

The improvement in business noted last week has been maintained and the outlook is brighter. Stocks are low and buyers are cautious, but a spirit of confidence in the future will help to stimulate business. The more important price changes this week are in binder twine, galvanized pipe, white lead and linseed oil. Further changes are anticipated on account of the high cost of raw materials. Mixed paints will no doubt advance, also varnishes. Linseed oil has declined, following a break in the flax seed market. The metal prices are firm, the tin market, however, is weaker and unsettled. There is no improvement in the spelter situation. Collections are reported to be improving, but still slow.

MONTREAL.

MONTREAL, March 25.—There has been less activity in the trade so far as price changing is concerned during the past week, and at the same time there has been an improvement in the movement of goods. The latter condition is due to good demand in country districts with the spring weather, and also to the fact that stocks were in that condition where inquiries from the consumer meant orders.

So far as prices are concerned the many readjustments which have been made have cleared the situation to a large extent. There are many lines of shelf goods which will still have to be altered, but these changes will come more slowly, depending upon the action of the manufacturers who may delay until stocks of raw material secured before the war are exhausted. In addition to the changes in the metals, which are a weekly feature, galvanized pipe, rope, and black wire cloth have been advanced. The readjustments in connection with builders' hardware have not yet been effected, and there is evidently some difficulty in getting all manufacturers down to a basis which will agree with the very unsettled state of the market for raw materials.

The following new prices for galvanized W.I. pipe went into effect March 19:

PIPE, STANDARD WROUGHT.

Buttweld.

Size.	Per 100 feet. Black	Galvanized
¼" and ⅜"	$ 2 16	$ 3 18
½"	2 64	3 74
¾"	2 99	4 49
1"	4 42	6 63
1¼"	5 98	8 97
1½"	7 15	10 73
2"	9 62	14 43
2½"	15 21	22 82
3"	19 89	29 84
3½"	23 92	35 88
4"	28 34	42 51

Lapweld.

2"	$ 11 10	$ 15 91
2½"	15 80	23 40
3"	20 66	30 60
3½"	24 84	36 80
4"	29 43	43 60
4½"	36 83	52 07

8"x25 lbs. per ft.	80 00	110 00
8"x28 lbs. per ft.	92 16	126 72
9"	110 40	151 80
10"x32 lbs. per ft.	102 40	140 80
10"x40 lbs. per ft.	131 84	181 28

The Metals.—The metal markets have developed new tendencies during the week, although this is hardly a matter of surprise in view of the ever-changing situation as influenced by factors without precedent which have followed one after the other since the outbreak of the war. Tin shows ease, although the British embargo has created a lot of uncertainty for the time being; lead is strong and advancing; copper is also advancing; spelter continues weak on the recent reaction; and antimony, while quoted higher in the States, is an unknown quantity on account of the uncertainty of the war demand.

Tin.—Prices on the local market show a marked easiness compared with a week ago, and, while the top is still at 60c in some quotations, 50c to 52c is nearer the basis. The old price of 52c is holding in New York for spot, but there is a weakness for futures on the prospect of larger arrivals than had been forecast; futures are completely neglected for the time being. The March squeeze has not developed, as was indicated by conditions a week or so ago, and some of those with spot may find that they have overstayed the market.

Copper.—Copper is very firm at the quotation of 17c, and higher prices are to be expected in view of the fact that the American spot has advanced from $14.85 to $15.25. This feeling of strength seems to be due to the feeling that the passing of the Dardanelles and the taking of Constantinople, together with the prospects of Italy entering the war, indicate that the "beginning of the end" may have been reached. This would mean much for the export copper trade, as it would open the German market.

Solder.—The solder market continues to get firmer and to take a more even basis; thus, while the top remains the same as quoted for the past couple of weeks, the spread is materially reduced. Half-and-half is quoted 26c to 30c, and strictly 28c to 32c.

Spelter.—The market shows little change following the sharp reaction of last week, which indicated that the bottom had fallen out of the situation. So far the prices locally have held to 12½c, but 11c would be nearer the basis in comparison with New York, and a continuance of the lower level there will no doubt bring a decline. New York reports that there is evidently a determined effort to make lower prices for two reasons—for its effect on the ore market and to restore the business of selling to Europe, which lately has been cut off by the excessively high prices which have prevailed. Zinc in casks has been advanced to $14.50, with 50c above for part casks.

Lead.—The market for lead is very firm, although there has been no change in the quotation locally or by the American Trust. New York reports that sellers are shy at even 2½c to 5c premium on the Trust quotations, and the Trust, as usual, declines to quote futures.

Antimony.—Conditions as regards the antimony market are very unstable. On the one hand, the sources of supply are such as to permit of easy manipulation on the part of some of the big dealers, and on the other hand, the consumption is uncertain on account of such a large amount being used in the manufacture of ammunition. However, while the price remains firm locally there has been a considerable advance in the States, and New York now quoted 30c as compared with 27c Montreal.

Sheets.—The new prices which were

put into effect on sheets last week were those arranged by the association, and it is understood that there are quotations somewhat under this basis for substantial orders.

Iron and Steel.—Market is dull in the hardware trade, as it has been for some time. The base for bar iron is $2, and this figure is firm.

Nails and Staples.—The market is steady on the recent advances in both nails and staples. There has been some reaction in spelter, but this has not yet carried the cost of galvanizing below the basis indicated in the recent advances.

Builders' Hardware.—The trade is still considerably at sea with regard to prices for builders' hardware. A general statement that advances would be made has been followed by an evident failure of certain manufacturers to agree upon a basis, with the result that new lists have not been issued following the suspension of the old.

Building Materials.—Although the season is now at hand when activity is normally looked for in building materials, there is little indication of movement as yet, and the dealers are looking for a very quiet season in sympathy with the general conditions prevailing.

Pipe.—While the spelter market is reacting from the top level, manufacturers are revising their prices on galvanized pipe, and the revision is upwards and now downwards. The explanation of this is that the present price of spelter is still considerably above the normal basis, and the increase in pipe comes with the exhaustion of old spelter stocks and the necessity for buying supplies at the new price.

	Per 100 feet galvanized.
¼-in. and ⅜-in.	$3 18
½-in.	3 74
¾-in.	4 49
1-in.	6 66
1¼-in.	8 97
1½-in.	10 73
2-in.	14 43
2½-in.	22 81
3-in.	29 84
3½-in.	35 88
4-in.	42 51

There is an advance on this figure for quantities under 100 feet, similar to that prevailing over the old figures.

Rope and Twine.—New prices have been announced on rope. In the following figure it will be noted that, while the tendency is generally upwards, the quotations for sisal clothes line are lower:

British Manila basis	12½c
Sisal basis	10½c
Double lath yarn	10¼c
Single lath yarn	9¾c
Sisal Clothes Line—	
3-ply, 30 ft.	40c
3-ply, 40 ft.	55c
3-ply, 48 ft.	65c
3-ply, 60 ft.	80c
3-ply, 72 ft.	95c
3-ply, 100 ft.	$1.40
6-ply, 40 ft.	0-90
6-ply, 48 ft.	1.00
6-ply, 60 ft.	1.30
6-ply, 72 ft.	1.55
6-ply, 100 ft.	2.00

Seasonable Goods.—There is beginning to be noted a strong call for lawn tools, cream freezers and other summer lines, which has no doubt been encouraged by the fine spring weather of the last few days.

Wire Cloth.—An advance has been made in the price of painter wire cloth, the quotation being advanced from $1.50 to $1.55 in 100-foot rolls, and from $1.55 to $1.60 for 50-foot rolls.

TORONTO.

TORONTO, March 25.—The improvement noted last week has been maintained and there is a more optimistic feeling in hardware circles. This is due to the advent of spring, for even in normal times trade begins to pick up at this time of the year. Fortunately this spring is no exception to the rule, except perhaps that the volume of business is not as great as in recent years. The city trade has improved to some extent, but is still rather quiet. Prospects for the country trade are more hopeful and business continues to improve in volume. The coming season promises to be a very active one for the farming community and there will be a corresponding demand for those lines required on the farm. There is a fair demand for seasonable lines which will increase as the weather becomes more favorable.

A great many price revisions have already been made because of the higher tariff, but adjustments have not been completed and conditions are still very unsettled on this account. The high ocean freight rates are also having a disturbing effect and causing anxiety among importers. Steps, however, are being taken to relieve the situation as far as is possible under the circumstances. The increase in cost of raw materials, apart from the tariff, is also affecting some lines and further advances may be made on this account. This is especially noticeable in rope and galvanized goods. In the former case, British Manila, African hemp, sisal and lath yarns have all advanced on account of the scarcity and increased cost of raw materials. With regard to galvanized products, the high cost of spelter has caused an advance in galvanized pipe.

New binder twine prices have been announced, but on account of the unsettled conditions in Mexico and shortage of supplies of material both in that country and in the Philippine Islands, a further change in prices may be made later unless the situation improves considerably.

The Metals.—Business is gradually improving, but the demand is light and consumers continue to buy only to cover immediate requirements. There have been no price changes this week, although tin is weaker, having declined in London, although the local market is unchanged. The tin market is very unsettled and prices are nominal. The spelter situation is still demoralized. The antimony market is strong and prices are nominal. Solders are firm but unchanged. Prices will be found in the panel and current market quotations. Aluminum is unchanged at 23½c per pound.

Tin.—A new development in the tin market has been the embargo placed on the export of tin from England by the British Government, except under special license. The market on this account is very unsettled and has declined in London. There has been very little buying and a shortage of tonnage is also affecting the market. Quotations are unchanged and nominal at 58c per pound.

Copper.—Exports to Europe continue very large and the situation is unchanged. Local quotations are firm at 16¾c per pound.

Spelter.—The market continues demoralized and unsettled, as the result of manipulation. There is very little spelter offering locally and prices are nominal at 15c per pound.

Lead.—The market continues strong

NEW DISCOUNTS ON SHOE FINDERS' LIST AND CAPPED GOODS.

The following schedule is supplementary to the new tack quotations which have already appeared in Hardware and Metal:

SHOE FINDERS' LIST.

	%
Shoe tacks, in dozens	45 & 2½
Shoe tacks, 1-lb. packages	60 & 2½
Swedes shoe nails	55 & 5
Soft steel shoe nails	55 & 5
Iron shoe nails	55 & 5
Zinc nails. Prices quoted on application	
Hard steel nails	30
Tempered steel shoe nails	30
Channel nails	65 & 7½
Hungarian nails	30 & 7½
Miners' tacks	20 & 5
Hob nails	30
Zinc shank nails	
Prices quoted on application	
Steel wire shoe rivets	12½ & 5
Brass wire shoe rivets	15 & 7½
Clinch point shoe rivets, steel	12½ & 5
Do., brass	15 & 7½
Steel cobblers' rivets	30 & 10
Brass cobblers rivets	15 & 7½

CAPPED GOODS.

	Net List
Lining tacks, in papers	
Lining tacks, in bulk	15
Saddle nails, in papers	10
Saddle nails, in bulk	15
Tufting buttons 22 line, in dozens only	50
Tin capped trunk nails	20
Zinc glaziers' points	
Prices quoted on application	

and exports to England heavy. Quotations are firm at 50c per pound.

Antimony.—The antimony market is strong on heavy demand with indications pointing to an advance in prices. Quotations are firm at 25c per pound.

Scrap Metals.—The market is dull but prices are holding firm and are given in the current market quotations.

Bar Iron and Steel.—Prices of Pittsburgh steel bars and shapes have advanced and are being quoted at $1.15. Conditions in the trade are much the same as last week, the demand still being comparatively light. Canadian bars are unchanged at $2.05 base.

Pig Iron.—There is nothing of importance to note in the pig iron market. Buying is still hand-to-mouth and prices are unchanged at $19 per ton for Hamilton and Victoria brands.

Lead and Iron Pipe.—The market continues quiet with light demand. Prices of lead pipe are firm at 7½c and for waste pipe 9c net. Quotations on iron pipe are unchanged and are given in the current market quotations. See below for report on galvanized iron pipe.

Wire Nails.—There is only a moderate demand for wire nails, but the price is firm at $2.35 base. Cut nails are quoted at $2.20 base.

Galvanized Sheets.—Prices are very firm on galvanized sheets and are given in the current market quotations.

Sap Buckets.—The maple syrup season is now on and with it a good demand for sap buckets and spouts.

Stoves.—Bookings for oil stoves are fairly good and shipments will commence shortly.

Kitchen Utensils.—There is a fair demand for shelf lines. Prices unchanged.

Galvanized Pipe.—The advance predicted in Hardware and Metal last week has materialized and prices on galvanized pipe are approximately 5 per cent. higher. The advance is due to the increased cost of spelter. The new list is given in panel on accompanying page.

Rope Higher.—The advance in rope anticipated in these columns has been made and the following price changes have been issued. British Manila and African hemp have both advanced 1½c, the new quotations being 12½c and 10¼c per pound, respectively. Sisal and lath yarns have all advanced 1c. Sisal is now quoted at 10½c, single lath yarn 9¾c and double lath yarn 10¼c per pound. There is little improvement in the general situation as regards raw materials, although sisal shipments are moving a little more freely from Mexico. There is still, however, a shortage of supplies of sisal and manila, while in addition ocean freight rates have advanced considerably. With conditions such as prevail at the present time the higher prices were inevitable and, unless the situation improves considerably, further advances are not improbable, especially if business continues to improve.

NEW PRICES FOR WHITE LEAD.

Prices per 100 lbs. in ton lots.

	Montreal	Toronto
Elephant Genuine	$9 25	$ 9 40
"Anchor," pure	8 95	9 10
Green Seal	8 95	9 10
Brandram's B.B. Gen'ne	9 95	10 10
C.P. Co. decorat's pure.	8 95	9 10
Crown and Anchor, pure	9 15	9 30
Moore's Pure White Lead	8 95	9 10
Painter's Perfect	8 45	8 60
Ramsay's Pure Lead	8 95	9 10
Ramsay's Exterior	8 65	8 80
Tiger Pure	8 95	9 10
"James Genuine"	....	10 50
Stephens' H.P.P. (Winnipeg)	....	8 70

Less than ton lots, 30c per cwt. higher.

Binder Twine.—In a panel on page 44 will be found the new binder twine prices which went into effect on March 20. The new prices are lower than those given in the old list which is accounted for by the fact that the new prices are based on cost of materials purchased before the recent advances. Conditions in the fibre market however, may warrant an advance in prices at a later date. The unsettled conditions in Mexico and difficulty in securing supplies of fibre, both from that country and the Philippines, and further, the increase in ocean freight rates, all add to the cost of raw materials. It is anticipated that there will be a heavy demand for binder twine this year owing to the increased acreage. This will have a tendency to stiffen prices of twine.

Plough Lines.—There has been an advance in plough lines of approximately 12 per cent. The new prices are as follows: Russia snap $36.60 and India snap $33 per gross.

LONDON.

LONDON, March 23.—Business here is good this week. Several merchants report last Saturday's business the best in months. Collections are very fair. Nearly all spring booking orders are shipped and sorting orders are larger.

British Manila and African hemp rope have advanced 1½c per lb. The quotations now stand:

Pure Manila	14½c
British Manila	12½c
African hemp	12½c

Shoe thread has again advanced 15 per cent.

Galvanized iron pipe has advanced about 5 per cent. Black pipe remains at the same price. Net prices now stand:

	Black.	Galvanized.
¼	$2.16	$3.18
⅜	2.16	3.18
½	2.64	3.74
¾	2.99	4.49
1	4.42	6.63
1¼	5.98	8.97
1½	7.15	10.73
2	9.62	14.43
2½	15.21	22.82
3	19.89	29.84
3½	23.92	35.88
4	28.34	42.51

There has been no change in the nail situation. Wire nails are still quoted $2.35 base and cut $2.70 base.

Linseed oil is standing at the same figure. Quotations are: 1 to 2 barrels, 84c raw, 87c boiled; 3 to 5 barrels, 83c raw, 86c boiled; 6 to 9 barrels, 82c raw, 85c boiled.

Turpentine quotations are stationary this week. In one-barrel lots they stand at 69c; 2 to 4-barrel lots, 68c; 5-gallon lots, 76c.

A new list has been issued showing a change in the prices on shoe rivets. Both soft steel and clinch points have changed. The new list is as follows:

	18	17	16	15 Ga. & Heav.
Clinch Pt. Steel				
3½/8 and shorter	19	17	15	15c per lb.
4/8 and longer...	17	15	14	14c "
Steel Wire				
3½/8 and shorter	16	14	12	12c "
4/8 and longer...	14	12	11	11c "
Steel Cobblers				
3½/8 and shorter	23	19	16	16c "
4/8 and longer...	21	17	15	15c "

WINNIPEG.

WINNIPEG, March 25.—Business is reported satisfactory. Orders are not as large as in some other years, but they are of better quality on the whole. There seems little risk of any big losses being sustained by any in the trade, all watching credits exceedingly closely.

Again the market is active as far as price quotations are concerned. Many more changes are noted this week—all in an upward direction—and it is very evident that further changes may be looked for before the end of the month or early in April.

Ammunition Up.

Ammunition has been put on a new basis, powder now being quoted at $7.50 per keg. Metallic ammunition also has risen materially, as is shown in the Winnipeg hardware quotations.

Shot, because of an advance in lead, has risen, soft now being quoted at $10 per 100 lb,; chilled at $10.60, buckshot at $10.80, ball $11.20.

Spelter continues very high, and while there is some talk of Government investigation in the States which may exert a restraining influence on this product, lines such as galvanized ware, in which a lot of spelter is used, have had to be advanced.

Galvanized iron pipe is now quoted as follows:

¼ inch	$3.95
⅜ inch	4.05
½ inch	4.70

¾ inch	5.55
1 inch	8.15
1¼ inch	11.00
1½ inch	13.35
2 inch	17.00

Wire to Rise Again.

Barbed wire has not yet been advanced beyond the quotations of last week, but at this very moment wholesalers who have to secure new stock are paying in Fort William an amount which, plus the freight, means that they are turning over the wire at exactly what they are giving for it. There can be only one result, namely, a further advance. The American quotations are already considerably higher, all things considered, than those in Canada. It is difficult to tell when this advance will come. It depends how large are the stocks now held.

Solder Up One Cent.

Tin has advanced 17½c in two months and still further advances are not out of the question. This advance has brought with it an upward movement in solder, which is now quoted at 32 to 33c.

Canada plate is another line put upon a higher basis during the week, being quoted as follows:

Half polish, 6 to 7 inch	$3.80
8 inch	3.95
Full polish, 6 to 7 inch	4.95
8 inch	5.20

The flax situation is causing some uneasiness. Because of the shortness of this crop, prices of oil has advanced very rapidly, being now quoted at 91c for raw and 94c for boiled. It is indicated, moreover, that these may further rise to the $1 mark.

Already those interested are trying to bring farmers to see the advisability of putting in a part of their land in flax. There is such a desire to grow wheat that the crop of flax has fallen off considerably in the last few years. If all the farmers devote their energy to wheat this year, as seems possible, there may be a great scarcity of flax in Canada next year.

Paint Up April 1st.

It has been said from time to time that paint prices are about to advance. It is now definitely learned that this upward movement will take place on the 1st of April. Just what the advances are, however, has not yet been announced by the manufacturers. It seems practically certain that all paint lines will go up, and while glass may not rise immediately, a higher level in that line also may be expected.

The advance in paint is entirely due to the increased cost of the raw materials.

NEW BINDER TWINE PRICES.

HARDWARE LETTER BOX

Cocoa Mats.

Fraser Hardware Co., Galt, Ont.—Could you give us the names of firms manufacturing cocoa mats?

Cobourg Matting & Carpet Co., Ltd., Cobourg, Ont.; Thomas Bros., St. Thomas, Ont.—Editor.

Method of Soldering Aluminumware.

A. R. Wright, Port Burwell, Ont.—"Will you kindly inform me the correct way of soldering aluminumware?"

The necessary articles for doing this are a blow-pipe and aluminum solder, and the method used is the same as employed in soldering tin, only instead of using a soldering iron a piece of steel is used, as it is much harder and smooths the solder better. The aluminum solder for doing this may be obtained from the British Aluminum Co. of Canada, Ltd., Toronto, Ont.—Editor.

Chees Factory Presses and Outfits.

The Johnson Hardware Co., Fort Francis, Ont.—"Kindly give us the names of manufacturers of Cheese Factory Outfits and Presses."

C. Richardson & Co., St. Mary's, Ont.; The Jas Smart Mfg. Co., Ltd., Brockville, Ont.; Bertrand, La Cie Limited, St. Hyacinthe, Que.; T. McQuat & Son, Lachute Mills, Que.; James & Reid, Perth, Ont.; St. Lawrence Dairy Supply Co., Montreal, Que.—Editor.

Water Coolers.

The Plaunt Hardware Co., Ottawa, Ont.—"Kindly inform us if there is a Canadian-made water cooler similar to the 20th Century."

Hungerford, Smith Co., Ltd., Toronto, Ont.; Perfection Cooler Co., Ltd., Toronto, Ont.—Editor.

SAP IS RUNNING

The annual harvest of sap has commenced throughout the Province of Quebec, and with the favorable weather which has prevailed this week, with bright sunshine and sharp frosty nights, is already well under way and the toothsome products of syrup and sugar will soon be on the market in ample quantities.

Conditions indicate that there will be a good run and the harvest is expected to be a good one, although operations will be hampered to some extent through the fact that there is comparatively little snow in some localities.

Look at every building —in this light

It has floors to varnish and walls to finish. Its owner is a logical customer. Then make sure of **satisfaction** to your customer and profit to your **customer** and **profit** to **yourself** by handling Berry Brothers' products—for 57 years the universal choice of Home Owners, Architects, Builders and Decorators everywhere.

We can supply anything your customers require—but the following products should always be carried by the trade —they are finishes for which there is a constant demand:

Liquid Granite—A floor varnish as lasting and durable as its name suggests.

Luxeberry White Enamel—Unequalled for white interior finishing. Whitest white—stays white.

Weekly Paint Markets

MONTREAL.

MONTREAL, March 25.—With a further advance in the price of white lead, with linseed oil at a high level and with a shortage of colors which means higher prices when they can be replaced at all, there is more definite talk amongst the manufacturers as to an advance in prices for mixed paints. Hardware and Metal is in a position to state that not only are higher prices logically necessary under the circumstances, but that they have been practically decided upon. A prediction was made when the tariff changes were made, that there would be higher prices about the 1st of May, and the present indications are that an advance will go into effect about that time or during the month of April. The prices which are being charged to-day are too low in comparison with the cost of materials, but they have been maintained for the spring booking because some of the business had already been placed at that time and manufacturers had their supplies assured on stocks of materials in hand.

Linseed Oil.—The oil market has reacted sharply after the advance noted last week, although it has not sunk to the level noted before the recent activity. The quotation of the crushers is 74c and 76½c, as compared with 82c and 84½c last week, a reduction of 8c. The top of the market has declined about 5c, and there is still a big range in prices. Quotations follow:

	Raw.		Boiled.	
1 to 2 bbls.	74c	82c	76½c	85c
3 to 5 bbls.	73c	81c	75½c	84c
6 to 9 bbls.	72c	80c	74½c	83c
10 bbls. & over	71c	79c	73½c	82c

5-gal. cans, 50c each; 10-gal. cans, 75c each.

Glass.—New prices on glass have not yet been announced and the trade continues to be unsettled as to the change. On the one hand there is an actual increase of costs; on the other, a slow demand and stocks secured before the tariff advance was made.

Gasoline and Benzine.—There is a somewhat better demand for gasoline, owing to improved motor traffic and oil consumption is a little lighter with the longer days and the weather still not warm enough to encourage the use of oil stoves. Prices are unchanged, gasoline being quoted at 15c in drums and 14½c tank wagon.

Turpentine.—There is little change in the turpentine situation, although prices are inclined to be a trifle easier. Quotations are not at all steady and show a considerable spread as between the different dealers; refiners' quotation is 66c.

	Per gal.
½-bbl. lots	69c-71c
1-bbl. lots	66c-68c
2 to 4-bbl. lots	65c-67c
5 to 10-bbl. lots	64c-66c

Lead and Zinc.—Further strength in the market for pig lead, with rising price, has resulted in white lead being advanced an additional 25c, the basis now being $8.95 in ton lots and $9.29 in less than ton lots. This compares with a basis of $8.40 for ton lots at the outbreak of the war, and is only one indication of the necessity for a readjustment of mixed paint prices. Even at the recent advance the market is very firm and the tendency is towards still higher levels. Zinc is very firm, and where quotations have not been withdrawn altogether there is a further advance of about 1c; however, the volume of business in this commodity is very small.

TORONTO.

TORONTO, March 25.—The approach of milder weather is having a beneficial effect in the paint trade. The city business is beginning to move and more orders are coming in from factories. The country trade continues to improve, and is assuming satisfactory proportions. A better demand for white lead and mixed paints is reported. White lead has advanced 25c per cwt. this week, and indications point to a sharp advance in other lines in the near future. Nearly all raw materials are increasing in price, in many cases irrespective of the tariff, and the advance in ocean freight rates has to be taken into consideration on some imported materials. There is a scarcity of certain dyes and chemicals, especially those formerly imported from Germany; this will affect dry colors, principally blues and reds. An advance in dry colors is, therefore, anticipated. Varnishes will no doubt advance, as gums and imported oils have increased in cost; while mixed paints can hardly remain on the present prices owing to high cost of materials. Turpentine is firm, but linseed oil has declined 4 cents owing to a break in the flax seed market. Glass is unchanged, and there is a possibility of the present prices being adhered to, at least for a time. Putty is unchanged, but may advance any time. Gasoline is moving more freely. Collections are showing some improvement, but are still slow.

Linseed Oil.—The market is unsettled, and owing to a break in the flax seed market during the week, oil has declined 4c. There is hardly any business being done, as stocks of cheaper oil are still on hand, and consumers are reluctant to buy at the present figures. The following prices are being quoted in Toronto:

	Raw.	Boiled.
Single bbls.	80	83
3 to 5 bbls.	79	82
6 to 9 bbls.	78	81

Turpentine.—The situation is practically the same as last week. Heavy shipments from Savannah to England continue, with the result that stocks of turpentine are becoming depleted. Locally the demand is light, but prices are very firm. The following prices are being noted in Toronto: Single barrels, 69c; 2 to 4 barrels, 68c; and 5-gallon lots, 76c per Imperial gallon.

White Lead.—An advance of 25c per 100 lbs. in white lead has to be noted this week. The new prices are given in panel on page 43.

Dry Colors.—Sharp advances in some lines may be expected shortly. There is a scarcity of some kinds of dyes and chemicals, especially those formerly imported from Germany. In addition, the increase in freight rates will affect those colors imported from England. The higher tariff has also to be taken into consideration.

Glass.—It has been expected that glass would advance, but present indications point to the present prices being adhered to, at least for the time being. Stocks are fairly heavy, considering the light demand, and jobbers are waiting to see what action, if any, the manufacturers may take with regard to prices.

Putty.—The market is quiet. Higher prices are expected, but nothing has been done in this regard at present.

The People Are Responding

There is a magnificent response all over the country to the "Made-in-Canada" Slogan.

Never before was there such an intelligent grasp of a National situation as to-day.

Patriotic sentiment is manifesting itself in the greater practical interest which Canadian people are taking in the manufactures of their own country. In their purchases they are giving Canadian products the preference.

The merchants of this country, too—the mediums through which Made-in-Canada products are transmitted to the consumer—are also doing their part, and a most important part it is. The recommendation of the "Man behind the Counter" is perhaps the most potent of all the factors in the Made-in-Canada movement.

And to those who are helping in this work we say—

Handle the Always-Canadian paint, B-H "English" Paint—the home paint with the stated and guaranteed formula. The only paint containing Brandram's B. B. White Lead, and of that, always and in all tints and white, the full 70%—the remaining 30% of the base being Pure White Zinc.

Do You Look Forward To 100% Increase In Varnish Sales This Year?

BASING his judgment on past experience, C. J. Chapman expects 100% increase in his sales on Pratt & Lambert Varnishes this year. Read Mr. Chapman's letter. Can you feel and talk the same way about the line of varnishes you carry? P & L Dealers expect big things and do big things, because there are big selling plans behind the P & L Varnishes on their shelves.

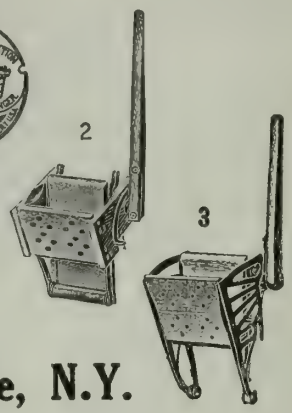
THE WHITE MOP WRINGER



always bears this trade-mark

LOOK FOR IT.

Janitors and Housekeepers praise these wringers, because they wring easily and neatly, are durable, practical and useful.

Ask your jobber for them or write to us.

White Mop Wringer Co., Fultonville, N.Y.

A quarter of a century's distribution of Foster Bros.' Brand of

BUTCHERS' CUTLERY

has accomplished world-wide prestige. The reputation of this line is due solely to those qualities of good service and durability that every user of CUTLERY seeks.

Cutlery for Hotel, Restaurant or Kitchen use in various shapes for various uses, forms part of this complete line. Every piece fully warranted. The blades are securely riveted to the handles and will not loosen. The Foster Bros.' Brand Cutlery should be in every Canadian Hardware store. It is a profitable line to handle. It is used wherever good quality is essential.

Our illustrated catalogue will convince you. Write for a copy.

JOHN CHATILLON & SONS

85 Cliff St. New York City

Scale Makers Since 1835

Tell us what you have been getting in GERMAN and AUSTRIAN WOODENWARE SPECIALTIES

— WE CAN SUPPLANT THEM—

It is our aim to keep our plant running as in usual times and afford all the work possible to our employees during winter.

We would be pleased to have suggestions from the Wholesale and Retail trade and to pay for samples you would submit of anything we could make here.

More washings will be done at home for a time now than have been for some years. This means a larger demand for **Washboards, Pails and Tubs.** "Cane" quality and finish assure easy sales and satisfaction.

All our Standard products are stocked to render quick shipment.

Hardware Merchants, order from your wholesale!

The Wm. Cane & Sons Co., Ltd.

NEWMARKET ONTARIO

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

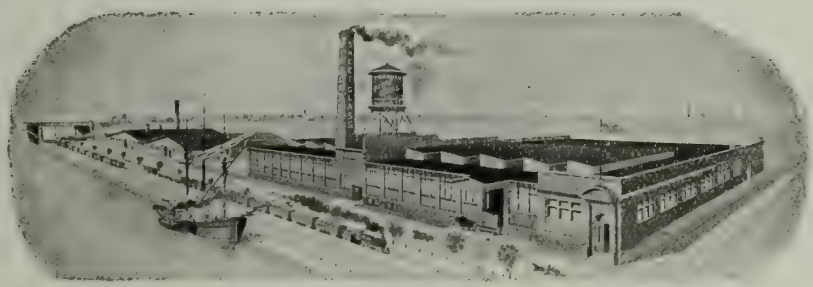
RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."



"The Right Paint to Paint Right."

Send Us Your Sorting Orders For Heavy Hardware—

Advantages of dealing with us—

Our stock is a complete range, enabling us in most cases to ship your order the same day as received. We will arrange wherever possible to include your order with carload lots, thus giving you the advantage of lower freight rate.

We follow each order through to its destination through our own tracing department, insuring delivery of goods as quickly as possible.

The advantage of being able to secure your material in exactly the size you want saves you paying freight on waste; also the time and labor otherwise required for alterations.

GIVE THIS NEW SERVICE A TRIAL.

Our New Warehouse Department is well stocked with all sizes, and we can make immediate delivery on large or small orders for

Bars	**Sheets**	**Plates**	**Rivets**
Angles	**Tees**	**Bolts**	**Nuts**
Spikes	**Turnbuckles**	**Rails**	**Tubes**

We offer you both price and service equal, or even better, than can be obtained elsewhere. Try out our service. Send us a copy of the first inquiry you send out to the trade. Get our quotations.

We will be glad to send you our Stock list Monthly, it's Free.

Our Spring Mailing circular

The Sherman Williams Co.,
Montreal, Que.

Dear Sirs:

I got ahold of one of your paint cards which you have sent out to my customers. I must congratulate you on issuing such a fine card. We have had quite a number of our customers in already, and have bought paint on account of this card which they brought with them, and showed it to me.

Hoping that this will bring us lots of business this Summer, I am

Yours truly,
S L Adolph

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Readers of Hardware and Metal Let Us Know Your Wants

Hardware and Metal is in a position to secure information on new lines in the Hardware trade, and of novelties occasionally asked for in the Hardware store.

Don't hesitate to write us. As a subscriber of Hardware and Metal you are entitled to this service.

A Straight Talk from the Advertising Manager

NOT long ago, a hardware merchant in Eastern Ontario told one of our representatives why he regarded the advertisements in Hardware and Metal as the most valuable department of the paper.

"Just to give you one instance," said he, "I noticed an advertisement a while ago, of a line that particularly interested me. I applied for the local agency, secured it, and almost immediately made $100 profit from it. And to think that Hardware and Metal's subscription price is only $2 per year!"

There are similar opportunities **in every issue** of Hardware and Metal. If you fail to investigate the advertising pages of this number, or any other number of Hardware and Metal, you are passing up great possibilities for profit.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

J. H. McCOMB LIMITED
MONTREAL

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a WANT AD. in this paper

THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Easy Seller Because--

it is exceptionally convenient, quick acting and an oil saver.

Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted as the flow of oil stops the instant the pressure on the plunger stops.

A sure good sale and splendid profit.

Order it now.

Make Your Local Advertising Pull Good Business

One of the best means at your disposal, for stirring up business, is intelligent advertising in your local newspapers. Have you felt the need of small cuts to put life and selling power into your advertisements? No doubt you have, but owing to the cost of cuts required for this, you have been prevented from going more thoroughly into the matter. Hardware and Metal has overcome this difficulty, and will supply you with cuts, at very low cost. They will cost you only fifteen cents each. We have two hundred of them in Hardware and Metal's Electro Service. Send for sample sheets, showing proofs of these valuable little cuts. Then make your selection.

STANLEY'S No. 1776-J1 Garage Door Sets

CONTAINING

Complete Hardware Equipment for Garage with Double Doors

Sets include the following:

3 pairs **No. 960-J1** 10-inch Extra Heavy Tee Hinges, with Reversed Pads.
1 No. 1055-J1 6-inch Wrought Steel Chain Bolt, with Three Staples.
1 No. 1056-J1 6-inch Wrought Steel Foot Bolt, Bolt Springs are Sherardized.
1 No. 1260-J1 No. 4 Thumb Latch with Padlock Eyes. See Cut.
1 No. 1257-J1 No. 4 Handle. Same size as Handle in No. 1260 set.
All the above in Dead Black Japanned Finish.

No. 1776-J1 Garage door set supplies the demand for a quality set at moderate cost. The extra heavy 10-inch hinges have reversed pads to permit application to jamb of the door.

The plates of the 6-inch chain and foot bolts are the same size, making a neat combination.

The wrought steel thumb latch with 8⅞-inch handle is fitted with padlock eyes so doors can be securely locked.

The wrought steel pull No. 1257 is the same size as the handle of No. 1260 set, and is applied to the other door. The advantage of two handles for drawing the doors shut is obvious.

The dead black japan finish gives the hardware a neat, dignified appearance.

Send your order to your jobber *now,* and ask us for printed matter with complete description to enclose with your letters and invoices.

THE LAIDLAW BALE-TIE CO., Limited, Hamilton, Ontario

GEO. W. LAIDLAW, Vancouver, B.C. HARRY F. MOULDEN, Winnipeg, Man.

WANTED—BY FIRST-CLASS HARDWARE-man with ten years' experience, position as salesman or manager; Eastern town preferred. Can give best of references. Temperate. Box 000, Hardware & Metal, Toronto.

Look at this Advertisement!

Somebody *in the hardware trade* is going to be interested in that little advertisement. Perhaps a great many will be. Certainly nobody *outside* the hardware trade will care a continental about it.

Yet there are some people who insert advertisements like that in daily papers. A mighty small percentage of the readers of *any* daily paper are engaged in the hardware trade and there is no daily in Canada which is read by any considerable proportion of the Canadian hardware trade.

The place for an advertisement of that kind is on the Condensed Advertisement Page of Hardware and Metal. There it will be seen by nearly everybody in the trade in every part of the Dominion. The cost is insignificant—2 cents per word for first insertion and 1 cent per word for each subsequent insertion. Numerals each count as a word, and if Box Number is used, there is an extra charge of 5 cents per insertion.

The above advertisement, for example, would cost *69 cents* for one insertion, and *37 cents* for each subsequent insertion. And it would secure the attention of nearly everybody in Canada who would be at all interested in such a proposition.

Advertisements for the Condensed Ad. Page should reach our Toronto office not later than Thursday morning for insertion in the current week's issue.

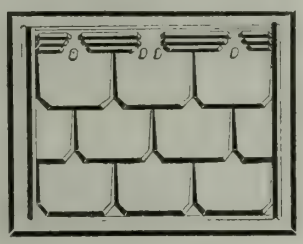
FREEZERS

Whether you stock the LIGHTNING, GEM or BLIZZARD, you get a Freezer that has made good for more than a quarter of a century—one that has won its way into the hearts of the housekeepers by service that satisfies—backed by quality that creates confidence in both merchant and manufacturer—one that's well advertised and in demand — one that brings trade and helps you keep it.

The BLIZZARD, being a low-priced Freezer, makes a good running mate with either the GEM or LIGHTNING. Now is the time to place your order. Shipment can be made any time you specify.

BE SURE to INCLUDE the LIGHTNING ICE CHIPPER No. 1. You can sell one with every Freezer. It chips a block of ice into small uniform pieces in a jiffy, just right to pack closely around the can and shorten the time of freezing. So much easier to make Ice Cream. They help the sale of Freezers.

Your Jobber will Supply You.



NORTH BROS. MFG. CO.

PHILADELPHIA, PA.

"EASTLAKE" STEEL SHINGLES

Now is the time to let their fair fame and sterling worth make money for you.

"Eastlake" Steel Shingles have a splendid reputation, over 30 years old, for durability, ease in laying, and water-tight qualities. People KNOW the "Eastlake." It has been consistently and heavily advertised for over a quarter century, and has always lived up to every claim we have ever made. You can now cash in on this reputation by looking around and seeing who needs a new roof in your neighborhood. Send us their names and we will co-operate with you with suitable advertising matter.

You will never regret pushing the "Eastlake" Steel Shingle—while it is low-priced, it has never been built down to a price, but up to a standard.

Get our illustrated list and selling helps.

Dominion Cartridge Company, Limited

120 St. James Street, Montreal

Regarding Hack-Saws—

You men in the hardware trade can never really appreciate what a nuisance the question of hack-saws is to the factory foreman or superintendent until you have heard the complaints of the workmen regarding breakage, easy dulling, teeth stripping, etc.

We faced these troubles in our own tool works until we got tired of them—and just a little bit "mad." Then we set to work and experimented with materials and processes until finally we produced a line of saws that suited us so well that we are willing to put our name on them. Because of our reputation as tool makers we know that

The Name Starrett Will Sell These Hack-Saws

Everyone knows we are old enough and big enough so that we would not put our name on a product that can't make good. As a hardware dealer you can make the initial sale of these saws on the strength of the name, and we are positive that after your customers have tried them they will come back for more.

The reason is this: We have selected a certain tungsten-alloy steel which we make into hack-saws—tempered by a secret process, developed by ourselves, which secures uniformity. The teeth are milled, not stamped out, and they are set evenly and perfectly by another exclusive Starrett process.

Now we want to sell these saws because we know they will cut quicker and last longer than other saws. It is a good line for you because of profits and repeat sales.

BY INVITATION MEMBER OF

Ask our salesmen for prices. Write for free catalog No. 20-M.A. showing the proper saws for various uses.

SHOW any experienced mechanic the instantly changeable speed shift (operated by the knurled ring shown in the illustration) and trust him to realize its great advantage.

Nor is that the only new feature of

MILLERS FALLS
HAND DRILL No. 1980

On the crank-handle, within easy reach, is a simple, effective ratchet—indispensable when working in cramped corners or on a delicate job.

The perfect grip and accurate centering of the three-jawed Star Chuck will also appeal to him. These jaws are controlled by springs that are protected from injury. Any twist drill within the capacity of the chuck can be kept in the hollow handle. Steel pinions and shifting device are enclosed for protection. Gears are machine-cut with adjustable friction roll to equalize bearings.

This tool has the distinct features that gain the certain approval of the best mechanics.

Other Millers Falls Tools That Will Hold an Exacting Trade.

You should certainly carry in stock Bit Brace 872, Extension Bit Holder 6, Hack Saw 1027, Breast Drill 112, Bench Drill Press 210 and Acme Mitre Box—new Millers Falls Tools of established quality that will impress your customers. Send for catalog showing our complete line.

THIS EMBLEM is more than a trade-mark device.

It stands for the experience, ability and business integrity of a long-established house. So that any article upon which it appears is not merely offered for sale; it is meant to give service. And that every J-M Product shall give this service fully and permanently is the whole meaning of J-M Responsibility.

Two Practical Ideals Are Embodied in JM Asbestos Ready Roofing

Every roll of J-M Asbestos Ready Roofing is manufactured and offered for sale on the basis of Service to the Roofing Buyer and Profit to the Hardware Dealer.

There are cheaper prepared roofings, but none is as good. This is quite a claim, but it can be proved by the service record of J-M Asbestos Roofs running back twenty years without a cent for painting or repairs. Back of this roofing is J-M Responsibility.

There are prepared roofings that sell for less. But do they stay sold? And are the men who bought these cheap roofings so well sold on them that they come back for more of the same when they need more roofing? Every J-M Roof makes more J-M Asbestos Ready Roofing business for you.

Let us tell you the advantages of J-M Asbestos Roofing and show you how it pays to handle it.

THE NEW SILK WOUND DE LUXE

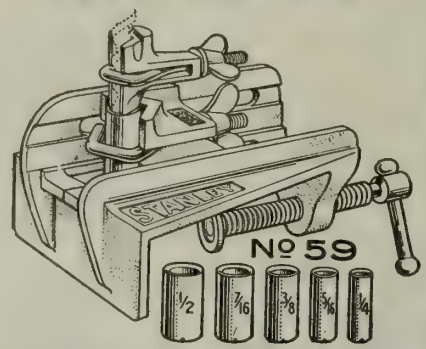
"Bristol"

TRADE MARK REG. U.S. PAT. OFF.

In Washable De Luxe Glove Leather Case, $25.00

You fishing tackle dealers who want to make $9.25 per sale and bring something new to the attention of your fishing trade, consider this:

In addition to our regular line of "BRISTOL" Steel Fishing Rods, we have brought out a new "BRISTOL" De Luxe Rod—two models, a trout fly rod and a bait casting rod—with silk winding covering the entire length. The joints are reinforced with silk winding.



The guides are also wound on with silk. Over this is a water-proof finish. On top of the water-proof finish is the very best finish similar to that used on the highest grade split bamboo rods. These silk windings and reinforcements add fully 40% to the strength of the steel rods, and in addition, in the fly rods they take away the action so that it duplicates that of the highest quality bamboo rods. This produces a rod that is practically unbreakable, that cannot warp, lose its balance or shape, that has many times the strength of bamboo and yet has all the essentials of feel, hang and action identical with the finest bamboo.

The new silk wound De Luxe "BRISTOL" has been advertised in beautiful full-page and four-page color advertisements to approximately half a million fishermen. We are receiving inquiries and orders from dealers from every part of the country.

Place your order with your jobber at once, or write to us for full particulars, color prints, dealer helps, circulars, newspaper electros, etc.

You Can Save Money

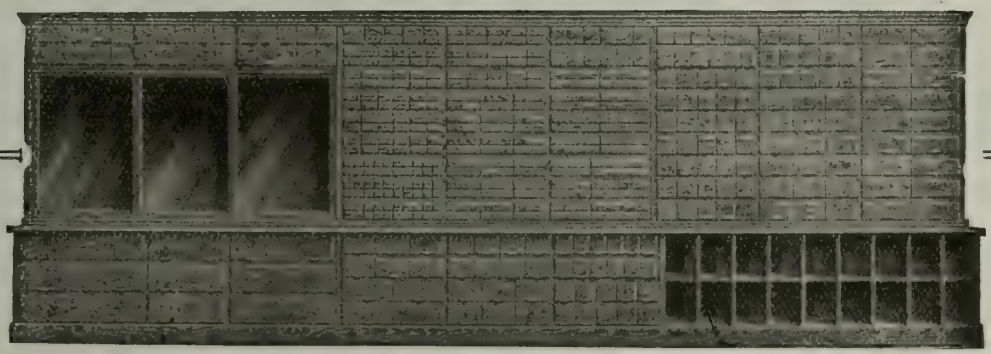
These days by making your own bread.

And you needn't be afraid of the result—even if you never made a loaf of bread before in your life—if you use a

CANUCK BREAD MIXER

We can prove, by actual figures, from actual experiments we have made, that by using the CANUCK and producing clean, sweet, wholesome, home-made bread, in preference to buying the baker's factory product, you can effect

A Saving of 100%



This conclusion is based on a 6c loaf—and the percentage of profit to CANUCK users will exceed 100% in the same proportion that the bakers have advanced their 6c price in your locality.

Even with those who can afford to waive the consideration of price (and how many are really in a position to do so to-day?) the CANUCK still asserts its superiority, in that it offers a sanitary, cleanly, sure and certain method of perfect bread-making not obtainable by any other means.

CANUCK Bread excels in nutritious, health-giving, body-building qualities—has all the attributes essential as an ideal exponent of the "staff of life."

Bring your customers up to a realization of the value of good health, good appetite and good digestion, and the saving in household expenses effected by the presence in the kitchen of the CANUCK.

No. 20 Heider Four-Horse Gang, Sulky and Disc Plow Evener

THIS Evener works four horses abreast on either gang, sulky or disc plow, with one horse in the furrow and three on the unplowed ground. Is made very strong and durable in every respect; castings of malleable iron; straps of steel; works free from side draft; all four horses pull equal; coupled very short; made very simple, nothing to get out of order, easy to attach. Owing to the way our Four-Horse Evener is constructed, the draft straps have very little slant, which causes the Evener to work very freely. The length of the eveners and singletrees on this Four-Horse Evener gives the horses plenty of room to walk and pull freely. Can be attached to any gang or sulky plow that has a cross clevis, or disc plow that has a broad, flat draft bar, and with our Clevis Attachments can easily be attached to frame hitch gang or sulky plows, or plows that have a vertical clevis. Can be used on either right or left hand plows. Weight, complete, 55 lbs.

Advertised in all leading farm journals—Let us refer enquiries to **YOU.** Ask about our mailing proposition (**in your name**) direct to the farmer.

"Heider" Eveners, Singletrees, Doubletrees, Neckyokes, are all Fast Sellers.

HARDWARE AND METAL

Vol. XXVII. APRIL 3, 1915 No. 14

Proposed Bulk Sales Act, 1915

Bill Introduced in the Ontario Legislature This Week—May Not be Passed this Session —Features of the Act Respecting the Purchase, Transfer and Sale of Goods and Chattels in Bulk.

READERS of Hardware and Metal engaged in the manufacture, wholesaling or retailing of hardware will be interested in the provisions of the porposed "Bulk Sales Act, 1915," respecting the purchase, transfer and sale of goods and chattels in bulk. The Canadian Credit Mens' Association in conjunction with the Retail Merchants' Association, had the bill introduced in the Ontario Legislature on Tuesday afternoon of this week. The bill was introduced under the name of W. D. McPherson, M. L. A., but was presented by J. R. Dargavel, Member for Leeds. As readers will see by the provisions of the Act given in this article, the Act is a measure that will make it compulsory for parties selling out their stocks in bulk, whether they be of merchandise, farm equipment or household furniture, to give their creditors ten days' notice by registered mail, and to publish a notice in their county paper, and failing to furnish a list of their creditors with the amounts of their liability to the purchaser, and covering same by statutory declaration, the sale will be void and creditors will have the right to possess the stock by due process of law.

The principle of the bill has been sought by wholesalers and manufacturers for the past five years. Some features at first opposed by the retailers have been eliminated or modified and the Bill in its present form has the approval of the Retail Merchants' Association, and opposition from the retailer has been removed. When the Bill was presented the Premier stated that he did not know that there would be time to pass the Bill at this session but the officers of the Association are hopeful that the Bill may become law this session.

Following are the provisions of the Act respecting the purchase, transfer and sale of goods and chattels in bulk:

His Majesty by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Short Title.

1. This Act may be cited as "The Bulk Sales Act, 1915.'

Interpretation.

2. In this Act,—

(a) "Creditor" shall mean and include a person to whom the owner of a stock of goods, or of any share or interest therein is indebted, whether the debt is due and owing or is not yet payable, and any surety for such owner, or the endorser of any promissory note or bill of exchange who would upon payment by him of the debt, promissory note or bill of exchange in respect of which suretyship was entered into or such endorsement was given, become a creditor of such owner.

Sale in Bulk.

(b) "Sale in Bulk" shall mean a sale or transfer of a stock or of any part thereof or of any class of goods, wares, merchandise or chattels included in the same made by the vendor out of the ordinary course of his business, trade or occupation.

Stock.

(c) "Stock" or goods shall mean and include:

(a) The goods, wares, merchandise or chattels in which any person trades, or which he produces, or which are the output of any business, trade or occupation carried on by him.

(b). Live stock, implements, vehicles and grain.

(c) The furniture, household fixtures and utensils in an hotel, lodging house, boarding house or residence.

3. Before making any sale in bulk the owner of any stock shall (a) give notice thereof to each of his creditors by registered letter addressed to the creditor at his place of business or place of residence, and mailed at least ten days before the sale in bulk shall take effect and (b) publish at least ten days before the sale in bulk, in some newspaper published in the county town of the county or district in which he resides or in a daily newspaper published in the City of Toronto, a notice of his intention to sell or transfer the stock containing a general description of the stock, with his name and the address of the place at which he carries on his trade, business or occupation.

4. Every sale in bulk of a stock shall be void as between any creditor of the owner of the stock, and the purchaser or transferee, unless the purchaser or transferee before taking possession of the stock or paying over or delivering any part of the purchase money or other consideration for the sale in bulk, has procured from the owner of the stock a statutory declaration, made by the owner, and setting out the names of the creditors of the owner, and the amounts due to them respectively, or for which the owner may be liable to them, and stating that notice has been duly given to them and published as required by Section 3, and stating the dates at which such notice was mailed and published.

5. If the purchaser or transferee has not procured the statutory declaration mentioned in Section 4, any creditor of the owner, or vendor, may proceed against such purchaser or transferee, and against the stock or any portion thereof, or the proceeds of any such sale in bulk, in the same manner and to the same extent as in the case of any sale of goods which would under the law of Ontario be void or voidable as against creditors of the vendor at the instance of a creditor or of an assignee for the general benefit of creditors.

6. Nothing in this Act shall apply to

(Continued on page 49.)

The Housecleaning Campaign

Suggestions for Housecleaning Advertisements—Making the Newspaper Pull Business —Are Advertisements Read—Care in Preparing Advertisements.

THE brushes, brooms, and dusters are mobilizing, and housewives throughout the country have started the annual war on dust and dirt. As in former years huge amounts of ammunition will be needed to oust the dust that has accumulated during the winter months, and to polish or brighten up furniture, floors, woodwork, etc. The question that naturally arises is, where will the housewives get the cleaning supplies they need for housecleaning? The question can only be answered by the retail merchants—the merchants who go after the housecleaning trade in the most aggressive manner will probably get the business.

One of the best business-getting mediums for the merchant in the small city or town is the local newspaper. Most hardwaremen advertise in the newspapers prior to Christmas, and receive in return a large share of Christmas trade. That is a splendid idea, but what is to prevent the merchant from conducting a campaign prior to the housecleaning season and secure in return a good share of trade in housecleaning supplies.

The housewife is very susceptible to suggestion when it comes to talking about the home. It is usually one of her hobbies to keep it in a clean, sanitary condition and when advice is tendered, and particularly through the newspaper, she is only too eager to consider it carefully.

On this page and the following pages are presented suggestions for advertisements on housecleaning lines. This is a year when every retailer must look to increasing his turnover by selling as many lines of goods as possible. Probably in the advertisements suggested here are lines that have not in normal times been pushed very hard. A little selling effort is bound to bring results, and if new goods are sold this year, they are going to take the place of, in some instances, decreases in sales of staples. This is not a year for giving up. The times necessitate greater energy than ever being putting into selling work.

Too many retailers in writing their advertisements simply present lists of goods they have for sale, overlooking the more important matter of describing them or telling some interesting features about them. In the advertisements presented on the pages, the feature is the uses told of the lines advertised. It is by this method readers get interested.

The advertisements presented here are simply suggestions. They can be changed around to suit the requirements of each individual merchant and cut down or enlarged in size as desired. One advertisement is shown without illustrations of any kind. In this advertisement 14 lines of cleaning goods are featured. Nearly all of these are carried by hardwaremen and no doubt many of the lines are not pushed as they should be, but are shown or sold only when asked for by customers. Illustrations could be used in this advertisement if desired. The other advertising suggestion shows how small electros can be used to feature housecleaning supplies. These electros and many others shown in our electro assortment can be secured from Hardware and Metal at a cost of fifteen cents each. The use of electros gives the advertisement a distinctly hardware appearance and it will stand out prominently among the other ads. in the newspaper. Illustrations of this kind are particularly desirable in preparing circulars or small bulletins for distribution to customers.

Suggestion for Housecleaning Advertisement.

There is no good reason why hardwaremen should not secure more of the housewives' trade this spring than ever before. Sales in some departments will probably show a falling off this year and this can be offset largely by aggressiveness in pushing goods that have in a sense been more or less neglected when times were real good and business was booming.

Housecleaning will take place this spring as usual, and many thousands of dollars worth of housecleaning supplies will be needed.

The question the hardwareman asks himself is whether or not his advertisements are read. If his advertisements are not read, he is losing a large amount of money, which he is paying to his newspaper. There is one thing sure, and that is, he should not undertake newspaper advertising unless he can see his way clear to give his advertising the time and thought that it deserves. Newspaper advertising if properly applied will pay big dividends; but if neglected, will be an expensive luxury, bringing little or no returns.

In the busy newspaper office time is at a premium. Too much attention cannot be given an advertisement to ensure an attractive appearance. Usually the newspaper ad.-man arranges the type matter so as to be identical with the manner in which the copy is written. It is therefore left to the advertiser to see that his copy is so written as to produce an attractive appearance when printed, or else to have a "lay-out" sheet accompany the copy, so as to make clear the desired arrangement of the type matter. The advertiser should see to it that his ideas are so clearly expressed on the lay-out that the best possible ad. may be composed.

One of the most glaring faults to be found with present-day advertisements is over-emphasis. If you will look over the ads. in your local newspaper you will readily see that for every one that stands out in a dignified manner, courteously displayed and delivering the message in a clear, simple, and concise way, you will frequently find a large number of inapt makeshifts. Ads. overburdened with large, bold-face type or underscoring, not only weaken the ad. and confuse the reader, but usually fail to feature the essential points intended to be brought out.

Ads. laden with bent and twisted rule work, unattractive ornaments, irrelevant borders, meaningless illustrations, etc., surround the ad. with a repellent atmosphere and greatly minimize its pulling power by not utilizing the space thus wasted for effective display and legible text matter.

Remove the Dust and Dirt and Save the Doctor Bills

THE earlier the house is given a thorough cleaning the better. During the long winter, with stoves and furnaces going all the time, dust and dirt accumulates in every nook and corner. In the winter, too, there is usually insufficient ventilation in the home, and disease germs find no better breeding places. Just because they cannot be seen is no indication they are not there—take no chances, but get your supply of house-cleaning ammunition at once. Read carefully these suggestions:

Powdered Ammonia

Softens the water and eases the work of rubbing the floors and furniture. Blank brand, **10 cents** per package.

Sweeping Powder

Why sweep in clouds of dust when you can prevent it by the use of a little sweeping powder? Use it on the floors, rugs and carpets. Large can, **75 cents**; small can, **35 cents.**

Chloride of Lime

Nothing better for the closet or for sweetening drains. Every home should always have a supply on hand—one of the finest chasers of disease germs known, and the price of a tine is small, only **15 cents.**

Liquid Ammonia

Some prefer the ammonia in liquid form. Simply moisten the cleaning rag with it and it's ready for use. A good-sized bottle for **15 cents.**

Sink and Bath Tub Cleanser

You know how hard it is to get the dirt off the sides of the sink and bath tub. Blank brand is a powder which does the work with the least amount of rubbing. Per can, **20 cents.**

Lye

Another fine disinfectant is lye—there are few houses which do not keep a plentiful supply on hand. It will take up grease and other dirt from the floors as quickly and easily as anything. Per tin, **20 cents.**

Furniture Polish

To make the chairs, tables, window sills and other furniture clean and bright, use Blank Brand. Just rub it on with a clean cloth and it will produce a bright shine like new. Per bottle, **25 cents.**

Silver Polish

The table silver, no matter how good it is, soon tarnishes. Brighten it up with ———. This is guaranteed to brighten silver and give it a shiney, new appearance. Per bottle, **25 cents.**

Metal Polish

For shining up the brass knobs on the buffet and other furniture, a good metal polish is necessary. Try ——— Brand—it is recommended for pots and all metal fittings about the house. Per can, **15 to 50 cents.**

Brushes and Brooms

Did you ever think how much time could be saved the year round by brushes that get behind and under the stove and the radiators, and between the spokes of the broom? Why not make your work lighter? A full supply to choose from.

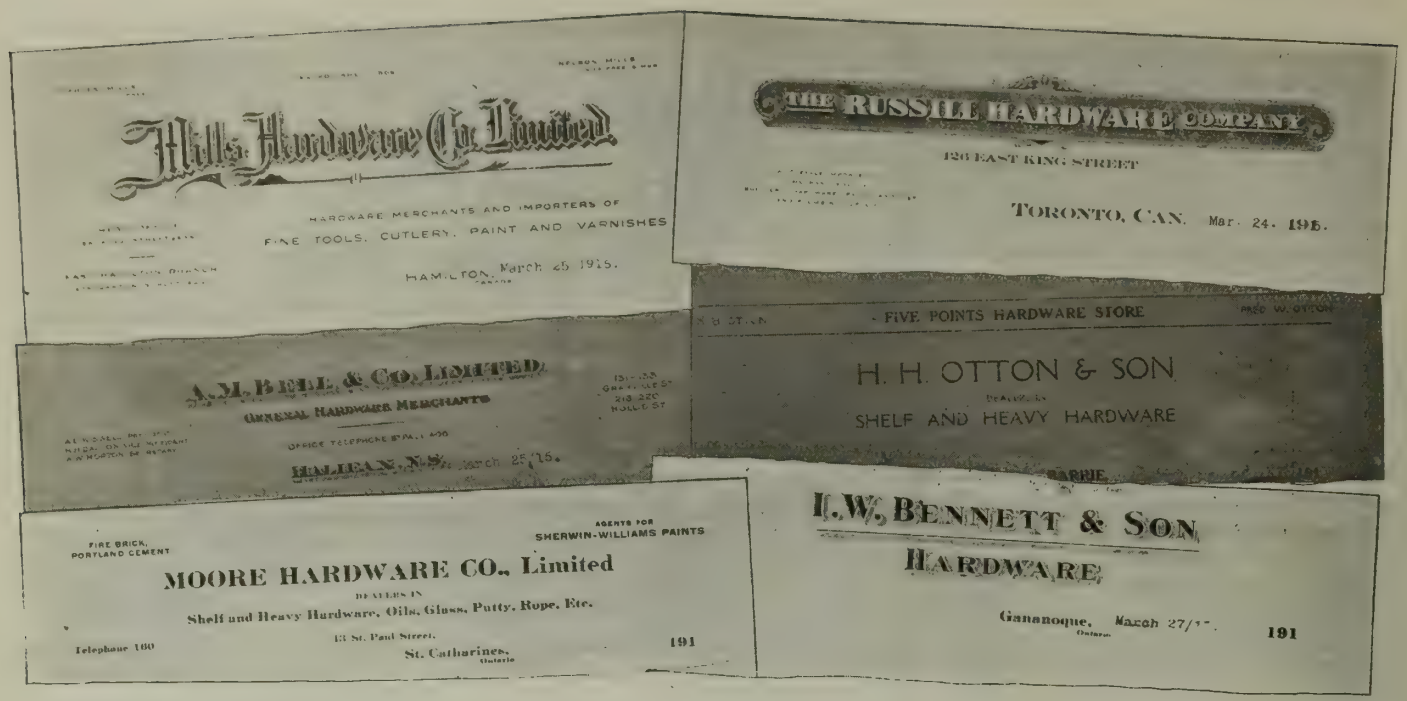
Dustless Mops

These mops are working wonders in thousands of Canadian homes. They get into the corners and pick up all the dirt. For your housecleaning campaign this year let the dustless mop help you. Different sizes. Prices from **75c to $1.50.**

Vacuum Cleaners

The modern vacuum cleaner gathers the dust—and holds it. The vacuum cleaner has revolutionized housecleaning methods, and enables the housewife to thoroughly rid the house of dust and dirt with the least possible amount of labor. We would like to give a demonstration in your home. Prices range from **$8 to $150.**

Mops Washboards and Clothes Pins



A full supply on hand of all kinds of woodenware for the cleaning season. Come in and let us show you our stocks—made by the most reliable manufacturers.

Please remember we guarantee every line of house-cleaning helps advertised—they have all been tried and tested. Select your requirements at once from a full stock.

JAMES THOMPSON & SON,

75 Main Street Phone 196

Above is tendered asa suggestion for a housecleaning newspaper advertisement. Retailers will fill in the brand names they wish to advertise and their own prices.

What Successful Hardwaremen Think of Our Spring Number

The Russill Hardware Co., Toronto, Can.

"We are in receipt of the Annual Spring Number of Hardware and Metal, and felt compelled to express our satisfaction with it and to congratulate you on such a splendid and successful number. While your publications of a like kind in the past, have always achieved a high standard of excellence, we think that this time, you have surpassed yourselves. The excellent quality of the paper, the splendid typographical work, the large number of clear and striking illustrations, and the attractive, interesting, instructive and practical articles on the many phases of hardware business, combine to make it a publication which will not be lost sight of by the trade in Canada.

Wishing you continued success and assuring you of our lively interest in and appreciation of Hardware and Metal, we are,

Yours truly,
The RUSSILL HARDWARE CO.,
FRANK J. RUSSILL,
Mgr."

* * *

Moore Hardware Co. Ltd., St. Catharines.

"There is no possible doubt that the Spring Number of Hardware and Metal has certainly excelled any previous issues. It not only contains a vast number of Canadian manufacturers' ads., but English and American as well. It is nothing more nor less than a regular Encyclopedia to the hardwareman. The market reports from week to week are absolutely reliable, which is a very necessary thing at this time of so much price changing. I have been a reader of Hardware and Metal for Twenty (20) years, and the information gathered therefrom has been invaluable. You have our congratulations in publishing the "Best Number" of Hardware and Metal yet printed.

Yours truly,
MOORE HARDWARE CO., LTD.,
Per J. B. ARCHER."

* * *

A. M. Bell & Co. Ltd., Halifax, N.S.

"We beg to say that although a careful reading of your annual spring number has not yet been possible, a glance through its splendidly illustrated pages and editorial matter convinces us that you may very well feel proud of this issue as being probably the best of its kind ever published in Canada.

It shows that the hardware and paint manufacturers of Canada together with the wholesale trade in hardware are fully alive to future trade conditions and ready to take advantage of the better times that are in store for Canada in the year upon which we have but recently entered. We in the Maritime Provinces are getting our fair share of business.

Yours very truly,
A. M. BELL & CO., LTD.,
Per A. B. WISWELL,
President."

• • •

Mills Hardware Co. Ltd,, Hamilton, Can.

"Just received our Hardware & Metal Spring Number and wish to congratulate your Editor on this successful issue.

The most striking feature from cover to cover lies in the fact that each section from Editorial down to advertising has been given equal prominence. There is no question but that every hardwareman

will read and re-read this issue in order to digest the valuable suggestions and ideas contained therein.

We take much pleasure in writing this short comment on your issue.

Yours very truly,
MILLS HARDWARE CO., LTD.,
Per N. MILLS,
Vice. Pres. and Mgr."

* * *

H. H. Otton & Sons, Barrie, Ont.

"Your special Spring Number of Hardware and Metal arrived only yesterday. Was rather disappointed at not getting it sooner as it comes so regularly on Saturday and as I have been a reader of your magazine for over 20 years it seems like something is lost when you have not got it. I must say you are to be congratulated on this splendid edition. The front page is a beauty and is very striking.

The articles throughout the whole edition are excellent and are worthy the most careful attention of every hardware dealer. Wishing you still greater success, I am,

Resp. yours,
FRED. W. OTTON."

* * *

The Martin-Senour Co., Ltd., Montreal.

"On the whole we consider it a credit to trade journalism. The editorial pages ought to give hardwaremen a great many ideas in store management and window and store display. Your articles on paint and varnish selling are particularly worthy of note, and your color page is especially appropriate as it symbolizes in a direct way one of the most important industries upon which Canada's prosperity relies at this time. We are also glad to note the improvement from year to year in the advertising copy put out by Canadian advertisers.

We have no doubt that the issue has met with the general approval of the trade, and with continued good wishes, we remain,

Yours very truly,
THE MARTIN-SENOUR CO., LTD.,
W. H. GERKE,
General Manager."

* * *

Kuhne-Anderton Mfg. Co., Port Hope, Ont.

"We believe your Annual Spring Number to be the most careful in setting and arrangement of any issue we have seen since advertising in your Journal.

The retail hardwareman should profit from the reading matter also from the advertisements contained therein, as the Journal in general should be quite a help in selecting goods. We are,

Yours very truly,
KUHNE-ANDERTON MFG. CO.,
Per JAMES ANDERTON, JR."

• • •

Easy Washer Co., Toronto.

"We are in receipt of your copy of Hardware and Metal Annual Spring Number and are very pleased in the way you have used our ad. as well as the position you have given us in the classified index. We trust this will be the beginning of a profitable connection, and we will be glad to make arrangements for future copies.

Yours very truly,
EASY WASHER CO.,
F. H. REID, *Manager.*"

Frost Wire Fence Co. Ltd., Hamilton, Ont.

"Your Spring Number was received yesterday and we must congratulate you on getting out such an elaborate booklet. It certainly should be one of valuable information to the hardwaremen and should prove not only helpful to them but a good trade getter for your advertisers.

We are quite well pleased, not only with our page in the book but also with our past service with yourselves.

Yours truly,
FROST WIRE FENCE CO., LTD.,
C. C. MORIN,
Assistant Sales Manager."

• • •

Channell Chemical Co. Ltd., Toronto.

"We are in receipt of your Annual Spring Number, 12.

We are very well pleased, and think it contains first-class reading matter.

The work on "O-Cedar Ad." is alright.

Yours very sincerely,
CHANNELL CHEMICAL CO., LIMITED,
A. T. CHANNELL, *President.*"

• • •

I. W. Bennett & Sons, Gananoque, Ont.

"Your Spring Number to hand, and I consider that this annual number is the best that you have yet produced, and is worth the whole year's subscription price to any hardwareman.

Wishing you continued success, I remain,

Yours very truly, W. W. BENNETT."

• • •

Wheeler & Bain, Toronto.

"We wish to congratulate you on the excellence of your spring number of Hardware and Metal, as we consider it should be a great help to all retail hardwaremen, and as advertisers we were much pleased with the general arrangement of the advertising matter.

Yours truly, WHEELER & BAIN."

• • •

The Roofers Supply Co. Ltd., Toronto.

"Your Annual Spring Number of Hardware and Metal has been received and gone over very carefully. It is indeed a paper which is creditable to its editors.

Yours very truly,
THE ROOFERS SUPPLY CO., LIMITED,
N. F. CULVERHOUSE."

• • •

Smith & Hemenway Co., Inc.

"We have carefully scanned over the pages of the Annual Spring Number of Hardware and Metal, and in conclusion, must express our intense satisfaction as to the quality of reading matter and advertising.

The reading matter we found therein is full of snap, well illustrated and to the point. The advertising matter represents a very careful array of typography blended into very harmonious effects.

This is the least we can say in crediting you for such a splendid number.

With best wishes for your hard work and with continuous success, we beg to remain,

Very truly yours,
SMITH & HEMENWAY CO., Inc."

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, APRIL 3, 1915 No. 14

IT LOOKS AS if there might be some monkeying with the parcel post zones. The retailers should see that there are no thin wedge edges injected into the present arrangement.

* * *

WITH A VIEW to encouraging the Made-in-Canada movement, the Chambre de Commerce, Montreal, has taken a stand in favor of the establishment in that city of a permanent commercial exposition. Such an exhibit to contain samples of all foreign-made goods imported into Canada and full information regarding them, so that Canadian manufacturers might undertake their manufacture.

* * *

PLANS HAVE been discussed at Washington by the United States Government officials for the sending of a warship to Yucatan to take money necessary for the movement of the sisal crop of Mexico which is required for the binder twine output of the current year. There is $625,000 in the vaults of the banks of Galveston, Texas, which the American manufacturers propose to advance to the Southern growers to get the wanted material out of the trouble zone.

The warship will be sent unless there is further improvement in the situation. At present there are prospects that there will be a serious shortage of binder twine when the harvest season comes. However, there is comparatively good news in the report that the burning of the sisal fields, as reported, is not true.

* * *

ELSEWHERE in this issue appears a complete report regarding the proposed "Bulk Sales Act, 1915," which was introduced in the Ontario Legislature during the past week. Every hardwareman should study the bill closely and take such action as he may see fit. The bill was for a long time opposed by a section of retail merchants but it is quite apparent that the objectionable features have been removed, for the bill now has the approval of the Retail Merchants' Association. Merchants who are doing business in a legitimate manner and whose dealings are square, need have no fear of the Bulk Sales Act. The retail merchant also secures protection from dishonest creditors and this is a feature of the bill which should meet with the hearty approval of all retailers.

* * *

OFFICIALS OF the Harbor Board at Montreal are predicting that the ocean channel from Montreal to the ocean will be open by the 10th of April. Already it is stated that the river is clear from Three Rivers to Quebec and as soon as the ice breaks away from Lake St. Peter the last obstacles will be removed. This prediction would mean that the opening of navigation from Montreal would be about ten days earlier than usual, the average for several years past being the 20th to 25th of the month.

The wholesale and retail hardware trade is directly interested in view of the fact that there is heavy booking throughout the winter season for spring delivery and not only does early navigation mean the comparatively early delivery of goods, but it means reduced freight charges because from the 1st of April every day of delay is likely to result in higher carrying charges on goods required and transported by the railroads.

Higher Paint Prices

THE markets for raw materials used in paint manufacturing have developed very unsettled conditions since the outbreak of the war. Not only has there been the advance in the tariff, which has applied to many commodities imported, but other factors have figured to an important extent to raise the cost levels. With the increasing prices for pig lead has come an advance of 55c in white lead, while zinc has become so erratic and uncertain that some makers have withdrawn prices while others have made advances of several cents; linseed oil in sympathy with the price of flax has increased in cost from 5c to 10c the gallon; colors have not only become higher in value but very scarce on account of German supplies being cut off and there is possibility that some shades will have to disappear from the color cards, although the great majority can be replaced with substitutes; chemicals have also been in small supply and the general tendency is for higher prices.

Under these conditions there is only one logical course for the manufacturers and that is to advance the prices of mixed paints. Up to the present the old prices have prevailed, due largely to the fact that the tariff advance came between seasons when part of the spring placing had been done. Thus the basis has prevailed but the intention is to make a general change before another season and new prices are likely to go into effect during the month of April or early in May.

Report has it that the price increase will be based in a general way on the tariff advance, which would be about 7½%, but this does not necessarily apply in this situation as there are other factors to be con-

sidered. Besides the duty there are direct price influences for which the war conditions are responsible as in the case of lead, oil and chemicals.

Paris Green Inspection

THE Inland Revenue Department has just issued a report dealing with the samples of Paris green purchased by inspectors throughout Canada. Inspection was made in the districts of Toronto, Hamilton, Windsor, Rocky Mountains and Vancouver, consequent upon complaints received to the effect that an article of unsatisfactory character was being offered at Paris green. It is pleasing to note that, so far as the report is concerned (the products of nine manufacturers were represented in the samples tested) such complaints have been without foundation. The names of the manufacturers are not given here, but will be supplied to readers of Hardware and Metal on request.

Paris green is defined in the 5th schedule to the Adulteration Act, as follows: "An insecticide containing at least fifty per centum of arsenious acid, and at least thirty percentum of cupric oxide and being completely soluble in aqueous ammonia." It is said by the department that all the samples analyzed were found to meet legal requirements within such narrow limits as to make the article perfectly satisfactory. Paris green has been examined on several occasions since 1895, but the recent examination is the first to result in all the samples being found genuine. The report shows clearly that at least nine manufacturers are selling Paris green that is not adulterated.

Cutlery Prices Advance

THE latest advance in the price of cutlery at Sheffield, England, will not come as a surprise to the trade for further advances over those reported in Hardware and Metal some time ago were predicted by the paper and by Canadian distributors who are conversant with movements in the Sheffield cutlery trades. The lines affected are scissors, razors and spring cutlery. The Ironmonger in referring to the advance states as follows:

"Wages in the several branches of the spring-knife industry were increased by 5 per cent. last autumn, and have just been raised again by a like amount, while the scissors and razor workers have obtained much more substantial advances still. The effect of the war is felt in the cutlery trade in the shape of greatly enhanced prices of steel and nearly everything essential to manufacturing and of all the various materials used in the workshop. When the burden of increased taxation is taken into account it will be seen that the costs of producing cutlery are appreciably heavier than they were six months ago. In comparison with the serious advance in price of many goods, the cutlery makers deserve some credit for their moderation, and the workmen have been equally reasonable in their demands. The increase will doubtless be unpalatable to some of the retailers on the ground that it may lessen their margin of profit, but their remedy is to charge the public higher prices. We do not believe that the sale of cutlery will be affected adversely if the cost of a knife or razor is raised by a few pence. Cutlery is very cheap in relation to other goods of equal utility and workmanship, cheaper, it is said, than it was half a century ago. The alleged difficulty of raising the retail prices of cutlery has always, we think, been imaginary, and an increase is greatly simplified now by the absence from the market of low and medium priced German goods. It is just possible that the present conditions of the trade may educate many of the public to a recognition of the truth that cutlery of good quality is the most economical in the long run."

Means Much to the Retailer

EIGHTY million dollars is the approximate amount of war orders secured recently by Canadian firms from the Russian military authorities. These orders are for shrapnel shell principally and they mean that a large number of men will be kept busy for a long time. While we all regret that conditions in Europe have made it necessary for factories in any country to turn out such vast amounts of death destroying missiles, yet these conditions have to be met and we are glad that Canada is getting a share in the manufacture of the weapons with which to meet them.

This big contract has been sublet so that factories in various parts of the country are engaged in the work, all of which will mean much to the retail trade. It should help greatly in keeping business as usual.

It has been stated that already 100,000 shrapnel shells have been manufactured by Canadian firms and have gone to Europe and that the orders from Britain alone have totalled somewhere in the neighborhood of $60,000,000. The whole thing has meant an increase in the size and staffs of plants that before the war were closed or practically closed down from lack of business.

With the majority of our other factories operating and with the farmers getting big prices for their grain and a vast harvest assured them this year, we in Canada have every reason to be elated. Spring is with us once again and all the advantages that it brings with it are due, including the reopening of navigation, a revival in building and the commencement of the spring work on the farm.

World Wheat Supplies

SOME figures in connection with the visible supplies of wheat in the different countries of the world are worth noting. The European visible supply of good stuff is practically 90,000,000 bushels, that is 6,000,000 bushels in excess of the same time last year.

On the other hand our own visible supply in Canada is over 10,000,000 bushels below what it was a year ago and that of the United States is about 10,000,000 below March last year. A reliable authority estimates that at the present time no less than two billion bushels of wheat are tied up. This enormous sum represents 50% of the world's production of wheat. Even supposing that next year the warring nations of Europe produce a crop half as good as last year there will still be a deficit of one billion of wheat. Canada as a great wheat producing country thus has her chance. We need "production more than usual" in wheat almost above everything else. Canadians might very well see the handwriting on the wall and do as much as they possibly can to increase the production of wheat. When the war is over we have got to begin to think about feeding the people that are now starving to death.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—Steel Market and the War—Canada Expanding —Let the Rich Spongers Pay.

Steel Market and the War

From American Metal Market.

THE fall of Przemysl, the probable entrance of Italy into the war, betting of even money at Lloyd's that the war will be over by June 30th and the approach of the date when Lord Kitchener recently said the war was going to begin are incidents that strengthen materially hopes that the war will be ended this summer. Soon there may be opportunity to modify these hopes into expectations as additional features are injected in the situation. It is rightly said that for the major part the allies have been on the defensive and to turn a defensive into an offensive campaign is a great undertaking, but there is this also to be said, that in the early part of the war the strategy was, on account of Germany being prepared and the allies unprepared, entirely on the part of the Germans, but in the nature of things the French and English are strategists also and we may now soon see strategy on their part. German strategy has been played; French and English has not.

Americans have been slow at making up their minds about this war, or indeed at forming any definite conclusions at all, but we think there has been a fairly general sentiment that this war, as all others, will towards its close or just after its close produce a sudden quickening in business, sometimes called a boom. It may not be long until men begin to look forward to that boom, and anticipation of such a thing usually results in its materialization. If the end of the war becomes discernible there will be a rapid loosening in funds for investment, according to the views of nearly everyone.

As to the steel trade, the market situation of late has been clearly that this one thing is needed to put on the finishing touches. We have lately had an almost normal demand for the steel products of everyday consumption, and a striking lack of demand for the steel products that enter into permanent work. The railroads have been buying scarcely anything, and the amount of structural business, for bridges, hotels, office buildings, factories and other industrial development, has been extremely light. A loosening up of investment funds is clearly the first additional thing needed to raise the steel industry to a plane of greater activity and prosperity, and all the possible trade influences of the future taken together cannot compare in importance with the one influence that war prospects present. We realize that such a view is not universally entertained but we believe it is the correct view.

• • •

Canada Expanding

From Buffalo Commercial.

ONE advantage will be gained by Canada through the war. It has given stimulus to a campaign for greater agricultural production and will thereby bring under cultivation thousands of acres of land heretofore idle. During the past five months plans have been perfected by which twenty per cent. will be added to the area of land under cultivation this year.

There are many thousands of fertile acres in Canada still undeveloped, which will rapidly be converted into productive farms. Increased population, greater wealth, the demand for enlarged industrial plants, remunerative rewards for the workers and better markets will be some of the benefits derived from the conflict, as it affects the Dominion. Blessings in disguise are not easily interpreted, but Canada will in the coming years look back upon the agricultural development of 1915 as an instance of unexpected good fortune.

• • •

"Let the Rich Spongers Pay."

From Sydney, Australian Bulletin.

THERE is no reluctance to go to war on the part of young Australians. On the contrary. There is not one healthy young man in a hundred who would stay away, if he could be sure that neither his family nor he would be prejudiced financially by his departure. This is where the opportunity of the resolute stay-at-home of means comes in. The possibly indigent young man is willing to risk his health, perhaps his life, in the cause of Empire. Let the wealthy citizen who isn't in a position to do that, or who frankly doesn't want to, make it up financially to those who feel differently. If all the rich men who have no intention of approaching the front would drop writing futile letters to the papers, and, instead, call a meeting and individually pledge themselves to assist, according to the size of their incomes, the wives, children, parents and other dependents of the soldiers, the recruiting returns would go up with a bound.

• • •

One Way to Collect a Bad Bill

From Business.

SOMETIMES schemes have to be resorted to in order to bring delinquent debtors to time. It often happens that men who are perfectly good will neglect an account. The business house knows that they are all right, while ordinary methods for collecting fail to produce results. In other cases small balances are permitted to stand, that are too small to spend much time or money over, or for the reason that as the debtor is at some distance the expense of getting to him would more than eat up the amount involved.

Last week a retailer told of an accident that resulted in collecting a whole string of accounts that he had almost given up for lost. It happened that he had just bought a new writing machine for his stenographer, and she was slow in making out the bills, getting accustomed to the new typewriter. By mistake she struck a "3" instead of "1" in writing a bill for a delinquent, and instead of charging him $19.45 she charged him $39.45. It was only a few days until he showed up at the store, mad all through and looking for vengeance. He took the bill to the proprietor and stormed around about it. The proprietor acknowledged the mistake, but insisted upon payment. How to get that man into the store had been a puzzler for months, and here he was. The proprietor collected the bill, and the debtor went out satisfied that he had made him correct an error.

Next month he went through the ledger and took every account of similar nature, and told the girl to make mistakes on them all running from $20.00 to $70.00. Then he sat down to await results. The scheme worked. He heard from them all, collected a large portion of them, without further delay, and by diplomacy brought in the rest.

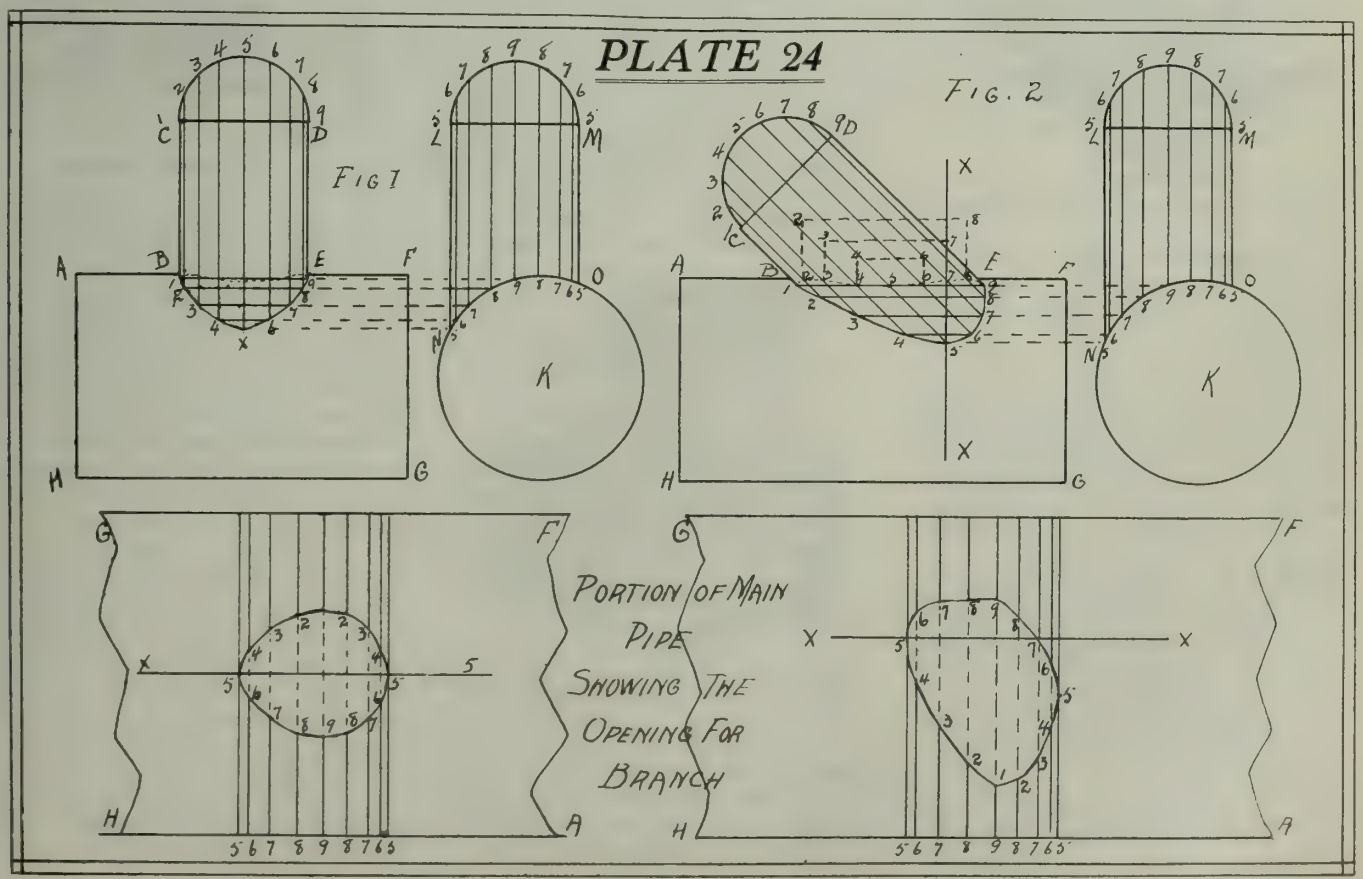
Practical Course for Sheet Metal Workers

Article No. 24 of Series

By CHARLES SEIVERS

IN article 22 we showed how the various patterns were to be developed, which would be necessary for the branches to be taken off a given main pipe.

Such branches are very often very necessary for air ducts, and in many cases such a branch will overcome the use of an elbow.



This article takes up the method of developing the pattern for the hole in the main pipe. Plate 22 and article appeared in our special spring number.

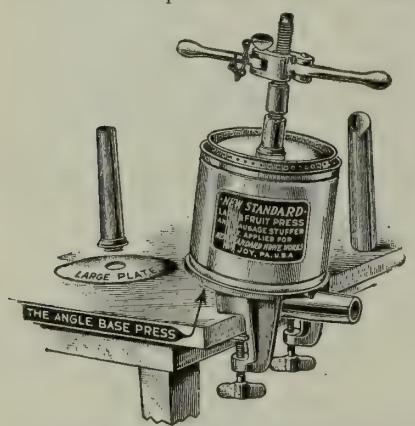
To develop this portion of Fig. 1, lay out portion of main pipe, as shown by G-F-H-A. On A-H set off the spaces between N and O on section at K, numbering them to correspond. From these points draw lines at right angles to H-A, joining them to G-F, these lines being the points on circumference where divisions from branch intersect. The next step is to mark off the width of branch on each line, using the line 5-X as a base line to work from. Measure the distance from 5-X to points 4 and 6 (in this case being a square branch, both sides are equal). Now, set off from a corresponding base line on pattern. Measure from 5-X to 3 and 7, 2 and 8, and 1 and 9, and set off in same manner from base line on pattern. A line drawn through points thus obtained will give outline of opening for branch.

In Fig. 2, lay out portion of pattern and set off divisions between N-O, as in Fig. 1. To mark off the distances between 1 and 9, 2-8, 3-7, 4 and 6 and point 5, we can work from line A-H, F-G, or a parallel line between them, as X-X, and use a corresponding line on pattern. (As in these figures the branch is not directly off the centre of main, it will be necessary in this case to measure the distances between these points, 1-9, 2-8, etc., on each side of centre line, 1-9), the side on elevation being shown by solid lines and the opposite side by dotted or broken lines (these are extended upwards to make clearer). A line drawn through the points thus obtained will give outline of opening for the branch.

PROVINCIAL WAR TAX.

Taxation of all the assessable land in Ontario at the rate of one mill on the dollar was the war measure proposed by Hon. T. W. McGarry, Provincial Treasurer, in his Budget in the Legislature this week. This on the basis of an assessment of $1,800,000,000 is calculated to raise a revenue of $1,800,000. The proposal is made only as a temporary tax, not to be continued after the war, but is to provide for such extra demands as may be made from time to time in order that Ontario may contribute its share towards meeting the burdens of the Empire at this time. Apart from this proposal, Mr. McGarry reviewed at some length the financial situation of the Province, claiming that the nominal deficit had been caused by extraordinary conditions, and had the estimates of last year been fulfilled the result would have been different. He submitted an estimate of the assets and liabilities of the Province, showing that over all charges there was a net surplus of $14,000,000.

New Hardware Goods



Offered Canadian Hardwaremen

FRUIT AND LARD PRESS.

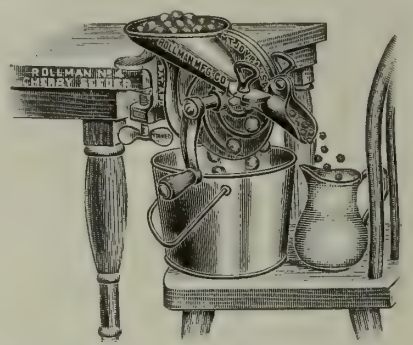
New Standard Hardware Works, Mount Joy, Pa., offers to the trade the new standard "angle base" fruit and lard press and sausage stuffer. The makers state that the press has many new features as follows:—

The angle base, it is claimed, insures perfect quick drainage and prevents the press from twisting off the table when in use. This is due to actuating the pressure at a different angle than that surface to which the press is attached.

With the labor-saving pressure bar it is not necessary to start at the top of upright threaded rod and go all the way down to secure pressure at the bottom

New Standard Fruit and Lard Press.

or all the way up to refill the press. By means of a simple latch device it can be split at the centre and attached or detached at any place.



The perforated cup has a bottom. It is easy to refill, there being no danger of the contents dropping out or scattering over the press when removing same.

Dripping is prevented by the extra long over-hanging spout. A strainer or receptacle can be hung on same for restraining or catching the juices.

For sausage stuffing the large plate on sleeve is used (the small one is attached to sleeve by coarse thread) remove perforated cup and fasten stuffing spout to base; the press is then ready.

The press is manufactured in two and four quarts only. Sausage stuffing attachments extra.

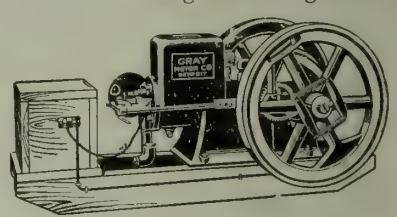
The "new standard" press has two positive clamps cast integral with the main base, a simple and effective arrangement for fastening them when in use.

Rollman No. 4 Cherry Seeder.

NEW CHERRY SEEDERS.

Rollman Manufacturing Co., Mount Joy, Pa., are offering to the trade two new models of Rollman cherry seeders here illustrated. Seeder No. 3 is said to be a machine of graceful design, compact construction, tinned finish, adjustable jaws, and will seed any size cherry. The spirals on the feeding wheel are laid out on scientifically accurate lines insuring the best possible results for removing the seed from the pulp with the least possible mutilation. For packing, one screw is removed at the top of the standard, which permits packing the seeder in a box not nearly half as bulky as is usual for this type seeder.

The clamping device for fastening the



Rollman No. 3 Cherry Seeder.

machine to the table is the same as used on Rollman meat and food choppers. The clamp screw is made of steel and has cut threads instead of the ordinary cast iron screw. The seeders are packed in individual sealed corrugated cartons, six cartons (½ doz. seeders) to a corrugated container. Weight per gross 480 pounds.

The working principle of the No. 4 is the same as the No. 3, but by shortening and removing the construction of the standard the discharge spout points away from instead of over the table. This permits the use of much larger receptacles for receiving the seeded cherry and the seeds. The shipping weight is 456 pounds per gross. The Canadian representatives of the firm are Saunders and Wainwright, Montreal, Quebec.

GRAY STATIONARY ENGINE.

Gray Motor Co., Detroit, Mich., are offering to the trade a new product in their H.P. Model "G" Engine. The makers, in describing the engine, state as follows:—"All gasoline engines must

Gray Stationary Engine.

have good compression to be powerful. In starting a small engine, a man turns it over, and, when it comes up to the compression point, he gives it a quick, strong pull over this point and the engine starts. It is this quick, strong pull over the compression point that has been eliminated on the Gray 1¾ and 2¾ h.p. engines, so that any woman can start either one without this quick, strong pull kind of effort wsich is not always the right thing for a woman."

Another feature on the 1¾, 2¾ and 4 h.p. Model G engines is the new speed change screw, which permits the speed to be regulated from 300 to 600 r.p.m. The makers claim that the Gray is the only engine built with the speed screw adjustment, admitting of such a wide variation while running. It has no lock nuts on the governor weight spring. The position of the speed change screw on the engine is said to be handy, safe and away from the fly wheel.

Junior Clerk's Page

Self-Reliance

The Self-Reliant Man is Not Dependent on Time or Circumstances or the Service of Others—He Does Things Himself.

By DR. ORISON SWETT MARDEN.

EMERSON never uttered a more universal truth than when he said: "It is only as a man put off from himself all external support and stands alone that I see him to be strong and to prevail."

No youth is started right in life until he feels that it is up to himself to make good. Until he has gotten over the idea that he must wait for somebody to give him a lift, to boost or push him forward before he can begin his work; until he has decided that he, and he alone, shall be the builder of his career, the structure will never be built.

It does not matter how much ability you may have, how many diplomas, from college and university, you may hold, you will sink in the great business or professional sea if you do not develop self-reliance, if you do not believe in yourself, first, last, and all the time.

Everyone who has ever amounted to anything has courted responsibility, has been self-reliant, independent, courageous, even to daring. There is no place, especially in modern life, for the man who has no stamina, no courage in his nature, who is simply material for stronger minds to manipulate and use for their own advantage. The very idea is opposed to all the principles of democracy. No one in the world is capable of making your life program for you, because no one was ever born who is just like you or knows so well as you ought to know what you can do best.

"Every heart vibrates to that iron string."

Even a baby must trust itself, must dare, or it will never learn to walk. A dog which should be afraid to experiment would never learn to swim. Animals and young children often show more intelligence in this respect than grown men and women.

Swimming, for instance, is purely a matter of belief in one's own power. Thousands of people have drowned merely because they did not believe they could swim. The moment timidity is overcome and one gets complete possession of himself, and becomes thoroughly conscious of his power, he can swim without any difficulty.

There are hundreds of boys and girls in our great universities to-day who would never have been there but for their faith in themselves and their stern resolve, come what might, to get an education. Many of them were on farms, in backwoods districts, or in workshops and factories. They were not only poor, but had others depending on them. Yet despite all their handicaps, they resolved that they must and would somehow, sometime, in some way, go to college. And they did. It didn't matter that others laughed at them as dreamers, and told them it was impossible. That always happens when one resolves to rise from a lowly condition. They resolved and carried out their resolution. And not only they, but society would be poorer to-day if any "kind" friend had stepped forward and paid their way.

You will be amazed to find how the moment you cut off all outside assistance you will be reinforced by a new power from within which you never before dreamed you possessed. But it will never come to your aid until you stop leaning and depending, until you throw away all crutches and stand erect on your feet.

The late Cornelius Vanderbilt, whom many believe to have been the best of the Vanderbilt family, showed at an early age that manly spirit of self-reliance which distinguished him through life. Telling his mother that he was going to New York to look for a place, with no other assistance than a letter of recommendation from his teacher, he presented himself one day at the office of the president of the Shoe and Leather Bank.

The president read the letter, and asked the boy if he was related to Commodore Vanderbilt.

"Yes, he is my grandfather," was the reply.

"Then, why didn't you get him to introduce you?" inquired the astonished broker.

"Because I didn't want to ask him for anything; I didn't want anyone to help me," said the sturdy applicant for a job.

Perhaps it was his independence, perhaps his neat, comely, and withal, earnest appearance, or both combined that weighed in his favor, but the boy was employed at once and started at the lowest rung of the ladder, as a messenger. Here young Vanderbilt began to show the other qualities that made him the man he afterwards became. He was punctual, prompt, clear-cut, discreet, and as hard a worker as any they had in the bank.

One day the youth's employer happened to be in the office of Commodore Vanderbilt, and mentioned the fact that he had a grandson of his in the Shoe and Leather Bank. The old man was astonished and immediately sending for the youth asked him why, when he wanted a job, he had not applied to his grandfather. "Because," replied young Vanderbilt, looking straight into his eyes, "I made up my mind that I would never ask you for anything."

The answer so pleased the commodore that it influenced him, so it is said, to add a codicil to his will, which provided that an extra million dollars should go to the grandson of whose independent, self-reliant spirit he had so complete proof.

One of the worst misfortunes that can befall a youth is to be relieved in any way from developing his self-help qualities. With few exceptions a pampered youth becomes a pigmy; he seldom develops into a strong and vigorous type of manhood.

Training in self-help and self-reliance are just as essential for any career that is worth while as is the training of a medical or a law school for the preparation of those who would enter the medical or legal professions. A young man could never become a skilful physician or a clever lawyer by lying around in a luxurious home, being waited upon by servants, indulged in all sorts of ways by a rich father.

Current News

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Fire Losses.

Perdue, Sask.—M. A. Searle, hardware dealer, was burned out.

Winnipeg Man Wounded.

Winnipeg, Man.—Word has been received here that Lieut. Hugh Niven, formerly manager of the Merrick-Anderson Co., and who is with the Princess Patricias, was wounded on March 19.

Change in Names.

Permission has been granted to change the name of the Canadian Toy & Novelty Co., Ltd., to that of "Colonial Toy & Show Case, Ltd."

The name of "P. L. Schmidt, Hardware, Limited," has been changed to that of "Hardware, Limited."

New Firms.

Vanguard, Sask.—Henderson Bros. are opening a branch hardware at Webb.

Perdue, Sask.—Chas. Clarke has added hardware to his general stock.

Merrit, B.C.—The Merrit Heating & Plumbing Co. ,has started business here, Messrs. Barrett & Alcock are the proprietors.

Active Hardwaremen.

Toronto, Ont.—Included in the delegation that interviewed the Provincial Government last week in connection with the Hydro-Electric Railway Union of Ontario were Past President of the O.R.H.D.A., H. H. Occomore, Guelph, and Past President W. F. Macpherson, Prescott.

Obituary.

Toronto, March 29.—A. J. Somerville died at the family residence, Atherley, 566 Jarvis street, yesterday. Mr. Somerville was born in Huntington, Que., Feb. 25, 1844, and came to Toronto 40 years ago. At the time of his retirement, some time past, he was president of the Ontario Lead & Wire Co., a director of the Standard Bank, the Consumers' Gas Co., and the Toronto Mortgage Co., as well as being interested in a number of other companies.

Emerson, Man., March 22.—Charles Whitman, a hardware merchant and coal and wood dealer here, died this morning at the age of 76. He was one of Emerson's oldest business men, filling many important positions. He was at one time mayor, chairman of the school board, president of the Agricultural Society, and president of the Conservative Association.

Rebuilding Store.

Yorkton, Sask.—F. S. Collacott intends to proceed at once with the construction of a new and up-to-date hardware store on the site of the one destroyed by fire last week. The new building will be of the same size as the one destroyed but will be more modern in many important particulars and will embody all the latest ideas of this type of building.

Personals.

George St. James, formerly of Montreal, and now hardware buyer for the Hudson Bay Company at Winnipeg, recently spent a few days in the Quebec metropolis and called upon a number of old friends. He left for New York and Chicago on a buying campaign.

Business Changes.

Winnipeg, Man.—G. H. Saywell Co. are discontinuing business here.

Blaine Lake, Sask.—H. H. Hanadence has purchased the hardware business of J. B. Clearihue.

Vernon, B.C.—The Wilcox Hall Co., Ltd., of Kamloops, B.C., has purchased the stock of the Glover-Rice Hardware Company.

Red Deer, Alta.—The Wright Hardware Co. opened for business on March 25, in the premises formerly occupied by the Day Hardware Co.

Appointed Eastern Representative.

Bowes, Jamieson, Ltd., Hamilton, Ont. announce that Allan Tilley has been appointed as their eastern representative, handling the territory from Kingston east through Quebec and the Provinces. Mr. Tilley was formerly with Hanson & Tilley of Montreal, and owing to his long connection with the stove trade in that district, over twenty years, his friends will no doubt be glad to renew their acquaintance with him. The line which Mr. Tilley is selling comprises a complete range of coal, wood, gas, and oil ranges, cook stoves, hot plates, ovens and furnaces.

Presentation.

Hamilton, Ont.—Charles J. Phoenix, who is severing his connection with the Steel Company of Canada, Hamilton, to take a position with the Algoma Steel Co. at Sault Ste. Marie, was made the recipient of a very appropriate gift from the sales department of the local concern, when, on their behalf, W. D. Muir presented him with a fine club bag. Mr. Muir voiced the sentiments of the entire staff when he told how highly Mr. Phoenix was esteemed, how sorry they were to see him go, and how they wished him success in his new field. The recipient replied with much feeling.

Dominion Incorporations.

Canada Iron Foundries, Ltd., capitalized at $4,500,000, head office, Montreal, Que.

Canadian Horseshoe Co., Ltd., capitalized at $300,000, head office Hamilton, Ont.

Rubber Regenerating Company, of Canada, Ltd., capitalized at $200,000, head office Montreal, Que., to regenerate and reclaim rubber and rubber by-products.

The Canadian Blower & Forge Co., Ltd., capitalized at $500,000, head office Berlin, to manufacture and deal in engines, heating and ventilating apparatus, forges, fans, blowers, etc.

Ontario Incorporations.

Canada Fibre Board Co., capitalized at $40,000, head office, London, Ont., to purchase, manufacture and deal in building materials.

Canadian Regal Motor Co., Ltd., capitalized at $100,000, head office, Berlin, Ont., to manufacture automobiles and parts, motor trucks, cycles, tricycles, motors, etc.

Metal Drawing Company, Ltd., capitalized at $50,000, head office St. Catharines, to carry on in all its branches the business of metal drawing, metal stamping and forging, etc.

McCormick Mfg. & Supply Co., Ltd., capitalized at $40,000, head office Welland, to carry on business as iron and brass founders, etc.

Daylight Saving Endorsed

Saskatoon Retailers Take a Vote and Majority are in Favor—Advantageous Legislation Secured and More That is Wanted—Weekly Half Holiday Decided Upon —Some Market Troubles.

SASKATOON, Sask., March 30.—A "Booster" meeting of the local Retail Merchants' Association was held last week and a number of old and new members of the association met to discuss the work of the association and to take steps on various matters affecting their interests.

The meeting expressed itself thoroughly in favor of the daylight saving scheme and weekly half-holiday. Among other topics discussed were the business tax, pedlars and transient traders, the City Market, trade sections, the forthcoming convention and other matters of general interest to the retailers of the city. C. T. Woodside, grocer, president, was in the chair.

The chairman expressed his gratification at the good attendance which spoke well for the canvass which had taken place during the past week. He commented upon the necessity for further organization among the retailers of the city and referred to other branches of business which had their trade organizations.

Gratifying reports were presented by the chairmen, H. Tupling, J. L. S. Hutchinson, S. E. Fawcett, A. W. Wylie and Mr. Dibden, with respect to the active membership campaign in Saskatoon. The members of the committee generally met with a hearty reception.

Important Legislation.

J. L. S. Hutchinson, of the Saskatoon Hardware Co., Saskatoon, delivered a most interesting address on work of the Association and some of the work it intended to take up in the future. One of the objects he pointed out and, one of the most important, was initiating legislation in the interests of the retailers and watching legislation which was inimical to their interests.

In Saskatchewan the association had been able to bring about the small debts court. They were also now endeavoring to get the limit of $50 in the small debts court raised to $100, and also to bring about legislation whereby if they obtained judgment they could issue execution against a debtor's lands. They were also endeavoring to obtain continuous garnishee proceedings and the raising of the pedlar's license in the Province, the producer and grower of meat, fish and farm products to be exempt from such legislation. The Food and Supply Bill and the forcing of a debtor to return to settle his accounts where they were transacted.

Another matter which was being taken in hand by the association was an alphabetical list of property owners in the registry office. Their credit rating department was second to none and he himself would not be without it for three times the subscription to the association. Other branches of the association's work which had been or would be taken up were the free legal department, the lost debtors' list and the handling of bankrupt stocks.

Endorse Daylight Saving.

The question of daylight saving was discussed, and it was suggested that with regard to the children, the schools might

J. L. S. HUTCHINSON, who addressed the R.M.A. at Saskatoon.

open at 10 o'clock instead of nine. One member of the association, who said he intended to oppose the proposal, as much as possible, said it was impossible to get a family of small children to bed so long as it was daylight and equally impossible to get them up in the morning. The mothers and the employees at the roundhouses of the C. N. R. and the C. P. R., he said, would oppose it. The money that would be spent in putting the question to the vote would be better spent in relieving cases of distress, for it would be defeated as sure as it was brought up. It was argued that the farmers would oppose it very much, on account of the inconvenience to them with respect to shopping, while on the other hand it was contended that the farmers only required to be educated in favor of it. On the question being voted upon 26 of those present expressed themselves in favor of a daylight saving scheme and 12 against. A petition in its favor was circulated at the meeting and largely signed.

A weekly half holiday during the summer months was also discussed, a resolution being proposed that a half holiday should be observed as last year on Wednesday afternoons, from one o'clock during June, July and August, the council to be asked to pass a by-law in either case making the half holiday compulsory. The resolution was carried.

The grocers and fruit dealers in the city, it was contended, should be protected from the pedlars and transient traders and it was decided to take up the matter further.

The city market came in for some criticism, it being contended that the manner of running the market was detrimental to the interests of the retailers. It was pointed out that the retailers could not purchase quanities at less than the consumer could purchase a small quantity, whilst 10 per cent. of the produce sold in the market came from the farmer, 90 per cent. came from the country towns. The retailers, it was contended, were directly paying for the upkeep of the city market, while at the same time they had to pay heavy taxes and electric light and other bills. It was suggested that the members of the association should attend the meeting of the city council on Friday morning at 10 o'clock, when the market question is being investigated.

It was decided to hold a meeting of the association in the Wilson Hall on the second Monday in each month.

TRADE JOURNALS FOR COMMERCIAL ATTACHES.

The following is taken from the Trade and Commerce reports, Washington, D.C., and comes from Commercial Attache A. E. Baldwin, London, Eng.:—

"The commercial attaches of the U.S. Department of Commerce stationed at ten important trade centres throughout the world are under instructions to make every effort to keep informed of current trade conditions in the United States. It is certain that their work will be more effective in specialized lines of trade if they are currently in receipt of journals devoted to such branches of commerce."

Weekly Market Reports

Statements From Buying Centres

The Markets at a Glance

The unfavorable weather during the early part of the week had a depressing effect on business, especially in the agricultural districts. The opening of navigation is eagerly awaited and prospects point to an early opening of some ports. The markets are settling after the many changes which have taken place during the past few weeks. Among the price changes this week are advances in prices of Paris green, shellac, washboards, Canada plates, lead sheets, scissors and snips. Building trades are considerably quieter than during the corresponding period of last year. Many orders for April 1 delivery are now being shipped. Collections are fair.

MONTREAL.

MONTREAL, April 1.—The first day of April marks the commencement of the spring shipments of goods from Montreal to the country districts, and, although the real movement of booked orders does not begin until the opening of navigation, there are prospects of good immediate business. Country prospects continue very satisfactory, although the city trade is not picking up as might be expected at this season of the year, and for this the lack of demand for building materials and builders' hardware is chiefly held responsible.

For the past few days there has been noted to be rather a depression with regard to spring and summer lines, which had commenced to move briskly. For this the colder weather is probably the reason. However, with the turn of the month the call for garden and lawn tools and other summer lines should revive in earnest.

MONTREAL QUOTATIONS.

Tin	50-55c
Spelter	$11.00
Copper	$17.00
Lead, Trail, cwt.	$6.00
Lead, Imported, cwt.	$6.00
Antimony	$27.00
Solder, ½ x ½	26 to 30
Solder "strictly"	28 to 32
Aluminum, Ingot	23c lb.
Aluminum, Pattern	24c lb.
Wire Nails	$2.40 base
Cut Nails	$2.50 base
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp	11c base
Sisal	10½c
Lath Yarn	9¾c

Price adjustments continue. An advance of about 90c all round is noted on wash boards. Canada plates are up 15c to 25c, and higher prices are in order for builders' hardware, although the manufacturers do not appear to have reached an agreement as yet. Gas stoves are in good demand, and cutlery for wedding presents is receiving attention. In the metals the tendency is still towards higher levels; tin is about the same as a week ago; lead is higher; and antimony and copper are firm; while spelter is somewhat weaker.

Tin.—The market has been up and down during the week in London and New York, but locally there has been little change, and prices are around 50c. New York at last quotation was 54c, but this level was reached after a decline earlier in the week, which took the price down considerably below the figure of 52c, which prevailed a week ago. Besides, while New York is somewhat concerned over the London embargo, this does not apply to Canada. The situation in the States is strained for spot and for delivery early in April on account of depleted stocks and interference with transportation. However, buyers are showing an indifference, which is a relief under the circumstances, as anything like a normal demand would be difficult to satisfy. American consumption is in a very unsatisfactory condition.

Copper.—The big demand for copper for the purpose of making ammunition is holding the market very firm; in fact, there is a tendency to advance, and New York quotes $15.87½, as compared with $15.25 a week ago. Locally the market continues firm at about $17. However, production is being steadily increased, and there is a late tendency towards easier quotations in the States.

Solder.—While the tin market continues in its present high and unsettled state, the tendency for solder prices must be expected to be firm to higher. Quotations continue as for the past couple of weeks with a leaning towards the outside of the range: Half-and-half, 26c to 30c, and strictly, 28c to 30c.

Spelter.—The market here is tending downwards following the reaction which occurred in the States a week or so ago. At present 11c about covers the situation. Quotations in New York continue at $9.75, as a week ago. St. Louis reports that there are indications of continued manipulation. This manipulation first took the market up, and now has driven it down. It is claimed that spelter cannot be produced at the prices now quoted, but that there is practically no spot available, and that makers are working on orders placed at the recent high prices. Thus the tendency would be to work the market back to a stronger position when the present orders have been filled. Sheet zinc in casks, $14.50 and $15.

Lead.—The market continues its upward tendency. Locally there is now a spread from the recent quotation of $5.75 to 25c above that figure. In the States the Trust has advanced 5c, and the independents have taken their prices 5c to 7½c higher. Further advances by the Trust are looked for. The strength is put down to the war demand for the manufacture of bullets. London has suffered a reaction of feeling and former sellers have become buyers.

Antimony.—The market for antimony has changed but little, and the quotations are firm. This is particularly the case with the local figure of 27c, as New York continues to put 30c as the top of the market.

Builders' Hardware.—Trade is still waiting for readjustment of prices from the manufacturers. In the meantime the advances have generally been 5 per cent. to 10 per cent. on the lines manufactured of brass or bronze, and which were particularly affected by the advance in copper. Demand is not brightening up with the approach of spring, as might be expected, but some inquiry for lock sets is noted. Lines required in country trade and in house constructions are expected to be in fair demand.

Building Materials.—Materials entering into construction and building programmes in general are very quiet for this season of the year, and dealers report that this constitutes to a large extent the comparatively poor business being done in the cities.

Canada Plates.—Further advances in the prices of Canada Plates are noted, although some houses still quote the old figure. Ordinary 52 sheets have a high figure of 15c advance, and the full polish 52 sheets an advance of 25c.

Wash Boards.—The higher cost of zinc entering into the manufacture of wash boards has resulted in an announcement of increased prices. The pony line is up 30c a dozen, the brass 50c a dozen, and the other lines 90c a dozen.

Sheets.—The continued high market for lead has finally affected lead sheets; 3 lb. to the square foot are quoted at $7, an advance of 25c, and 3½ lb. to the square foot at $6.75, an advance of 12½c. Black sheets are covering a considerable range in prices. From 10 to 20-gauge there is a spread of 15c to 25c, and there are some quotations for the 14 to 20-gauge that go as much as 25c above the high which has been quoted. Thus, for 18-20 gauge $2.75 has been quoted, while one large firm gives a price of $2.50, and another house puts the price at $3.

Nails and Staples.—While book orders have been closed, there is a good demand for both nails and staples for immediate delivery, and there should be a good movement after the first of the month. Nails are firm at the base of $2.40 for wire.

Fencing.—There is a good demand for fencing continuing for immediate delivery, and the booking orders have been altogether satisfactory. Deliveries will commence with the 1st of April. There is also a good demand for poultry netting.

Iron and Lead Pipe.—While the demand for pipe is not heavy, prices are very firm, the quotations for both wrought and galvanized being strictly net. Price for lead pipe is 7½c, and lead waste pipe is quoted at 9c, both figures being net.

Rope and Twine.—A fair business is being done under the new prices. Quotations for twine are regarded as favorable under the circumstances, but likely to be subject to advances in view of the unsettled conditions prevailing in the South and probable interference with shipments from Mexico and Yucatan.

Cutlery.—There is already beginning to be an active demand for wedding cutlery. Lent is about over, and nuptial events should be numerous until the end of June. The demand should improve as the latter month approaches.

Bolts and Nuts.—Although the season is now at hand when there should be a better demand for bolts and nuts, normal consumption is not looked for except in the country districts. Some additional interest in these lines is being noted, however.

Woodenware. — Although there are some lines of imported woodenware upon which prices have been advanced owing to war conditions and the advance in duty, the majority of the lines in the Canadian trade are of domestic manufacture and, therefore, they have not been affected.

Seasonable Lines.—In seasonable lines there is a movement of garden tools and lawn equipment, ice cream freezers, etc. This has been rather dampened during the week by cooler weather, but it should revive with the opening of the month.

Utensils.—There is nothing of importance in regard to utensils. The unsettled state of the metal markets makes the future very uncertain, but there are no price changes for the time being.

Stoves.—The approach of warm weather has started a very good demand for gas stoves, and oil burners are also on the move. There is also noted a certain amount of interest in cook stoves, but this is not up to normal.

TORONTO QUOTATIONS.

Tin	54c
Copper	16¾c
Lead	5¾c
Spelter	12-15c
Antimony	25c
Aluminum Ingot	23½c
Aluminum Pattern	24½c
Solder, ½ x ½	33c lb.
Wire Solder	34c lb.
Wiping Solder	27c lb.
Tinker's Bar Solder	35c lb.
Wire Nails	$2.35 base
Cut Nails	$2.70 base
Poultry Netting	45%
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp Rope	11c base
Sisal Rope	10½c base

TORONTO.

TORONTO, Ont., March 31.—Conditions are gradually improving in the hardware market. Orders continue to be on the small side, but are becoming more numerous. Cautious buying is the general rule with a tendency to keep expenses down as much as possible. This is more apparent in the city than in the country districts, where there is a fairly brisk demand for assorted lines. The approach of spring is making the market more active and the outlook is improving.

This has been a quiet week as regards price changes and few advances have been announced. Further revisions will no doubt be made in due course, as the need arises, some possibly on account of the increased cost of raw materials, not necessarily attributed to the new tariff. The rope and twine situation in Mexico does not improve and is causing considerable apprehension with regard to the Yucatan sisal hemp supply. At the recent fur sales in London, it is stated that quantities and prices were about 50 per cent. less than were offered last March. The results were naturally disappointing.

The building trade is not showing the improvement that might be expected at this time of the year and consequently there is not much demand for builders' hardware and other lines associated with the trade. There is a better demand for assorted shelf lines, but stoves and furnaces are moving out slowly. Garden and farm tools are in better demand. The iron and steel trade is rather more active but pig iron is still very quiet. There has been an advance of about 5 per cent. in prices of scissors, snips and hinge butts.

The Metals.—There is an improving volume of business passing although generally in small lots. With the exception of tin and spelter, the markets are firm and unchanged. Tin is gradually recovering after the break in the London market, but has not regained the level reached previously. The spelter market is weak and prices are nominal. There is no change in the copper situation and the market is firm. Solders are unchanged at prices given in the current market quotations. Aluminum is unchanged at 23½c per pound.

Tin.—The market is recovering after a heavy decline in London but has not returned to the original high level, being approximately 4c lower. The market is unsettled on account of the congestion at the London docks and shortage of tonnage. There is little prospect of an improvement in the situation for some time to come. The local market is weaker and quotations are nominal at 54c per pound.

Copper.—It is stated that the British Government has practical control of all shipments of this metal from the United States to Europe; exports, however, continue heavy. The market is quieter but firm, and quotations are unchanged at 16¾c per pound.

Spelter.—The situation has not improved with regard to obtaining prompt shipment of spelter and the market is still irregular. The market is quiet and prices are nominal ranging from 12c to 15c per pound, the lower figure being nearer the market.

Lead.—The market is quiet but very strong, with a possibility of higher prices. Quotations are unchanged at 5¾c per pound.

Antimony. — The market continues quiet at unchanged prices. There is little enquiry and quotations are nominal at 25c per pound.

Scrap Metals.—Prices are firm, especially on copper and brass scrap, but business is dull. Prices are given in the current market quotations.

Bar Iron and Steel.—The steel trade is showing some improvement but it still far from being active. A demand is developing for round steel bars for making into lyddite shells. There is not much enquiry for merchant bars or for structural shapes. Prices on bars are firm but unchanged at $2.05 base.

Lead and Iron Pipe.—The dullness in the building trade is reflected in the iron and lead pipe market, business being quiet. Lead pipe is quoted at 7½c and waste pipe at 9c net. Prices of iron pipe are given in the current market quotations.

Wire Nails.—The market is quiet with light demand. Wire nails are quoted at $2.35 base. Cut nails are quoted at $2.70 base.

Galvanized Sheets.—A reduction of 10c per 100 lb. is allowed on the new prices for orders in half-ton lots. Quotations are firm and are given in the current market quotations.

Kitchen Utensils.—There is a fair demand for assorted lines. Business is reported to be about equal to that of the corresponding period of last year. Prices are firm.

Rope and Twine.—Business is showing considerable improvement but the situation with regard to raw materials is causing some anxiety in the trade. The supply of Yucatan sisal hemp is being interfered with on account of the internal conditions in Mexico. The binder twine market is seriously affected as stores of sisal are reported as having been burned, but the report has not been confirmed, and shipments can only be made with great difficulty. The United States Government, however, is making an attempt to relieve the situation. The scarcity of ships and high freight rates will also tend to firmer prices.

Raw Furs —The fur sales recently held in London have been disappointing to the trade. It is announced that the quantities offered and the prices obtained were practically 50 per cent. less than at the sales last March. There does not appear to be any possibility of any improvement in the fur market and further reductions are anticipated.

LONDON.

LONDON, Ont., April 1.—Owing to unfavorable weather, business has been rather quiet during the week. A number of price changes have taken place here, following changes at Toronto and Montreal.

Linseed Oil Down.—Linseed oil has been reduced four cents per gallon and is now quoted:

	Per gallon.	
	Raw.	Boiled.
1 to 2 bbls.	80c	83c
3 to 5 bbls.	79c	82c
6 to 9 bbls.	78c	81c

Turpentine quotations remain unchanged and are as follows:

	Per Imp. gal.
1 bbl. lots	69c
2 to 4 bbl. lots	68c
5-gal. lots	76c

White lead has advanced and pure is now quoted at $9.10 per 100 lb. in ton lots and $9.40 per 100 lb. in less than ton lots.

Rope, Twine, etc.—Rope remains at the advanced prices quoted last week, as follows:

Pure Manila	14½c lb.
British Manila	12½c lb.
African Hemp	12½c lb.

The 1915 prices on twine are now out and are quoted as follows:

650 ft.	12¾c lb.
600 ft.	10¼c lb.
550 ft.	8½c lb.
500 ft.	8c lb.

WINNIPEG QUOTATIONS.

Ammunition:	
Powder, per keg	$7.50
Boiler Tubes, 2", per foot	10½c
Canada Plates:	
Half Polished, 6-7 inch	$3.80
Full Polished, 6-7 inch	4.95
Solder	32c-33c lb.
Linseed Oil, raw	91c gal.
Linseed Oil, boiled	94c gal.
Poultry Netting	40% off
Galvanized Iron, 28	
Apollo and Fleur de Lis	$5.25
Queen's Head	5.60
Corrugated Sheets, 28-gauge galvanized	**$3.45**
Glass, First Break	**$5.25**
Rope, Pure Manila	16c
Sheet Zinc:	
Cask lots	13¼c
Small lots	13½c
Iron Pipe:	
Galvanized, 1 inch.	$8.15
Black, 1 inch	$5.80
White Lead:	
Pure, ton lots $9.45 less $9.75.	
Barb Wire per Spool:	
Lyman 4 pt., Ft. William	$2.10
Winnipeg	$2.45
Paris Green:	
1-lb. pkgs., per case	23½c
Shot, soft, per 100 lbs.	$10.00
Chilled	$10.60
Buckshot	$10.80
Ball	$11.20
Galvanized ware, heavy, 25 and 12½% off.	

Iron Pipe.—The following prices are quoted on iron pipe:

	Black.	Galvanized.
¼	$ 2.16	$ 3.18
⅜	2.16	3.18
½	2.64	3.74
¾	2.99	4.49
1	4.42	6.63
1¼	5.98	8.97
1½	7.15	10.73
2	9.62	14.43
2½	15.21	22.82
3	19.89	29.84
3½	23.92	35.88
4	23.34	42.51

There has been no change in the nail situation. Wire nails are still quoted $2.35 base and cut $2.70 base.

WINNIPEG MARKETS.

Editor's Note.—For some unexplained reason the Winnipeg weekly market reports had not arrived at the time Hardware and Metal went to press. The omission of a market report is an extremely rare occurrence, and we regret very much that the Winnipeg report is missing this week.

SELF-RELIANCE.

(Continued from page 43.)

What an inspiration there is in the life of the newsboy, Wendell Scoy, who worked twelve years selling newspapers that he might obtain a college education.

During those twelve long years through summer heat and winter snows, this boy stood at the Thirty-third street and Ridge avenue entrance to Fairmount Park in Philadelphia, and by judicious saving accumulated twenty-six hundred dollars, which he put into a four years' course at the University of Pennsylvania.

It would be well for those especially who must make their own way in the world to take to themselves the little fable of the farmer and the mother lark who had built her nest in a field of corn. "We must move our nest at once!" exclaimed four little larks in terror, one day, when their mother came home. "We overheard the farmer say that he would get his neighbors to come to-morrow to help him cut down his corn."

"Oh, there is no danger yet," said the mother; "we can rest easy. But listen carefully to what the farmer may say to-morrow." When she returned the next night the young ones were again much excited. "The farmer was very angry," they said, "because his neighbors didn't come as they had promised, and he declared he would get his relatives to help him to-morrow."

"There is no danger yet," replied the mother quietly, "but listen to-morrow

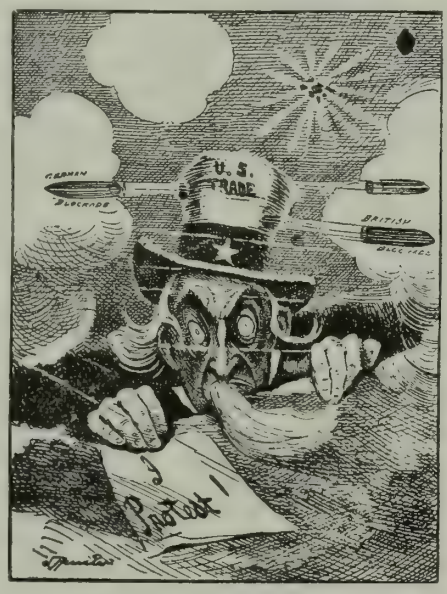
as before." The next evening the birds were very cheerful, and when the mother asked "what news?" they replied, "Oh, nothing important. The relatives didn't come and the farmer in a rage said he would cut the grain himself without waiting for any one to help him."

"Then we must leave our nest tonight," declared the wise mother bird, "for when a man decides to do a thing himself, and to do it at once, you may be pretty sure it will be done."

Don't lose time by waiting for others to help you; do what you can yourself.

The self-reliant man is not dependent on time or circumstances or the service of others. He does things himself, as did a young missionary in a certain scantily settled western district, who had set his heart on building a church there. He had no friends, but he went to a lumber camp and asked that enough lumber be donated to enable him to carry out his purpose. The lumberman, with a rough laugh, said: "You can have as much lumber as you can carry away in your own hands, and not another foot."

Not a bit discouraged, the zealous clergyman took the lumberman at his word, removed his coat, rolled up his sleeves, and went to work. All that day, all the next day, and for many days afterward, he dragged piece after piece of lumber a half-mile away to his church site, until he had actually carried enough to build his church. Now the little ivy-covered, moss-hung building, erected over thirty years ago, still stands in that remote western country, the symbol of the beginning of a better civilization.



"If I wasn't so burdened with a family to support," said a man who was constantly blaming conditions for his lack of success, "I could conquer the earth: but as it is I can do nothing." The day came when he lost his family, when he was free to do as he pleased. Then he moaned: "If I had someone to work for, there would be an incentive to try; but now there is no one to care, so why should I concern myself?"

The very thing that you think is holding you back may be made an instrument of help in accomplishing your desired end, if only you have the self-reliance to forge ahead and compel its service.

Nicholas Longworth died leaving a fortune of $15,000,000, every cent of which he made by using to the best advantage the conditions that confronted him. When a penniless young lawyer, his first case brought him, instead of much needed money, thirty-three acres of barren Ohio land, on which nothing had ever been made to grow. But he couldn't sell it, and he couldn't pay taxes on it unless it could be made self-supporting. In his dilemma he set to work and experimented until he found that a certain variety of grapes — the catawba—would grow just in that sort of soil. He planted all of the land in catawbas and started the great industry of grape culture in Ohio and the beginning of his own colossal fortune.

We must use the means that we have to accomplish our ends. And we will win the battle in spite of defects in our armor; we will succeed with the tools already at hand, if we are built of the sturdy, self-reliant stuff that does not balk at obstacles, nor cry out for assistance at every little difficulty that rises on the horizon.

Time and again, when in London, I have been taken to the Parliament Houses, or to Westminster Abbey by a friend, but whenever I undertook to go alone I was sure to lose my way. When depending on my friend's guidance I never tried to fix in my mind the points which one naturally observes to guide the eye in finding the way for himself.

Uncle Sam in the Trenches.

It is just the same with the young man or woman who follows somebody else in life, who always leans upon others. Experience is of no practical use to such a one, for he never acquires power which is developed only through self-help.

There is one very important point in this connection which must not be overlooked. The ability to stand by one's purposes through thick and thin, through hard times and all sorts of discouragement, requires a great deal of that sort of staying power which depends no little on one's health. Physical vigor is in a certain sense the basis of all achievement that is worth while. The dyspeptic, anaemic man is rarely self-reliant. For the sake of the moral force you exert by means of it, keep yourself in a good physical condition. You cannot afford to go through life borrowing other people's opinions, asking other people's advice, using their judgment, and never developing your own independence, your own good sense and practicality, any more than you can afford to let your pocket be picked by every passer-by. You literally cannot afford to miss a single opportunity for developing your confidence in and reliance on yourself.

Twenty Years Ago
In the Hardware Trade

The following items are taken from the issue of Hardware and Metal of March 30, 1895:—

D. J. Cowan, of London, was a business visitor in Toronto this week.

Editor's Note. — D. J. Cowan, of Cowan's Colossal Hardware is still in business at London, Ont.

* * *

J. A. W. Allen, of Newmarket, was a business visitor in Toronto this week.

Editor's Note.—Lieut.-Col. J. A. W. Allen is still in the hardware business at Newmarket, and has volunteered for active service in the second contingent.

* * *

Hardware and Metal of twenty years ago gave weekly market reports and in the issue of the above date a complete weekly report was given.

PROPOSED BULK SALES ACT, 1915.

(Continued from page 33.)

or affest any sale by an assignes for the general benefit of creditors or to any sale under distress or under due process of law.

7. Nothing in this Act shall affect the title to any goods, wares, merchandise or chattels in the hands of a bona fide purchaser for value from the purchaser or transferee under a sale in bulk, without notice that the conditions of this Act have not been complied with, and where the purchase is made in the ordinary course of the business of the person selling or transferring the same.

A "What d'you want?" telephone clerk will put a crimp in the store's telephone business in less time than it would take to give that clerk some valuable instruction.

Paint Department

Clean Up and Paint Up

Plans are Under Way in Many Places for Spring Clean-Up and Paint-Up Campaigns—Newspapers Taking an Interest—What Some Cities are Doing.

THE newspapers in various parts of Canada are beginning to take an interest in the "Clean Up and Paint Up" movement which was boomed and carried out successfully in many Canadian towns and cities last year. Plans are now under way in many places for clean up campaigns and it is expected that during the month of May the movement will assume large proportions.

At Regina, Sask., one of the leading newspapers a few days ago announced that plans are being laid by the health department of the city and a number of public spirited citizens for another grand clean-up campaign this year such as has been conducted for the past two years in Regina with great success. It is expected that the campaign will, as in other years, be a short and sharp one, beginning about April 1st and culminating in a grand "Clean Up Day," on May 1st. It will be carried on jointly by the health department and a committee of citizens, and the aid of the schools, churches, business houses and picture shows will be solicited.

Last year and the year before special lessons on sanitation were taught in the public schools, the ministers preached sermons on the value of such a campaign in maintaining the public health, and special films were shown at the various moving picture shows depicting the changes wrought in other cities by similar campaigns.

At Montreal the mayor has opened a new phase of his clean up campaign by writing to the Protestant Board of School Commissioners, asking the members to see that school premises are made tidy, and suggesting that the children who attend the schools be taught that they must not throw paper or rubbish in the streets and so cause a dirty city.

His worship announced at a session of the Board of Control that he was next going to write to the Catholic School Commission, and then he would approach every priest and minister in the city with a view to having all co-operate in the great clean up. Every moving picture house in the city is to receive a letter asking that some mention of the clean up be made in a slide to be thrown on the screen two or three times a day.

At Vernon, B.C., Mayor Smith strongly advocated the inauguration of a clean up day at a recent council meeting. He said that many of the vacant lots, yards and premises in the city were in a very untidy condition, and that a vast improvement might be effected by a little concerted action on the part of the citizens. The aldermen supported the idea, and the matter was referred to the Health Committee with power to act.

A Walkerville, Ont. despatch states that the annual order issued by the Walkerville Board of Health, requiring every householder to join the Loyal Order of Spring Cleaners has again gone forth.

For many years the residents have heartily co-operated with the officials in keeping the town in first-class shape.

This year the clean up campaign will last from April 16 to May 10, and during that time the boss of the house is expected to get busy and put his (or her) premises in good shape.

In addition every householder is required to use a sanitary garbage pail. This provision will be rigidly enforced.

After the 10th of May Sanitary Inspector Forrest will make his rounds of inspection and anyone who has disregarded the order of the Board of Health will receive a business call from either Chief Griffith or one of his staff.

Ottawa's 1015 fire prevention and clean up campaign may be held one week later in May than last year. Chief Graham has stated that in his opinion about May 15th will be the ideal time for the holding of the campaign.

The date of May 15th comes on Saturday, and thus if Chief Graham's views are carried out the big spring clean up campaign, will likely get under way about May 13th.

The dates of May 6, 7 and 8, the latter part of the first week, have been favorably suggested, and in some circles regarded as the most probable dates for the holding of the campaign.

Chief Graham, while agreeing with the feasibility of an early clean up, points out that moving operations do not usually conclude until around May 5th or 6th, and thus the people are not all ready to swing into line for the clean up.

"After the people have moved, then a real and general clean-up can be made," said the chief.

The campaign this year will likely be three days in duration, and will be proceeded with along some of the lines employed last year.

The Halifax, N.S. Civic Improvement League has taken the first step in the clean up and paint up campaign for the coming spring. The dates for clean up week have not yet been selected, but some preliminary work has got to be done before this and ather details are decided upon. In the meantime a special general meeting of the League has been announced to take place in the Board of Trade Rooms, when plans wil be discussed.

It is proposed to make an earlier start with the movement this year, because it is desired to expand it. One of the League's aims is to encourage home gardens, the care of parked sidewalks, the planting of street trees, the use of window boxes, and so forth. A campaign to popularize all this, which would materially add to the improvement of the city, could be made to synchronize splendidly with the clean up campaign, and this matter will be discussed fully at the special meeting, which will be open to the public as well as to members of the League. A suggestion will be submitted for prize competitions.

Weekly Paint Markets

MONTREAL.

MONTREAL, April 2.—The brisk demand from country sections of Eastern Canada continues with the approach of the opening of navigation and the prospects for better shipping facilities. Consumption in the cities and manufacturing towns and throughout Eastern Canada continues comparatively small and, with the conditions prevailing, there is not much prospect for renewed demand until manufacturing and building becomes more normal. Western Canada is expected to improve with the crop developments.

Talk regarding higher prices is taking more definite form, but nothing more as to the date when the increase will go into effect can be obtained than that it is likely to be some time before the 1st of May. Higher prices for shellac, varnish and Paris green are noted, and there are indications of a split in the glass market, although the basis continues the same.

Linseed Oil.—There is a firmer tendency in the oil market than a week ago, although the prices remain about the same. Crushers continue the quotation of 74c for raw and 76½c for boiled, while the average prices in the trade are from 78c and 81c to 80c and 83c, with the top of the market still at 82c and 85c.

	Raw.		Boiled.	
1 to 2 bbls.	74c	82c	76½c	85c
3 to 5 bbls.	73c	81c	75½c	84c
6 to 9 bbls.	72c	80c	74½c	83c
10 bbls. & over	71c	79c	73½c	82c

5-gal. cans, 50c each; 10-gal. cans, 75c each.

Gasoline and Benzine.—Better weather and the approach of the opening of navigation continue to encourage a better demand for gasoline. Quotations continue at 15c for drums and 14½c tank wagon.

Turpentine.—The turpentine market is easier and very unsettled. In the trade quotations show little change, although the range is a cent lower with the same high. Refiners report a lower level, 62c being heard, which is a decline of 4c for the week.

	Per gal.	
½-barrel lots	68c	71c
1-barrel lots	65c	68c
2 to 4-barrel lots	64c	67c
5 to 10-barrel lots	62c	66c

Glass.—The glass market is very much unsettled. The advance predicted as the result of the increased tariff has not gone into effect formally, the same base prevailing as for some time past. However, there are indications that dealers are not all of one mind, and that there are some individual prices being quoted.

Lead and Zinc.—The lead market is very firm on the advance noted last week; in fact, the quotations on "pig" have advanced further, and still higher levels are indicated for the near future. Zinc also continues very strong, with some dealers refusing to quote.

Paris Green.—An advance of 2c lb. all round on Paris green went into effect on the 26th. This is in sympathy with the higher cost of raw materials, and was looked for in view of the fact that the opening quotations were really below the market, and were adjusted to suit the conditions following the very light consumption last year. Paris white, whiting, dry colors, etc., are very much unsettled, and are likely to continue so until more normal conditions prevail in relation to the sources of supply.

Shellac Varnish.—General advances have been made in the prices of shellac, practically all kinds and brands being affected to the extent of 15c a gallon. The increase in the cost of chemicals is given as the chief reason for the change.

TORONTO.

TORONTO, Ont., March 31.—A decided improvement in the demand for paints, white lead, etc., is noticeable this week both from the country and and city trade. The latter is showing more activity than for some time past, while the country trade is almost equal to last year. The only price change to report this week is in Paris green, which has advanced 2c per pound. Other price adjustments, however, are contemplated and may be announced shortly. It is interesting to note the extent to which raw materials have advanced since last October. The increases are due to various causes, such as the higher tariff, scarcity of some materials, increased demand and high freight rates, etc. It follows that with materials increasing in cost to such an extent, mixed paints, varnishes, enamels, dry colors and other lines affected are bound to advance in price. White lead has already advanced, but revision of prices on other lines has not been completed. The following are a few percentage increases since last October:—Pig lead, 18 per cent.; zinc oxide, 57 per cent.; linseed oil, 40 per cent.; earth colors, 7½ per cent.; chemical colors, 100 to 200 per cent. An advance in putty may be expected at any time. Collections are fair.

Linseed Oil.—The flax seed market at Winnipeg is higher, and is firm at 1.77. Linseed oil, however, has not recovered from the lower level reached last week. There is very little oil moving, otherwise the market would no doubt advance. The following prices are being quoted in Toronto:

	Raw.	Boiled.
Single bbls.	80	83
3 to 5 bbls.	79	82
6 to 9 bbls.	78	81

Turpentine.—The market is firm, but unchanged. Stocks are light in the South, and the new turpentine will not be on the market for two or three weeks yet. The local demand is light and the market is quiet. The following prices are being quoted in Toronto: Single barrels, 69c; 2 to 4 barrels, 68c; and 5-gallon lots, 76c per Imperial gallon.

White Lead.—There is a fairly active demand for white lead at the advanced prices announced last week.

Paris Green.—An advance of 2c is announced for Paris green. Prices are given in the current paint market quotations.

Mixed Paints.—The demand is improving and prices are firm. Owing to the increased cost of materials, prices of mixed paints will no doubt advance in the near future.

Glass.—There is no change in the glass situation, and the market is firm. An advance in prices has been under consideration for some time, but it is doubtful if there will be any change in the immediate future. The demand continues light, and stocks are fairly heavy.

Putty.—The market is firm, and an advance in price may be expected any time. The following prices are for standard putty in less than ton lots:

(Continued on page 50.)

TAKE TIME BY THE FORELOCK

YESTERDAY perhaps you wondered what paint line you would handle this Spring. Past experience decided you to handle nothing but B-H "English" Paint.

TO-DAY if you will sit down and drop us a card asking for information,

TO-MORROW or a few days after, you will receive full information as to our selling plan, terms, arrangements with agents, advertising campaign, etc.

THE DAY AFTER you receive your stock, you will have a great many enquiries and good starting sales of B-H "English" Paint.

A WEEK AFTER you will probably wish you had ordered twice as much, as the demand for B-H "English" Paint is growing all the time.

A MONTH AFTER when you have received your second order and have sold it out, you will be congratulating yourself on the increased sales and extra profits.

THE YEAR AFTER you will be handling B-H "English" Paint again.

ELEPHANT GENUINE WHITE LEAD

A favorite with the paint trade for more than fifty years

The facilities of The Canada Paint Co., Ltd., give them absolute control of the production of Elephant White Lead from start to finish. Every package is of high, uniform quality—always. The painter buys Elephant Lead because he knows he can depend on it in every respect. It is one of the best known brands on the market and is a standard line every paint dealer should stock.

The attractive Elephant White Lead poster, printed in four colors, will bring painters into your store. Now is the time to send in your order if you have not already done so.

THE PLANT BEHIND OUR PRODUCTS

Since 1835 John Chatillon & Sons have been making Scales. These scales have acquired a wide reputation because of their superiority of workmanship and construction.

The Universal Sale of CHATILLON SCALES

is constantly increasing. Our products stay sold. They have a number of imitators, but no superiors. All our scales are warranted to be accurate and perfect in workmanship. Our policy is quality products and fair prices.

Our complete line of BUTCHERS' CUTLERY

knives, cleavers, steels and cutlery for hotel, restaurant and kitchen use, has acquired a reputation for excellence. The users of our line of cutlery are universally satisfied.

For twenty-five years our skilled workmen have been producing this cutlery. The steel is especially adapted for the purpose—tempered by our own process. The high standard of quality that has made John Chatillon & Sons' products world-famous is maintained throughout this line.

Interesting illustrated catalogue upon request.

RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."

"The Right Paint to Paint Right."

PAINT AND VARNISH MAKERS

WINNIPEG and CALGARY

Handle your Oils and Gasoline with the

Wayne Pump

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness.

Throws a pint, quart, half-gallon or gallon, and measures exactly.

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts accurately machined and thoroughly tested, and are interchangeable.

If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

THE WAYNE OIL TANK AND PUMP COMPANY

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Exclusive Factory Agent TORONTO.

WHEN A MAN CALLS FOR A GOOD FILE HE NATURALLY EXPECTS YOU—

(as a man of experience in handling files), to supply him with the best. If you disappoint him he'll go to your competitor next time and probably remain his customer.

Delta Files

always meet such demands with reorder producing satisfaction. They are the only line of files from 3 to 24 inches that is made absolutely of crucible steel. This, in conjunction with half a century's experience in cutting and tempering, makes the Delta a distinctly superior file and one that cannot be spoken of too highly.

We make a shape and size for every purpose.

Order from your jobber. If he cannot supply you, write us.

TRADE MARK

DELTA

SEE THAT OUR TRADE-MARK'S ON THE TANG OF EVERY ONE YOU RECEIVE—IT'S A SATISFACTION OR MONEY BACK GUARANTEE.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

YOUR GUARANTEE

INSTALL Gipe-Hazard Carriers — use them ten days—put them to every test—and if they do not give quicker, better and more satisfactory store service than any other system, they may be returned at our expense. Fair enough, is it not? Investigate our modern Electric Cable Cash Carrier and Pneumatic Dispatch Tubes.

Send for our new Catalogue F.

GIPE-HAZARD STORE SERVICE CO., LTD.
97 Ontario St., Toronto, Canada

A Few Dollars More a Week

makes a big difference in your yearly income.

Have you ever thought how you might add to your weekly salary without interfering with your regular work?

Will you let us solve this problem for you?

So far this year, we have shown seventy-five enterprising and ambitious clerks how to make $5.00 a week more during their spare hours. They will each make additional salary every week this year, and longer should they wish.

If you would like us to show you, write to-day.

This is genuine.

NORCROSS

Garden Cultivator-Hoes and Weeders

"Norcross" tools work between rows, or middle shovel may be removed and the rows straddled, and much finer work accomplished, because they will cultivate closer to delicate plants without injuring them, than any other type of garden tool known.

They are EASY TO HANDLE, DO VERY RAPID WORK, and LEAVE THE SOIL LOOSE AND UNTRAMPLED.

SELL FOR BUT LITTLE MORE THAN THE ORDINARY HOE, AND LEAVE A VERY LIBERAL PROFIT.

WRITE US FOR PRICES, TERMS AND FURTHER PARTICULARS.

Convenience Quickness and Economy
that fills a long-felt want

The "CANNON OILER"

FORCES THE OIL ANYWHERE by simply pressing on the plunger. The oil is entirely controlled by the operator in whatever position the can may be held.

SAVES THE OIL. As the flow of oil ceases the instant the pressure on the plunger stops, not a drop of oil need be wasted.

TRY IT. THE SALES WILL SURPRISE YOU.

DU PONT POWDER CO.

Established 1802

WILMINGTON, DEL.

Heller-Aller Force Pumps

"The very profitable and reliable kind".

Pump Cylinders are made of heavy brass tubing, which has a double advantage.

It ensures the very best wear and permits the use of very coarse thread on cylinder caps (eleven threads to the inch). This prevents the cap threads from wearing or rusting off and dropping into well.

Heller - Aller Force Pumps are equipped with the most efficient, tried and tested valves. They never fail in service.

Write for full information.

The Heller-Aller Co.

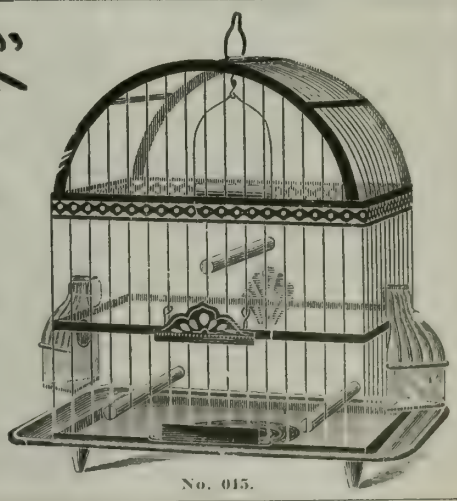
Windsor, Ontario

No. 72L.

"HENDRYX"

A Word for Quality

Japanned Cages



are unequalled in design, finish and low price.

The finish includes three coats of white enamel baked on and the colored stripings added.

Over 100 styles to select from contained in our complete catalog.

The COLT Covers It All

ACCURACY: The COLT Automatic is a perfectly balanced, easy-shooting, hard-hitting pistol.
QUICKNESS: The COLT Automatic is ready for instant use. "The COLT fires the first shot first."
SAFETY: The COLT is automatically locked against unintentional discharge. You must **grip the grip** and purposely pull the trigger to make a COLT let go. "You can't forget to make a COLT safe."
CONFIDENCE: The COLT feels right, acts right and, because it is automatically safe, it is an antidote for fear in the hands of gun-shy men and women.

The COLT Automatic

"The Colt Fires the First Shot First"

"You can't forget to Make a Colt Safe"

costs more to make, because of its automatic safety features, but its price is no more than an ordinary pistol.

PRESTIGE: The COLT was adopted by the U.S. Army and Navy because of its "marked superiority to any other known pistol." Show the COLT Automatic to everyone interested in firearms, let them examine it, compare it, handle it and the COLT will sell itself. Give them the booklet, "How to Shoot," and Catalog.

THE COLT'S PATENT FIRE ARMS MFG. CO., Hartford, Conn., U.S.A. or **A. MACFARLANE & CO., Coristine Bldg., Montreal**

Jenkins Bros.' Discs

Backed by 50 Years' Experience

Discs for valves were one of the first, and continue to be one of the most important of the JENKINS BROS.' products. They are all scientifically compounded from those ingredients which long experience has taught us to be the most durable for each particular class of service.

Made in compositions to suit either Steam, Hot and Cold Water, Air or Gas Service.

Accept no Substitutes

Numerous imitations, for which superiority is claimed because of newness, are on the market. Is it not a case of the "just as good" claiming to be better?

Certainly every user will agree that a concern long in business by merit of **service is better** equipped through experience to keep abreast of the times and to make improvement where improvement is needed

STOCKED BY ALL DEALERS.

Write for Catalogue.

The "MADE-IN-CANADA" Rifle

The "Ross Rifle" is made in Canada—which means that repairs, spare parts, new barrels, etc., can be obtained quickly, and without vexatious customs delays.

Quite aside from any *sentiment* there is a reason why Canadians should buy Ross Rifles, made in Canada. And Ross Rifles are 100% efficient.

Ross Rifle Company

QUEBEC, CANADA

Androck Guard Handle Dust Remover

A REAL CARPET BEATER

It is put together to last; made just as good throughout as we make other things, and once in your hand, the sale is made. It really does feel good in the hand—it has the RIGHT HANG, you know—it balances perfectly the moment you grip it.

The GUARD HANDLE gives a grip that is secure, and prevents knuckle-barking, because the knuckles do not reach the lower part of the handle at all.

This sturdy beater represents big value at 15 cents. We also make other styles that sell from .10c to 25c.

Have a good stock on hand SOON, for the BIG carpet beater season is almost here.

PEMBROKE - - ONTARIO

MADE IN CANADA

It's a Pink anyway you take it, and it's the best Peavey made.

At the rear, he has built an office for himself and bookkeeper, which is airy and receives plenty of light from a rear window. The writer found a pile of trade papers and catalogs on his desk, the presence of which Mr. Boucher explained by the fact that he had been away several days. He intended going through every one of them carefully. Any article in the trade papers which he considers likely to be helpful, he marks. They are then passed on to the clerks for perusal, one of whom clips the special articles, and files them for reference. Catalogs are examined carefully and only those considered useful are filed.

It was observed by the writer that the advertising pages of a hardware trade paper lying on the table were clipped. "You will excuse me for saying it," said Mr. Boucher, "but I often find the advertising pages more interesting than the editorial. That is perhaps the chief reason why I buy the trade papers. Those clipped are the ones to which I have replied."

From Hardware and Metal
March 27 issue, page 32.

The above extract, from last week's issue of Hardware and Metal, refers to the methods of a successful hardware merchant in St. Hyacinthe, Que. The money he spends in subscribing to Hardware and Metal works overtime for him. Do **you** secure the maximum benefit from **your** subscription to Hardware and Metal?

X-Ray view showing the **UNIVERSAL** Method of percolation, the Patented Pumping Device and Spreader Plate. Note how evenly the water is distributed over all of the coffee.

By this method all of the healthful, flavor-producing elements of the coffee are extracted before the water boils.

UNIVERSAL Coffee Percolators

circulate the water through the coffee six to ten times more than any other make, extracting every bit of the flavor and aroma from the coffee berry and making the most delicious beverage imaginable.

By the **UNIVERSAL** Process the water starts circulating through the coffee as soon as heat is applied to the percolator, and before the boiling point is reached percolation is completed and the coffee is ready to serve.

UNIVERSAL Percolators are made in various designs and sizes in Aluminum, Porcelain Enamel, Copper polished or with nickel or silver-plated finish. Prices to suit every purchaser

Money In Salesmanship

The trained salesman is practically independent. Scores of business houses seek his services.

It should, therefore, be the aim of every young man to qualify himself for a higher position. He can accomplish this in his spare time, just as hundreds have done.

No work so quickly develops poise, self-reliance, ease, ability to grasp situations, instinct to meet the demands of the moment, and the capacity to meet men of their own level, as representing MACLEAN'S.

This work puts you in touch with the prominent men of each town, a connection of inestimable value. We require representatives in nearly every town and center of population in Canada. You can make from $5 to $10 per week in addition to your regular salary. We give you a practical training that is worth consideration.

Write us to-day for particulars.

"Salesmanship is Co-operation"—help the buyer select what he wants!

And what the buyer—your customer—wants, in an ice-cream freezer, is one which will give a firm, velvety-smooth product quickly, with least labor.

This is exactly what is achieved by the *triple motion* feature of the White Mountain freezer.

Triple motion means that, in operation, the container and its *two* dashers revolve each in an opposite direction to that immediately beside it. And since motion is a prime requisite of good freezing, this is why ice-cream can be made more quickly in this machine, and come out smoother than by any other method.

Strong and durably made:
Sound tubs—Malleable castings—Strong cans heavily coated with tin.

Simple and easy to operate:
Smooth, uniformly-frozen cream in three minutes.

Clean and sanitary:
Can, dashers, etc., all removable for cleansing.

Made in sizes suitable to every household and sweets-shop.

The only Triple Motion Freezer on the market.

They're files that dealers are proud to sell. Because they're as *uniformly* perfect as 50 years' experience—5 great plants—and the finest machinery can make them.

And they're profitable files to sell. They're advertised consistently in every field. Recognized in every industry as World-Standard Files. Stocked in large quantities at the factory—so that you need only a small stock on your shelves. That means many quick turn-overs—and the best net profit on your investment.

From every angle, the "Famous Five" are the RIGHT Files to handle. Why not write to-day for "File Filosophy" and our complete catalog?

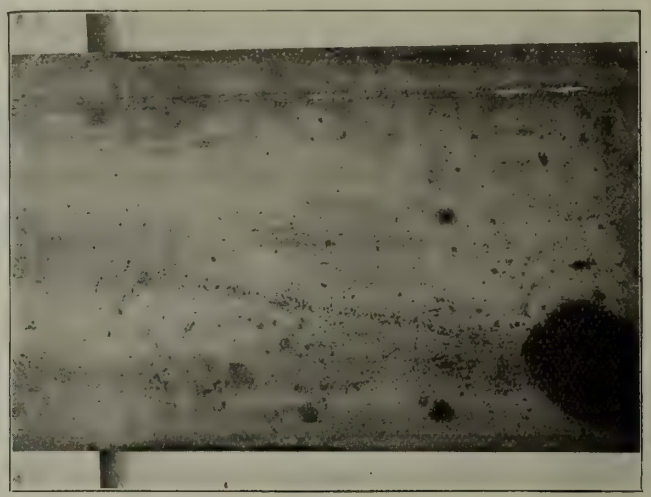
The Watch for Hard Wear

Ingersoll

Practically every man carries a watch. He wants it, not as a jeweled ornament, but as a **timekeeper.** It must companion him in his every-day life — must go through all his activities and exertions without missing a tick. Like modern clothes, the modern watch must allow for freedom of action.

Such a watch is the Ingersoll. Thoroughly accurate and reliable, timing as closely as a man **needs** to be timed, it will yet stand harder usage than any other timekeeper made. Even the extreme strains of military campaigning affect it little, as scores of letters from the front have testified.



The Opportunities for Ingersoll Sales are Almost Limitless.

The man purchasing outdoor goods doesn't need much persuasion to add an outdoor watch. Every buyer of hardware or tools is a watch user. In fact, hardly a customer coming into your store but is an Ingersoll prospect. A display of the watches in your window, a case of them on your counter, is usually a sufficient reminder.

You do not have to buy Ingersolls in large quantities to get Ingersoll selling helps. They are included in every order, however small. Ask your jobber for particulars or address

Robt. H. Ingersoll & Bro.

200 McGill St., Montreal, P.Q.

The Fight for Durability

Chapter XII.

The streak along the top edge of this bar is clay. The lining of the furnaces and the ladles is subject to a heat of at least 2800° F.

The temperature at times melts the bricks and scours off the ladle linings.

It is not unusual for this clay to imbed itself in the metal.

It is obvious this will cause trouble if permitted to go into the finished sheet.

It offers unusual resistance to the sulphuric acid in pickling and can sometimes be removed only with hydrofluoric acid.

The galvanizing will sometimes cover it, but the coating is scabby and inferior.

It will crack the coating and even the sheet when formed up, and offers another inviting spot for rust to begin its deadly work.

ARMCO IRON
Resists Rust

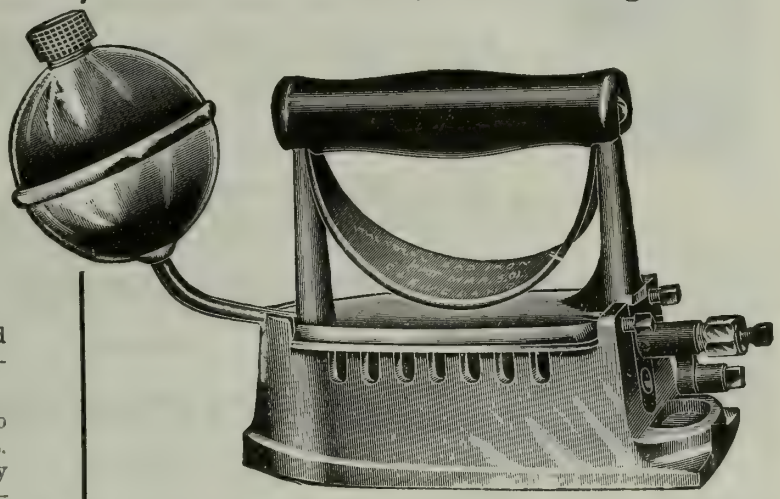
Clay bars must be carefully sought and rejected to insure durability.

This trouble is always entirely eliminated in our product and this removes another cause for rapid corrosion. No clay in Armco-American Ingot Iron.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.



Licensed Manufacturers under Patents granted to The International Metal Products Company.

"IDEAL" Gasoline Iron

Self-Heating

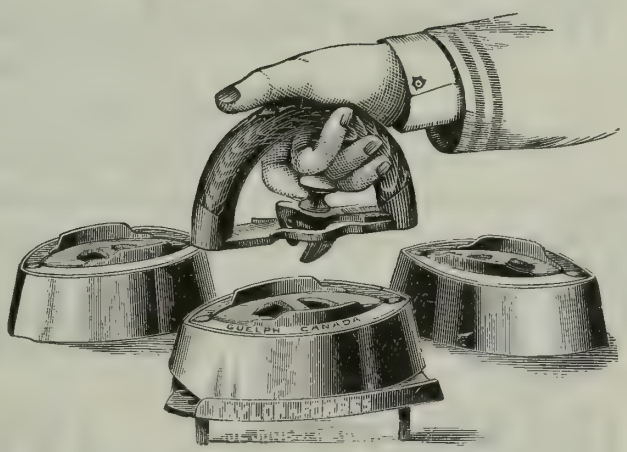
The Ideal is made from the highest grade material. BURNER AND GENERATOR ARE MANUFACTURED UNDER THE DIRECTION OF MEN WITH 20 YEARS' EXPERIENCE IN SUCH WORK.

Exposed parts are nickel plated and polished, giving the iron an ATTRACTIVE APPEARANCE.

When the "Ideal" is hot enough to iron heavy linens there is but 2½ lbs. pressure on the tank—while every tank is tested to stand 175 lbs. — THIS INSURES ABSOLUTE SAFETY.

Cost of operation is less than one cent per day for a family of five.

A tank of gasoline will burn for four hours.



Heat can be regulated to suit conditions.

No possibility of scorching clothes.

There is no gas, the combustion being perfect.

Handle and operator always cool.

Directions accompany every iron and we guarantee satisfaction if operated according to directions.

MRS. POTTS Cold Handle Sad Irons

GENUINE PATTERN. No. 50, nickel plated. No. 55, polished japanned top, stand coppered.

Sleeve Irons

Nickel face, plated top, with narrow point suitable for finest work; lace, waists, etc.

Regarding Hack-Saws--

You men in the hardware trade can never really appreciate what a nuisance the question of hack-saws is to the factory foreman or superintendent until you have heard the complaints of the workmen regarding breakage, easy dulling, teeth stripping, etc.

We faced these troubles in our own tool works until we got tired of them—and just a little bit "mad." Then we set to work and experimented with materials and processes until finally we produced a line of saws that suited us so well that we are willing to put our name on them. Because of our reputation as tool makers we know that

The Name Starrett Will Sell These Hack-Saws

Everyone knows we are old enough and big enough so that we would not put our name on a product that can't make good. As a hardware dealer you can make the initial sale of these saws on the strength of the name, and we are positive that after your customers have tried them they will come back for more.

The reason is this: We have selected a certain tungsten-alloy steel which we make into hack-saws—tempered by a secret process, developed by ourselves, which secures uniformity. The teeth are milled, not stamped out, and they are set evenly and perfectly by another exclusive Starrett process.

Now we want to sell these saws because we know they will cut quicker and last longer than other saws. It is a good line for you because of profits and repeat sales.

BY INVITATION MEMBER OF

Ask our salesmen for prices. Write for free catalog No. 20-M.A. showing the proper saws for various uses.

HARDWARE AND METAL

Vol. XXVII. APRIL 10, 1915 No. 15

Activity in the Retail Association

Membership Contest Starts April 15—Officers Planning Big Things for the Association—Price Book to be Supplied to Members—The New Secretary Plans Service Department.

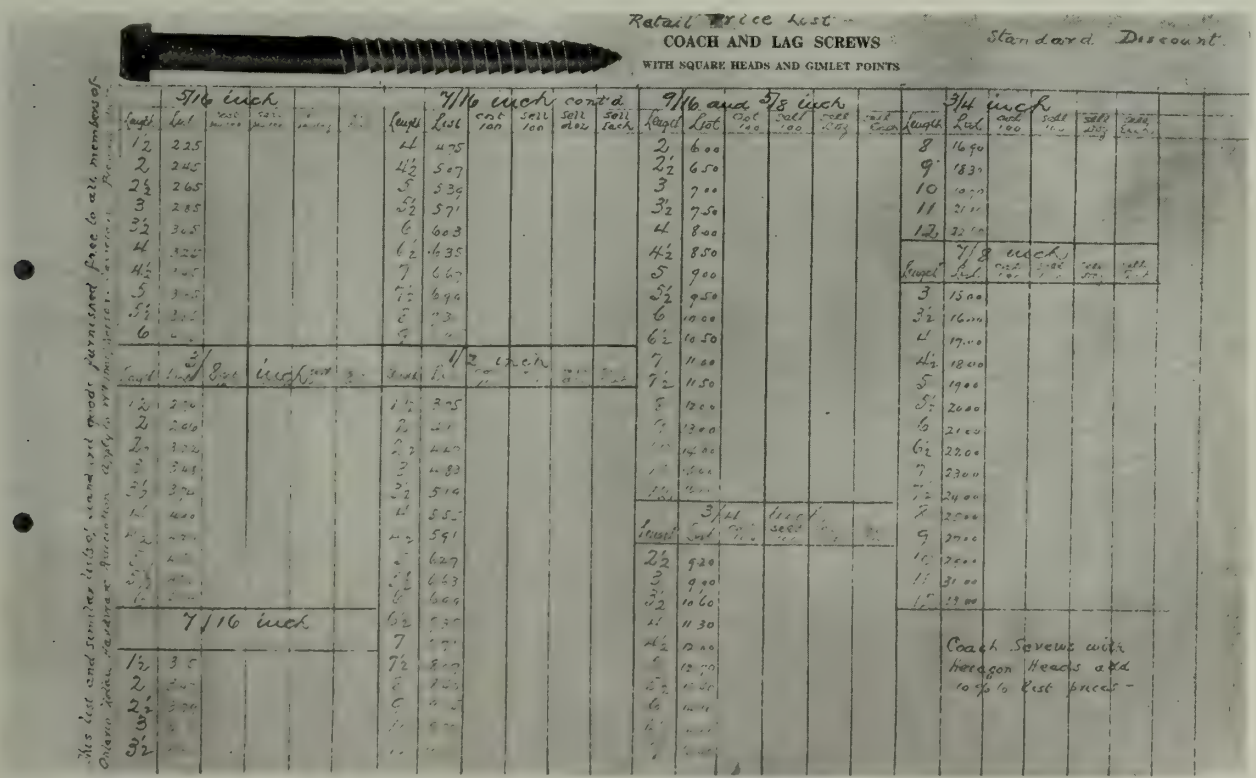
A FEW weeks ago Hardware and Metal stated that the newly elected officers of the Ontario Retail Hardware Stove Dealers' Association had plans underway for instilling new life into the Association, increasing the membership, and for giving the retailers a real service between conventions.

The officers of the Association have been working hard, and at a meeting of the executive held at the Queen's Hotel, Toronto, this week they were able to report considerable progress.

In the first place it should be remembered that the officers of the Association are practical hardwaremen and they have firmly determined to accomplish big things this year.

Arrangements are almost completed for the membership contest referred to in Hardware and Metal some time ago. The contest promises to be a real live one. Five teams are entered in the contest. The contest opens on April 15 and will close on Jan. 15, 1916. The cost for joining the Association is only three dollars for merchants; one dollar for clerks; one dollar for travellers.

Rules for Membership Competition 1915



Competition to open April 15th, and close Jan. 15, 1916

(1) Captains to select teams from following districts.
  (a) Central—Niagara Peninsula.
  (b) Eastern—All Ontario east of Toronto.
  (c) Northern—Toronto to Barrie.
  (d) Western—All Ontario west of Brantford.
  (e) New Ontario—New Ontario north of Barrie.

(2) Applicants for membership may be received from any eligible firm or person, by members of any team, regardless of territory in which the applicant resides.

(3) The secretary shall furnish different colored application forms to captain of each team, and shall credit application to the proper team, whether sent in direct or through a member of the team.

(4) The Secretary shall not be a member of any team, and applications received by him, through the service to members plan, shall not be counted

Suggestion submitted by Secretary Macpherson, for price sheet on coach and lag screws for the new loose-leaf price book which is being prepared for the Ontario Retail Hardware and Stove Dealers' Association and which will be supplied to members free of charge. This sheet shows the page in rough form. The finished sheet will be neatly printed on a high quality paper.

C. W. CONN,

Tillsonburg, President, Ontario Retail Hardware and Stove Dealers' Association.

by any team, unless made on the colored forms, furnished to each team.

(5) Scores to be counted by points, as follows:

Member 3.00	fee	30 points
Clerk 1.00	"	10 "
Traveller 1.00	"	10 "

(6) No score to be counted, until fee is in the hands of Secretary.

(7) Secretary shall furnish to members of all teams, full details of Service plan to members, and all other assistance in his power.

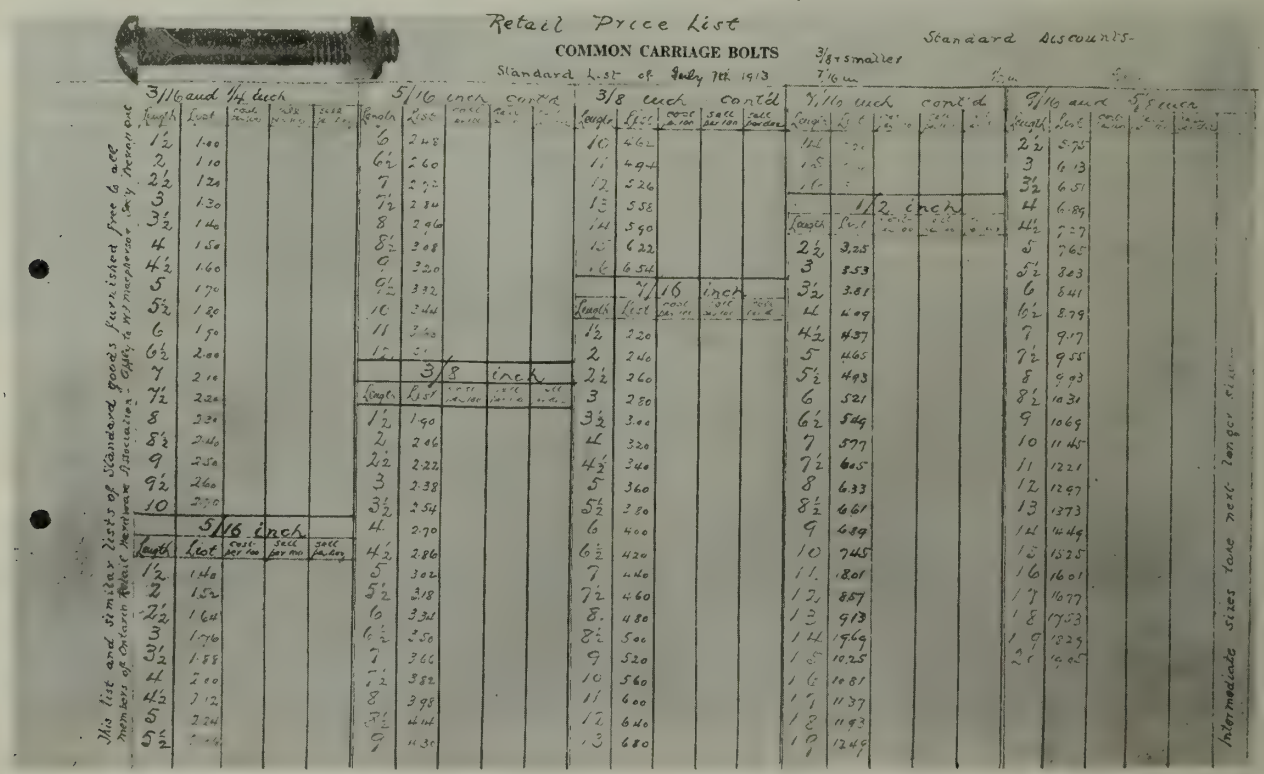
(8) Captains shall furnish Secretary with names of members of their teams, and may add to same from time to time, either from new or old members. The number of men to each team is not limited.

(9) The secretary shall at stated periods advise the members of the teams with the respective standing of the teams as an incentive to renewed vigor.

(10) The procuring of a suitable Banner or Trophy for the winning team, shall be left to the Advisory Committee.

(11) All disputes or complaints shall be referred to the Advisory Committee, and their decision or action will be final.

(12) An appropriation of $100.00 being $25.00 to each team will be allowed for expenses, and accounts for expenses shall be rendered to the Secretary by the Captain of each team when voucher will be issued by the Secretary, up to the amount of the appropriation.



(13) The Executive or Advisory Committee may in addition to this competition, arrange for a travelers' competition should they deem advisable.

Retail hardwaremen throughout the province are urged to lend all possible assistance in the membership contest and to assist the officers of the O. R. H. & S. D. A. in building up an Association that will be a power in the trade. There is much work for a retail hardware association to do, and with the support of the mayority of the retailers in the province the Association will be able to undertake many big problems in the interests of the retail hardware trade. Many problems of vital interest to the retail hardwaremen are developing every week and it is highly important that there be some influential body to handle these matters as they come up.

In the next issue of Hardware and Metal which will appear two days after the opening of the contest, the names of the district captains, with additional details regarding the contest will be published.

W. F. MACPHERSON,

Prescott, Secretary, Ontario Retail Hardware and Stove Dealers' Association.

Suggestion submitted by Secretary Macpherson for price sheet on common carriage bolts for the new loose-leaf price book which is being prepared for distribution to members of the Ontario Retail Hardware and Stove Dealers' Association. *See cut on page 25.*

W. F. Macpherson, Prescott, Ont., who was elected Secretary of the Ontario Retail Hardware and Stove Dealers Association at the last convention stated some time ago that he was planning a service department for the members of the Association.

Some of the first fruits of Mr. Macpherson's labors are presented to retail hardwaremen in this issue of Hardware and Metal. Two illustrations show in rough form sheets from the members price book that is being prepared for members of the O. R. H. & S. D. A. This price book, of loose leaf design, will contain price sheets giving correct lists, sizes, etc., of carriage bolts, coach screws, wood screws, bar iron and many other lines. On each sheet spaces will be provided for cost prices, gross or hundred prices, dozen prices and each price. Any hardware man can see at a glance that this is a valuable feature. The sheets will be of a high quality paper, neatly printed and ruled and the price book will be worth far more than the cost to join the Association.

One of these price books complete with cover will be supplied to every member of the Association without additional charge. The three dollar membership fee covers all costs and entitles the retailer to all the benefits of the Association's account collection system, convention meetings etc., as well as securing for them a price book which alone is worth more than the three dollars. The two illustrations shown here are only in the rough form but the complete set will soon be in the hands of the printers and when completed will be reproduced in Hardware and Metal along with complete details. Secretary Macpherson has a number of other new features which will be introduced in the service department from time to time.

The Association is now doing practical work,—work that will benefit the retail hardwaremen. The place of the next convention has not been definitely decided upon but some members are inclined to think that London, Ont. will be the chosen city. Watch Hardware and Metal during the next few weeks for particulars regarding the activities of the retailers' Association.

Moved Offices.

L. G. Beebe, manufacturers' agent, Toronto, has moved from the Foy Building, to more commodious premises in the Webster Building, 53 Yonge street.

H. M. Smith, American sales manager of the Hutchins-Kilbourne Co., Buffalo, was a business visitor in Toronto last week.

More Opinions of Spring Number

IN last week's issue of Hardware and Metal appeared a large number of letters from prominent hardware firms giving their opinion of the annual spring number of Hardware and Metal, issued on March 20. Since the publication of last week's issue a great many more letters have reached the office of Hardware and Metal. A few of the letters are here appended:

W. F. Macpherson, Prescott, Ont.

"Allow me as a retailer to compliment you on your magnificent Spring Number of Hardware and Metal. This copy is full of interest from cover to cover, and the many suggestions obtained, both from the advertising pages, and your editorial and descriptive matter makes it a copy worth keeping for future reference. The educative features, relating to buying, selling, displaying and advertising are worthy of special commendation, and no merchant or salesman who will carefully read the several articles on these subjects can fail to reap a direct benefit, if he will adapt the suggestions to his own particular place of business. I wish you every future success.

Yours very truly,
W. F. MACPHERSON."

Carter Bros., Picton, Ont.

"The writer has read your Annual Spring Number of Hardware and Metal. The advertisements are great. The editorials are great. It's a great number all the way through. Published by a great publishing house, a house that every Canadian Hardwareman should feel proud of.

Yours very truly,
W. J. CARTER."

The Stanley Rule & Level Co., New Britain, Conn.

"Good. Very good. Cannot help but be of interest and value to the retailer."

Millers Falls Company, Millers Falls, Mass.

"We are just in receipt of your issue of March 20, and compliment you upon the exceedingly attractive appearance of this number. It should stimulate buying among your subscribers, and we have no doubt will be held as a reference number.

Truly yours,
MILLERS FALLS CO.,
F. H. Atwood,
Sales Manager."

The Canada Paint Co., Montreal, Que.

"Your Annual Spring Number of Hardware and Metal appears to us to be fully up to your usual standard, and altogether is a very creditable production.

From the point of view of a retail hardware man, the whole number should be of the greatest interest both in reading matter and advertising, and from the advertisers' point of view, we can only say that we are very glad we are in it.

Yours very truly,
THE CANADA PAINT CO., LTD.,
H. W. Aird,
Manager."

C. S. Norcross & Sons, Bushnell, Ill.

"Referring to your Annual Spring Number of Hardware and Metal, in which we have advertised now regularly for several years, wish to say, that although we have not yet found time to read this through as closely as we expect to, we have gone through it sufficiently to satisfy ourselves that this is truly a wonderful number.

"We trust we realize to some extent at least, what it means to produce an issue like this and we want to congratulate you upon the excellency of this number from every point of view. The advertisements are impressively set and arranged and the topics which appear in the reading columns, are unquestionably such that will be interesting and helpful to retail hardware dealers who are of course, the principal beneficiaries of a hardware trade paper.

"We have often thought, that among all the different classes of merchandising in which men are engaged, the hardware business above all others, is blessed with the most interesting, instructive and helpful reading matter that comes from the trade press.

It seems to us that more brains and study are brought in to play in hardware trade journalism, than any other branch of trade; although our judgment on this may possibly be due to the fact that it comes more closely home to us by reason of our relations to this particular branch of trade, and that we therefore read hardware trade papers almost exclusively among trade publications.

"In any event, we know they are very high class and we congratulate Hardware and Metal upon being among the best that come to our office. We remain,

Yours very truly,
C. S. NORCROSS & SONS."

Life is a game in which one man's push is pitted against another man's pull.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, APRIL 10, 1915 No. 15

THE HIGHER paint prices predicted by Hardware and Metal are due on April 15.

* * *

WHEN THE sales-force is working in harmony with the merchants selling policy, and his other merchandising systems are good, he may be sure that he has secured a maximum efficiency in selling.

* * *

THE FIRE WASTE in Canada recently is the worst in the whole world. The loss in Canada would pay off the national debt in twenty years. It is seven times as great per capita as it is in Great Britain, and we are paying five times as much for our insurance as they are in Europe.

Bookkeeping and Credit

THE Credit Men's Journal in a recent issue draws attention to a matter which should receive the attention of every retail merchant, and that is the question of retail bookkeeping and credit. We believe that the retail hardwaremen as a rule are careful regarding their bookkeeping and credit, but we are reprinting the article which reads as follows:

"The average retail merchant does not realize that his inability or neglect to keep a proper set of books is an extremely serious handicap to him and in the eyes of the law a very serious offence. The Criminal Code makes it an indictable offence to get into debt to the extent of a thousand dollars without having the ability to pay and without having kept books for five years next before the inability to pay. The Code makes the guilty person liable to a fine of $800 and one year's imprisonment. However, the sting is taken out of the section to some extent by the fact that books to be kept are simply such books of account as are usually kept in that business.

There is a strong feeling in various interested quarters at present that something should be done to raise the standard of business methods among retailers, even if it is necessary to amend the Criminal Code on the subject.

The interested parties are, of course, those who are granting credit to the retail merchant. The retailer as a rule is honest, a good salesman, a good judge of the demand in his locality, but he consistently avoids a complete system of bookkeeping.

There are several reasons for this. In the first place, he hasn't time, or imagines he hasn't. Secondly, he lacks ability. Here again his imagination has something to do with it, and no doubt he would astonish himself if a simple set of books were placed in his hands. Thirdly, he does not see the utility of bookkeeping. He can appraise his stock generally at a glance, and as a rule his selling price allows him a fair profit. Like the farmer, he knows that he is getting a living and that quite often he has a balance in his favor in the bank. That that balance is more than offset by liabilities he knows sometimes and sometimes he doesn't.

As a rule the retailer understands the extent to which he is dependent upon credit, but he steadfastly refuses to see that that credit would improve if the credit men, i.e., the banker and the wholesaler, knew more about his business. The wholesaler bears the burden of the financing of the retail trade, because he knows more about it than anyone else, but all he knows is the volume of the goods the retailer is turning over.

The Retailers' Association has taken up the matter with the idea of improving the credit basis and the bankers have taken the matter up with the idea of protecting themselves. It is up to the wholesaler to do something also in the way of self-protection. As the chief source of credit for the retail trade, he has it in his power to force the retailer to keep a set of books that will show the profit and loss in any month in any year since he started in business."

The Business Outlook.

IN commenting on the business situation in various industries The Financial Post a sister publication states:

Canadian industries generally are finding more orders coming to them but they are smaller in volume than usual. We are not referring to the special orders arising out of the necessities of war but to what might be called the normal sources of business in Canada. An eminent manufacturer said that the man who says that business at present is as good as it was last year has forgotten to leave the "ginger" off his ale. Undoubtedly business is not yet up to the volume of the corresponding period of a year ago. The outlook, however, is changing for the better.

Last week reference was made to the Government bank statement which showed a continued steady increase in the savings of the Canadian people. It is not very generally realized, however, that the savings deposits carried by our chartered banks stand now at the highest level in Canada's history with the exception of July last, the month immediately preceding the outbreak of war. The respective figures for July, 1914, and February, 1915, are $671,214,-

125 and $671,088,613. In other words, our present savings are but .0001 lower than the highest mark touched in our banking history.

It is satisfactory also to record that business offering to our railways is improving. Actual figures, of course, show a heavy falling off in gross as compared with a year ago, but the net is gaining. The latter result is no doubt due to drastic economy, but aside from this the disparity between the gross of this year and the corresponding figures of a year ago is closing up somewhat.

It will not have escaped the observation of business men that trading on Toronto and Montreal exchanges has been slightly more active and interest has now extended to certain industrial issues. We think that activity in this respect will be precedent to any real industrial activity comparable with that existing prior to the war or before the depression set in in the early part of 1914. At Montreal the activity in this respect is notable.

Most of the bankers on the other side of the line, in their reviews at the end of the month express the opinion that business is reviving very slowly and that money is quite easy. Moreover, crop conditions are reported as being excellent not only as to growth but as to acreage sown to spring wheat. The fall wheat is looking well. If the crop comes off all right the chances are that money in the United States will continue to be easy for the rest of the year. Canadians will be interested in this fact inasmuch as it means a market for their securities at a reasonable figure, the effect of which will be to stimulate industry somewhat. If, at the same time, the Canadian crop is normal, there will be no dearth of money, the continued ease of which will no doubt stimulate industrial activity and development work despite the incidence of war.

Pay-up Week.

ACCORDING to reports a certain township in one of the Western States originated a bright idea which seems to have taken root in a very large section of the state. When the town in question announced its purpose of observing a "pay-up week," in which all debtors would make settlement, everybody smiled. But the thing was done, and several thousand unsettled bills were cleared in the process. Now the place has had its most prosperous year, and many other Western towns and not a few big cities are considering a "pay-up week." The philosophy of the plan is simply this: that by paying your bills, the other fellow is enabled to pay his, and so on in a sort of endless chain, which finally comes around to you again, with you out of debt and no one owing you. Thus all are quits, the commercial skies are clear, and everybody feels better. In the first experiment it is said over $40,000 in old accounts changed hands, and the further liquidation promises to be a financial tidal wave.

The idea of a "pay-up week" is excellent and should be helped along by all retail merchants. The wider it extends, the more sound and stable will be the business of the country.

The Out-of-Town Buyer

MERCHANTS who complain of people of their district buying from mail order houses are not always immune from similar criticism. A country weekly paper takes one of them to task—and rightly too—when the editor says that it is funny how the buy-at-home game is preached by some merchants, and they generally tell their tale to the newspaper man. Recently one of these men, who, by the way, doesn't advertise in his home paper, was giving us his views on people who deal out of town. We pointed out to him that his printing had the appearance of being an out-of-town product. It was true. He bought it in Toronto, and that, too, at a price as great if not greater than if bought here. The subject suddenly changed.

"The other day," the writer adds, "one of our readers from the country gave us a strong argument as to our attitude on people buying away from home. He said a man should buy where he could buy the cheapest, and get the best. This is sound commonsense. We argued that he did not give the home merchant a fair chance. He purchased goods from a catalogue and took what he got whether it was up to quality or not. With the home merchant you can see what you get and if there is anything wrong he is ready to make good when you approach him. We suggested that he take his order to the home merchant, show him what he was going to send away for, and the price, and see if he couldn't do better at home. Our friend said, "No, I wouldn't do that. In fact I never buy away from home at all." We had been talking to a man who realized that good home towns made his farm more valuable, and the community he lived in more habitable. What brought up the discussion no doubt was the fact that he went to the station and got a package of goods for a neighbor and he probably felt he was a little disloyal to his section by obliging his neighbor in taking it home.

War Tax on Letters

ANNOUNCEMENT has been made at Ottawa that the war taxes which have not already come into effect will do so on the fifteenth of April. The trade will therefore take note of the fact that a war tax of one cent has been imposed on each letter and postcard mailed in Canada for delivery in Canada, the United States or Mexico, and on each letter mailed in Canada for delivery in the United Kingdom and British Possessions generally, and wherever the two-cent rate applies, to become effective on and from April 15.

This war tax is to be prepaid by the senders by means of a War Stamp for sale by postmasters and other postage stamp vendors.

Wherever possible, stamps on which the words "War Tax" have been printed should be used for prepayment of the war tax, but should ordinary postage stamps be used for this purpose, they will be accepted.

This war stamp or additional stamp for war purposes should be affixed to the upper right hand portion of the address side of the envelope or post card, close to the regular postage so that it may be readily cancelled at the same time as the postage.

In the event of failure on the part of the sender through over-sight or negligence to prepay the war tax on each letter or post card above specified, the letter or post card will be sent immediately to the nearest Branch Dead Letter Office. The department announces that it is essential that postage on all classes of mail matter should be prepaid by means of ordinary postage stamps. The war tax stamp will not be accepted in any case for the prepayment of postage.

CARDWRITING MADE EASY

by

R. T. D. Edwards

LESSON NO. 4.

IN this article, No. 4 of the series, I am going to dwell at some length on one of the most important features of card writing, viz., brush work. The brush is the most important tool of the card writer's equipment. The card writing pen is quite satisfactory for some kinds of lettering, but if a card writer is a master of the brush he can get along much more easier without pen work than he could without the brush. With a brush it is possible to do heavy one-stroke lettering or very small work, and this can be done rapidly by the man who is able to master the brush. The brush can also be used for making large outline lettering such as used for posters or large cards. For work of this kind a pen is not the correct tool, but it has been shown in previous articles that the pens will do the work if brushes are not available.

In selecting brushes, I would recommend "red sable writers." The hair of the red sable brush is arranged in such a manner that it works out to a chisel point. The round ferrule can be secured in nickel-plated or brass. When testing a brush wet in clean water and draw the hair of the brush gently between the thumb and forefinger. Thus, the length of the hair is shown and in a good brush the hair will be of uniform length, such as shown in Fig. 1.

The Best Brushes.

The five illustrations accompanying this article show the regulation sizes of the best red sable lettering brushes. The illustration is made from an actual photograph which shows the ferrules and hair of the brushes. The black stroke above each brush indicates the width of the stroke made by the brush below. Of course, the width of the stroke is very often regulated by the quantity and thickness of the paint carried in the brush while lettering.

In buying a brush be careful you do not get a brush with an uneven tip. In Fig. 2, note the centre brush. A brush like this is absolutely useless for good card writing. It is well to remember that the hair at the end of the brush is, or should be, the natural ends of the hair as it grows, and this is the reason why it can be brought to a fine wedge point. If the hair is uneven it is necessary to trim the ends and this makes a hard point in the brush. The hard point is not satisfactory in doing good lettering.

Figure 2.

Select the first brush I have shown in Figure 2. I would also advise the use of a sable brush with a round ferrule. The round brush is more easily controlled than the flat and will carry more color; it also has more spring and life.

Two, or at the most, three, brushes will be sufficient for the beginner to purchase. The card writer should always keep his brushes in good condition. Neglect will ruin brushes. Always wash the brushes thoroughly when through work. Paint left in the brush at the root of the hair will split the hair and cause it to fall out (see illustration in Fig. 2).

After washing the brush be sure and see that the hair is straight and in proper working shape. If stray hairs get out of shape and are allowed to dry the working quality is impaired. Should the paint at any time harden in the brush, let it soften in water for five minutes before attempting to clean it. Do not bend the hair if the paint has dried on it, for this loosens the hair from the ferrule and causes dropping out, thus rendering the brush useless for card writing.

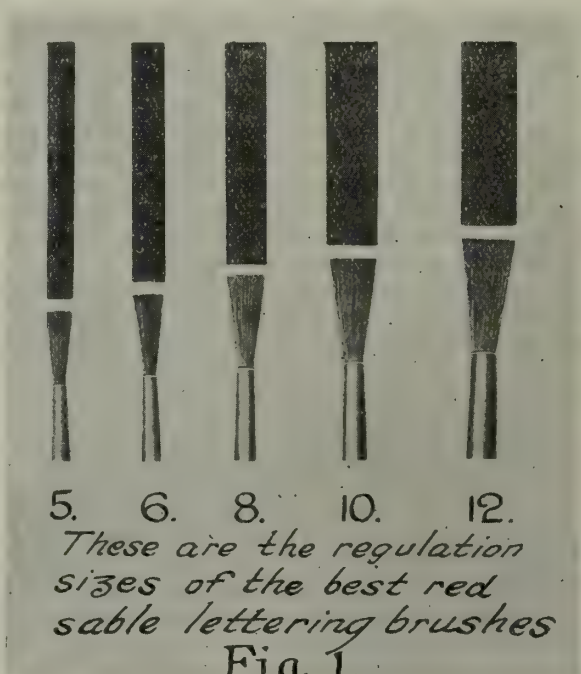


Fig. 1.

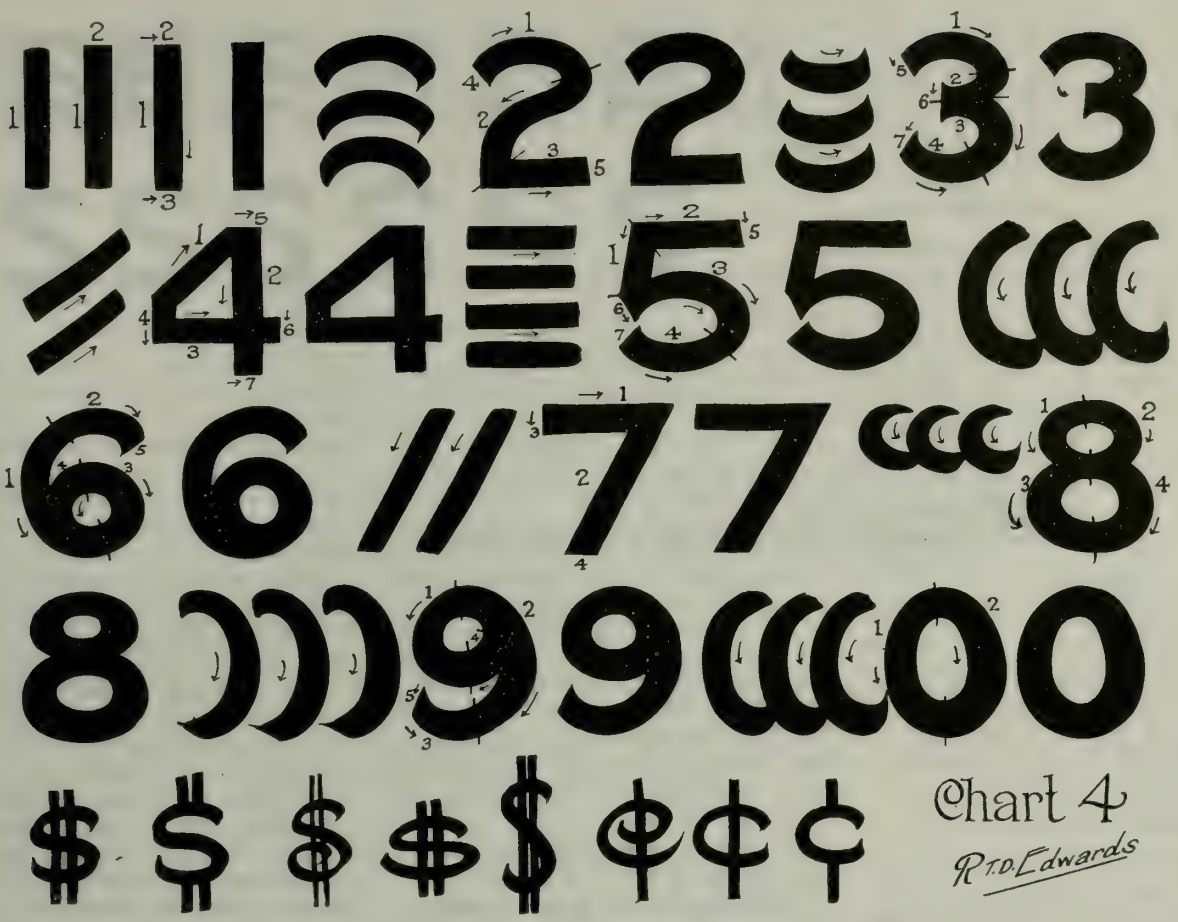

Caring for the Brushes.

Do not allow the brushes to lie on a piece of cardboard or glass long enough to allow the paint to dry. Should the paint become hard and stick to the cardboard or glass, put a few drops of water on it and allow it to soften before attempting to remove (see Fig. 4).

Brushes should not be allowed to stand very long in a glass for this bends the hair and makes the brush unfit for good work. Should a brush become bent from standing in a glass it sometimes takes a considerable length of time to get it back to the original shape (see Fig. 3).

The card writer should treat his brushes just as the careful mechanic treats his tools—as though his job depended on them.

In Lesson No. 1 I stated that the card writer should have a

slanting table. If a special table is not available you can use an ordinary kitchen table by cutting about three inches off the front legs. The height of the table should be such that it would not interfere with the free swing of the right arm. Always sit square in front of the table and keep the top of the card on which you are working slightly toward the left, so it will be parallel with your right arm.

Fig. 5.

Keep your pot of color at your right hand, with a piece of scrap glass or paper near it. This can be used for working the brush to a flat point after it has been dipped into the color. Do not attempt to letter in card by using the color direct from the paint pot to the card. To begin, lay out a blank card as shown in Fig. 5. Mark out lightly with pencil guide lines two and one-half inches apart. Then proceed to practise the exercise and figure separately as indicated. Remember, you cannot practise too much. Follow the instructions keep the brush flat and do not be afraid to spoil a little cardboard.

Chart No. 4.

Chart No. 4 shows the complete set of figures, dollar and cent marks necessary for making price tickets. These are made by the one-stroke method; each stroke is numbered, and by following the numbers you should not have difficulty in doing the work.

The "1" is composed of three strokes, the main down stroke and the top and bottom finishing strokes. The "2" is a five-stroke figure, the small cross lines indicate where the strokes join. The "3" is composed of seven strokes; in this figure the top loop should be slightly smaller than the bottom.

In Making the Figures.

The "4" is also composed of seven strokes; this figure requires a great amount of careful practice. Care should be taken in making figure "5." This is a hard figure to balance properly. The illustration shows where the strokes are joined; this figure is composed of five strokes. In making figures it is important that all joints be hidden as much as possible, and each letter should look as though composed of a continuous stroke.

The "7" appears simple, but to make this letter correctly considerable practice is required. The hardest part in making this letter is to get the plant

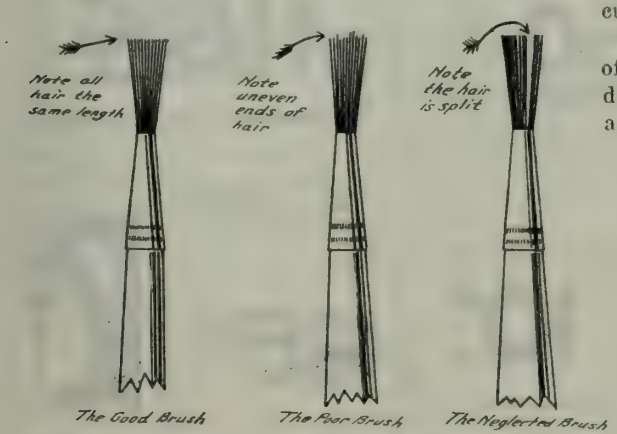

Fig. 2.

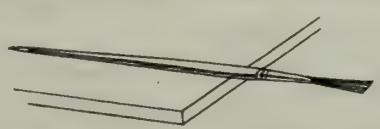

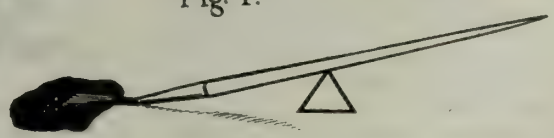

Fig. 4.

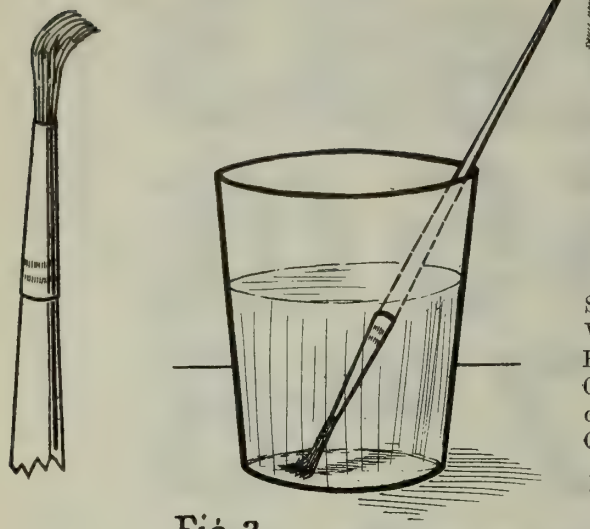

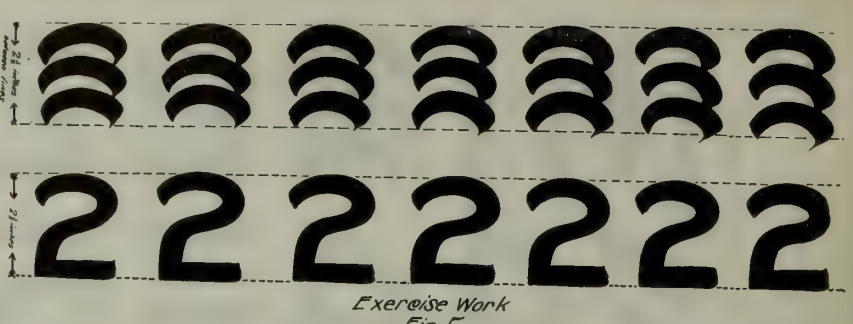

Fig. 3.

stroke at the right angle. As shown in the chart, the top loop of the figure 8 is smaller than the lower one. Four strokes are required in making this figure, but each stroke must be made correctly or the figure will be spoiled.

Collection of Price Cards.

The collection of price cards shown in Fig. 6 gives a fair idea of the work that can be done by a student who has mastered the foregoing lesson. The ruling on these cards was done with the stub pen shown in a previous lesson.

In buying materials I would advise the card writer to buy prepared show card colors as they are the best for brush work. These can be purchased in dull or gloss finish. The former is most desirable. Do not use pen ink for brush work.

Exercise Work

HARDWARE LETTER BOX

Waste Paper.

Repheron Bros., Ltd., 54 Queen Street, Ottawa, Ont.—Can you give us the address of firms who purchase waste paper?

E. Pullan, corner Adelaide and Maude Streets, Toronto, Ont.; The Levi's, 100 John Street, Toronto, Ont.—Ed.

Small Japanned Wooden Handles.

The Collins Mfg. Co., 413 Symington Avenue, Toronto, Ont.—Could you give us the names of manufacturers of wood handles, japanned and baked, such as currycomb handles?

E. B. Salyerd, Preston, Ont.; Canada Spool and Bobbin Co., Ltd., Walkerton, Ont.; Lyster Wood Box Turning and Enameling Co., Ltd., Lyster, Que.; Lachute Shuttle Co., Lachute, Que.—Ed.

Firms Doing Steel Stamping.

H. Pitts, Cornwall, Ont.—Could you put us in touch with firms who could do stamping on soft steel or iron, or angle brackets about 1 x 1½ by 1 inch wide?

Dominion Stamping Co., Walkerville, Ont.; W. H. Banfield & Sons, Toronto, Ont.; Duncan Electrical Co., Montreal, Que.; Homer & Wilson, Hamilton, Ont.; Monarch Electric Co., St. Lambert, Que.; Electric Metal and Stamping Co., New Hamburg, Ont.—Ed.

Sporting Goods Manufacturers.

Fraser's, Limited, Vancouver, B.C.—Will you kindly furnish us with names of sporting goods manufacturers in Canada?

A. J. Beach Co., Brantford, Ont.; Bentley & Anderson, Niagara Falls, Ont.; Western King Mfg. Co., Ltd., Winnipeg, Man.; Harold A. Wilson Co., Ltd., Toronto, Ont.; A. E. Bregent, Montreal, Que.; R. W. Kerr, Montreal, Que.—Ed.

Raw Cedar Oil.

E. Boucher, Saint Hyacinthe, Que.—Can you advise me where I can procure raw cedar oil other than that prepared by the Channell Chemical Co.?

W. E. Bulmer, 32 Front Street West, Toronto, Ont.; A. B. C. Oil Supply Co., Montreal, Que.—Ed.

Small Sheet Metal Stamping Machines.

C. W. Clarke, Brechin, Ont.—Can you inform me where I may be able to purchase a small machine for stamping sheet metal?

Noble & Westbrook Mfg. Co., Hartford, Conn.; A. R. Williams Machinery Co., 64 Front Street West, Toronto, Ont.—Ed.

Aluminum Bread Tickets.

Fleurie Bros., Eaganville, Ont.—Kindly let us know where we can get aluminum bread tickets.

Hamilton Stamp and Stencil Works, Hamilton, Ont.; Toronto Stamp and Stencil Works, Toronto, Ont.; L. F. Grammes & Co., Allanstown, Pa.; Thos. Davidson Mfg. Co., Montreal, Que.; and Martel, Stewart Co., Montreal.—Ed.

Steel Fence Posts.

W. B. Lawson, Lumsden, Sask.—I would like to get in touch with firms or manufacturers who can supply me with steel fence posts.

Frost Wire Fence Co., Ltd., Hamilton, Ont., and Winnipeg, Man.; Dennis Wire and Iron Goods Co., Ltd., London, Ont.; Wm. Hamilton Co., Ltd., Peterborough, Ont.; Alberta Ornamental Iron Co., Ltd., Redcliff, Alta.; Brandon Machine and Implement Works, Brandon, Man.; Steel Co. of Canada, Limited, Hamilton, Ont.; C. H. Johnson & Sons, Montreal, Que.—Ed.

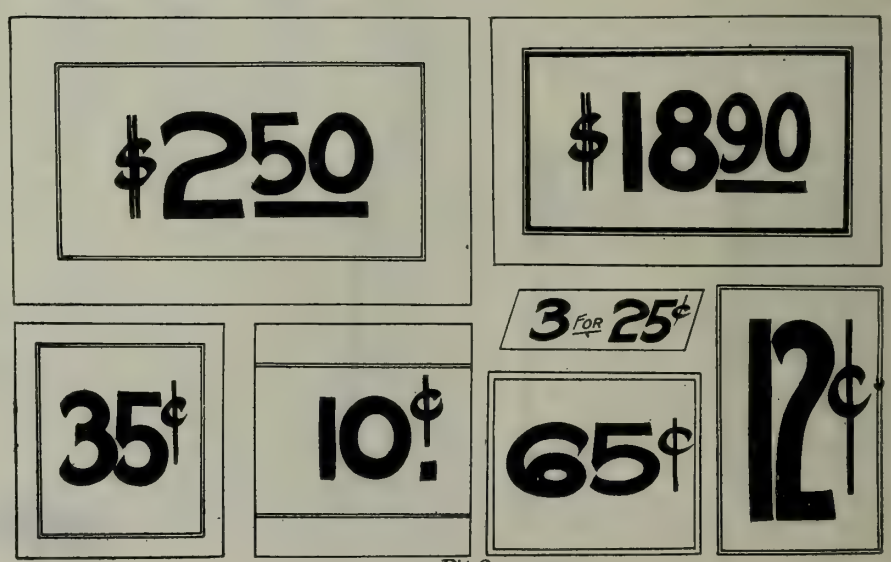

Fig. 6.

Practical Course for Sheet Metal Workers

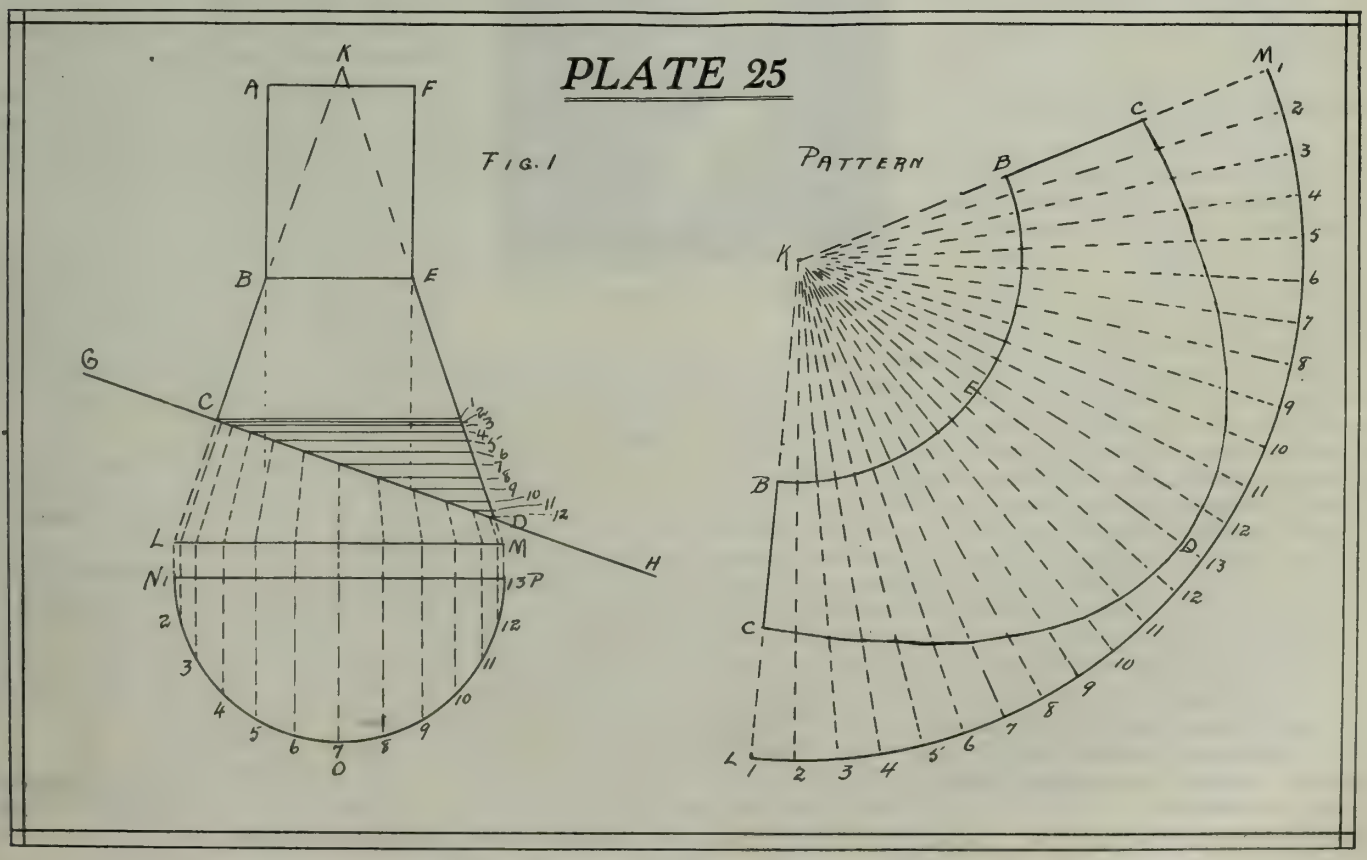
Article No. 25 of Series

By CHARLES SEIVERS

Article 25.

IN this article are shown the principles upon which the patterns for a cone-shaped flashing is developed. Whatever pitch the roof may be the same method is adopted.

The first step to take is to determine the exact slope of the flashing, carrying the base of the cone below the actual pitch of the roof. The next step is to find out the size of pipe for which the flashing is required, and also the size of the cone at its base. The best way to do this is to make an outline drawing as shown by all the solid lines.



At A-B-C-D-E-F is shown the elevation of a pipe passing through a sloped roof G-H. The problem in this case is the development of the cone flange around the pipe and fitting on the roof as shown by B-C-D-E. To complete the view of cone extend the sides B-C and D-E to their apex at K. The base of which can be drawn parallel to B-E from the point D or any convenient point below as L-M, extending the two sides until they intersect base line. On this base line or one parallel to it draw a half section of bottom of cone as N-O-P.

Divide this half section into any number of equal parts as shown by 1, 2, 3, 4, etc. At right angles to N-P draw lines from each of these points extending them until they intersect the base line L-M. From each of these points on the line L-M, draw a line to K intersecting the line G-H, from each of these points on G-H draw a line parallel to L-M, intersecting the side E-D.

To develop the pattern, K-M in Fig. 1, as a radius, draw an arc, from K draw a line to intersect the arc as shown at K-M, Fig. 2. From M transfer the spaces shown on half section N. P, O, in Fig. 1, repeating to complete circumference.

From each of these points draw a line to the centre K. This will outline pattern of cone K-L-M at Fig. 1, to obtain the part B-E C-D, with the compasses measure the distance K-E-D in Fig. 1, and with these as a radius and K as the centre draw an arc through pattern of cone as shown by B-E-B, Fig. 2. As the base of part required is not parallel to base L-M, the different radii are obtained by the intersection of the lines drawn from G-H with the side of cone between E-D. With K-1 as radius draw a small arc on line K-1 of pattern obtaining point C as shown. With K-2 as a radius draw a small arc intersecting line K-2 in pattern, proceed in the same manner with K-3-K-4, etc., as radii, and intersecting lines K-3-K-4, etc., in pattern. A line drawn through these intersections on the pattern completes outline of pattern of the cone flange as shown by B-E-B and C-D-C in Fig. 2. It must be noted that no allowance for seam is allowed. This should be done by extending the pattern Fig. 2 on each edge shown at B-C, B-C.

Lucknow, Ont.—The hardware firm of Bell & Dowse, has been changed to Bell & McLeod. Mr. Dowse has sold his interest in the business, and W. S. McLeod has become a partner in the business.

Current News

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Fire Losses.

Paynton, Sask.—The hardware store of J. A. Boles, was destroyed by fire.

New Firms.

Tyvan, Sask.—J. G. MacCartney has opened a hardware business. P. Davis is manager of the store.

Obituary.

Hillsboro, N.B.—The death occurred here of Jordan Steeves, of Jordan Steeves & Son, hardware and plumbers.

Business Changes

Cobourg, Ont.—R. H. Smith has sold out to J. A. Lind.

Vanguard, Sask.—Henderson Bros., have closed their Aneroid branch.

Trenton, Ont:—G. A. White has sold out to W. House, who was formerly chief clerk.

Forget, Sask.—Chisholm & Wheeler, hardware merchants, have been succeeded by McCartney & Davies.

Simcoe, Ont.—L. R. Sharp and L. S. Ryckman have purchased the interest of A. H. Paulin in the firm of Paulin & Rutherford.

Changes in Yale & Towne Executive.

The Yale & Towne Mfg. Co., general offices, 9 East 40th St., New York, and works at Stamford, Conn., has issued the following notice to customers:—

On March 11th, 1915, Mr. Henry R. Towne having declined re-election as president, after forty-six years of service in that position was elected Chairman of the Board and Mr. Walter C. Allen, previously a Vice-President and General Manager, was elected President. The executive organization of the company as now constituted is as follows:—

Henry R. Towne (46), chairman of the board; Walter C. Allen (23), president and general manager; Schuyler Merritt (38), vice-president; J. H. Towne (24), secretary; John B. Milliken (5), treasurer; Joseph A. Horne (24), general superintendent of the works.

The figures after each name indicate the years of employment in the company's service and constitute the best evidence of experience and fitness and the best assurance of continuity in the company's policies and methods.

RE-ENTERS MANUFACTURING BUSINESS.

After living in retirement for three years, E. B. Salyerds, of Preston, has decided to once more assume proprietorship of the plant which he established twenty years ago, for the manufacture of brushes, hockey sticks and small wood specialties.

It will be remembered that Mr. Salyerds retired from the business three years ago, handing it over to his sons and associates who were incorporated under the name of Salyerds Mfg. Co.

E. B. SALYERDS.

Many difficulties were naturally experienced by the new firm, under the unfavorable business conditions of recent years, and Mr. Salyerds himself has again assumed control of the business, and will run it under the old name.

Mr. Salyerds was one of the pioneer hockey stick manufacturers in Canada, getting into this line twenty years ago, when hockey, as an organized game, was just evolving from the old-fashioned "shinny." He prospered with the rapid development of the game, and had worked up a Dominion-wide reputation, at the time of his retirement.

It is Mr. Salyerds' intention to manufacture a line of small wood handles and other specialties, in addition to hockey sticks, and, as before, he will sell his product through the wholesale trade. He has already renewed connections with many of his old customers.

Winnipeg Notes.

Felix Marntz, of Sifton, Man., has been in Winnipeg on business this week.

A. Renuart, hardware merchant and lumber dealer of St. Pierre, Man., has returned to the West after spending some months on a visit in Santiago and San Francisco. Mr. Renuart took in the Panama Exhibition while in California.

CATALOGUES AND BOOKLETS

Repairing and Building.

This is the title of a twenty-page booklet which Bird & Son, of Hamilton, Ontario, have just issued.

This booklet is nicely illustrated and gives a complete description of the Neponset line of products—shingles, roofings, wall board, sheathing papers, roofing paints, etc.

It also tells briefly how the business was originated 120 years ago and has grown from a very small mill to two large plants located at Hamilton, Ont., and Pont Rouge, Quebec, and with warehouses in all of the important centres, and a Neponset dealer in most cities and towns in the Dominion.

The Neponset building products are made in Canada and they are claimed to be of that quality of which Canadians are proud.

This book is being advertised to the dealer as one of the helps which Bird & Son are offering him this year. It is also being advertised to the consumer and distributed largely on mailing lists, etc.

Many a man claims to have the dearest little wife in the world, when he really means the cheapest.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which Item is Taken—Uncommon Testimony—A Constructive Era —A Little Sorrel Mare—Flaxseed Imports.

Uncommon Testimony.

From American Metal Market.

CORPORATION managers and the public generally have come to recognize the value of advertising in building up and holding mercantile trade. Recently Clarence M. Woolley, president of the American Radiator Company, paid marked tribute to advertising publicity as a large factor in the steady growth of his company's business. Such testimony is not common in the financial advertising field, but one case is known to a few in Wall Street that has convinced them that it more than pays to advertise consistently.

It is the personal testimony of N. W. Halsey. He, with a few assistants, built N. W. Halsey & Company into one of the largest bond distributing houses in the world. Shortly before his death he spoke to some of his associates in about these words: "I never could have built up this business to the point I have, in the time I have, unless I had advertised regularly from the start."

He did not stop advertising for the 1907 panic, and there are probably few investors to-day who realize that N. W. Halsey & Company is much younger than many of the houses that it has passed in its own field. They will tell you they have known of N. W. Halsey & Company since they were children, but the explanation is found in the fact that they have seen the name in print every day for the past fourteen years.

* * *

A Constructive Era.

From the Metal Worker (U.S.).

MUCH of the caution and apprehension of the times is due to the fear of the future so prevalent among the financial classes. There is fear of constant legislative regulation and attack, of socialistic laws and theories that undermine the traditions and inheritances of the past, of the trend of popular thought that less and less regards the ideas and beliefs of vested interests. It is a truism that capital is timid, but there is usually omitted the attendant corollary that this timidity too often arises from an inability either to understand or sympathize with public opinion.

The white heat of reform has largely cooled down, not only because the people are generally satisfied with what has been accomplished in the way of better things, but also because the pitch was too high to be continuously maintained. There is the natural reaction that has turned with new enthusiasm to the accomplishment of material things, and that actually hungers and thirsts once more to be at the business of developing the resources of this great country. The popular vision looks wholly to the future, but those who vainly imagine that the old ways or that the great changes in political and economic life are mere passing phases of popular hysteria are but blind leaders of the blind.

The prosperity that is coming, though somewhat delayed, will be one that is based on the facts of patient, intelligent industry, and on a higher plane of living than the nation has ever known

Flaxseed Imports.

From Paint, Oil and Drug Review.

THE imports of flaxseed from all countries and at all ports in the United States for January, 1915, were 418,355 bushels, valued at $530,710. It is interesting to compare this amount with January, 1914, when 702,562 bushels valued at $810,053, were imported.

There have been other imports from Argentina which have already been published in these columns.

On January 31, 1914, there were stored in United States government warehouses 250,519 bushels of flaxseed valued at $288,096, while on the same date, 1915, there was not a single bushel in storage. This is a point worth thinking about.

* * *

A Little Sorrel Mare

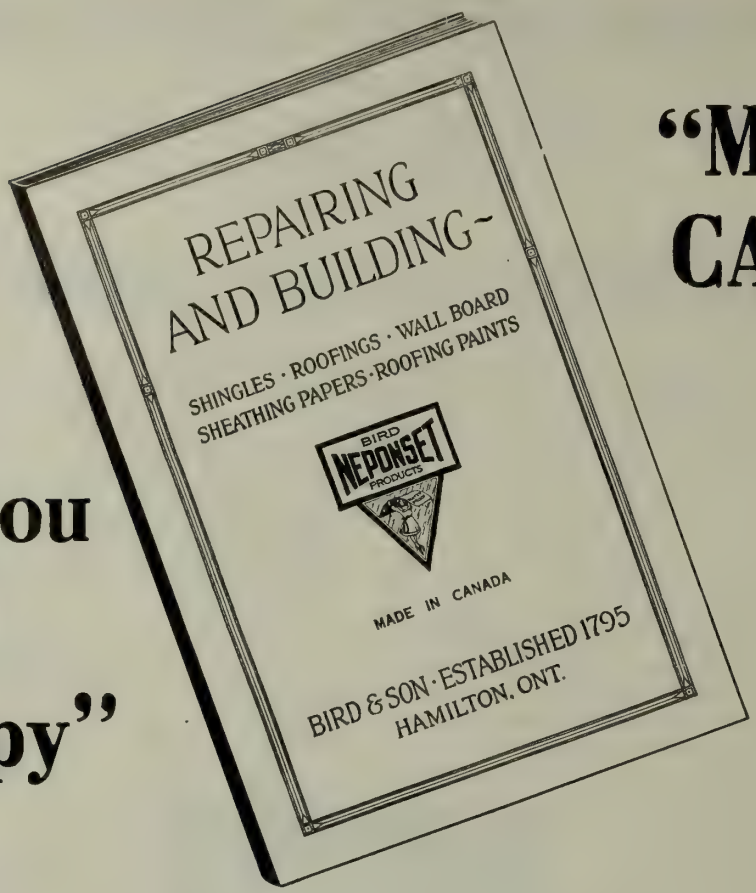
From Ford Times.

HERE'S a preachment from the practical brain of E. Elmo Martin that's quite "good enough" for every one of us. Each can take something from it: Down on the farm we used to have a little sorrel mare. She was high strung and a hustler, but father used to say that she could travel all day in a half-bushel basket.

You have seen men who hustle a great deal who are like the little sorrel mare in that they never seem to get anywhere.

A man who is hustling his business does not appear to hustle. It is only when a man's business is hustling him that he has the appearance of hustling.

An executive with a desk covered with papers—unfinished business—no time to see any one—every appearance of being busy, will be found to be on close analysis, busy—yes, busy, but nine-tenths of his busy-ness is occasioned by his efforts to keep from getting run over by his business. He is kept busy dodging and putting off, whereas if he would take things in their order and dispose of them one at a time, much of his busy-ness would disappear. And unless he does this his business will disappear.



Most men are trying to live a week in a day, and in an effort to consume are consumed. Be a real executive, get on top of your job.

A real hustler makes haste slowly, and through moderate, consistent, persistent effort, he hustles "others and things" instead of being hustled by "things and others."

He is ahead of his job, not behind. He is on top, not under. He is one man in a thousand—look around. The Big Man delegates authority along with responsibility. The Big Man seldom does anything that he can get some one else to do acceptably. The Big Man is seldom busy. The Little Man is always busy. The Big Man handles big things. The Little Man is handled by little things—literally consumed by them.

The Big Man is in harmony with laws and principles. The Little Man is trying to reverse them. The Big Man realizes that to know principles is more important. The Little Man does not know or recognize principles, and is therefore greatly affected by detail. The Little Man in trying to handle his detail is continually "jarred" by principles. Let me ask you to ask yourself, Are you a Big Man or a Little Sorrel Mare?

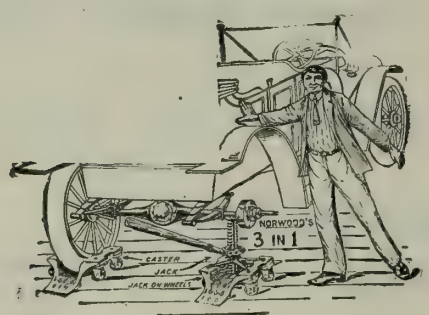
New Hardware Goods

Offered Canadian Hardwaremen

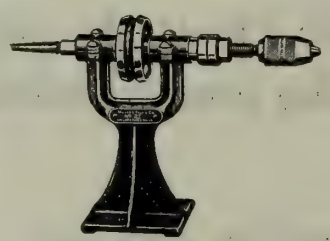


COMBINATION AUTO ACCESSORY.

Automobile & Accessories Mfg. Co., Baltimore, Md., are introducing to the Canadian trade a combination caster,

Jack on Castor.

jack, and jack on wheels, known as "3 in 1," a device for handling, automobiles, trucks, etc. The jack is detachable and can be used either on the caster or on the floor. The jack is made with a broad base, extended top, long handle, and it is claimed will lift or lower two tons without stooping under the car. With the 3½ ft. handle the jack can be pushed about the shop, under a car, the car raised and lowered. The



Showing Combination in Use.

makers claim that with the casters under the wheels, two men can handle the heaviest automobile in less time than twelve men can without the casters. The frame of the caster is one solid piece of malleable iron, light, strong and rigid. Ball bearing casters delicately respond, permitting the auto to be turned or moved very easily in any direction. The devices are made in three sizes, and can be supplied with cast iron or fibre wheels.

MILLERS FALLS COMPANY'S POLISHING HEADS.

The Millers Falls Company, of Millers Falls, Mass., has brought out a line of small polishing heads to hold polishing, buffing and grinding wheels with flanges up to ⅞ of an inch in thickness. They are handsomely finished with solid iron frames, japanned black and steel pulleys painted red. Spindle bearings are adjustable and are fitted with brass oil caps. Pulleys are grooved for ¼ inch round belt or may be used with flat belt.

Style numbers used are 250, 251, 252, and 253. Nos. 250 and 252 have a threaded taper on one end of the spindle and drill chuck for round shanks on the other, with capacity up to 3-16 and ¼ inch respectively. Three jaws in the chucks are actuated by springs that are

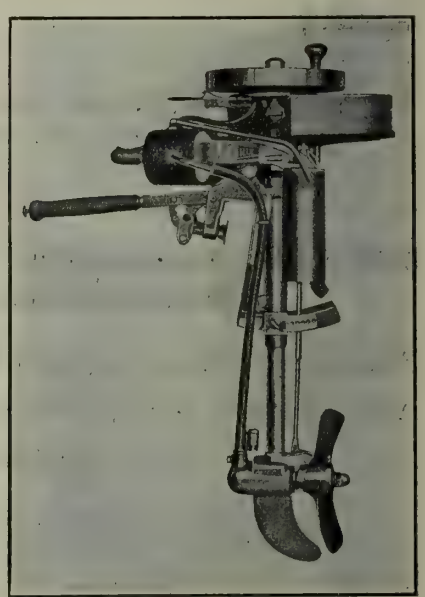
Millers Falls Polishing Head.

protected from injury and will not get out of order. Nos. 251 and 253 have a threaded taper on each end of the spindle.

Height from spindle to bench is 6 inches, and weight varies from 2¼ to 3¼ lbs. Diameter of pulley is 1 13-16 inch on Nos. 250 and 251, and 2¼ inch on Nos. 252 and 253.

NO. 401 TRESTLE.

Richards-Wilcox Canadian Co., Ltd., London, Ont., are offering to the trade a new steel product, called the No. 401 Factory Standard Steel Trestle. The trestle is also known as a shop horse and



No. 401 Trestle.

it is claimed will carry several tons dead load. The trestle is made of steel, weighs 40 pounds, measures 36 inches long, fifteen inches wide, twenty-five inches high. Special sizes can be made to order.

OUTBOARD MOTOR.

The Caille Perfection Motor Company, Detroit, Michigan, recently announced their new outboard motor for 1915. This model is known as the "Caille Portable Five-Speed Motor." The Caille is claimed to be the only motor to have introduced this five-speed feature, two speeds forward, two reverse and one neutral, just like an automobile.

Another feature, suggested by the electric gear shift on the newer type of motor cars, is the Caille Button-Control.

Caille Five-Speed Motor.

One need merely press the button to change the speed of the motor, or press another button to stop it.

Altogether the Caille is said to possess some very novel and advantageous features. The Engineering Department of the Caille Company have had under way a number of ideas for the past eighteen months, none of which would they adopt until they were assured by months of testing that the ideas were not only correct but dependable.

Junior Clerk's Page

MAN'S IDEAL CITY.

THE healthy mind divides life into two distinct conceptions: one is the world of our everyday affairs, the world of actual contact with things; and the other is the world of fancy, the kingdom of our mind or the ideal city of our better self.

In our ideal city live our ideal men and women, and it is here that we do things the ideal way. These two conceptions, though entirely distinct, reflect on each other to such an extent that **a man who may be classified as an idealist or a mystic is oftentimes strictly and severely practical.**

To be practical means to co-operate with the laws of nature, and this means to travel toward the ideal city, the ideal business, toward that degree of perfection where we do things the ideal way. This applies not only in business affairs, but in our relation with other men—in our mental and physical conduct; so there is a practical idealism and every man who has accomplished things worth while is first and foremost an idealist.

Every healthy, normal man can build a world in which he may live independently; a kingdom of his own of which he is the ruler; a world in which he may enjoy the finest companionship, the companionship of his own beautiful aspirations; the companionship of the people he has created for his ideal city.

History has supplied us many examples of idealists who were practical men. Such an example we find in Pericles, the man who made Athens the most beautiful city of all time. Athens, the ideal city, existed first in the mind of Pericles; and we are still learning from the Athens that existed two thousand and three hundred years ago; we are still studying her architecture; still finding inspirations in her sculpture, literature and government.

The city of our mind is the city we build for ourselves, and this city is merely a beautiful conception we evolve to represent the finest, cleanest and most natural moments of our lives.

Every man should have an ideal and should live as nearly as possible an all-round, beautiful life—at least, he should have a clear understanding of what a life of this kind really is. Our ideal represents the best we know and understand, as this creation of mind is the result of crystallized experience, plus our poetic vision. Every man should have a high conception of conduct, a clean conception of business, of relation between himself and his fellows.

Most men who have accomplished things have come through a crucible of experience, which has in most cases evolved an idealistic conception of life at a very early period. This is a condition of mind which takes hold of us at an early age—that stands first and foremost in all the things we do and say.

We often say, "this man is **great,** a man of **genius,** a man of **size**"—and we are right; because this man formulated an ideal, away back in the beginning of his life, and has driven straight ahead until that early ideal has been realized. So, happy is the man who builds an ideal city, for **without an ideal life is vanity, work is drudgery, responsibility is slavery.**

OUTBOARD MOTOR.

(Continued from page 38.)

The Five-Speed idea was conceived after careful investigation and testing of the various Caille Motors in actual service. The machine gives five distinct speeds. The changes are accomplished by shifting the steering handle. Pressing a button located at the end of the steering handle releases the ratchet lock and enables the operator to change the speed or direction of the boat in an instant without, in any way, altering or changing the speed of the motor. The makers claim this advantage will be appreciated mostly by those who have already used an outboard motor that did not embody the Caille Five-Speed feature.

Among the other features in addition to the button-control and five-speeds is the enclosed waterproof high tension magneto built into the fly-wheel. The Caille Company announce that they had perfected a fly-wheel magneto over a year ago but discarded it in anticipation of achieving something more efficient, which they have embodied in their fly-wheel magneto for 1915.

The self-lubricating system, weedless speed propeller, Caille silencer equipped with cut-out, water-tight gear housing, improved cooling system, cushioned steering handle that absorbs all vibration, dual ignition, and a number of other refinements, are features of the Caille Product Co. The Caille Portable Five-Speed Motor develops 2 h.p. at 900 r.p.m., weighs only 55 pounds and gives a speed of from one to ten miles per hour.

ROLL OF HONOR.

John Lysaght, Limited, Bristol, England, represented in Canada by A. C. Leslie & Co., Ltd., Montreal, have issued an appropriate and splendidly gotten up book entitled "Men on service in the war and roll of honor." The introduction states that 1,449 men from the works and 67 men from the office staff, over a quarter of the total number of employees of the firm are at present on active service for their country. It has been thought fitting that the names of all those connected with the business who have bravely come forward when their country needed them, should be recorded, together with a roll of these who have been killed or wounded, that they may be preserved and honored by their relatives and fellow workmen. The firm has promised that all those men who have left for service would have the jobs kept open for them on their return. An allowance is also being given by the firm to the wives or dependent relatives of the men who are away. The introduction also reviews the conditions which led up to the war. The book is a handsome tribute of a firm that takes a deep interest in the welfare of its employees.

BACKBONE.

Backbone is the courage of your convictions; confidence born of positive knowledge of conditions.

The stiffening of the fibres of your business sense; the clarification of your gray matter; the realization for all time that honesty is the best policy.

That's what backbone is, and it will be yours, as the day follows the night, if you "get together" in your own city, and "get busy" finding out where you have been wilfully ignorant or heedless, or careless of your store and your sociability.—Playthings.

Weekly Market Reports

Statements From Buying Centres

The Markets at a Glance

The advent of fine weather has had a splendid effect on business and a general improvement is noted. While not of large proportions, the improvement has created a much better feeling in business circles. The metal markets are still quiet, although a slight improvement is noted in the demand for sheet metals. Copper is firmer and has advanced in price. Tin is easier. Lead pipe and sheets have advanced. Arsenate of lead has declined. Ammunition has advanced. Some lines of builders' hardware have advanced from 7 to 10%, but the demand is slow. Glass and oil are unchanged, although low prices are quoted in some quarters. The advance in the price of paint predicted by Hardware and Metal is due on April 15. Nails and wire are unchanged. Most large buyers booked large quantities of nails when the price ranged around $2 base. Among the lines affected by price changes during the week are: Oakum, halters, cokes bright sheets, butts and other lines.

MONTREAL.

MONTREAL, April 9. — Spring deliveries, which commenced with the 1st of April, are reported as being altogether satisfactory and as good, if not better, than last year. This not only refers to shipments already made, but to those booked for delivery during the next month. All indications are for a good season in the country districts in general lines, and the interest in immediate business is taken as further proof that the trade in general had been buying very close and that stocks had been starved close to the limit.

From Montreal spring deliveries are regulated by the freight rates. Where the opening of navigation makes no reduction to rail rates, shipments are made on the 1st; other rail shipments are made on the 15th, when reduced rail rates go into effect, and still others after the opening of navigation by the all-water route.

During the week price changes have not been general. Coke's bright plates are 25c higher; lead sheets are up the same amount; lead pipe has advanced to 8c; and there are new prices on ammunition. New price lists on builders' hardware are still being awaited, although prices have been advanced for some time. The price of Lufkin's assorted tape case has been fixed at $15, and prices on Stanley Works' products have been withdrawn.

The Metals.—The situation in metals still has many features of interest. Tin is somewhat easier, but material price reductions are not looked for until after the end of the month. Copper shows another advance on heavy demand for ammunition manufacture, and antimony is nominal, with conditions very unsettled. Lead is strong and the market advancing, and spelter is slightly easier with the future very uncertain.

Tin.—The situation in tin shows some easiness. Quotations locally are about the same, but New York shows a reduction to 48c, as compared with 54c. The factors have been better deliveries into consumption during March than expected and increases in the visible for April. However, material change is not looked for until after the 1st of May, when heavier shipments are expected.

Copper.—With an increasing demand noted for home consumption in Canada and the United States and foreign consumption continuing heavy, the copper market shows a further upward tendency, the local quotation now being $17.75, while New York is $16.50, an increase of 75c here and nearly the same amount in the States. The demand from sources related to the manufacture of war munitions continues strong and promises to do so for some time in the future.

Solder.—With tin continuing at high levels the situation shows little change and, although the demand is not heavy, the prices are firm. Half-and-half is still quoted at 26c to 30c and strictly at 28c to 32c.

Spelter.—The market continues unsettled, but without material change locally, the price being somewhat firmer around $11.50. St. Louis reports erratic conditions, with a better inquiry, and sellers inclined to hold futures at firmer prices. There is not much demand for spot, wants evidently having been pretty well satisfied. Heavy export demands are helping the quotations on futures.

Lead.—A further advance of 5c by the Trust is the feature of the American market, and is reflected here in firm quotations at $5.75 to $6. Still further advances are to be looked for, as New York reports independents and second hands holding 2½c to 5c above the Trust figure. Buyers, after fighting to hold the level down, seem to have found themselves in the same position as in the spelter market some time ago, when foreigners bought up sufficient of the futures to leave the spot very short with keen competition for immediate demands.

Antimony.—Antimony prices are nominal. The market is very unsettled and uncertain. Prices locally continue about $27, but there is a wide range. American quotations continue at $30, which does not indicate that the top has been reached at this side of the line.

Builders' Hardware.—The demand for builders' hardware is far from satisfactory, although the conditions are about as had been anticipated in view of the general conditions and the poor building outlook. The new price lists have not yet been issued by the Canadian makers, but advances have been

MONTREAL QUOTATIONS.

Tin	50c-54c
Spelter	11½c
Copper	17¾c
Lead, Trail, cwt.	$5.75 to $6
Lead, Imported, cwt.	$6.00
Antimony	$27.00
Solder, ½ x ½	26 to 30
Solder "strictly"	28 to 32
Aluminum, Ingot	23c lb.
Aluminum, Pattern	24c lb.
Wire Nails	$2.40 base
Cut Nails	$2.50 base
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp	12½c base
Sisal	10½c
Lath Yarn	9¾c

put into effect from 7 per cent. to 10 per cent. The long time required in the adjustment has been due to the fact that there was no distinction between copper and steel products, with the result that it was not possible to make the changes by altering discounts, new list prices being necessary.

Building Materials.—The conditions here are the same as with regard to builders' hardware. The season is at hand when the demand should be at its best, but it is far from normal.

Wash Boards.—The new prices on wash boards have gone into effect, the advances being from 75c to 90c, and the revised list is now as follows:—

Boards (Wash).	Per doz.
Pony	$1.50
Crown	2.95
Dandy	3.15
Improved Globe	3.25
Standard Globe	3.35
Neptune	3.35
Original Globe	3.65
Newmarket King	3.65
Jubilee	3.65
Victor (Glass)	4.25
Diamond King (Glass)	4.50
Western King (Enamel)	4.25
Beaver (Brass)	4.00

Plates.—A further advance in the price for Cokes Bright sheets are noted, Bessemer steel, 20 x 28 double box now being $9.50, instead of $9.25. Demand for plates and sheets is a little better, with prospects for lower transportation rates by water.

Lead Sheets.—With the further advances in the lead prices come changes in lead sheets, which follow increases made last week. Sheets, 3 lb. to the sq. foot, are up from $7 to $7.25; 3½ lb. to the sq. foot, $6.75 to $7, and 4 to 6 lbs. sq. foot, $6.50 to $6.75. Cut sheets extra as usual.

Lead Pipe.—An advance in the price of lead pipe has been made from 7½c to 8c, with lead waste pipe still at 9c.

TORONTO QUOTATIONS.

Tin	54c
Copper	17¼c
Lead	5¾c
Spelter	12-15c
Antimony	25c
Aluminum Ingot	23½c
Aluminum Pattern	24½c
Solder, ½ x ½	33c lb.
Wire Solder	34c lb.
Wiping Solder	27c lb.
Tinker's Bar Solder	35c lb.
Wire Nails	$2.35 base
Cut Nails	$2.70 base
Poultry Netting	45%
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp Rope	12½c base
Sisal Rope	10½c base

Demand is not heavy, but the increasing costs of raw material are having their effect.

Nails and Staples.—A better demand for nails and staples is noted for country trade with the commencement of spring shipments. Business in these lines has been generally good, although the demand fell off somewhat on the rising market.

Fencing.—April deliveries of fencing are very satisfactory, and the trade is well satisfied with this department this spring. Inquiries are continuing, despite the fact that the bulk of this business is always in placed orders; closer buying is indicated.

Rope and Twine.—There is a fair movement of rope for country trade, and business is considered as being satisfactory on outside orders. The twine situation as regards the supply of Mexican sisal has been somewhat improved, late reports being more reassuring. Prices are shown in current market quotations.

Cutlery.—The demand which was noted for wedding gift lines for after Lent ceremonies has fallen away, but there should be very fair business from now on until the end of June.

Butts, Hinges, etc. — The Stanley Works announce the withdrawal of all prices on butts, hinges, etc. A revision with an upward tendency is looked for.

Utensils.—There is a good spring demand noted for utensils of nearly all kinds, and inquiries for refrigerators are also being received.

Stoves.—Demand for gas stoves continues fair, with some inquiry for oil stoves. Interest in wood cooks is far below the normal, although country business is fair, all things considered.

Ammunition. — Ammunition makers have made further advances to the trade, which are reflected in revised price lists, with materially higher quotations for loaded shells.

TORONTO.

TORONTO, Ont., April 8.—Business has been a little quieter this week on account of the holidays, but otherwise conditions are much the same as last week. Trade is gradually improving, and with seasonable weather, sales of some lines will increase in volume. One manufacturer of wares reports business as being better this spring than for the corresponding period last year. Although this may not be the case in all lines, there is no doubt that business is not at all bad, taking everything into consideration. The country trade is quite good, and the city trade, although slow, is picking up. Price changes are becoming less each week now, as most lines have been revised. The few that remain will be adjusted gradually, as the necessity arises, while others will be affected by the increased cost of raw materials. A case in point is lead pipe, which has advanced ½c. Sisal halters have advanced owing to the higher price of sisal. Jute halters have advanced for a similar reason. Plow lines are higher, while U.S. Navy and new hemp oakum have also advanced. There is a possibility of an advance in copper rivets, as copper is gradually going up. The poultry netting situation is unsettled on account of the spelter market and the difficulty in obtaining netting. The building trade is not showing the improvement that might be expected with the result that business in builders' hardware and supplies is quiet. Garden tools and similar lines are beginning to move freely.

The Dominion Steel Corporation's output for March shows an increase in wire rods, bars, wire and wire products, over the corresponding month last year.

The Metals.—There is not much change in the general situation this week. The volume of business in ingot metals is small, and consumers are buying from hand-to-mouth. The metal exchanges in New York and London were closed last Friday and Saturday, and also on Monday in London on account of the Easter holiday. The primary markets generally are quiet with little trading. Locally, quotations are unchanged except copper, which is strong, having advanced ½c per pound. Tin continues dull, and has not reacted from the decline last week. The spelter market continues to be erratic, and there is still a scarcity of this metal. The lead and antimony markets are quiet, at unchanged quotations. Solders are firm, with fair business. Aluminum is unchanged at 23½c per pound.

Tin.—The tin situation is practically unchanged although there is an increase in the visible supply. The primary market is dull, and inclined to be easy for spot metal. Local quotations are unchanged at 54c per lb.

Copper.—The copper market is strong at advanced prices. The situation is unchanged and the demand for this metal for war munitions continues very heavy. Copper has advanced ½c and is now quoted at 17¼c per pound.

Spelter.—The market continues to be erratic and irregular. There is very little spelter offering in the local market, and prices have a firmer tendency. Quotations are nominal at 12c per pound.

Lead.—The market is firm but very quiet. It is believed that the trust will advance their price in the near future. Locally, lead is quoted at 5¾c per pound.

Antimony.—The market is quiet with little business moving. It is probable that this dullness is only temporary, and that prices will go higher. Quotations are nominal at 25c per pound.

Scrap Metals.—The market generally is quiet, but there is a better demand for copper scrap. Prices are unchanged, and

are given in the current market quotations.

Pig Iron.—There is little life in the market, and the demand continues light. The Dominion Steel Corporation, however, report an improvement in pig iron production for March, being ahead of the corresponding month last year. Victoria and Hamilton brands are quoted at $19 per ton.

Bar Iron and Steel.—The demand is improving, but the market is still inclined to be quiet. Prices are unchanged at $2.05 base.

Lead and Iron Pipe.—Lead pipe has advanced ½c being now quoted at 8c with waste pipe unchanged at 9c net. Business continues dull, but the increased cost of lead made higher prices inevitable. Prices of iron and galvanized pipe are firm, and are given in the current market quotations.

Wire Nails.—Most buyers are now drawing from orders booked at the time when prices were ranging around $2 base, with the result that there is not much business passing at the present price of $2.35 base. Cut nails are unchanged at $2.70 base.

Kitchen Utensils.—There is a brisk demand from the country trade for assorted lines of ware. Prices are given in the current market quotations.

Halters.—The new prices for sisal halters are now in effect, and are as follows: 7-16 in. $14.40, ½ in. $16.80 and ⅝ in. $21 per gross. The advance is accounted for by the higher cost of sisal. Jute halter ties have advanced as follows: 7-16 in. $11.75 and 9-16 in. $15.20 per gross. Prices of leather halters have been withdrawn indefinitely, on account of conditions in the leather market.

Plow Lines.—The new prices for plow lines are as follows: Russian snap $42 and Indian $38 per gross. High cost of raw materials accounts for the advance.

Oakum.—Two lines of oakum have advanced, the others are unchanged. New hemp is ½c higher, being quoted at 7½c, while U.S. Navy has advanced ¼c and is quoted at 7c.

Rope and Twine.—Business has improved considerably of late, and prices are very firm. The situation, however, as regards raw materials is practically unchanged, although it is reported that conditions in Mexico are improving, and that arrangements are under way for facilitating the export of a considerable amount of sisal from Yucatan.

Raw Furs.—Full particulars of the London fur sales are now to hand, as indicated in this journal last week. The results have been disappointing, both as regards quantity and values. The sales show a decline of from 25 to 50 per cent. of prices obtained a year ago. The season for receiving the better grade of furs is drawing to a close, and inferior furs are now coming in. Many kinds deteriorate rapidly as the warmer weather approaches. Manufacturers are sending out their samples but the orders received are on a conservative basis, and buying is generally on a hand-to-mouth basis.

The following new prices for arsenate of lead paste came to hand after the current paint market section had gone to press:

1 lb. pkgs., 100 lb. lots	$16 50
2 lb. pkgs., per 100 lbs.	16 50
5 lb. pkgs., per 100 lbs.	12 50
25 lb. pkgs., per 100 lbs.	11 50
100 lb. pkgs., per 100 lbs.	10 00
200 lb. kegs, per 100 lbs.	9 75
300 lb. pkgs., per 100 lbs.	9 25
600 lb. casks, per 100 lbs.	9 00

New prices for dry red lead:

Genuine, 560-pound casks, per cwt.	$7 00	$7 25
Genuine, 100-pound kegs, per cwt.	7 37½	7 62½
No. 1 casks, per 100 lbs.	6 50	6 75
Less quantity		8 50

LONDON.

LONDON, April 8.—Spring lines are beginning to move nicely. The fine weather of the past few days has had a good effect on trade generally and business is very fair. Collections are fairly good. Following the advances quoted in the Toronto and Montreal market reports last week Paris green has advanced here. Turpentine has advanced while linseed oil remains unchanged.

Paint to Advance.

It is expected that paint will advance on April 15. This prediction was made in Hardware and Metal some time ago.

Turpentine has advanced two cents per gallon and is quoted in barrel lots at 71 cents per gallon in single barrels; 2 to 4 barrels 70c per Imperial gallon. 5-gallon lots, 78c per gallon.

Linseed oil remains at the same price as last week and is quoted as follows:

	Raw.	Boiled.
1 to 2 barrels	80c	83c
3 to 5 barrels	79c	82c
6 to 9 barrels	78c	81c

Lead remains unchanged and is quoted in ton lots at $9.10 per 100 lbs. and in less than ton lots at $9.40 per 100 lbs.

Wire Nails, Etc.

Wire nails are in fair demand. The present price is $2.35 base for wire and $2.70 base for cut nails. Most of the larger buyers booked for wire nails some time ago when quotations ranged around $2 base. Wire from stock is quoted as follows:

	Per 100 lbs.
Barb	$2.55
No. 9 soft, galv.	2.30
No. 12 soft, galv.	2.45
No. 13 soft, galv.	2.55
9-coil spring	2.35
Oiled and annealed No. 10	2.46
Oiled and annealed No. 11	2.52
Oiled and annealed No. 12	2.60

Galvanized fence hooks are quoted at $3 per 100 lbs. and $3.25 per 100 lbs. in 25-lb. boxes. Fence staples, bright, are $2.60 per 100 lbs. in kegs; $2.85 per 100 lbs. in 25-lb. boxes; galvanized, $3 per 100 lbs. in kegs and $3.25 per 100 lbs. in 25-lb. boxes. Poultry netting remains at 45 per cent; screen wire is quoted at $1.55 in 100-ft. rolls and $1.60 in 50-ft. rolls.

Rope and Twine.

Twine and rope quotations are unchanged and are as follows:

Pure Manila	14½c lb. base
British Manila	12½c lb. base
African Hemp	12½c lb base

Prices on twine are as follows:

650 ft.	12¾c lb.
600 ft.	10¼c lb.
550 ft.	8½c lb.
500 ft.	8c lb.

Iron Pipe.—The following prices are quoted on iron pipe:

	Black.	Galvanized.
¼	$ 2.16	$ 3.18
⅜	2.16	3.18
½	2.64	3.74
¾	2.99	4.49
1	4.42	6.63
1¼	5.98	8.97
1½	7.15	10.73
2	9.62	14.43
2½	15.21	22.82
3	19.89	29.84
3½	23.92	35.88
4	23.34	42.51

WINNIPEG.

WINNIPEG, April 8.—Generally business is reported satisfactory. The orders are undoubtedly smaller than is usual at this time of year, but dealers are evidently keeping their stocks at the lowest possible point, and it is felt certain that the volume of orders through the summer will be larger than in past years.

Rope Up 1c or More.

Rope has advanced, as was indicated two or three weeks ago would probably be the case. Sisal is now quoted at 11½c. Pure Manila remains at 16c, the price recently fixed; but British Manila is up to 13½c, and lath yarn is now quoted at 10¾c. There is considerable trouble getting fibre from Manila because of boats being able to make more profitable freight arrangements by taking longer hauls. Then the trouble in Mexico has interfered considerably with the export of sisal.

This situation is likely to become more aggravated, but it is rendered less serious by reason of the fact that the demand for rope at the present time is not very heavy.

Rope is quite likely to go still higher.

Wire Advance Seems Likely.

Barbed wire is being sold now at a price below that for which it can be brought to Winnipeg by the wholesalers. At present wholesalers are selling out

of stock which they bought at a better rate. It is doubtful, however, if they have more than enough on hand to fill the contracts which have been placed with them. Dealers, of course, are taking full delivery of these contracts this year. It is quite likely that a further advance in wire will be struck within the next fortnight. It might very possibly come within the next few days.

White Lead Up 25c.

White lead has been put on a new basis, pure in ton lots now being quoted at $9.70, and less than ton lots at $10. The advance here, of course, is largely due to the rise in raw material.

Linseed Oil.

Linseed oil, which declined last week, has again advanced, and is quoted in single barrels at 91c per gallon for raw and 94c per gallon for boiled.

Some Paint Advances Already.

For some time it has been known that paint prices must be changed. These changes are now being made, some coming into effect the 1st of April. These will be followed by further advances, and by the 15th of the month everything will be on a higher basis. Generally house paint is up 15c per gallon; floor paint 10c per gallon. Buggy paints are going to advance very much more than this. Especially is this going to be the case for bright reds and vermilions. The dyes from which these colors are made came from Germany, and are almost impossible to secure at the present time. One manufacturer, for instance, has just paid $1.05 per lb. for dry colors, where 30c per lb. used to be the quotation.

It begins to seem as if dealers will have to keep their customers away from bright colors this year. To the railways and some other concerns these colors are absolutely necessary, and it almost appears as if the manufacturers will be compelled to make the price for these colors nearly prohibitive, so that they will be able to take care of the orders from these concerns who must have the bright reds.

Some of the paint changes are given in the paint and oil quotations, but more will be struck, as has been indicated, very shortly.

WINNIPEG QUOTATIONS.

Ammunition:	
Powder, per keg	$7.50
Boiler Tubes, 2", per foot	10½c
Canada Plates:	
Half Polished, 6-7 inch	$3.80
Full Polished, 6-7 inch	4.95
Solder	32c-33c lb.
Linseed Oil, raw	91c gal.
Linseed Oil, boiled	94c gal.
Poultry Netting	40% off
Galvanized Iron, 28	
Apollo and Fleur de Lis	$5.25
Queen's Head	5.60
Corrugated Sheets, 28-gauge galvanized	$3.45
Glass, First Break	$5.25
Rope, Pure Manila	16c
Sheet Zinc:	
Cask lots	13¼c
Small lots	13½c
Iron Pipe:	
Galvanized, 1 inch.	$8.15
Black, 1 inch	$5.80
White Lead:	
Pure, ton lots $9.45 less $9.75.	
Barb Wire per Spool:	
Lyman 4 pt., Ft. William	$2.10
Winnipeg	$2.45
Paris Green:	
1-lb. pkgs., per case	23½c
Shot, soft, per 100 lbs.	$10.00
Chilled	$10.60
Buckshot	$10.80
Ball	$11.20
Galvanized ware, heavy, 25 and 12½% off.	

WEEKLY PAINT MARKETS.

(Continued from page 46.)

TORONTO.

TORONTO, Ont., April 8th.—The improvement in the paint trade continues, and the outlook is better with the approach of more open weather. The city trade is picking up, but is considerably below last year. The country trade, on the other hand, is brisk. There have been no important price changes this week, but it is generally understood that mixed paints will advance 10c per gallon on April 15th, owing to increased cost of raw materials as outlined in Hardware and Metal last week. For the same reason it is highly probable that all other lines will follow; colors in oil will no doubt be affected. Some lines of dry colors are also expected to advance. Linseed oil is firm, although price-cutting is in evidence. Turpentine has advanced 2c per gallon. Putty is unchanged, but an advance is anticipated. Gasoline is moving freely.

Linseed Oil—The demand continues light, but prices vary considerably, ranging from 80c to 85½c, while 75c has also been heard of. Quotations at 80c are, however, nearer the market, and are being more generally quoted. The flax seed market is rising a little, and it is stated that the crushers are not willing to sell oil at a price permitting the jobber to sell lower than the present market quotations. The demand for oil cake is falling off, as is also the price. The following prices are being generally quoted in Toronto:

	Raw.	Boiled.
Single bbls.	80	83
3 to 5 bbls.	79	82
6 to 9 bbls.	78	81

Turpentine—Stocks have been considerably reduced in the South, and the new turpentine will not be coming in for two or three weeks. Turpentine advanced 2c last Monday, and is firm to-day at the same quotations as given below. The demand continues light, but prices may advance again shortly. The following prices are being quoted in Toronto: Single barrels, 71c, 2 to 4 bbls. 70c, and 5-gallon lots 78c per Imperial gallon.

Mixed Paints—An advance of 10c per gallon is expected on April 15th. The high cost of material has rendered this step necessary. There will be many advances in paint sundries.

Gasoline—Gasoline is moving freely, and prices are unchanged at 18½c per gallon. Quotations on coal oil are given in the current paint market quotations.

Glass—A new development has occurred in the glass situation, probably of a more or less temporary nature. On import orders in lots of 50 cases or over, some firms are quoting prices under the general discount. As stocks are heavy, it is probable that business generally will not be affected to any marked extent.

IN THE NEXT ISSUE.

Next week's issue of Hardware and Metal will contain many special features including articles on the following subjects:

"What Hardwaremen Say in Their Newspaper Advertisements."

"How the Rural Newspapers are Commenting on the Distribution of Catalogues by Mail Order Houses."

"How Carriage and Machine Bolts are Manufactured and Sold. Illustrations will be published showing machines used in manufacturing these goods."

"Suggestions for Seasonable Headings for Advertisements."

"Suggestions for Seasonable Show Cards for Show Window or Interior Display."

In addition to the above and other special features, the regular departments will be full of interesting matter. These departments include market reports, tinshop articles and problems, new goods, current news, paint department, clerks' department, what other papers say.

Be sure and watch for next week's issue. It will contain many excellent suggestions for the hardwareman.

Paint Department

Paint and Your Town

A Town is Judged to Some Extent at Least, by the Paint it Uses—What Some Towns are Doing—Improving Homes and Towns.

BY HENRY LEWIS.

NEWSPAPER editorial announcements, and retailers' advertisements urging spring clean-ups and paint-ups are becoming numerous. During the next two months many more will appear in newspapers throughout Canada.

With the arrival of spring the need for a general cleaning-up of the home becomes very marked. Not only is house-cleaning necessary inside but even more so is it necessary outside. There is one phase of spring which cannot help but appeal to everyone. The house that needs paint never seems to need it so badly as during early spring days. It may stand up gaunt and weather-beaten and badly blistered during the winter without its dilapidation being conspicuously noticeable but just as soon as the buds begin to appear and nature takes on the garish garb of spring, lack of paint becomes the most glaring and noticeable of faults. The dingy house is out of tune with nature. It is the one marring feature.

This was perhaps the primary reason why spring became the recognized time for painting. More houses are painted at this season of the year than at any other time. There are, of course, other reasons of a more practical nature—the desirability of putting property into good shape after the wear and tear of winter being a prime consideration.

But the practice of "painting up" in spring is not nearly as general as it should be. For one house which is given a fresh coating of paint, a dozen which need it just as badly, are left to suffer depreciation through the influences of sun, rain and wind. To those who know, paint is a preservative of particular potency. It is a sure form of insurance against decay. The house which is kept well painted will continue in good repair and attractive long after the neglected house has fallen into a condition of dilapidation. A dollar spent in house paint saves many in repairs as well as lengthening the life of the property.

The wise householder will devote a full week each spring to the work of cleaning up his premises and to painting wherever possible. The advantages that accrue to him as an individual are not entirely from the standpoint of improved appearance. Health demands that the home premises be kept in the most sanitary condition. Disease germs breed in garbage piles and in accumulations of refuse. Nothing is more conducive to sickness than yards which are not kept neat and clean.

There is another side of it which should appeal to the householder as well. The welfare of the community demands that each individual should contribute towards keeping the city or town attractive. What better advertisement can a place have than neat homes, well trimmed lawns and orderly yards? A town that presents a freshly-painted front to the visitor creates the best possible impression. "Here is a place where I would like to live," is the mental commentary of the visitor. On the other hand the worst possible "knock" that can be administered to a town is when the householders fail, through lack of personal and civic pride, to keep their homes in good condition. There are dozens of towns that everyone knows in this category. You can picture one of them in a moment—rows of dilapidated houses, with rickety fences and unkempt lawns, paint blistering from the woodwork and giving that dismal air of shabbiness that so offends the eye, muddy streets, ragged rows of trees and so on. Would you ever think of going to live in a place of that kind? Would you ever refer to it in terms other than of indifference or even contempt?

And so the need for a thorough spring "clean up and paint up," is not purely personal or individual. The welfare of the community is concerned. Consequently the question should be treated by the community as a whole.

Despite the importance of the matter, it is exceedingly hard to get the average individual stirred up. Man is sometimes a lazy animal. Spring arouses in him the desire to get up at 4 o'clock in the morning and go fishing, but it does not create any very keen desire to clean out the ash pile or rake the back yard. His intentions are always good. He is going to do it to-morrow or next Saturday afternoon. And sometimes it runs on from one postponement to another until finally the weather gets too hot for manual labor.

And so it has become quite a problem in every community to get the citizens as a body stirred up to taking an interest each spring in the problem of cleaning up.

A solution has been found in many cities in the United States and Canada. By dint of much newspaper publicity the interest of the public is aroused in the subject of spring cleaning. The council sets aside a certain week, generally late in April or early in May, as a special "clean up and paint up" week. It is impressed upon all and sundry that their duty to the municipality enjoins upon them the task of straightening up things during that week. Every means is taken of "boosting" the idea. Not only do the papers talk spring cleaning but the merchants feature the idea in their advertisements and in the store windows. The pulpits sometimes help along the good work.

Wherever it has been attempted the idea has worked out with conspicuous success. The citizens as a whole have entered into it with surprising vim. The week set aside is marked by a general tendency toward the improvement of homes. The rake, the spade and the paint brush are brought into requisition. The smoke of bon-fires rises from every back yard. The garbage wagons are loaded to the brim with the refuse of the long winter's accumulation, and at the end of the week the difference that has been wrought is little short of amazing.

What are you doing in your town?

Tell us what you have been getting in GERMAN and AUSTRIAN WOODENWARE SPECIALTIES

— WE CAN SUPPLANT THEM—

It is our aim to keep our plant running as in usual times and afford all the work possible to our employees during winter.

We would be pleased to have suggestions from the Wholesale and Retail trade and to pay for samples you would submit of anything we could make here.

More washings will be done at home for a time now than have been for some years. This means a larger demand for **Washboards, Pails and Tubs.** "Cane" quality and finish assure easy sales and satisfaction.

Weekly Paint Markets

MONTEAL.

MONTREAL, April 9.—The advance in the prices of all kinds of mixed paints, which was predicted by Hardware and Metal as the logical development of the situation created by the increase in the tariff covering the war tax and the higher costs of the main ingredients—particularly imported colors and chemicals—is announced to go into effect on April 15th. Many weeks ago May 1st was mentioned in these columns as the time when changes would be made, but later came the indefinite announcement that it would be a short time before that date. All brands of mixed paints are to be affected in the same manner so far as can be learned, although there may be some slight difference in the adjustments made by different houses in relation to their individual supplies of materials. However, the situation is such that the step has been forced and the manufacturers can see no other course. The delay until the present has only been due to the fact that at the time of the tariff change much of the spring business had been placed, and it was considered inopportune to increase prices in the middle of a selling campaign.

The trade is busy. With a favorable spring opening and stocks low there is a brisk demand for immediate delivery, and everything is being made ready for heavy deliveries with the opening of navigation a couple of weeks hence. City business continues dull, and Western Canada improves very slowly.

Mixed Paints.—All lines of mixed paints are affected, but the advance is not a uniform one, adjustments being based upon the extent to which the cost of raw materials have been affected. The increases run all the way from 10c a gallon to 50c a gallon. Bright reds are particularly affected, and there are some other shades of imported materials which are practically out of the market. In such cases prices for drys and for colors in oil are withdrawn and quotations only given on request, the makers preferring to protect their own output of mixed.

Mixed paints in general are up 10c a gallon, including floor paints, enamels and porch paints, but for bright reds the advance is about 25c. On flat oil paints the general advance is 10c, with bright reds 50c up. Barn paints advance 5c a gallon. Carriage paints show a small general advance, with about a third higher for bright reds and wagon paints 10 per cent. up and 25 per cent. higher for bright reds. For colors in oil the advance is 1c a pound for greens, other colors 2c lb., and vermilions, Prussian blues, Chinese blues and Japan colors all out of the market, being only quoted on request.

PAINTS TO ADVANCE APRIL 15TH.

There will be a general advance in the price of all mixed paints, to go into effect on April 15th on deliveries after May 1st. The increases cover a big field, but may be generally summarized as follows:—

General lines of mixed paints, including floor paints, enamels and porch paints, 10c gal., excepting bright reds, which advance 25c a gal.

Flat oil paints—10c a gal. and 50c a gal. for bright reds.

Barn paints—5c gal.

Carriage paints—A small advance for regular colors and 33 1/3 per cent. on bright reds.

Wagon paints—10 per cent. advance on ordinary colors and 25 per cent. on bright reds.

Colors in oil—Greens, 1c lb. Other colors 2c lb., excepting vermilions, Prussian blues, Chinese blues and Japan colors, which are withdrawn.

The factors which have led to the higher prices are the tariff change, increased costs for lead, zincs, oils and chemicals and the shortage in imported colors, which promise to be out of the market almost entirely after a few months of a continuance of the present conditions.

Linseed Oil.—The market is distinctly firmer and prices have advanced. Conditions are reported as unsettled, firm for the time being, but uncertain for the future. Crushers have put their prices up 2c. In the trade there is considerable spread in prices, as indicated by the following range.

	Raw.		Boiled.	
1 to 2 barrels ..	80c	84c	83c	87c
3 to 5 barrels ..	79c	83c	82c	86c
6 to 9 barrels ..	78c	82c	81c	85c
10 bbls. and over.	77c	81c	80c	84c

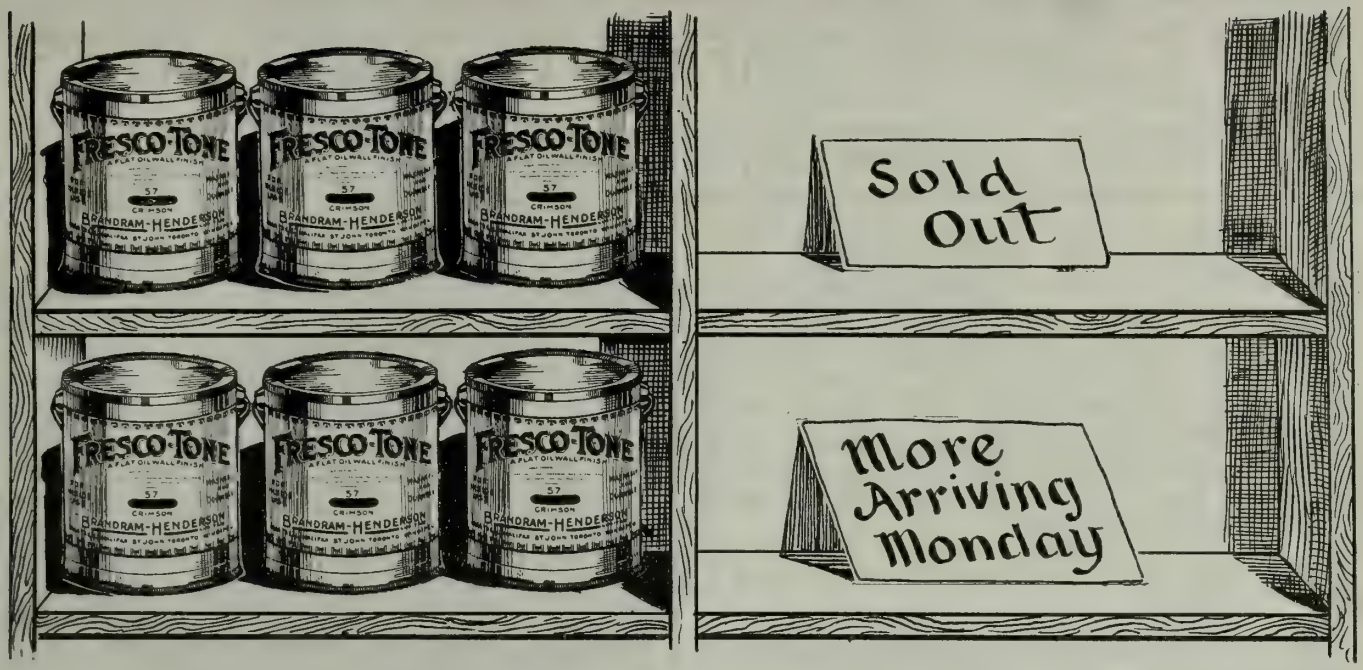
5-gal. cans, 50c each; 10-gal. cans, 75c

Demand for oil is reported to be brisk, this being the season when there is good buying for water delivery to country points.

Gasoline and Benzine.—Spring demand for delivery on the opening of navigation is reported to be brisk and equal to that noted at the same time a year ago. Prices are without change at 15c in drums and 14½c tank wagon.

Turpentine.—The turpentine market is very unsettled, there being a wide range in quotations according to individual stocks and opinions. In some quarters quotations are somewhat easier and in others they are indicated as being very firm.

	Per gal.	
½-barrel lots	68c	71c
1-barrel lots	65c	68c
2 to 4-barrel lots	64c	67c
5 to 10-barrel lots	62c	66c



Glass.—There appears to be no change in the glass situation. Officially the quotations are without change, but it is intimated that the schedule is not being closely adhered to.

Lead and Zinc.—With the prices for pig lead continuing to advance almost every week, the situation is very strong on the last advance and higher prices are quite possible. Zinc is very firm and hard to get.

Dry Colors, etc.—Colors are very unsettled, as indicated by the high price of red paints and the withdrawal of a number of lines of colors in oil. Dealers are generally conserving their stocks for their own use. Putty is very firm, with whiting costing considerably higher.

Arsenate of Lead.—Canada Paint Company announces material reductions in the prices of arsenate of lead in paste. The quotations are down about $3 per hundred pounds throughout the range, as indicated in the price list.

(Continued on page 43.)

Fill Your Shelves With FRESCO-TONE

They will soon be emptied.

The Flat Finish vogue finds its fulfilment in

"FRESCO-TONE"

The soft velvety finish, thoroughly sanitary and easily washed.

We predict for you a large sale of

"FRESCO-TONE"

this season. We have added five new colors to keep up with the increasing demand.

Fashion has set her seal of approval on Flat Finishes, and many of the old-fashioned color washes on walls, etc., have been replaced by the new washable Flat Oil Wall Finish,

"FRESCO-TONE"

Try an assortment, including our five new colors, to start the season with.

Our advertising display matter, show cards, window cards, etc., are very original and trade compelling—send to-day for particulars.

Do You Look Forward To 100% Increase In Varnish Sales This Year?

BASING his judgment on past experience, C. J. Chapman expects 100% increase in his sales on Pratt & Lambert Varnishes this year. Read Mr. Chapman's letter. Can you feel and talk the same way about the line of varnishes you carry? P & L Dealers expect big things and do big things, because there are big selling plans behind the P & L Varnishes on their shelves.

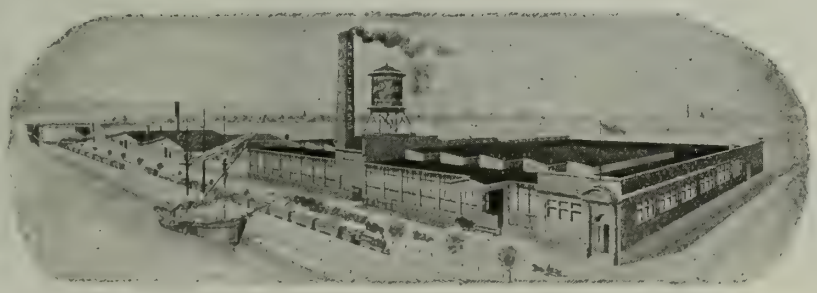
RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."



"The Right Paint to Paint Right."

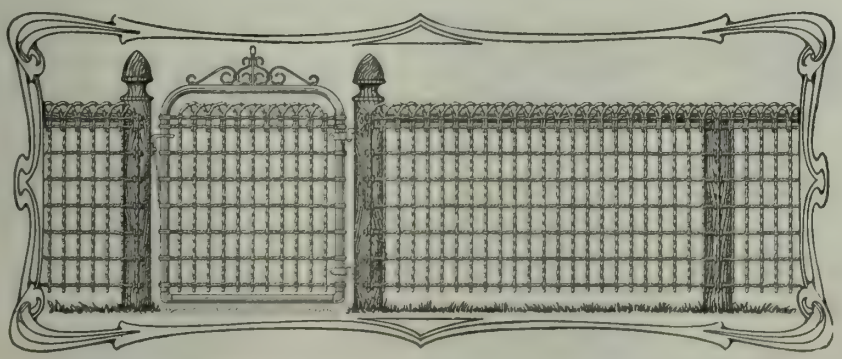
"FENCE UP"



A farm, garden or lawn is judged at first by the fence which surrounds it. Time and a close inspection are necessary to discover the inner qualities. You must for your first impressions be guided by the outward appearance. Therefore, it pays to have a neat exterior. In other words a fence is "The outward sign of an inward order and cleanliness."

You will say when you get this far:—"What is the idea? They must have fence to sell," and this will be right, we have fence to sell. Fence for all purposes, and border and gates to go with the fence, and gates to go without the fence. All of them are of the best standard makes; and we sell them plus our "Service," which means you buy fence value.

We also have a big intelligent fence circular which tells you all about our fence, its gates, etc.; also how much fence you will need for any known quantity of land, all worked out for you on a neat little chart, which will help you talk to your prospect and give him facts with every one of your selling arguments.

If you haven't a circular, mail the coupon and make sure of getting one. We want to help you start a "Fence Up" move. We think it will be a good one, and we want to have our fence in the game too. We can supply you with everything that is honest and new in fencing, and back it by our "Service."

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps
They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

MAKE MONEY FROM GOOD PUMPS—PROFIT

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift — every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

Money In These

There's many a hardware merchant making a nice annual profit handling SPRAMOTOR parts and accessories. The SPRAMOTOR is universally used. It has become standard through its excellence, and there is a steady demand for the superior parts we make.

When you handle the SPRAMOTOR you handle the best made. We have outfits selling all the way from $6 to $350, and the dealer who sells a

Spramotor
It isn't a SPRAMOTOR unless we made it

satisfies a customer. Our persistent advertising has familiarized the name "SPRAMOTOR" to such an extent that we have had to adopt the protective slogan under the name cut above. This indicates how widely our machines are known.

Why not accept some of the money being made? Write for our proposition. Made in Canada. No duty to pay.

Spramotor Works
2173 King St., London, Can.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Easy Seller Because--

It is **exceptionally convenient, quick acting** and **an oil saver.**
Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted as the flow of oil stops the instant the pressure on the plunger stops.
A sure good sale and splendid profit. Order it now.

R. E. BLOOMER
Keithsburg, Illinois

Atlas
10 Cent Fly Swatter

This swatter has an extra long handle — 10 inches. It is very neatly and securely bound with soft green felt — cannot mar the finest furniture. Especially adapted for parlor or drawing room use. We have made it extra strong and flexible — will outlast any now on the market.

Our 5 cent swatter is the best ever sold for a nickel. Also it has a triangular fold, permitting the insertion of your ad. if you desire.

Now is the time to place stock orders. We'll gladly quote prices and terms.

Russell Jennings

stamped on the round of our

Auger Bits

The original double twist auger bit, patented by Mr. Russell Jennings in 1855

Russell Jennings Mfg. Co., Ltd.

St. Catharines, Ont.

PEERLESS ORNAMENTAL FENCING

It's Made of Heavy Open Hearth Steel Wire

with all the impurities burned out and all strength and toughness left in. Heavily galvanized. Every intersection is locked together with a Peerless clamp. Top and bottom wires of Peerless Poultry Fencing are extra heavy—extra strong. Consequently fewer posts are required. **Peerless** fencing can't sag—can't rust—can't get out of shape—can't help giving absolute satisfaction.

You can sell our fence with a clear conscience and make money, too.

Send for our dealer's proposition. It's attractive. It will interest you. It's well worth a stamp. Send today.

CHICAGO STEEL BENDING BRAKES

(Made in all sizes)

Regarding the Steel Bending Brake we purchased last Spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.

Yours truly,

THE McCLARY MFG. CO., C. E. Main, Manager

The Steel Bending Brake Works Ltd., Chatham, Ont.

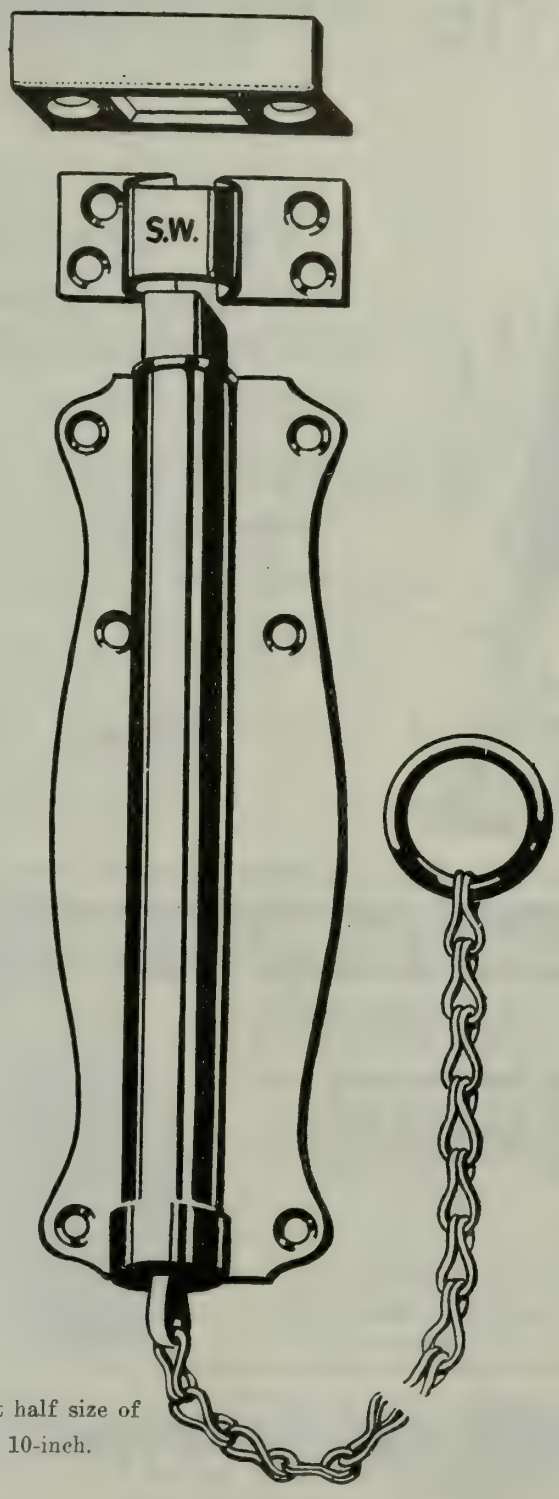
The Stanley Chain Bolt

No. 1055—Ten-Inch Size FOR GARAGE DOORS

This Wrought Steel Chain Bolt comes under the class of "Good Goods." It's a "Stanley" Product. This particular Bolt shown is our 10-inch size made for heavy garage and warehouse doors. A choice of Japan or Plated finishes. Chains made 24 inches long—strong links, well linked. Two staples furnished with each Bolt. Box staple packed when ordered. Also furnished with 5-foot chain and numbered 1055½.



One indication of quality in this "Stanley" Bolt is shown by the "Stanley" Sherardized spring. This prevents rusting and breakage. Ordinary strains won't break this Bolt, and it serves its purpose when once in place. May be reversed by removing set screw from bolt proper, turning bolt and replacing set screw in other side.

Other "Stanley" Bolts are somewhat similar in type, but are made 3 inches long for use on light doors, closets, cabinets, sheds, etc. Then there is the 6-inch size for full-size doors. These three sizes are enough to satisfy all ordinary demands for Chain Bolts.

Packed one in a box with screws to match.

Send a memo to your jobber

See Page 1

Cut half size of 10-inch.

Facts About Dazey Churns

More than 350,000 are now in use in hundreds of thousands of homes, in every part of the world.

In practically every town in the United States and a great many Canadian, responsible Dealers in Hardware sell and recommend Dazey Churns.

Are carried in stock by more than 150 of the Largest Hardware Jobbers in the United States and many foreign countries.

That they are undoubtedly the greatest advancement of the last century in churn making — combining Simplicity with a Scientific Principle of separation of butter-making properties of the cream —resulting in the production of a perfect granular butter in the marvelous time of 2 to 6 minutes.

That they have revolutionized butter-making — actually resulting in nothing short of a national conversion.

Special Prices to the Canadian Dealers. Catalog and information on how to increase your churn business will be sent upon request.

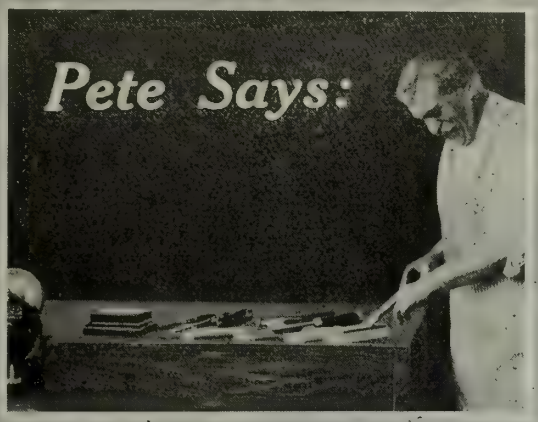
BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.



Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

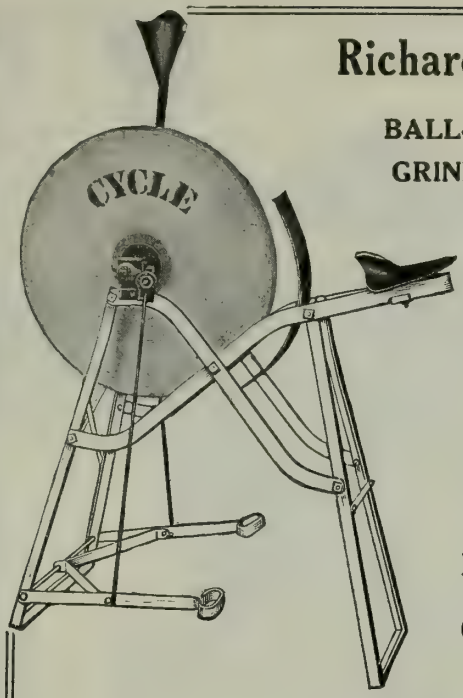
The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Spring building operations will soon begin

The boys will be drilling out at seven with their tool kits ready to put up the modest little cottages or the big mansions.

They will all need good sharpening stones,

Carborundum Sharpening Stones



The stones that they can depend upon to always cut free, fast, and clean, and give an edge that is an edge. The round and oblong Combination Stones, the Carborundum Slips and Gouges will be asked for. Stock up to meet the demand.

Show them in a Carborundum window

The UNIVERSAL

Butter Churn and Cream Whip

A practical churn for general household use.

Simple and speedy in operation, easy to clean and perfect in results.

The construction of the perforated paddle and its action in connection with the round wire frame, within which it revolves, is such that it will turn cream into butter in less time than any other glass churn on the market. This paddle is made of sheet steel, heavily tinned. It is more sanitary than wood and never wears out.

The glass bowl is entirely open at the top and the inside is perfectly smooth with no grooves or corners to interfere with cleaning.

The entire metal construction may be withdrawn from the bowl with one operation. A large clamp holds the churn securely to the table while in operation

The churning capacities mentioned below are actual ones and in most cases UNIVERSAL Churns will make as much butter as the next larger size of other makes.

As A Cream Whip

With cream below 60 degrees the UNIVERSAL Churn is just as good for whipping cream as it is for making butter at the higher temperature. Does the work more thoroughly and in less time than it can be done by hand.

For prices, etc., write to your jobber or direct to us.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.

STANDARD No. 0, No. 1, and No. 2. Retailing at about $2.50. High-class barber's clipper.

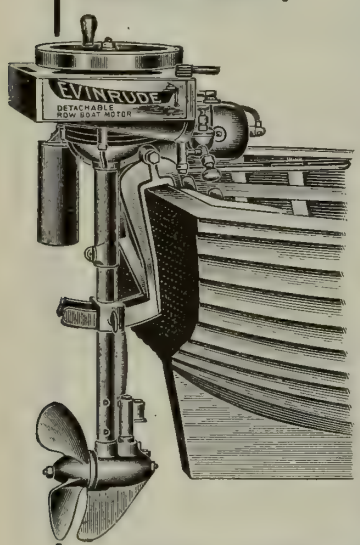
Your Opportunity

To Make Extra Profits



This Season

If there is any boating in or near your town you can profit by being the local agent for

Evinrude Motors

We are conducting an extensive advertising campaign in the following Canadian Publications:

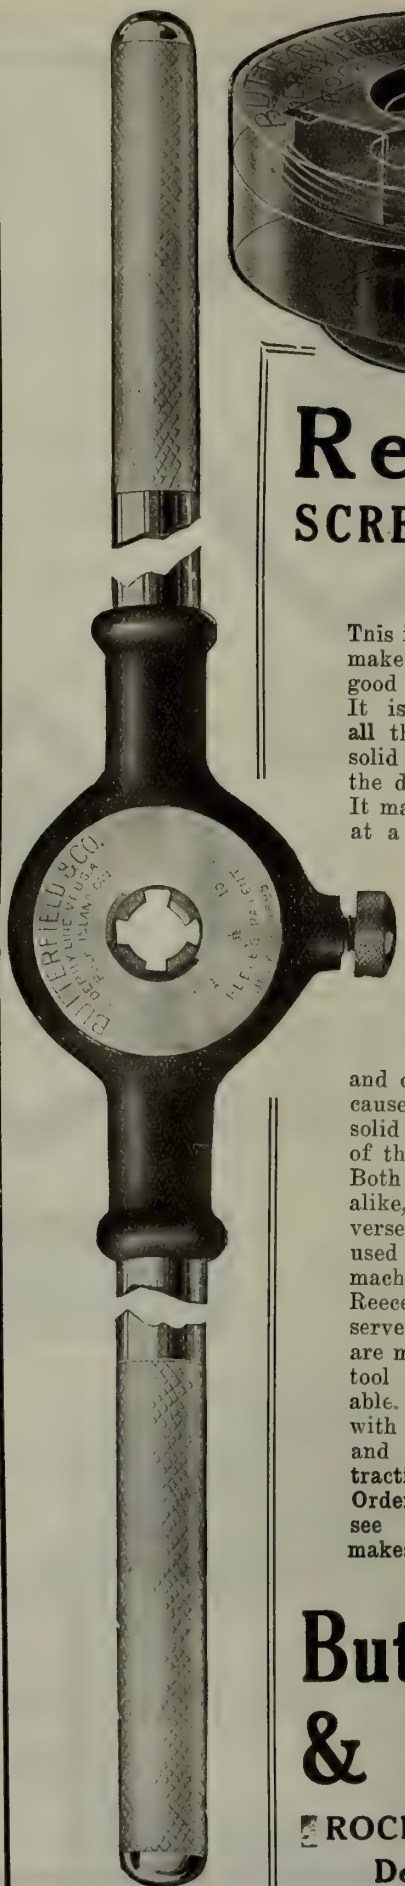
Toronto Saturday Night
MacLean's Magazine
Canada Monthly
Canadian Magazine
Rod & Gun
Motor Magazine

In addition to this advertising a large campaign is being carried in the

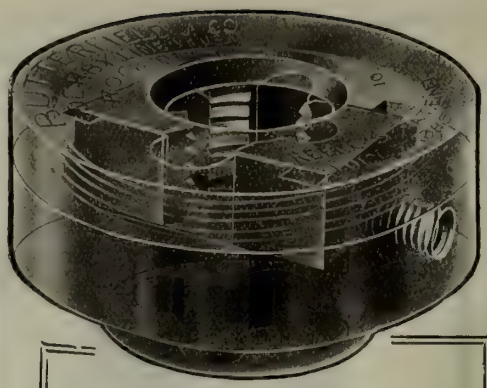
Saturday Evening Post

and other U. S. Periodicals, circulating generally throughout Canada. This advertising will greatly increase the demand for

THE EVINRUDE MOTOR



Every inquiry from your territory will be promptly turned over to you. We will mail personal letters and catalogues to prospects whose names you send us, requesting them to call upon ***you***—our Local Agent.



We will furnish you with "exclusive agents" window display cards. They make sales. It will be easy to sell Evinrude Motors with the help we give you, and you can fill your orders promptly, because these motors are carried in stock by our

CANADIAN DISTRIBUTORS.

There will be only one Evinrude agent in your town. Will you be that one? If so, write for particulars.

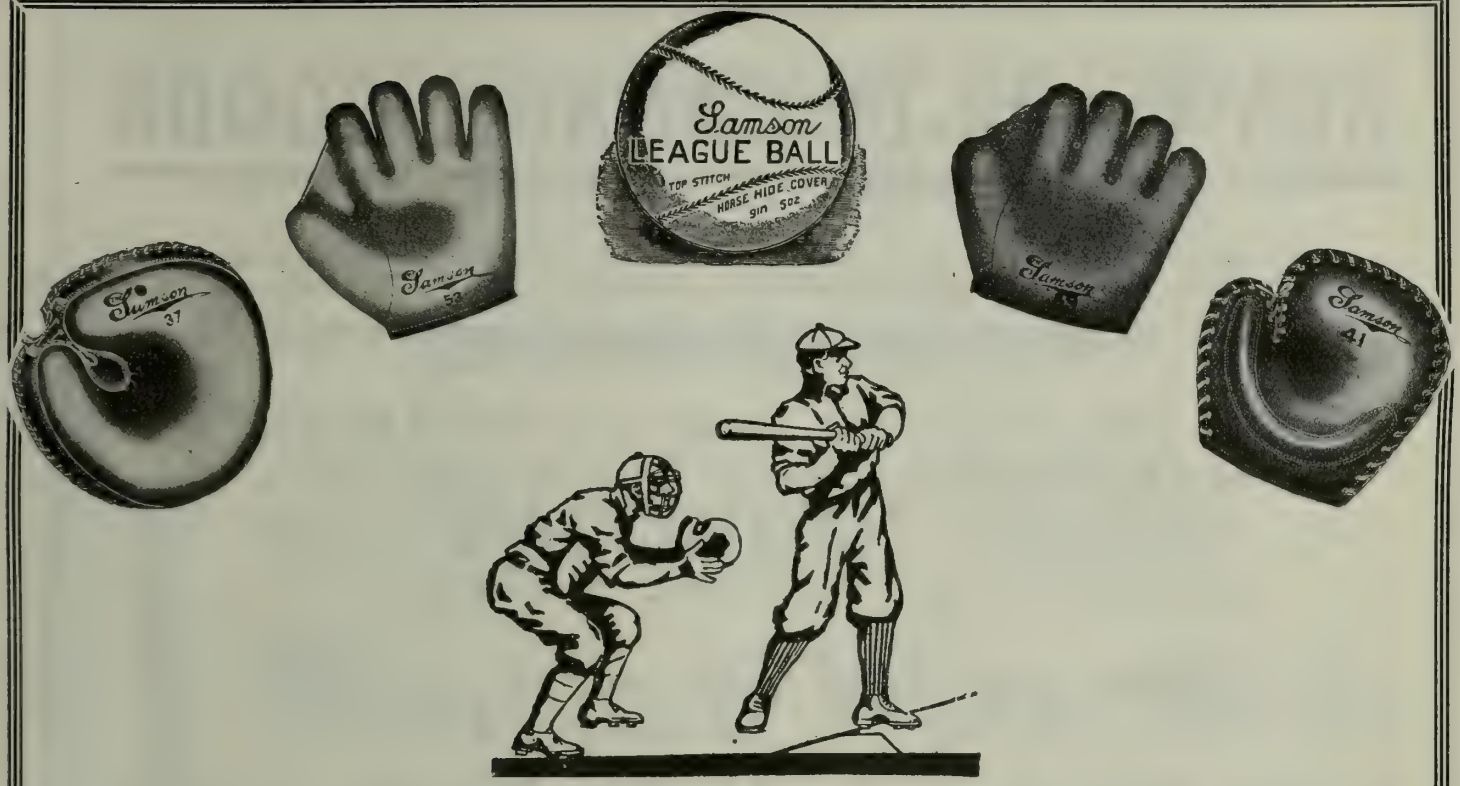
MELCHIOR, ARMSTRONG & DESSAU
Broad & Water Sts. New York City

Reece's SCREW PLATES OUTSELL

Tnis is a class of tool that makes firm friends with good mechanics.

It is adjustable, having all the advantages of a solid die, without any of the disadvantages.

It makes a perfect thread at a single cut and will cut close to a shoulder by simply reversing the collet. No "backing and filling" is necessary. It is impossible for the dies to loosen and cut cross-threads, because the guides are cast solid with and are a part of the collet.



Both dies being exactly alike, they can be reversed in the collet and used in a lathe or other machine.

Reece's Screw Plates serve longer because they are made of the very best tool steel that is procurable. They are finished with absolute accuracy, and set up in neat, attractive wooden boxes.

Order a sample set and see what a "hit" it makes.

BUFFALO

Ideal Threshers' Oil

is the most satisfactory oil obtainable for use on bearings of ALL kinds of farm machinery.

Is a straight mineral oil, dark red in color, heavy, but not too heavy to occasion loss of power, or to prevent free flowing.

Is not affected by moisture, or climatic changes, and age will not impair its unequalled lubricating properties.

Is possessed of a very low, cold test, so that it does its work in the cool of the morning equally as well as in the heat of the day.

You will make no mistake in recommending your customers to use Buffalo Ideal Threshers' Oil.

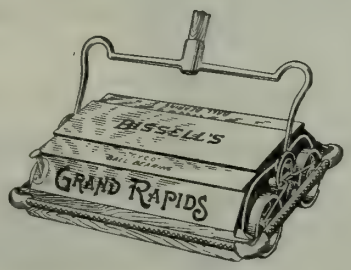
Time to Order

FREEZERS

Whether you stock the LIGHTNING, GEM or BLIZZARD, you get a Freezer that has made good for more than a quarter of a century—one that has won its way into the hearts of the housekeepers by service that satisfies—backed by quality that creates confidence in both merchant and manufacturer—one that's well advertised and in demand — one that brings trade and helps you keep it.

The BLIZZARD, being a low-priced Freezer, makes a good running mate with either the GEM or LIGHTNING. Now is the time to place your order. Shipment can be made any time you specify.

BE SURE to INCLUDE the LIGHTNING ICE CHIPPER No. 1. You can sell one with every Freezer. It chips a block of ice into small uniform pieces in a jiffy, just right to pack closely around the can and shorten the time of freezing. So much easier to make Ice Cream. They help the sale of Freezers.



Your Jobber will Supply You.

CAVALIER VACUUM CLEANERS

EAT THE DIRT. SWALLOW THE DUST. The lightest running hand cleaner to be had

CONSTRUCTION

Built of selected three-ply birch veneered wood throughout.
BELLOWS: Specially constructed to withstand the hardest use; displacing 40,000 cubic inches of air per minute.
NOZZLE: Overlapping twelve-inch suction nozzle, reaching into the corners and close to the wall.
VALVES: Arranged to give perfect action by means of high-tempered springs, tight fitting and assuring no loss of suction.
DUST BOX: Flexible; metal sides covered with canvas cloth; indestructible.
BALL BEARING: Special annular steel ball bearings, accounting for the ease of operation.
WHEELS: Made of cold pressed steel, extra heavy pure rubber tires.
BRUSH: Best Russian bristle, held in position by oil-tempered spring, self-adjustable to all naps of carpets, with double dust pans easy to clean.
TWO STEEL PINS: Insuring accurate adjustment of nozzle; exclusive feature.
STEEL SPRING CLAMPS: Holds the handle upright, so sweeper can be carried to any part of the house; a decided improvement over the old method.
FINISH: All wood parts beautifully finished in mahogany. Metal parts highly nickel-plated.

Start a Gun Club—
It Means Dollars To You

Post a notice in your store to-day that you are forming a gun club, to shoot once a week on some vacant lot near your store and you will have every man and boy in town putting down their names as members.

It is not only good sport for your mid-week half holiday this summer, but it will boost your ammunition sales and bring more people to your store—this will increase your sales and profits in practically every line of goods you carry.

Write us to-day for fullest information—we will give you complete details and tell you just how to organize a gun club and build up sales.

Speaks for Itself—

A Starrett Micrometer in a Plush-Lined Case

Ty Cobb values his glove and bat because of what he can do or has done with them. A musician values the instrument he plays because of his ability to make it produce melody. So also does a high-grade mechanic prize the instruments of his trade because they enable him to do fine work—to split hairs in measuring and to produce perfection in a machine part.

No tool is in more common use and none more highly regarded by machinists than the Starrett Micrometer. The most popular style is the No. 3—1″ micrometer with ratchet stop and lock nut.

There are many other types of Starrett micrometers for other purposes and it is safe to say that each style is in its class the recognized standard.

The fact that mechanics take so much pride in the possession of fine tools has made our *micrometer cases* very popular with them and consequently ready sellers for the dealer. This is because the case furnishes suitable protection for a highly prized instrument. The price of the leather-covered, velvet-lined case for ordinary sizes of micrometers is fifty cents. Price of 3″ micrometer $6.00.

Send for supply of catalogs No. 20-M.A. to distribute to Mechanics.

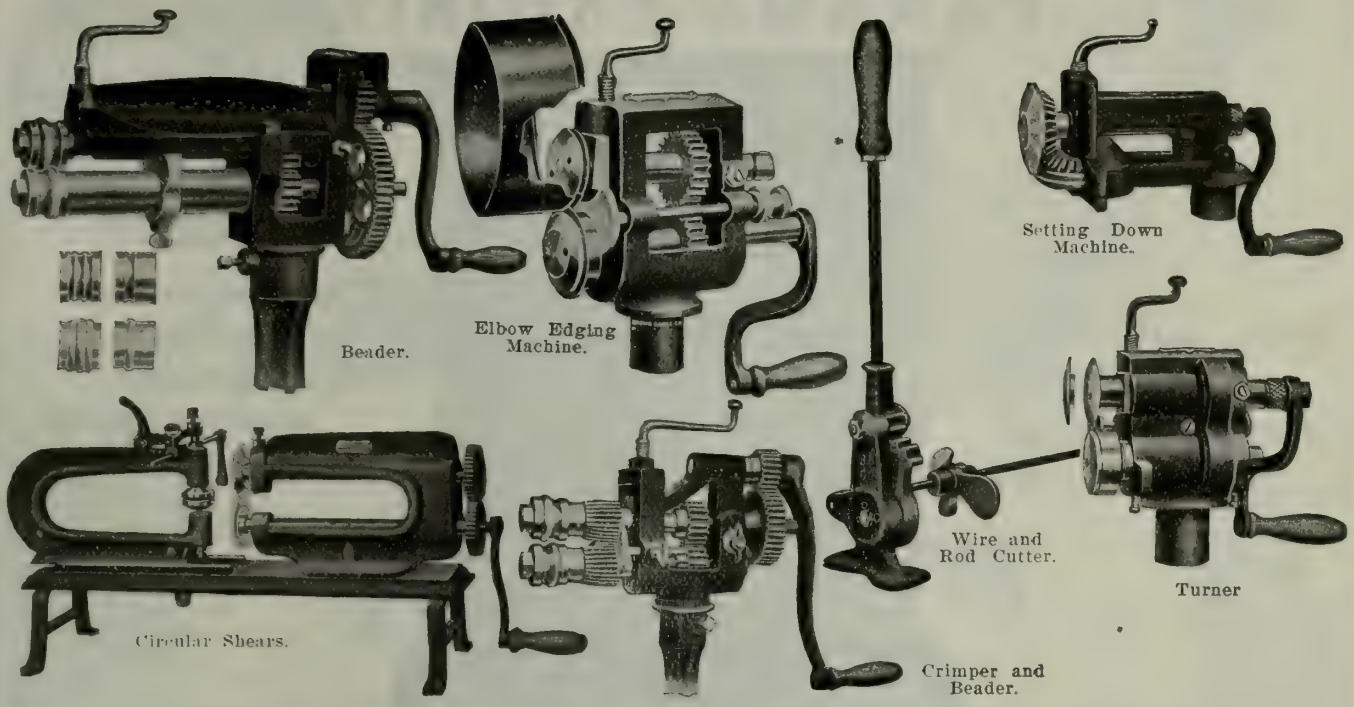
Mr. Dealer:-

Now is the time to prepare for the return of good business in the Spring. Your customers are going to ask you for "Canadian-Built Chain-Blocks" and their faith in you will certainly be increased when you are able to give them promptly what they want.

And when they get their Morris chain-block home on the job, and they find how fast and yet how easily it takes up the load, their respect for you as a man who handles "good goods" will be more firmly established than ever before.



Yours truly,

The Herbert Morris Crane & Hoist Company, Limited.

WROUGHT STEEL Screen Door Hardware

COMPLETE SETS IN CONVENIENT PACKAGES

Set No. 1750.

Set No. 1750 is made up of one pair of 3x3 ornamental, loose-pin butts to screw on the surface of the door; one five-inch wrought steel pull; one high-grade No. 3 spring, of much better quality than is usually used on screen doors; one gate hook and eye. Each set is packed securely in a neat, strong, telescope carton, with screws of the proper size and finish, ready to be handed to the customer.

These sets are finished in Japan, Antique Copper, Dull Brass, or the Rust-Proof "Stanley" Sherardized finish.

A less expensive set, No. 1752, is also put up with 2½x2½ butts, and a No. 2 Spring. It is made of good materials and is fully equal to other sets on the market.

Send in your order for Stanley Screen Hardware, and be prepared for Spring business. Write us, if your jobber cannot supply you. See page 1.

Showing Paint in the Window

Fine Weather Increases the Interest in Paints—The Clean-Up and Paint-Up Movement —The Part the Show Window Plays — Helps Supplied by the Manufacturers.

By HENRY LEWIS.

WITH the advent of fine weather there has been a noticeable increase in the demand for paints of various kinds. The good weather has also had a beneficial effect on the "clean-up and paint-up" movement throughout Canada, and there is every reason to believe that the movement this year will receive even more support than it did last year. Newspapers, boards of health, municipal governing bodies, and the public appear to be taking an interest in the various movements which have been inaugurated in many of our Canadian towns and cities.

One of the most pleasing features of the campaign this year is the interest that is being taken by the retail hardware merchants. Many attractive newspaper advertisements are being run by retail hardwaremen who are boosting the paint game this year.

Of course, there are some towns and cities where the movement has not met with much success, but a sufficient number of towns have taken up the movement to such an extent that the paint trade in general will be greatly benefited.

Newspaper editorial announcements, advertisements, circulars, etc., will help a great deal in boosting the clean-up and paint-up movement, but there is another form of publicity, which can be effectively used by the retailer, and that is the use of the show windows. What line have you, in your store, that can be used to better advantage in preparing an attractive window display than painting materials? The neatly labeled cans and the color cards in themselves can be arranged into a neat display, not to mention the many excellent selling helps and display cards, etc., supplied free by the leading manufacturers.

A good window display attracts the attention of passers-by, and often results in their entering the store to make enquiries or a purchase. By judicious use of the show windows, the public are kept

An exceptionally attractive and well-balanced paint window display by George H. Garrett, 1244 Gerrard street east, Toronto, showing how manufacturers helps have been used in the window. There is no evidence of crowding in this window.

informed regarding the goods carried in the store.

An attractive window display will often interest a prospect to such an extent that it makes him think he needs the goods on display. As the seasons change, the show windows are used to attract the attention of the public to the many lines of seasonable merchandise that have been selected for their use, comfort and convenience. In the spring paint season the window can be made to play a big part in pushing paint sales.

In the large departmental stores the show windows are given a high rating, as business bringers and competent staffs of window-dressers are employed for the purpose of arranging attractive and sale-producing window displays. The displays are changed at regular intervals and considerable time and money are expended in obtaining display fixtures and other appliances that will assist in showing their merchandise in a manner that will attract the attention of the passers-by. There are many people who make a visit at least once a week to the windows of many of the large stores, knowing that they will see each time a new and well arranged display. The public soon lose interest in the show windows of a store if they find that the displays are not changed regularly and are allowed to become stale.

Wonderful changes have taken place along this line during the past few years, and in many places we find up-to-date store fronts where a few years ago very little attention was paid to window displays. This latter assertion applies particularly to the hardware business. It was not an uncommon sight a few years ago, especially in the small cities and towns, to see a window display go unchanged for several weeks, with the result that the goods became disarranged and dirty. The labels on the cans or packages were often faded out, and did not at all resemble their former appearance as far as color was concerned. Unseasonable goods were often displayed. Windows were often covered with circus posters or show bills, and in many cases paint was lacking.

You find now that stores of this kind are the exception rather than the rule, and that hardware merchants in many places are beginning to realize more than ever, the true value of their show windows, and are making splendid use of them.

Some of the best and most practical and attractive displays in the business sections of our towns and cities are found in the store windows belonging to hardware merchants.

Why not make your store window work overtime during the paint selling season this spring?

High Linseed Oil for Year or More

Fluctuations in Oil Expected During the Next Few Months, But a High Level of Prices Will Generally be Maintained—Scarcity of Flax Seed.

THIS, in the opinion of those closely connected with the linseed crushing mills, is what hardware dealers must expect. The decline in prices which came two or three weeks ago was almost inexplicable. During the coming months there will probably be other similar declines, but the impression of close students is that such dips will be only temporary, and that a high level of prices will generally be maintained.

Why of the High Prices.

Dealers may wonder as to the cause. Is it because of the scarcity of flax seed? Is it owing to market manipulation? Apparently nothing of this nature has brought about the present high prices, nor is it these things which it is expected will keep linseed selling at a high figure. This is simply a case of a manufacturer having one source of income largely cut off, and therefore having to get a little larger income from his remaining sourse.

Oil Cake Market Killed.

Hardwaremen will realize that an important part of the profit made from crushing flax seed comes from the oil cake. This by-product of the linseed oil has formerly been shipped largely to Belgium and to Holland. At the start of the war the demand from Belgium was of course cut off, but unexpectedly very heavy orders were received from Holland and very high prices for oil cake were given, as was reported in an article on linseed oil in the Jan. 30th issue of Hardware and Metal. This heavier ordering from Holland has now ceased, though probably not because the Hollanders do not want the cake.

The heavy demand from Holland, it is now believed, was partially the result of German orders being filled through Holland. Because of this oil cake has been declared contraband, and producers state that shipping companies are refusing to carry it. Hence the Holland market—at first more profitable than usual—is now as broken as the market of devastated Belgium.

With the great European markets closed, all the oil cake made by Canadian and United States crushers is left here. It is true that the demand for cake has increased locally in the last few years, but this increase is not at all in proportion to the increased supply which is thrown upon the American market.

Ten Tons a Day in Winnipeg.

How rapidly oil cake piles up when the ordinary channels for its disposal are affected may be understood when it is stated that Winnipeg crushers alone turn out 10 tons of cake a day. It was the regular custom to ship about 100 tons monthly to both Belgium and Holland. Now, as has been stated, no cake whatever is going to these countries.

Last year the United States shipped 165,000 tons to Belgium alone. This year only 500 tons have been sent to that market, and if the war continues practically none will go there next year.

Because of this situation the belief is that oil must remain at higher prices. The demand for the by-product has fallen off. It is possible, of course, to store the oil cake, but there is little advantage in this. The demand for this feed—when it returns—cannot possibly be large enough to use up the extra supply. As far as Belgium is concerned, there will be many less cattle and a naturally much reduced consumption. There cannot, moreover, be a stopping of the production of oil cake until the supplies become used up. While the linseed is being crushed the cake can be made almost as easily as not.

Formerly Asset, Now Liability.

It will be seen that not only is the revenue formerly derived from the oil cake cut off, but that there is actually an increase in the overhead expense in linseed mills. Oil cake used to be moved regularly, and required only a little handling. Now it must be stored—requires a good deal of room—thus raising cost of doing business.

The hope in the situation is that a new market for oil cake may be found. England at present is taking considerable of this cake, but not sufficient to in any way reduce the local over-stocks. China is being considered as a possible market. Inquiry though is only under way, and it will at best be some time before anything can be disposed of there. It does at present look as if the profit to the crushers will have to come from the sale of linseed oil—that they can depend little or nothing upon the oil cake to yield a revenue. If this is so, the oil alone will have to yield practically as much as the oil plus the cake have yielded in the past. Hence the expectations of high prices.

Mail Order Houses Save Money

And the Post Office Loses—Catalogues Sent by Freight to Post Offices Outside the 20-Mile Zone and Mailed From There at Low Rate — What Local Papers Say.

DOES the trade generally appreciate the fact that the big mail order houses are saving a large sum of money annually in sending their catalogues by freight and parcel post? Not only that, but the 20-mile zone limit is not having the effect of benefiting the merchants throughout the country—in so far as catalogues are concerned—that merchants anticipated when the new regulations came into effect.

The reason is this. Catalogues not being first-class mail matter may be sent by express or freight to any town or city in the country and mailed from there to their respective destinations. This gives the big mail order houses a fine opportunity to save a lot of money at the expense of local merchants. Catalogues are being sent out by freight to post-offices in different parts of the country and mailed from there to individuals living within the twenty-mile zone. With the exception of the cost of chartering a freight car, this method gets over the 20-mile zone restriction that was placed in the regulations to help out the cause of the local retail dealer.

Apart from the fact that the retail merchants of the country have to suffer from parcel post system, how about the work that is put up to postmasters in places where these catalogues are sent for distribution within the 20-mile zone? The accompanying cartoon represents a car of catalogues being unloaded at a small station. The representative of the distant house is enthusiastic over the great saving his concern is making; but the poor local postmaster sees nothing but an immense amount of work for himself and small staff and no extra revenue.

At the same time, the railways are making some money from this method of distribution, while the post office department and the country is losing. Retail associations take the stand that parcel post should pay for itself, and rightly too. The mail order houses are certainly reaping the greatest benefit from it and if it is not paying its way, it simply means that the Government has to use other people's money to meet the deficiency—and those "other people" include retail merchants who are the competitors of the mail order concerns.

This entire matter might be an interesting one to discuss at association conventions this year.

During the past few weeks thousands of mail order catalogues have been distributed throughout the rural districts in Canada and it is claimed by those in close touch with the situation that the mail order department of one of our largest merchandising concerns is by long odds the busiest department of all at the present time.

Reports are constantly coming in from retail hardware merchants who state that they are forced to cut many prices on their goods in order to meet mail order competition and that in selling at the mail order prices, the retailer makes little or no profit on his goods. Mail order houses always have leaders and it appears as though the retail trade must be prepared to meet the competition of these leaders in order to hold the trade at home.

Now is the time to fight the mail order houses. United effort on the part of the retail trade will work wonders in offsetting mail order competition. Local newspapers in many parts of the country are coming to the assistance of the retailers by running editorial notices, urging loyalty to the home community. The following notice from a small town paper is typical of many of the notices which are appearing in many newspapers in the smaller towns and cities:

The post offices have been flooded with price lists and catalogues sent from various houses. These houses send to you cheap, flashy catalogues, quoting, presumably, low-priced goods. They solicit your business, offer you, according to the catalogues, great bargains; but how many times have you been disappointed in these cheap mail order purchases? How many times have goods been of poorer quality than the goods you buy at home for the same prices?

Your local dealer advertises in the local paper; does the mail order house patronize the paper that you receive?

Who puts up the money for improvements, the merchant or the mail order house? The merchant puts up the money, and the mail order house only sends more of its cheap catalogues into the merchant's territory to draw away his trade.

The local dealer is always foremost when it comes to the improvement of your community. How many times have you gone to your local dealer when you wanted to improve or beautify your town? Did you ever write to a mail order house for donations towards improvements?

The merchant pays taxes in your district to help defray expenses and thus lightens the burden on your shoulders. The mail order house pays taxes in a community hundreds of miles away

TAKING ADVANTAGE OF PARCEL POST.

(Continued on page 35.)

How Hardware Goods Are Made

Third of a Series Showing How Hardware Goods are Made and Sold—Representative of Hardware and Metal Pays a Visit to a Bolt Plant and Describes the Manufacturing Process of Bolts and Nuts.

IN this article is presented to the readers of Hardware and Metal another article of the series, "How Hardware Goods are Made." The last article described the manufacture of silver plated ware. This article treats the manufacture of bolts and describes the operations through which the bolt passes, from the steel rod to the packing room.

First let us observe one or two bolt facts. Carriage bolts, machine bolts and coach screws are measured from under the head to the end. Tire and sleigh-shoe bolts are measured over all.

There are two kinds of tire bolts—the fluted and the plain. The flute grips the wood better. Those with flutes are made only up to ⅜ x 3 inches, while the plain are made in all sizes. Like sleigh-shoe bolts, they are countersunk.

Carriage bolts have a square neck, and a button head. Coach screws (sometimes called lag screws) are usually made with gimlet points.

Machine bolts are made with a square head. A square machine bolt means a square head and square nut, and a hex. machine bolt means a hex. head and hex. nut. There are also bolts with square head and hex. nut, which must be specified when ordered.

All sizes up to ⅜ by 6 inches of carriage bolts, machine bolts, tire bolts, sleigh-shoe bolts and coach screws, are made cold, that is, they are cut from stock and headed without first being heated. Larger sizes must be heated at the end before they are headed.

Let us, first, consider the manufacture of the smaller sizes, i.e., those which are made from cold stock. They are made from rods which have been drawn in the wire mill to the thickness of the bolt required. The rods are fed from a coil into a heading machine, which we will not stop to describe in detail. What the machine does concerns us more than how it does it. In the case of a carriage bolt, the machine is set so as to cut the correct length, and at the same time to give the button head and the square neck. This is done so quickly that the bolts fall in a constant stream into the pan below.

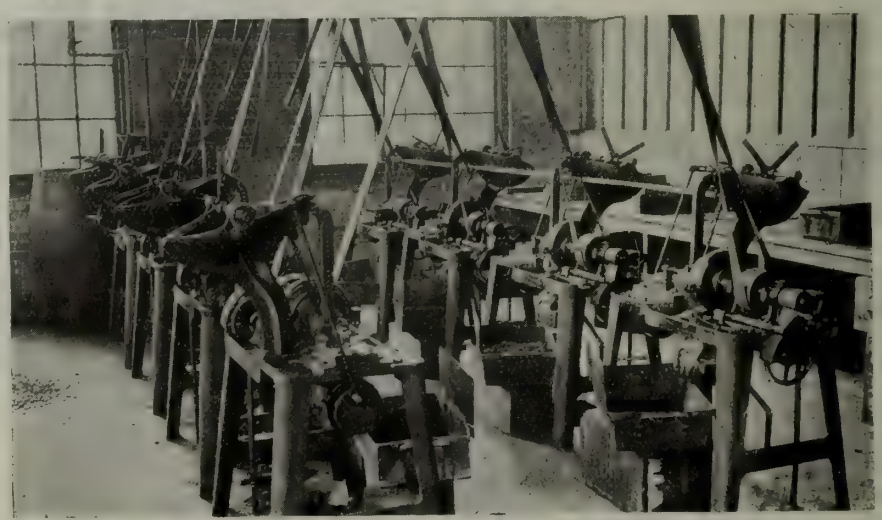
This operation has the effect of hardening the steel, and unless specially treated the bolts would be unfit for use. The process through which they now pass is known as annealing, and applies only to bolts made cold. Before going to the annealing furnace, the rough edges are removed by an operation known as rumbling. The bolts are placed in a large iron barrel, called a rumbler, which is revolved by machinery. By thus shaking them together they are made smooth and clean.

After leaving the annealing furnace, the bolts are removed to machines to be pointed a simple operation, which consists of rounding the bottom end. This is done with remarkable rapidity by girls.

Threading the Bolt.

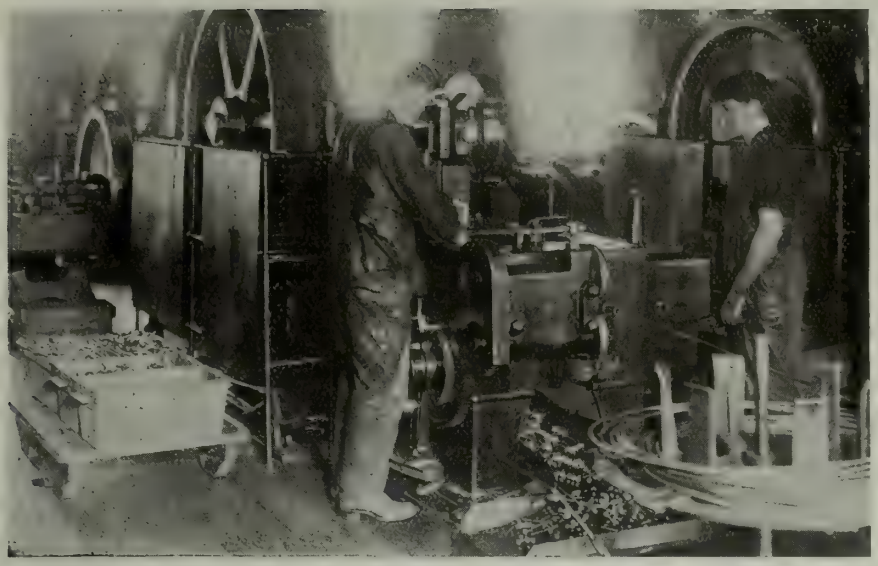
The average bolt is now ready for its thread, but the machine bolt requires to have the button head, which it now possesses, converted into a square or hexagon head, according to requirements. Automatic machines perform this operation at great speed. This is called "trimming" the bolt.

There are two ways of threading bolts by machinery. First there is the roll thread, which is made by running the bolt between two long dies. Some idea of this operation can be obtained by rolling a lead pencil between the palms of your hands. If there were dies on your hands, a mark would be made on the pencil similar to that on the bolt. These machines go at great speed, and are fed by girls. The plant of the Steel Company of Canada, Montreal, and in most Canadian factories, the U.S. standard thread is used entirely.



Work is not turned out so quickly on the second type of machine, but the work is done more efficiently. The second way is used more when threading larger sizes, as in this case the cuttings escape, whereas by the other method the metal is forced into the shank. The bolt passes through four dies, just as in the ordinary stocks and dies, the space between the dies permitting the cuttings to escape. The bolt which is stationary, is forced through the revolving dies by a lever. When the lever is withdrawn the dies are released, and the bolt drops into a pan. In both cases, a solution is poured continuously on the bolt as it is being threaded. This prevents the dies from burning and the solution is one that will not permit the steel to rust. The thread on a coach screw is made by dies as described above.

Prepared for Packing.



Before being packed, it is necessary to wash them. For this operation, they are packed in perforated buckets, and passed through tanks containing a hot solution of soda and soap. They stay in there for a few minutes until the oil has been washed away.

From the wash room, they are transferred to the packing room, and dumped on benches. First, each bolt is tested to see that it goes on the nut smoothly. Should a bolt not fit the nut, it shows there is something wrong with the threading, and the bolts are rejected.

After this inspection they are arranged in neat piles, wrapped in double paper and tied with twine. The packages are labelled, and on the label in bold figures are the quantity, diameter and length. Now they are sent to the

Tapping Nuts—They pass from the hoppers to the taps below.

Showing the rod being fed into a bolt making machine.

stock room ready to be shipped when ordered by the wholesale houses.

Larger Sizes.

Up to this point we have watched the manufacture of sizes up to ½ x 6 inches, no mention being made of larger sizes, which are made from stock which has been heated. This work is done in a separate department. In the plant of the Steel Co. of Canada, the whole length of one side of the building is occupied by furnaces and headers. They are arranged, so that the furnace man, as soon as the heads are hot, can easily pass them over to the man on the header. The stock is brought into the building on trucks, the bars being from 10 to 14 feet long. They first go through the shears, which cut them into desired lengths, a certain amount being allowed for making the head. These pieces are then moved in wheel barrows to the furnace, in which they are placed a sufficient distance to allow the heads to become red hot. The furnaceman knows by experience just how hot the end should be. An oil fire and blast is used in the furnace.

The headers perform more operations than in the case of those working on cold stock. It is easier to do this work when the steel is hot. The head is made complete. All bolts are rumbled when they require to be galvanized, as for galvanizing it is necessary to remove all scale from the bolt. While the actual operations on large size bolts are less, the cost of making them is higher because of the furnace, and being heavier, they cost more to handle. No annealing is required for large size bolts. After the head is made, they are moved to another department to be threaded.

Making the Nuts.

Just the same as in the case of bolts, nuts are made cold up to a certain size, and hot any size. They are made from nut steel, the shape of which is the same as the nut required. Large sizes are made very similar to large size bolts. There is a long line of furnaces with the same number of nut machines. The rods are heated to a certain temperature, and are then fed into the machine, which cuts them, crowns them, and punches the hole. When they are cool, they are sent first to the burring machine, and then to a rumbler to have the sharp edges removed. Small nuts are made cold from nut steel, which is fed into the machine from a coil.

There has been a remarkable advance in the manufacture of machinery for tapping nuts in the past few years. Until a short time ago, the spindle of the tap entered the nut, and was then withdrawn. Then a machine was made which allowed the nuts to pass up the spindle until the spindle was full, when they were emptied into a box, the spindle placed back, and the machine set in motion again. A machine of more recent invention allows the nuts to pass along the tap and to fall off at the other end. In this case the spindle revolves horizontally.

After being washed, the nuts are ready for the bolts, and are removed to the packing room.

Making large size nuts. The hot bar being forced into the nut-making machine.

WHERE MAIL ORDER HOUSES SAVE MONEYY.

(Continued from page 33.)

from where you live and you receive no benefit. Trade at home. Read the ads. in this issue, and see who helps support the paper you are reading.

Mr. Retailer, advertise in and assist your local newspaper. If the paper is a good one you will get returns that will repay you many times over and you will also get the co-operation of the local publisher. Your united action can do a great deal to kill the mail order bug in your district.

OPERATING 90% CAPACITY.

Cleveland, Ohio, April 15.—The Iron Trade Review to-day says:—Wire mills are now operating at about 90 per cent. of capacity. Tinplate mills are also very active, and there is improvement in other lines. In spite of some shading on desirable business, prices are being pretty generally maintained on finished materials.

Inquiry for machine tools does not show as much business, due to the European war, but domestic demand is slowly improving, and a very encouraging feature has been the appearance of a list of machine tools to be purchased by the Burlington Railroad, containing the largest list of tools which has come from any western railroad in many months. Pittsburgh machinery manufacturers are in a more cheerful frame of mind.

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, APRIL 17, 1915 No. 16

PAINT-UP, Clean-Up and Swat the Fly.

* * *

THE INCREASING industrial use of wood alcohol has created conditions of carelessness in the handling of it. Wood alcohol is an active poison, and all bottles, cans or other containers of this liquid should be plainly and conspicuously marked "Poison" in compliance with the law.

* * *

COURTESY IS AN investment that requires no cash outlay, but pays wonderfully big dividends. Courtesy is to your personality what service is to business—the one little thing that makes big things possible. No business can be built on a solid foundation where the keystone of courteous service is lacking. That is a known law no well-founded business house wilfully neglects. It is a law you personally cannot ignore and hope to advance far toward prosperity.

* * *

A LIVE WIRE is a man always looking ahead, and doing things that count. Of course, it is needless to say that someone has to do the routine work; of course they have, but the idea is for you to study out an easier and better way for that routine work to be done, and put that idea into practice, and ere long you will rise from the mediocre class, and attain things worth while.

The Tax on Cheques, Etc.

IN last week's issue of Hardware and Metal we announced that the war taxes not already in effect would be become effective on April 15 and that wherever possible, stamps on which the words "War Tax" have been printed should be used for prepayment of the war tax, but should ordinary postage stamps be used for this purpose they would be accepted. Further information has been given out this week by the Postal Department to the effect that if "War Tax" stamps are not available postage stamps may be used for the prepayment of war duties on bank cheques, bills of exchange, promissory notes, express money orders, proprietary or patent medicines, etc., as well as upon postal notes and post office money orders. The notice from the postal department reads as follows:—

"The Post Office Department, Ottawa, Canada, having given notice a week or two ago, in connection with the War Revenue Act, that all letters and postcards mailed in Canada for delivery in Canada, the United States or Mexico, and letters mailed in Canada for delivery in the United Kingdom and British possessions generally, or wherever the two-cent rate applied, should, in addition to ordinary postage, carry a one-cent stamp as a war tax, and also having notified the public that such war tax, while it should be paid preferably by the postage stamp marked "War Tax," could, if such stamp were not available, be paid by an ordinary one-cent postage stamp, is now issuing further notice to the effect that postage stamps may be used for the prepayment of war duties on bank cheques, bills of exchange, promissory notes, express money orders, proprietary or patent medicines, perfumery, wines or champagne, as well as upon letters and postcards, postal notes and post-office money orders, the intention being to provide facilities in those portions of the country where excise stamps are not readily available. This in view of the fact that postage stamps may be obtained at all points over the whole country, in many places where there is no Collector of Inland Revenue and no Inland Revenue stamps could be obtained, is a distinct convenience to the public, and, no doubt, will be largely taken advantage of.

The stamp on cheques, drafts, etc., must be affixed by the issuer—in the case of a cheque by the person who draws it; in the case of a draft or money order, etc., by the issuing bank. Stamps on promissory notes or bills of exchange lodged with or transferred to the bank must be affixed by the person lodging the item. Stamps on such items must be cancelled by the bank which pays or receives the item. Stamps on bank drafts and bank money orders are to be cancelled by the paying bank.

The bank has no authority to affix the stamp to a cheque, promissory note or bill of exchange for a customer, but may sell stamps for this purpose.

A penalty of $50 is provided for the person who issues a cheque or signs a savings bank receipt without affixing a stamp, and of $100 for the bank which issues any item which should be stamped without a stamp, or does not cancel the stamp on cheques, receipts for money, bills of exchange or promissory notes, etc., when paying them.

A cheque must be cancelled at or before the time of payment; a bill or promissory note at the time the bill or note is transferred or delivered to the bank.

Profit Sharing Coupons.

THE announcement made recently by Marshall Field & Co., to the effect that all merchandise involving the distribution of profit-sharing coupons would be dropped from their retail and wholesale business, has aroused considerable interest

not only among large concerns in the United States but also in Canada. The coupon plan has been worked on a large scale in the United States, and during the past few years has made considerable progress in Canada. While there are differences of opinion on the subject, there are a number of large firms which take the stand that the system of profit-sharing through the medium of coupons is misleading to consumers and destructive to honest competition among retail merchants. The announcement by the Marshall Field Co. reads as follows:

"The wholesale and retail buying organization of Marshall Field & Co. has been in the building for fifty years.

"It has been trained to study the many intricate phases of merchandising to the end that the buying public could obtain the highest degree of service in the merchandise purchased.

Profit sharing coupons packed with merchandise do not in any way add to the value of such merchandise.

"We have, therefore, decided that our retail and wholesale business will not carry any merchandise that would involve us in the distribution of profit sharing coupons, as the principle would be contrary to the long established policies and ideals that have built up our institution.

"We recommend that every retail merchant give serious consideration to the question of taking action along similar lines, as we believe that it will be to the interest of better merchandising."

Another large firm which approves of the action of Marshall Field & Co. sells certain articles in which coupons have been enclosed by the manufacturers but only after extracting the coupons. This firm is opposed to profit sharing coupon schemes, or any other promise to give something for nothing. Some firms after removing the coupons sell the goods at a reduction in price said to be more than sufficient to make up to customers the possible loss at not receiving coupons. Some merchants are of the opinion that profit sharing coupon schemes as a rule sooner or later make themselves felt upon the retailer and result in narrowing the profit of the retail distributor. It is true that some profit sharing schemes secure a certain amount of trade but there are so many other influences that it is just a question whether or not the retailer or consumer really benefits by schemes of this kind. The results of the action of the large firms will be watched with considerable interest.

Toys for Christmas.

HARDWAREMEN who handle toys—and a great many retail hardware firms now include toys in their stock of Christmas goods will follow closely the developments in the toy industry. Before last August Germany was the acknowledged headquarters for novelties and for the majority of the more staple lines of toys and fancy articles. Many buyers visited Germany each year at the time of the Leipsic toy fair held on the 1st of March. This important trade has absolutely ceased as far as Germany is concerned.

Though many lines are absent and cannot be procured there is a very representative toy line that is full of interest and novelty presented for the coming season. It is a big order to expect the manufacturer to produce a creditable line that shall take the place of an old established one almost over night as it were, but this is just what has been done by the Canadian, the British and the American manufacturer. Toy making is, broadly speaking, quite a new industry in Canada, but considering the fact that this is the first serious venture into this new line, tremendous strides have been made in a very short period of time in domestic toy construction, and it is to be reasonably expected that a very big business will be done. Another reason why Canadian toys will score is because prices are very reasonable. Money is being carefully spent at present, and the price of Canadian toys will be a big factor in helping sales.

Do Your Building Now.

ONE of the largest building contractors in Canada is responsible for the statement that the cost of building materials and the labor required have declined from 20 to 30 per cent. during the past eight months. This is an abnormal condition but one of which the merchant should prepare to take advantage. There are many businesses in Canada that are cramped for space; whose chief lack in the past has been a larger dwelling space with better facilities for stocking and particularly the display of goods. The proprietors, equipped with the sagacity and acumen that has created a steady expansion in their trade, should be in a position to know whether an extension of their premises in the near future is warranted; whether in fact, it would not have been pushed through already had not war intervened. For such immediate action would exert far-reaching benefits; it would be a powerful element of helpful publicity for themselves by the contrast to the opposing policy of contraction; there would be a saving in cost that would permanently reduce their overhead charges; needed employment would be provided and public confidence be stimulated.

Many retail hardware merchants, contractors and handlers of builders' supplies have started a slogan, Do Your Building Now, with very substantial figures to offer as an inducement.

Local Merchants Versus M. O. H.

FROM all parts of Ontario come complaints of the mail order houses gobbling the business that ought by rights to go to the local merchants, and in most cases the local merchants are to blame to some extent at least, states an Ontario weekly paper. The mail order houses have the science of advertising down fine and are not afraid of spending money on printer's ink. When the local merchant thinks to save a few dollars by dropping his advertisement out of the local paper that is the time the mail order houses get in their fine work with "bargains" for last-day shoppers.

During dull times the local merchants cut their space down or drop their ads., but not so with mail order houses, they flood the mails with catalogues, offering alleged bargains to clear off surplus stocks, and they double up on advertising and the highly paid ad.-writers eclipse their former efforts to catch the nimble dollar. It is a case of making the public think they are getting something for nothing and that seems just the thing bargain-hunters feed upon and so they send their orders to the city often in the mistaken idea that they have saved some money.

Does Your House Need Painting?

USES MAIL ADVERTISING.

The J. C. Wanless hardware store at Chatham, Ontario, takes advantage of every opportunity offered for advertising. Not merely is newspaper space used to good advantage and helped out by frequently changed and attractive window displays, but the mails are used extensively in a steady business-getting campaign.

For instance, the mailing of the monthly statements of account sent out to credit customers represents an outlay of one cent each for postage—or, with the new war tax added, two cents. The firm, however, make a practice of enclosing with each statement some advertising literature regarding goods handled in the Wanless store. For instance, the statements sent out early in April contained literature regarding house painting and prepared roofing, both timely lines.

For this purpose, the smaller sized manufacturers' booklets are used, which will fit neatly into the ordinary envelope and are not heavy enough to require double postage. This is a systematic and successful method of getting advertising literature into the hands of prospective purchasers; and that without an added cent of expense.

In addition, the Wanless firm has a mailing list to which literature is sent every month. Formerly, calendar post cards were used; but the last few months calendar blotters have been sent out. The blotter contains on the reverse side a small calendar for the current month, an art reproduction, and some timely printed matter.

What Hardwaremen Say in Their Ads.

You Don't Have to Be a Painter to Use —— Paint. The handy man about the house makes dollars with his paint brush and a can of ——— paint. It is the best money can buy, and it costs you no more than the ordinary cheap paint. Paint that is good paint is not an expense—it is an investment. You don't have to worry about what kind of paint to buy—we have done all that for you by stocking the famous —— —— paint, the best paint on the market to-day. Price per gallon for white and ordinary colors $2.30; price for high colors $2.60 per gallon.—The Rogers Hardware Co., Ltd., Charlottetown, P.E.I.

Mr. Automobile Owner—How About Your Tires and Accessories? This is an important question particularly at this season. Car owners are busy having machines overhauled and naturally the question arises—and it is an important one too—concerning the kind of tires to be used this summer and the extra accessories to be added for the providing of comfort and efficiency. Believing you are interested in the efficiency and economy of service we mention for your consideration something about our garage and the stock we carry. We can prove that you can save money by purchasing your supplies of us.—The George Taylor Hardware Co., Ltd., Cobalt, New Liskeard and Cochrane, Ont.

We think it is to your interest to buy your hardware from us, because: We are doing a cash business, a principle that should be encouraged in this country. We are setting the prices in this town—and setting them right. There is no better stock of hardware in Cupar. We have some exclusive lines that are superior such as —— ——— —. We maintain a fully equipped tinshop and support a first-class mechanic. We are out with a square deal platform. F. C. Hesketh & Co., Cupar, Sask.

We don't always realize what harm the wear and tear of the weather does to our houses and barns and buggies and wagons that are not protected by good paint. Buildings that have not been painted or on which the paint has worn off, are exposed one day to the wet and rain, the next to the hot sun and so on, until the unprotected wood twists and warps and cracks and the rot starts. So a building that should be in good repair at the end of 50 years, if it had been properly painted, goes to rack and ruin in 15 or 20. And think how it looks. Why don't you paint this spring with ——— paint, prepared? Made of pure lead, pure zinc, pure linseed oil and the necessary coloring pigments and driers, all mixed and ground by special machinery. Come and see us, we want to talk paint to you.—A. N. Fenn, Parry Sound, Ont.

Do you want a gallon of good paint for $1.75.

Come this week as we are having a special for 6 days at this price. You can't beat this value, as we have sold over 300 gallons and every can has given perfect satisfaction. If not satisfactory after you have used it, we will refund you the full purchase price. You take no risk.—J. B. Ross, Oshawa, Ont.

Are You Going to Paint this Spring? Does your house look shabby alongside of your neighbors'? Does it look neglected? Is this the way you are going to leave it for another year?

Your house may be larger and better than your neighbors' but it does not look so well, nor will it stand the weather and test of time so well without the necessary coat of paint. A small investment in paint will prove a money saver and you owe it to yourself.

The interior as well may need brightening up, or possibly your tables or chairs need a coat of Varnish Stain. ———make a paint for every purpose. Come in and talk over your paint troubles.—W. H. Cuddy, Strathroy, Ont.

The Outlook in the West

Past and Present Conditions Reviewed by Western Canada Sales Manager—A Bright Outlook—Growth in Past Abnormal in Some Cases.

TWENTY-EIGHT years is a very short period in the history of the world, but a similar time spent in the employ of one commercial institution by an employee is a long time, so said William Mortimer Crawford, sales manager for the Winnipeg branch of the Sheet Metal Products Co. of Canada, Ltd., when interrogated by Hardware and Metal to give a few reminiscences for publication, and to also give his views on present conditions in the West.

In November, 1887, Mr. Crawford entered the employ of "The Kemp Mfg. Co." or Toronto, and a few months later was appointed their city traveller, taking charge of their Toronto city business. At various times later he covered all parts of the Province of Ontario, but his principal business connection subsequently was in the three leading Western Ontario cities, namely, Toronto, Hamilton, and London.

The Canadian Pacific Railway having been completed to the Pacific Coast in 1885, and the West offering an expanding field for wider commerce, his firm recognizing the vast possibilities of the West, appointed Mr. Crawford their western representative, giving him charge of all territory between the Great Lakes and the Pacific Ocean. For a number of years he looked after this territory until business grew to such proportions that it was necessary to open a branch in Winnipeg to take care of the Prairie business, and an agent was appointed to take charge of the British Columbia business, with headquarters at Vancouver. Mr. Crawford then being appointed sales manager of the Winnipeg branch. At this point of the interview, Mr. Crawford became reminiscent, and referred to his first trip to Winnipeg. He said, a vivid recollection still exists in his mind of that trip, arriving in Winnipeg on a cold and stormy night with the thermometer 45 degrees below zero, he was impressed with the number of citizens who braved the elements to greet the transcontinental train and to give a true western welcome to the eastern tenderfoot.

The best hotels in those days all ran a bus to the station to meet the trains, and as travel was not as heavy then as now, there was the keenest rivalry among the porters to secure guests for their respective houses, and the newcomer had to run the gauntlet of these boisterous jehus to reach the bus representing the hotel where he intended stopping. The hotel porters shouted themselves hoarse, and after having had several wordy combats with other porters and the station policeman a start was made and in due course the hotel was reached. The Winnipeg streets in those days were little better than a prairie trail, and the shaking one received riding over the ruts and bumps in them, made the hotel portals a welcome sight, and the violent shaking up one received gave activity to a liver which had become inactive during a two days' journey on the train, resulting in readiness for a good square meal. After securing a

William M. Crawford

room and removing a little of the outside grime, inquiries were made for the dining room, on entering and being shown a table, a menu was presented which looked as if it might have done duty on many a similar occasion, scanning it closely the first thing that struck one, printed in bold type, was "This hotel does not use river water, but has an inexhaustible overflowing well of pure spring water on the premises." In less than twenty-four hours the reason for this announcement was obvious, and one was content to let the hotel use any old kind of water, so long as one did not have to drink it.

On the morrow Mr. Crawford made his initial bow to the buyers of Winnipeg, and in speaking of this he said to Hardware and Metal. "To be perfectly frank with you I shall never forget the welcome accorded by the late Mr. Abraham Buehler, buyer for J. H. Ashdown." On presentation of his card, Mr. Buehler said, "Your arrival has been heralded by a voluminous epistle from your house, are you here on business or pleasure?" (and seeing he was in the presence of a dry joker) Mr. Crawford answered, "Principally pleasure." Mr. Buehler then said, "I am glad of that, for there is nothing we want, our stock is complete in all lines. When are you going away? And, by the way, how are things in the Cent Belt?" This latter term was the endearing expression used by Westerners when making inquiries of the effete East. Mr. Buehler has long since passed to his reward, together with other noted celebrities in the hardware world of Winnipeg, who laid the foundation of the great hardware centre that Winnipeg now is, among them being Mr. Geo. D. Wood, Mr. Hyman Miller, Mr. Fred Morse, Mr. John S. More, Mr. Wm. McFarland, Mr. W. C. Perry, and of more recent date Mr. Thos. Black. These, well known old timers, and some others who still remain have made Winnipeg one of the largest hardware centres in America. Truly they have builded a monument "harder and more enduring than brass," so much for the Winnipeg and the West of the past. We have retrospected, let us run quickly over the present and peer into the future.

Conditions in the West.

The present Winnipeg is rightly called the gateway to the new and Golden West. During the past ten years the growth of Winnipeg and the West has been abnormal, and has taxed to the utmost the manufacturing and financial interests of Canada. In times of great prosperity the tendency is for all interests to plunge and to expand beyond the present needs of the country, temporarily forgetting that a time of reckoning must come, and that expansion must subside until the demands of the country catch up with it. These conditions obtained during the development of the Western States, and as we in Western Canada occupy relatively the same position, so must we expect a period of great prosperity to be followed by a period of slight depression. We are experiencing now one of these depressions, but with true western optimism we realize present conditions are only passing shadows, and that while the earth remaineth seed time and harvest

shall not fail, and in a little while we will bask in the sunshine of a grander and better prosperity than we have heretofore enjoyed. Those of us who have our fingers on the business pulse of the Great West realize this condition is nearer than most people think, this is a strong statement, but the facts bear it out. Stocks of merchandise were never lower, the merchant and the farmer owe less money than they ever did, credit has been placed on a proper basis, and business is being conducted to-day in the West, on safer and more conservative lines. The Government demonstration farms have done much to keep the farmers to the proper method of farming. The farmers have been quick to realize that the great war in Europe means an active demand for grains at good prices, and more land has been prepared for the seeder in the West to-day than ever before. The past winter's climatic conditions have been favorable, and there is an assurance of abundant moisture to give the crop a good start, and with an average summer rain fall, we should reap a bountiful harvest. Unquestionably a good price for grain is assured, and while Mr. Crawford admitted he was not a prophet, nor the son of a prophet, he thought that conditions in Western Canada were decidedly hopeful.

Mr. Crawford intimated that he still makes an occasional trip West, calling on some of his old friends and customers, and in this connection he was struck with the many changes in the personnel of the traveling staffs of the hardware and kindred trades. Many of the old-time successful travelers, now occupying important positions in the houses of the firms they so well and ably represented in years gone by. While others have passed beyond the twilight's purple hill to the vast realm of silence, where the innumerable dwell, leaving behind them pleasant memories of their worth and work.

While Mr. Crawford feels that all the old salesmen were a distinct type of men, trading more or less on their personality, he recognizes that the present day salesmen are competent men, conducting their business on lines suitable to the changed conditions. The old travelers and the old western business men combined business with pleasure, and certain brands of cigars and other things were considered essential to the taking of an order, what was then a necessity is now a thing of the past, and to-day it is not so much personality and entertainment in securing orders, as it is value, quality, and service.

Regarding traveling conditions there has been a decided improvement during recent years, at one time a bath could only be obtained west of Winnipeg at two cities, namely Brandon and Calgary, at both these points the hotel proprietors were so fearful lest a traveling man should use the bath that they kept a large board on hinges carefully locked over the bath, but on payment of 50 cents you were allowed to enter. This necessitated scheming on the part of the boys, and notwithstanding the initial charge for a bath, many a bath was obtained free of charge, while said bath was unlocked.

In conclusion, Mr. Crawford expressed his appreciation of Hardware and Metal and many a time while out on western trips in days gone by, welcomed a copy of this paper as an old friend, and as a reliable source of information.

O.R.H. & S.D.A. Inaugurate Business Aids

The Membership Contest Opened on Thursday — Captains of Districts — Business Aids for Members of Association.

IN last week's issue of Hardware and Metal an announcement was made regarding the activities of the officers of the Ontario Retail Hardware and Stove Dealers' Association and their plans for boosting the membership of the association. Reproductions were shown of and sheets taken from the price book which is being prepared for the use of members of the association. Secretary Macpherson, of Prescott, has given out some additional information regarding the "Business Aids" system that the executive has decided to inaugurate. The secretary's notice reads as follows:—

The executive have decided to inaugurate through the secretary's office a system of "Business Aids" for the use of the members of the association. This service will be extended to members without charge, as per the following outline:—

A Series of Retail Price Lists.

These lists will be printed on heavy ledger paper, of uniform size, and will have standard list prices of the article printed, with blank columns for use of dealer in filling in his costs, and retail prices both in full and broken packages. Standard discounts and net costs figured will also be furnished. A binder will be furnished each member to insert lists as received. The early issue will include carriage, machine, stove, tire and sleigh shoe bolts; lag screws, malleable fittings, bar iron, screws, poultry netting and screen wire. Two copies to be furnished free, and additional copies at 10c each; only available for members.

Classification for Checking Railway Freight Rates.

A freight classification list will be prepared showing class in which the various lines of goods usually sold by our members should be included, also special commodity rates. A page will be provided for entering the several rates of freight in each class from principal shipping points to dealer's town, which rates the dealer will procure from local freight agent. It is felt by the executive that every member can save dollars by a proper checking of his freight bills. The secretary will also procure expert advice for any member on special cases, and will furnish classification of any lines not included in the partial list issued.

Collection Letters.

Each member will be furnished with 25 collection letters and envelopes, and on request with 12 duplicate stove lien notes and 25 plumbing estimate forms, without charge. Further supplies at $1 per 100.

The foregoing is just a partial statement of what will be done for the aid and information of our members. This service will involve the expenditure of hundreds of dollars, and we fully expect the endorsation of every hardware and stove dealer in Ontario, inasmuch as the individual service rendered will be worth many, many times the cost of joining the association.

To enable you to participate, your application for membership is now solicited, and by consent of the executive will extend to December 31st, 1916, thus giving you 21 months' full service, including the 1916 convention—all for a membership fee of $3.

Any suggestions or requests for further service will be gladly welcomed by the executive. The more members we have the more we can do for them, and the more weight will our association have in dealing with other organizations for a recognition of our rights as retailers.

You see the point don't you?
Send in your application now.

For the Executive.

C. W. Conn, Tillsonburg, President.
W. F. Macpherson, Prescott, Secretary.

Important Business Before N.B. Convention

Retail Merchants of That Province Discuss Ways and Means for a Better Merchandising Basis for the Trade—Many Resolutions Presented and Gone into Thoroughly —Remainder of Report in Next Issue.

ST. JOHN, N.B., April 14.—(Special.)—This city has been to-day and yesterday the centre of a large number of retail merchants from various parts of the province. The reason is the first annual convention of the Retail Merchants' Association of Canada, New Brunswick Section, and is chiefly the result of the hard work that has been done by N. C. Cameron, the provincial secretary, since he came here last fall, and his associates.

The convention opened yesterday morning at ten o'clock with the registration and receiving of delegates, after which the meeting was called to order by President A. O. Skinner. An address of welcome was delivered by Mayor J. H. Frink and officers of the local branch, the replies being made by President Dr. E. O. Steeves, of Moncton; President A. Murray, of Fredericton, and Dominion Secretary E. M. Trowern, who came east for the convention from Toronto. The afternoon commenced by an address from the provincial president, Mr. Skinner. He reviewed the work that had been accomplished so far, elaborating on the rapid increase in the membership of the association during the past few months. After the reading of correspondence, the appointment of committees, and the receiving of resolutions, the delegates took a trip around the city in automobiles, which included a visit to the Atlantic Sugar Refineries and other factories and special points of interest. The new wharves were also inspected. In the evening there was a banquet given to the visiting delegates by the St. John section, one of the features being an address by E. M. Trowern, the Dominion secretary. Later the delegates formed a theatre party.

Credit Reporting Results.

At the opening session on Wednesday morning, Provincial Secretary N. C. Cameron, read his report, which showed that practically every town, city and village throughout the province was organized, and that many merchants had also received many times the value of their membership fee. Co-operation, he said, was being effected with splendid results in various centres through the holding of dollar day, which had proven to be successful. The methods of operating the credit reporting department were described. The benefits which members of the association are getting from the form letters being sent out was referred to, and special instances where old and bad accounts had been successfully collected by this department. Other reports were presented, including that of the provincial treasurer, Wm. Hawker, and the provincial auditor, P. F. Blanchett.

One of the special addresses of the session was given by E. M. Trowern on the assessment system in vogue in Canada, including his ideas on how a suitable system for the province should be operated. At the present time there are few more live subjects in New Brunswick. Recently there was a large delegation of the Retail Merchants' Association of this city, who waited on the Government to protest against an amendment to the Assessment Act which was introduced into the local House to exempt salaries up to $1,000. The merchants objected to the idea that no provision had been made as to where this amount of assessment was to be levied and urged the Legislative Committee to throw out the bill.

N. C. CAMERON, St. John, N.B.,
Secretary of the New Brunswick branch of the Retail Merchants Association of Canada.

During the convention there was an exhibit on the main floor of the hall of office devices and store fixtures, which proved an exceedingly interesting feature to the convention. It afforded the merchants an opportunity to look over new ideas in equipment and to help them in their business system.

Important Topics.

Some of the resolutions that came before the convention were as follows:—

"To stop smuggling along the border lines."

"Wholesalers and manufacturers discriminating in the matter of prices."

"To secure a Garnishee Act and to simplify the collection of small debts."

"To have an Association Fire Insurance Department."

"Also, to have a fire adjuster to protect the interests of the retail merchant against unfair insurance companies in settling claims."

"To buy and advertise 'Made in Canada' goods."

"To discourage, as far as possible, advertising goods manufactured in any other country."

"To oppose any change being made in parcel post zone system."

"The Bulk Sales Bill."

"To have uniform laws throughout Canada."

"To place a special tax on all business done by mail order houses."

"To secure a new Provincial Assessment Act."

"That all peddlers should have a Provincial license."

"That railway freight cartage charges should be abolished."

"How to deal with severe price cutting."

"To oppose co-operative legislation."

"That all delinquents leaving by night to defraud merchants should be

"To abolish fees for inspection of weights and measures.

"That a Minister of Inland Trade is required."

"That customers making purchases on Sunday should be held equally liable with the retail merchant."

"An amendment to the Trading Stamp Act."

"To secure interprovincial judgments throughout Canada."

"To secure local option law for Early Closing Act."

"To include a half-day a week."

"That manufacturers be held liable for adulteration instead of the retail merchant."

"That municipalities should not engage in retail trade."

"Importance of the press to the retail merchant."

The results of these resolutions will also be included in the article in next week's issue.

Practical Course for Sheet Metal Workers

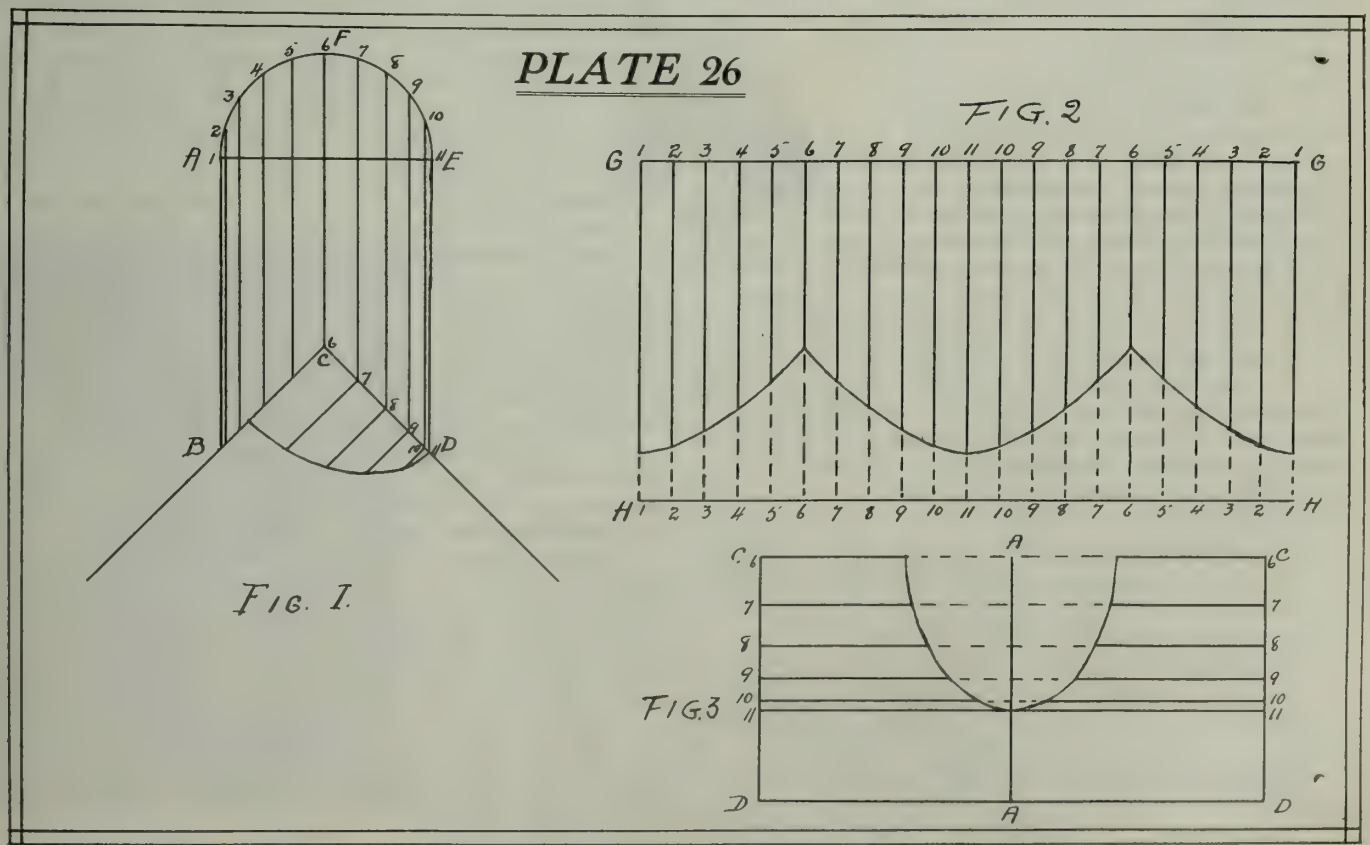
Article No. 26 of Series

By CHARLES SEIVERS

IN this issue is shown a round pipe which is to fit over a ridge of a roof and also how to develop the pattern for the pipe as well as the flange to fit the roof.

Fig. 1, A-B-C-D-E shows a side view of pipe fitting over section of roof. On line A-E draw a half section of the pipe as shown by the semi-circle A-F-E. Divide this section into any number of equal portions as shown by 1, 2, 3, 4, 5, etc. From each of these points draw lines at right angles to A-E, extending them until they intersect the roof line at B-C-D. Now turn to Fig. 2. To lay out the pattern for the pipe piece draw the two parallel lines G-G. and H-H. at either end. Next draw a line at right angles joining G-G to H-H as G-H. From this point on G-G and H-H set off the divisions in half section A-F-E repeating to make circumference complete, commencing at division 1 measure from the line A-E to where it joins the lines B-C-D, in this case from A to B, and set off on one end of stretchout or division marked 1, Fig. 2. Next measure distance on line drawn from point 2, and set off on next division on stretchout. Repeat in the same manner until last division at E is set off. This will give one-half the pattern. To complete the pattern of the pipe, measure off the distance on each of the lines working back toward the starting point that is the point at E, Fig. 1, or number 11 in Fig. 2, thus completing one half of the layout.

The accompanying article is No. 26 of a course of practical problems for sheet metal works prepared, especially for the readers of Hardware and Metal, by a practical mechanic who is constantly in touch with new problems which are arising in the sheet metal trades. These articles are a weekly feature in Hardware and Metal, Canada's only weekly hardware paper.



Next measure distance on line from point 10, then from point 9, and continuing until point one is again measured and set off. A line drawn through the points thus obtained on stretchout will give outline of pattern of pipe.

On C-D, Fig. 1 is shown a section of the opening in flange to receive pipe. From each of the points on C-D draw lines at right angles as shown, and on these lines from C-D set off the distance from A-E to the point on circumference which the line is drawn from. The distance from A-E to point 6 being set off on line drawn from C or 6, and from A-E to 7, on line from 7 at C-D, repeating others in like manner.

A line drawn through these points gives outline of opening. In Fig. 3 is shown a pattern for one-half the flange, now draw the outline of the flange as C-C-D-D, on these lines C-D at each end, set off the spaces on the line C-D in Fig. 1. In the centre of the flange and parallel to C-D draw a line as A-A and on each side of A-A set off the outline of opening as described at C, 6, 7, 8, 9, 10, 11 D Fig. 1.

Allowance must be given for seams, at points, G, G, H, H, in Fig. 2.

Don't imagine that your bank is not familiar with the true character and conduct of your business. It has diversified means of obtaining information.

Junior Clerk's Page

THE REFINING PROCESS.

Individual excellence is purely a matter of taking one's self through a refining process. Every healthy human being is fitted out with the same flesh, blood, bone and brain, the necessary material to become a refined, finished product.

A PIECE of iron that will make twelve dollars' worth of horse-shoes will make twenty-five thousand dollars' worth of watch springs. A piece of ordinary coal is formed of the same substance we find in a diamond, the only difference is nature has carried the diamond through a more extensive process of refinement.

Every healthy human being is fitted out with the necessary material to arrive at efficiency and excellence, with the necessary equipment to become a finished product. It is purely a matter of the refining process through which you are bringing yourself. The same constituents are found in the flesh, blood, bone and brain of every man.

We are a combination of certain forces, and these forces are guided, controlled and dependent on physical form. The same wasted life, the same abuse of nature, the same negligence of mind and body that destroys the lustre of the eye and deadens the clearness of the voice, are the same things which deprive us of the opportunity to reach proficiency. In other words to become an efficient human being.

The world is filled with people who do a little bit of everything, but who are not able to do anything worth while. Many women who can play a note or two of a good musical selection, who can sing a few lines of grand opera, have only dabbled in something they will never have the patience and care to complete.

Excellence is not attained because people do not attempt to attain it. If you wish to find someone for an important position you will discover in your analysis of applicants that one lacks knowledge of words to express ideas, another lacks executive ability, another has certain weaknesses which do not inspire confidence in other men.

If you do not do well the thing you have right at hand, there is no way of knowing that you will ever do a bigger thing any better. The chances are that you will not be able to handle more important responsibilities, because you have not trained yourself to handle less important ones. Our business institutions are filled with young men who expect opportunity to come to them by night and thrust them forward in life by some mysterious force or power.

We find men on the street corner discussing the affairs of Government, suggesting a solution of "woman rights," who actually do not know how to prepare a list of names, write a business letter or collect an account.

What the world needs is refinement of purpose, refinement of body, refinement of mind, refinement of intention, refinement of system and order, conduct and character, and fewer men and women engaged in directing the Government, outlining a policy for the Navy and deciding the questions of immortality and reincarnation.

And the moral is: The most pitiful condition in which a man can find himself in middle age, is the condition of mediocrity—that state in which you are a cobbler, a bungler, a combination carpenter, gardener, shoemaker, painter and district magistrate.

SELLING YOURSELF.

YEARS ago when Jimmy sold papers he planted the idea of selling himself—this way. He used to see the name of Arthur K. Gorman in his papers. Gorman was mixed up in everything, it seemed. Jimmy used to wonder if God could make another world without Arthur K. Gorman being on the board of "Do-it-alls." Jimmy thought Gorman must be some guy! He was, too! There didn't seem to be a week go by that Arthur K. Gorman's name didn't bob up somewhere, and he was always doing something and well thought of—so far as Jonesville was concerned. Jimmy early made up his mind that it must be a great pleasure to be such a prominent man as Arthur K. Gorman, and resolved that when he became a man he would have his name in the papers and be mixed up in whatever was going on.

When Jimmy was young and not wise in business matters, he used to look at it purely from the standpoint of pleasure. But as he grew older and got into business he saw the advantage that might accrue from being a well-known man. He saw that it might be of value to him to be a part of the civic life of Jonesville and take part in her growth, development and activities. So Jimmy deliberately planned to "sell himself" to Jonesville and "stay sold."

Jimmy joined the business clubs and did his best to become known to and acquainted with the best people in town. He actually schemed to meet men whom it would be to his advantage to know. He accepted every committee job offered him and worked like the very devil. People didn't fall upon his neck to express their appreciation of his work; but they didn't have to. Jimmy knew he was appreciated without having the fact inscribed on a parchment and presented to him on a silver tray. He gained a reputation for reliability and energy. He capitalized both. He grew to be a very busy man, but was never too busy to keep "selling himself." He prospered, and had many imitators.

Jimmy could not have "sold himself" if he had gone in to grab the limelight and play a sharp game. He would have lost out in the end on such a platform, but, as it was, although his name was hung on the tail of so many ads. that people couldn't forget him, yet his spirit was never that of bombast or self-glorification.

"Where did Jimmy find the time to 'sell himself' if he was busy?" Answer:—If you want anything done you go to a busy man, don't you? Jimmy was the original busy man. The more he found to do the more he seemed able to do.

New Hardware Goods

Offered Canadian Hardwaremen

ALUMINUM WASHBOARDS.

Wm. Cane Sons & Co., Ltd., Newmarket, Ont., are placing on the market an aluminum washing plate washboard, under their regular brands and are giving the trade their choice of aluminum or zinc at the same price. In a letter to Hardware and Metal the firm states that they have tried out aluminum for several weeks and find it to be absolutely satisfactory in every way, and in some ways much ahead of zinc. The aluminum boards will sell at the same price as the zinc.

LIGHTNING BUG LANTERN.

Stewart, Skinner Co., Worcester, Mass., offer to the trade the Lightning Bug Electric Lantern here illustrated. This lantern requires the ordinary No. 6 single cell battery, which is used for door bells, telephones, motor cars, etc., and which can be purchased for 25c.

The makers claim the lantern is indispensable in the home, barn, garage, camp, etc., and it is always ready for use.

The reflector furnished in connection with the Lightning Bug is made of a white metal which takes a very high polish.

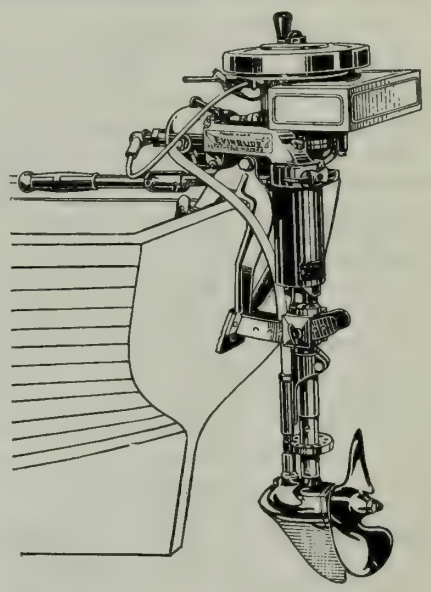
The added brilliancy of this metal is claimed by the makers to produce one-third more light than of electric lanterns which have reflectors made of brass and are either silver or nickel plated.

Owing to the new scientific angle of the reflector, it is said, the maximum amount of light is obtained without the use of condensing lense. In its place is used the ordinary clear straight glass which can be replaced at very little expense in case of breakage.

This reflector is designed to spread the light rather than to give the searchlight effect which is produced by any illuminating device in which a concentrating lense is used.

The widespread light gives an abundance of light close by instead of throwing a narrow stream of light at a distance.

Lightning Bug Lantern.



Perfection Ball Bearing Floor Scraper.

The switch is so located that light can be turned on or off with the same hand in which the lantern is carried, and the position of bail or handle is arranged to accommodate the natural position of hand.

PERFECTION FLOOR SCRAPER.

Duncan Bros. & Wray, Ludlow Falls, Ohio, are offering to the Canadian trade the Perfection ball bearing floor scraper. The scraper is claimed to be adjustable to all angles and to all floors, and can be used on a straight or shearing cut, to either right or left, with or across the grain. The makers claim that the machine can be easily operated and adjusted. The ball bearings make the machine easy to operate. The knives, it is claimed, are made from the best tool steel. The manufacturer is represented in Canada by S. F. Ainslee, 193 Spadina avenue, Toronto.

Evinrude No. 83 Motor.

EVINRUDE MOTOR.

Evinrude Motor Co., Milwaukee, Wis., manufacturers of detachable row boat and canoe motors, have for some years past brought forth each year new and desirable improvements. Last year it was the built-in magneto and this year it is the Automatic Reverse. These features are claimed to be absolutely dependable and so guaranteed by the Evinrude Company.

The magneto is claimed to be a much appreciated feature and, while the Evinrude Company will still supply battery ignition at a smaller cost, if desired, they state that ninety-eight per cent. of their orders specify the built-in magneto.

The Maxim Silencer is a part of every standard machine.

This year the Evinrude Company announces as its major improvement, the automatic reverse. With this feature, last year's model, it is claimed, becomes 100 per cent. more flexible and the "safety first" principle is fully covered. The automatic reverse is said to add

(Continued on page 47.)

Current News

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Leaves for Montreal.

Regina, Sask.—Alex. R. Grant, who for three years was associated with Peart Bros. Hardware Co., has left for Montreal to take up new duties in the hardware department of Goodwins, Ltd.

Catalogues and Discounts Wanted.

Kent, Garvin & Co., Ltd., Hamilton, Ont., in a letter to Hardware and Metal state as follows:—We would like to be put in touch with different manufacturers of high grade carpenters' tools in Canada. We intend putting in a complete line of the best goods we can get for carpenters' use.

Elected President.

Montreal, April 7.—At the annual meeting of the Canadian Consolidated Rubber Co., Limited, held at the office of the company, W. H. Robinson was elected a director. The retiring directors are Messrs. Duncan Coulson, D. Lorne McGibbon and the late Fleetwood H. Ward. This leaves two vacancies on the board.

At a subsequent meeting of the directors, the following officers were elected:

President—J. H. McKechnie.
Vice-President and General Manager—T. H. Rieder.
Treasurer—Walter Binmore.
Secretary—W. A. Eden.
Assistant Secretary—R. C. Colt.
Assistant Treasurer—A. Dwyer.

Mr. McKechnie's accession to the presidential chair is a fitting tribute to him as a Canadian, who has spent almost all of his business life in developing the rubber industry of the Dominion.

In 1883 he launched the Granby Rubber Co., Limited, at Granby, Que., which is now one of the associated companies of the Dominion Rubber System.

T. H. Rieder, vice-president and general manager, will be in active charge of the operations of the company as heretofore.

Industrial Items.

Chatham, Ont.—The Canadian Wolverine Company, Limited, the Canadian branch of the Wolverine Brass Company of Grand Rapids, Mich., on April 10 sustained $125,000 loss to buildings, machinery and stock in hand through fire, which completely gutted the factory. President L. A. Cornelius states that the Canadian factory will be rebuilt, but no decision has been reached as to the location.

Fire Losses.

Wolfville, N.S.—L. W. Sleep, hardware, tinsmith, etc., has suffered a fire loss.

New Firms.

East End, Sask.—East End Hardware Co. is opening a hardware store at Ravenscrag.

Business Changes.

Kildonan West.—J. DeWilde, hardware, has been succeeded by Tully & Davey.

Dorchester, Ont.—F. Burke, of Windsor, Ont., has purchased the hardware business of Levi Hodgens.

Lansdowne, Ont.—W. P. Moore & Sons have sold their hardware business to Edmond Latimer, of Chesley, Ont.

Gladstone, Man.—W. L. McNair & Jas. Anderson have purchased the hardware and implement business of W. H. Squair & Son.

Brandon, Man.—Hunter E. Burgess and H. H. Williams have purchased Gidding's Hardware, on Tenth street. H. E. Burgess has been in the hardware business in Brandon for some years and was for some years a traveler for the McClary Mfg. Co., traveling from Winnipeg West. Mr. Williams was for ten years with the Asbestos Broughton Fiber Co., East Broughton, Que. The new firm intends to remodel the store.

Obituary.

Chatham, Ont.—The death occurred here last week of William Sommerville, aged 78. For some years Mr. Somerville was in the banking business and later in the hardware business at Ridgetown.

Oshawa, Ont.—The death occurred here of John Cowan, aged 86. Mr. Cowan was one of the founders of the Ontario Malleable Iron Co., of which company he was president for 43 years. Mr. Cowan was also interested in a number of other industries.

St. John, N.B. Notes.

Arthur H. McGuire, of St. John, who has been one of the traveling staff of the Canada Cement Co., in its western territory for some years, has been appointed sales manager for the concern with headquarters at Calgary. His territory embraces the Province of Alberta, Saskatchewan, and British Columbia. Mr. McGuire has been at his home since Christmas and received the news of his promotion to-day.

T. McAvity & Sons have been granted a contract for the manufacture of shells for army purposes. They have leased from the city the big machinery hall in the Exhibition Buildings, and will carry on much of the work there. The firm plans to employ from 150 to 300 men, operating night and day.

Dominion Incorporations.

Shawinigan Electro-Metals Co., Ltd., capitalized at $50,000—head office, Montreal—to manufacture metals, metallic products, etc.

Meriden Britannia Co., Ltd., capitalized at $400,000—head office, Hamilton, Ont.—to manufacture and deal in precious metals, silverware, electroplated ware, etc.

Canadian Wallboard Co., Ltd., capitalized at $50,000—head office, Toronto—to manufacture and deal in wood fibres, wood pulp, wallboards, sheetings, etc.

Bermite Explosives, Ltd., capitalized at $200,000—head office, Montreal—to manufacture and deal in ammunition, gunpowder and explosives, etc.

Winnipeg Oil Co., Ltd., capitalized at $1,000,000; head office, Winnipeg, Man.

The Guelph Tire and Rubber Co., Ltd., capitalized at $350,000—head office, Guelph, Ont.—to purchase the business and property of the Independent Tire Co. of Toronto, Ltd., and to carry selling rubber goods, etc.

Ontario Incorporation.

Canada Steam Furnaces, Ltd., capitalized at $50,000—head office, Toronto—to manufacture and sell steam and all kinds of furnaces.

AN OMISSION.

In the classified index to advertisements which appeared in the recent Annual Spring Number of Hardware and Metal, the name of the Canadian Consolidated Rubber Co. was inadvertently omitted. This firm manufactures a complete line of all kinds of rubber goods, and among those of interest to the hardware trade are the following: Carriage and auto rugs, horse covers, jar rings, rubber mats, stair treads, belting, pump valves, force cups, furnace bulbs, conical connections, bibb washers, tack bumpers, automobile, bicycle and baby carriage tires, rubber cement, bath mats, packing, rubber rolls, lawn hose, water hose, fire hose, etc.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

The Editor, Hardware and Metal,
University Avenue,
City.

Who says business is not brisk in Canada? To those who have a pessimistic idea of trade conditions for 1915 *the following information may prove interesting and change the grouch who sits down and sees nothing but blue ruin into an optimistic hustler. If such be the case, the object of this letter will have been accomplished, for, that there is good business to be obtained when you go after it is evidenced daily.*

If you are from Missouri and want to be shown here is the evidence.

Hardwaremen sell Babbitt Metals and all machinists and manufacturers use it. If the manufacturer is not busy there is very little Babbit metal sold, excepting in isolated cases where they take advantage of the slack time to do repairs.

We all know 1913 *was a year to be remembered in the history of Canadian progress; during that year every trade was booming and prosperous. In April,* 1913, *The Canada Metal Co.'s sales for Harris Heavy Pressure Babbitt Metal were the largest on record and in fact were so high that it was doubted if the sales for that month would ever be equalled, yet we find in March,* 1915, *in the first three weeks the sales for Harris Heavy Pressure exceed the whole month of April,* 1913, *which as before stated was the established record and stood up prominently.*

What does this indicate? Surely nothing more or less than prospects for 1915 *are good and the manufacturer has recovered from the first shock which was given when war was declared. Also that results from Made-in-Canada Campaign are already being felt to the material advantage of Canadian manufacturers.*

We advise the pessimist to read and study carefully the following Shakespearean quotation:

"There is a tide in the affairs of men
Which, taken at the flood, leads on to fortune;
Omitted, all the voyage of their life
Is bound in shallows and in miseries.
On such a full sea are we now afloat;
And we must take the current when it serves,
Or lose our ventures."

In conclusion; if the tide serves and the manufacturer or retailer does not take advantage of it he deserves to lose his ventures.

THE CANADA METAL CO., LTD.,
Per H. C. Crow.

THE METRIC SYSTEM.

The Editor, Hardware and Metal.

Hardware and Metal is always interesting for I ever find it one of the most real, live, trade journals of the many British, colonial and foreign that I see, but the copy sent me of February 6th is not only interesting in general, it is also amusing so far as it refers to that old bogey—the metre. Your correspondent's letter might have been written a dozen years ago. At that time some merchants in the interests of German trade, were trying to get the metre to be compulsorily used—and the inch, which is used in all parts of the British Empire and Dominions, the United States, Russia, China, Japan, and the East generally—to be abolished and made illegal. The practical men whose investigations have "shown up" the absurd claims of the pro-meterists handsomely defeated this attempt. I remember addressing a body of business men—amongst them many scientists—in Toronto, some few years ago on this question of the inch v. the metre, when I had the honor of being informed by the spokesman for the scientists, that they had learned something from the lecturer as they had never before seen the subject treated from the point of view of the necessities of the manufacturer.

Meterologists know that whereas measures of money may be conveniently based on any standard—measures of weight, area, volume, time, space, etc., cannot be so treated. In the former money being purely artificial you can first set up your measure or system, and then adapt the coinage to it; in the latter, you are dealing with nature, which you cannot alter, and you MUST make your measures to suit nature's requirements. It is this fundamental difference in principle between coinage systems and weights and measures that is overlooked by pro-meterists, and that is the cause of such confusion to-day in the so-called metric countries where silk is weighed by the "denier" and ribbons woven by the "line"; where opticians work by the Vienna inch and builders by the Hamburg foot.

But I must not tire you. I could give you pages of Continental incongruities of weights and measures, and in countries, too, where fines, and even imprisonment, has failed to force manufacturers to use that system which we are asked to believe is "the greatest invention of human ingenuity"!

NEW HARDWARE GOODS.

(Continued from page 45.)

comfort, security and confidence in navigating difficult passages, manoeuvering to get through between other craft, in landing on the shore or at dock, avoiding collisions or in reaching a positive location when hunting or fishing, the automatic reverse is instantaneous and dependable in its action.

In the design of this new feature the company has used consummate consideration for its patrons by so standardizing the parts of the automatic reverse feature that the owners of earlier models can, for a few dollars, transform the machines they now have into the up-to-the-minute model.

The Evinrude Company also offer this season a Commercial motor to suit the popular demand, and which will sell at $60. Notwithstanding the decrease in the cost of this machine it will embrace the Evinrude built-in magneto as well as a genuine Maxim Silencer. The accompanying illustration shows the No. 83 Evinrude motor.

(Continued from page 41.)

The Contest.

The rules for the membership contest were published in last week's issue of Hardware and Metal. The contest is now on, having commenced on April 15.

Captains and Districts.

The captains are to select teams from the following districts:—

District No. 1.—Reg. F. Scott, Guelph, captain Counties of Wellington, Waterloo, Perth, Huron, Middlesex, Lambton, Kent, Essex.

District No. 2.—A. J. Wright, Hamilton, captain Counties of Halton, Wentworth, Lincoln, Welland, Haldimand, Brant, Norfolk, Peel, Oxford, Elgin.

District No. 3.—Fred Ellis, Toronto, captain Counties of York, Ontario, Durham, Victoria, City of Toronto.

District No. 4.—E. A. Whitten, Bracebridge, captain Counties of Bruce, Grey, Dufferin, Simcoe, Muskoka, Algoma, Parry Sound, Nipissing.

District No. 5.—R. Hawkins, Smith's Falls, captain Counties of Northumberland, Peterborough, Haliburton, Renfrew, Hastings, Prince Edward County, Lennox and Addington, Frontenac, Leeds, Grenville, Dundas, Russell, Glengarry, Lanark, Prescott, Carleton, City of Ottawa.

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

Important developments have taken place in the markets during the past week and a number of price changes have taken effect. Some of the changes were not unexpected. Paint prices have been changed and the changes are along the lines predicted by Hardware and Metal in several recent issues. Hardware and Metal's prediction regarding higher prices on binder twine has also proven correct and prices advanced this week. The feature of the metal markets this week is the extraordinary advance in the price of tin. Linseed oil quotations are still fluctuating and some firms that still have oil bought some time ago at low figures are shading prices below the general level. The advent of warmer weather has had a good effect on trade and country business is improving rapidly. The improvement in the cities is not so marked as in the rural communities, but nevertheless, an improvement is noted. The war stamp tax goes into effect this week. Particulars are given on page 36.

MONTREAL.

MONTREAL, April 15. — The spring movement of hardware to country points has been altogether satisfactory, and the wholesalers are looking for brisk business until the end of the month. The first boats will start their regular trips on Monday, and this will see the despatch of heavy goods and some further favorable adjustment in rail rates. Business in the cities continues quiet, largely on account of the slow demand for building materials and builders' hardware. In heavy goods, particularly metals, conditions are dull. The opening of navigation has as yet proven little incentive to buying, and the hope is expressed that orders may be held off until the last moment.

MONTREAL QUOTATIONS.

Tin	52c-54c
Spelter	11½c
Copper	18¾c
Lead, Trail, cwt.	5¾c-6c
Lead, Imported, cwt.	5¾c-6c
Antimony	$27.00
Solder, ½ x ½	26 to 30
Solder "strictly"	28 to 32
Aluminum, Ingot	23c lb.
Aluminum, Pattern	24c lb.
Wire Nails	$2.40 base
Cut Nails	$2.50 base
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp	12½c base
Sisal	10½c
Lath Yarn	9¾c

The advance in the price of paint is of interest, but generally conditions have settled down, the majority of adjustments, as necessitated by the tariff advance, having been effected. The metals continue very unsettled, with tin advancing to new levels, copper higher and antimony all over the market, while lead is a trifle easier. Higher prices are quoted for loaded shells, hay rakes and horse polks, while there is an announcement that the quotations on spades and shovels will go up 5 per cent. to 10 per cent. on the 1st of May.

Seasonable lines, such as lawn and garden tools, are beginning to move out, but it is felt that there will be more interest in these goods with warmer weather, the mildness of Sunday being followed by a Sol's dip before it had a chance to have its full effect.

Tin.—An unsettled situation in this market has become disorganized. Prices are nominal in the local market, where the tendency is firmer, and 52c to 54c is quoted. New York reports a state of affairs unparalleled in the trade, with 57c quoted for spot. The trouble has largely been caused by the British conditional embargo, which demands a guarantee that imports go direct to the consumer. This eliminates the dealer and the spot market. Negotiations are under way to secure relief, but if the British Government adheres to its position sensational developments are to be looked for. Canada should not be affected by this embargo to the same extent, but more settled conditions are not in sight in the near future.

Copper.—The market for copper continues to gain in strength, and locally an advance of 1c is noted, to a new high level of 18¾c, while New York is quoted at 16 2-3c, as compared with 16½c a week ago. The demand for purposes of ammunition manufacture continues strong, and March is reported as the biggest month since July.

Solder.—The solder situation holds strong, with an upward tendency, being encouraged by the high price prevailing for tin. Half-and-half is quoted at 26c to 30c, and strictly, 28c to 32c, with the prices shading to the top figure within the range.

Spelter.—The tendency for spelter on the other side of the line is a trifle higher, but the situation is not very active, and prices locally hold about the same—11½c being the usual. Sellers generally are showing a disposition to hold to their stocks and take a chance on developments.

Lead.—The price of lead, which has been steadily advancing for some weeks, shows a slight decline in New York, although not sufficient to affect the local quotations. The American trust holds at $4.20, but it is noted that, whereas independents and second-hands have been above this basis, they are now underselling. Montreal basis continues 5¾c to 6c.

Antimony.—The market can only be referred to as nominal, depending upon supplies available. The quotation of 27c still prevails, but only as a basis, and, while supplies are likely to be secured at this figure, a price of 5c above would not be surprising. New York continues to quote Cookson's at 30c, as for several weeks.

Ammunition.—The advance in the price of loaded shells made a week or so ago by the manufacturers has resulted in new quotations for the trade, with an advance of about 5 per cent. to 10 and cent. Crown black and Sovereign and Regal smokeless, which have been quoted at 30 per cent. and 10 per cent., are now 30 per cent., and Canuck smokeless, quoted at 35 per cent., are now 25 per cent. and 2½ per cent. Remington, formerly 25, 10 and 5 per cent., are now 25 and 7½ per cent. Nitro Club continues at 25 and 7½ per cent.; New Club, 25 per cent., and Arrow, 30 and 10 per cent.

Hay Rakes.—New prices are in effect for hay rakes, the discount now being 35 per cent., as compared with 40 per cent.

Horse Polks.—An advance in the price of horse polks has gone into effect, the increase being from 5 per cent. to 10 per cent., covering the different styles and makes.

Spades and Shovels.—An important advance in the price of spades and shovels is to go into effect on the 1st of May, an announcement to the wholesalers to this effect having been made by the manufacturers. The increase will be from 5 per cent. to 7½ per cent.

Builders' Hardware.—The demand for builders' hardware continues disappointing, but is not surprising in view of the quiet conditions prevailing. Some movement of cheap lock sets is about all that is noted. The new price lists have not yet been issued by the makers, although some have sent notice to the effect that an advance of 7½ per cent. on the old lists is in order. This is not considered as being satisfactory, in view of the fact that the revised lists are certain to show different advances as between steel and copper lines.

Building Materials. — Demand for building materials is very slack, and the movement which might have been expected with the opening of navigation has thus far amounted to little. The condition particularly applies to the heavy metal lines, and it is hoped that dealers may only be holding off until the last moment, and that there will be a better inquiry after the boats begin to move freely.

Fine Tools.—In the hardware trade there is noted a strong demand for fine tools. This is traced directly to the wide field which the shrapnel shell industry in Canada is not covering and the large number of metal working establishments which are now being devoted to the manufacture of munitions of war.

Mops and Polishes.—The house-cleaning season is having its effect on the demand for mops, polishes and similar lines, which are going out freely. A particularly active interest is noted with regard to O'cedar mops, which are commanding an ever increasing sale.

Seasonable Lines.—The movement of lawn tools—mowers, hose, etc.—garden tools, clothes lines and pulleys, as well as hammocks and cream freezers, is satisfactory, but the demand in these lines should become more active with the advent of warmer weather.

Plates and Sheets.—The market for sheets and plates continues steady, but very firm, especially for lead sheets. The consumption is light, but better things are hoped for when the boats begin to move.

Lead Pipe.—The demand for lead pipe is light. The market is firm at 8c for lead pipe and 9c for lead waste pipe, and the quotations are strictly net.

Nails and Fencing.—Shipments of nails, fencing and poultry netting have been moving freely since the 1st of the month, when deliveries commenced. The current demand for nails continues steady and staples are also in request.

Rope and Twine.—There are no further changes in the rope and twine situation. Demand for rope from country points is fairly satisfactory.

Utensils.—The spring demand for utensils from the country districts has been fairly satisfactory and the movement continues. Business is slow in the cities. No price changes have been made of late.

Stoves.—Gas stoves are in favor with the trade and are moving fairly well, while oil burners are also in season. Demand for cooks is light, although there is some interest in country trade.

TORONTO QUOTATIONS.

Tin	65c
Copper	17¼c
Lead	5¾c
Spelter	12c
Antimony	25c
Aluminum Ingot	23½c
Aluminum Pattern	24½c
Solder, ½ x ½	35c lb.
Wire Solder	37c lb.
Wiping Solder	31c lb.
Tinker's Bar Solder	40c lb.
Wire Nails	$2.35 base
Cut Nails	$2.70 base
Poultry Netting	45%
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp Rope	12½c base
Sisal Rope	10½c base

TORONTO.

TORONTO, Ont., April 15.—The gradual improvement in conditions continues and the volume of business is assuming more satisfactory proportions. The number of orders booked is about normal but cautious buying in small lots is the general rule. Stocks are being kept low on account of the tendency to buy only those lines which are more urgently required. The city trade, although comparatively quiet, is showing some signs of a revival, not as much, however, as might be expected considering the season of the year. The country trade, on the other hand, is more satisfactory, some dealers reporting almost normal conditions. The building trade is still comparatively quiet and the demand for builders' supplies and hardware, although more active, is below normal. Some seasonable lines are moving fairly well and there is a fair demand for assorted shelf goods. The most important price change to note this week is in binder twine which has advanced on account of the difficulty in securing supplies of sisal and Manila. Prices of galvanied wire are still withdrawn owing to the unsettled condition of the spelter market. The situation as regards sisal has improved to some extent, but manila is unchanged. On this account the rope market is firm and business is improving.

The Metals.—The feature in the metal markets this week is the extraordinary advance of 11c in tin due to a scarcity of spot metal. The market for futures is, however, considerably lower. Solders have also advanced on account of the strength of the tin market. The copper market is very strong and prices firm but unchanged. The spelter situation is much the same and there is little business moving. Lead is steady and the market quiet. Aluminum is unchanged at 23½c per pound.

Tin.—The market is very unsettled due to the restrictions placed on the export of metal by the British Government and the uncertainty as to how importers will be affected. The new regulations are causing considerable delay in making shipments and a consequent scarcity of spot tin. This has resulted in a sharp advance of 11c for spot metal, which is now quoted at 65c. Quotations on early delivery tin are practically the same, but futures are considerably lower at about 50c. There is little trading pending developments and quotations at 65c are entirely nominal.

Copper.—The market is very strong and the demand for copper for war munitions continues heavy; quotations are unchanged, but firm at 17¼c per pound.

Spelter.—The situation is practically unchanged and supplies of spelter are still difficult to obtain. The market is unsettled but stronger. Prices are unchanged and nominal at 12c per pound.

Lead.—The market is quiet but firm, with heavy demand for war munitions. Quotations locally are unchanged at 5¾c per pound.

Antimony.—The market is active and stronger with a scarcity of metal The demand for antimony for ammunition is heavy and is increasing. The embargo placed on antimony by the British Government will probably remain in force while the war lasts. Prices are unchanged and nominal at 25c per pound.

Solders.—The advance in tin is reflected in solders which are from 2c to 5c higher. The following new prices are being quoted: half and half, 35c; wire solder, 37c; wiping, 31c, and tinkers' bar 40c per pound.

Scrap Metals.—There is a little better demand for scrap, but the market is quiet and prices unchanged.

Pig Iron.—The market continues quiet and foundries are operating at considerably reduced capacity. Hamilton and Victoria brands are quoted in Toronto at $19 per ton.

Bar Iron and Steel.—There is little improvement noticeable in the steel trade and the outlook is better. Conditions, however, are considerably below normal. Prices on bars are firmer but unchanged at $2.05 base.

Lead and Iron Pipe.—Business continues quiet as the building trade is dull. Lead pipe is quoted at 8c and waste pipe at 9c net. Prices on iron pipe are given in the current market quotations.

Wire Nails.—There is no change in the situation and the demand is only fair. Wire nails are being quoted at $2.35 base and cut nails $2.75 base.

Binder Twine.—When a new binder twine list was published in these columns in the issue of March 27, it was stated that these prices would probably not remain in force very long and that an advance might be expected. This has now materialized and an advance of ¼c to ½c per pound has to be noted. There has been for some time considerable difficulty experienced in obtaining supplies of sisal from Mexico owing to the unsettled conditions in that country. The outlook is improving, however, but is still serious. Supplies of manila are also difficult to obtain owing to conditions brought about by the war. The new binder twine prices will be found in the current market quotations.

Rope.—There is considerably more activity in the rope market and the prices are firm. The situation as regards raw materials show little improvement and supplies are difficult to obtain and have increased in cost. Prices of rope and twine are given in the current market quotations.

WINNIPEG QUOTATIONS.

WINNIPEG.

WINNIPEG, April 15.—This week there appears to have been an improvement in the volume or orders being received. It is, in fact, stated in some quarters that the month of April begins to show signs of going ahead of April 1914. There are some who are feeling that the change has already come, and that from now on a volume of business well up to, and gradually becoming greater than, that done in the corresponding period a year ago, will be noted. Certainly weather conditions over the West have been almost as good as could be desired, and it seems likely that the hardware dealers throughout the country will feel the need of considerably increasing their stocks.

Lead Products Up.

The week has seen a number of changes in price, these being without exception in an upward direction. Lead products have generally moved up, this, of course, being due to the higher cost of the raw material.

Lead pipe coil is now quoted at $8.25 less than coil at $9.25 per cwt. Lead waste has moved up, now being steadily quoted at $8.75 per cwt.

In sporting lines, chilled shot has been put upon a higher basis, being quoted now at $10.75.

Fencing Still Steady.

No advance has as yet been made in fencing. It seems very likely, however, that this advance will come by the end of April. Prices are such at the present time that **Winnipeg jobbers are selling slightly below cost; that is, they have to pay more to keep up their stock than they get for the goods they are selling out of stock.** The intention seems to be to keep this up as long as the stocks bought at a better price exist, but it is felt the end of April will about see the last of this. Under the circumstances, therefore, it would appear dealers would do well to look over their fence supplies —see as nearly as possible what they will need—and get sorting orders in while the present low quotations exist.

Batteries Up in Month.

Batteries are locally being held at the present prices. There is a tendency upward in some lines, however, and by June it seems practically certain that higher prices will be asked for all lines. This will be not only due to the higher cost of manganese, but perhaps more to the continued advances in zinc. The difference in the price of zinc has increased the manufacturing cost of each battery well over 1c. If this product continues to go up, or even if it holds its present high level, a battery advance seems practically certain to take place when present stocks of zinc, which are far from high, are exhausted.

Linseed Takes New Level.

When linseed oil dropped a fortnight ago, it was stated that this decline was only temporary. The truth of this is now made more than ever obvious, for following last week's return to the old prices, there has this week come an advance of 2c, putting raw at 93c and boiled oil at 96c. As a matter of fact the situation has little or nothing to do with the flax market, but results from earnings, formerly received from the by-product, linseed cake, being almost entirely cut off. It is a very interesting situation, and one which **is likely to keep the prices of linseed oil high for a year or more. This is dealt with more fully elsewhere in this issue.**

Glass Goes Up Largely.

The advance in window glass—long expected—has been brought into effect. It cannot be stated that this is entirely a market advance—that is, not one solely brought about by the higher cost of manufacturing or of raw materials. It is an advance rather resulting from the law of supply and demand. The American glass manufacturers have control of the market at the present time. The Belgium supply is cut off. The American producers, therefore, have

raised their price—apparently not so much because they have more orders than they can fill, as because they have naturally a desire to secure the larger profits which the situation renders possible.

Present Glass Quotations.

	Single.	Double.
Up to 25 in.	$6.25	$9.00
26 to 40 in.	6.75	10.00
41 to 50 in.	8.25	11.25

61 to 70 in.	9.25	12.75
71 to 80 in.	...	13.75
81 to 85 in.	...	16.75
86 to 90 in.	...	17.75
91 to 95 in.	...	18.75
96 to 100 in.	...	22.00
101 to 105 in.	...	24.50
106 to 110 in.	...	28.00

Less than full cases, 33 1-3 per cent. off pane list.

The stove business is improving, ranges now moving quite briskly. It is evident that dealers' stocks are low and supplementary orders are being regularly received.

LONDON.

LONDON, April 15.—Business has improved greatly during the past week; garden tools and spring hardware lines are moving rapidly. Linseed oil has declined 2 cents per gallon, and is in fair demand. Turpentine has advanced. Binder twine has also advanced in the 500, 550 and 600-ft. grades. The advance in paint, referred to last week, is now in effect.

Turpentine has again advanced two cents per gallon, and is quoted in barrel lots at 73 cents per gallon in single barrels; 2 to 4 barrels 72c per Imperial gallon; 5-gallon lots, 80c per gallon.

Linseed oil has declined two cents per gallon, and is quoted as follows:

	Raw.	Boiled.
1 to 2 barrels	78c	81c
3 to 5 barrels	77c	80c
6 to 9 barrels	75c	78c

Lead remains unchanged, and is quoted for Government pure grades in ton lots at $9.10 per 100 lbs. and in less than ton lots at $9.40 per 100 lbs.

Wire Nails, Etc.

Wire nails are in fair demand. The present price is $2.35 base for wire and $2.70 base for cut nails. Most of the larger buyers booked for wire nails some time ago when quotations ranged around $2 base. Wire from stock is quoted as follows:

	Per 100 lbs.
Barb	$2.55
No. 9 soft, galv.	2.30
No. 12 soft, galv.	2.45
No. 13 soft, galv.	2.55
9-coil spring	2.35
Oiled and annealed, No. 10	2.46
Oiled and annealed, No. 11	2.52
Oiled and annealed, No. 12	2.60

Galvanized fence hooks are quoted at $3 per 100 lbs. and $3.25 per 100 lbs. in 25-lb. boxes. Fence staples, bright, are $2.60 per 100 lbs. in kegs; $2.85 per 100 lbs. in 25-lb. boxes; galvanized, $3 per 100 lbs. in kegs, and $3.25 per 100 lbs. in 25-lb. boxes. Poultry netting remains at 45 per cent.; screen wire is quoted at $1.55 in 100-ft. rolls and $1.60 in 50-ft. rolls.

Rope quotations are unchanged and are as follows:

Pure Manila .....14½c lb. base
British Manila .....12½c lb. base
African Hemp .....12½c lb. base

The new prices on twine are as follows:

650 ft. .....12¾c lb.
600 ft. .....10½c lb.
550 ft. ..... 8¾c lb.
500 ft. ..... 8½c lb.

⅛c per pound allowance on 5 tons.
¼c per pound allowance on 10 tons.
Terms November 1.

Reasons for Advance

The Recent Advance in the Price of Washboards Not Unexpected Owing to the Condition of Markets in Zinc, Glass, Brass and Enamel.

ALTHOUGH the recent advance of 90c per dozen in washboard prices announced in the market reports of Hardware and Metal, came as a surprise to some merchants, the advance was expected by a great many in the trade, especially those who have been following the market reports closely and have kept posted on the changing conditions in the zinc, glass, brass, and enamel markets since the outbreak of the war. Before the war, the zinc for the manufacture of wash boards came largely from Belgium and principally from the vicinity of Liege. Also before the outbreak of hostilities, the cost of zinc to the manufacturer was somewhere about 6 to 8 cents a pound. To-day the same metal costs them 14 to 15c a pound and is very scarce. There are some who think it will even go much higher before the summer arrives.

It is for a somewhat similar reason that glass washboards have advanced as well. One big English firm which manufactures glass and which has a large factory in England, have on account of the war a great number of men less in their employ, than heretofore. It is stated that this firm employs alone some 40.000 men in their British factories, and that from these factories alone an entire regiment has been recruited for the war. At the same time, the glass works in Belgium have pretty nearly all been put out of business, or else they are being operated by the Germans, and of course none of the product reaches the British trade. The cannonading in Europe has, too, been responsible for the breakage of large quantities of glass, which has necessarily increased the demand. We are, therefore, short the production of the Belgium factories, and we are getting less glass from the British firm above referred to.

Brass, too, is largely in demand for munitions of war of many kinds and is worth more for that reason. Every shell or shot that is fired is fired from a brass or copper cartridge case.

Enamel is made of imported materials largely supplied by Germany and so is rapidly becoming scarce and dear.

May Open Western Canada Zinc Mines.

In reference to zinc again. Very few people know that we have large deposits of zinc in Western Canada but owing to the high cost of operation, as compared with the very low cost of its importation from Belgium, it has not been commercially successful. It is quite possible that the high cost of zinc to-day and the scarcity of this commodity may lead to the opening up of the Canadian zinc mines and their operation at a profit, at least until the end of the war and until matters get adjusted and the supply equals the demand for this particular article. Zinc formerly came into this country free of cost, as far as duty was concerned. The zinc that we are using now comes from the United States where there are two mills operating and which has to supply practically the whole world and in addition it now has to bear a war tax of 7½ per cent. American zinc has always even in ordinary times been much more expensive zinc so that when the Belgium zinc was taken off the market. Canadian manufacturing trade have had to pay American prices, which were still higher in addition to many advances made owing to the heavy demands made on the production, which was not equal to the demand.

Toronto Sales Manager.

The Sarnia Metal Products Co., Sarnia, Ont., have appointed Geo. W. Britnell, vice-president Toronto Builders' Exchange, as Toronto sales manager, with offices in the Builders' Exchange, 154 Simcoe Street, Toronto.

Weekly Paint Markets

MONTREAL.

MONTREAL, April 15.—New quotations on paints covering a general advance are in effect today. The immediate result is the increase in the base quotation of 10c all round; however, so wide are the effects of the adjustments under way that it will be a matter of a couple of weeks perhaps before all the changes in varnishes and other miscellaneous lines are completed by the different houses.

The advance of 10c is only the general effect of the change, for there are many lines where the increase in the price will be materially above this, as stated last week on this page. The bright reds are particularly affected on account of the difficulty in securing color imports. In fact, the situation is such that if the existing conditions continue for any considerable period certain shades will have to be entirely withdrawn—some manufacturers are already depending upon their stocks on hand to fill orders and have ceased putting up some lines. In the dry colors the situation is particularly critical and such quotations as are given must be considered as nominal, manufacturers preferring to hold the colors which are in short supply for their own needs. Colors in oil are therefore seriously affected and on imported shades prices are only given on request.

In addition to the change in the base, about 25c can be added for bright reds in the general mixed lines and also in floor and porch paints and enamels; on flat oil paints about 50c can be added for bright reds. Carriage and wagon paints are up about 10 per cent. for the run of colors and 25 per cent. to 33 1-3 per cent. for the bright reds. Greens in oil are up 1c lb., run of colors 2c, and bright reds, Chinese and Prussian blues and Japan colors are only quoted on application.

The situation during the week has changed little so far as the chief ingredients are concerned and the quotations for staples show no important alteration. However, prices are very steady and the tendency is upward if anything, there being no indication that there will be any weakness in the new market established.

While there has been brisk buying in the trade it has been steady and there is little indication of any general attempt to speculate on the rise. Undoubtedly many dealers have taken advantage of the market to put in good stocks, but the opinion rules that the financial situation is such that "gambling" has not been popular. Spring shipments are now going out freely and in the country trade they are entirely satisfactory, being somewhat better than a year ago. Little improvement is yet noted in the city trade or in the Western demand.

Linseed Oil.—The oil situation has changed little but quotations in the trade are firmer on the strength of the advance of the crushers last week. The usual figure heard is 80c and 83c for the barrel basis but there are quotations as high as 84c and 86½c, while in the other direction the bottom is 78c and 81c, although this may be taken as exceptional. Efforts to bring the dealers closer together on the oil market do not seem to meet with much success. The following will be found to cover the usual range:

	Raw.		Boiled.	
1 to 2 barrels..	80c	84c	83c	86½c
3 to 5 barrels ..	79c	83c	82c	85½c
6 to 9 barrels ..	78c	82c	81c	84½c
10 bbls. & over.	77c	81c	80c	83½c

Gasoline and Benzine.—There will be a heavy movement of gasoline next week with the inauguration of the summer boat business. Booking is reported to be slightly better than last year for the country business and city demand is picking up slightly with the summer increase in motor traffic, although the consumption this year is likely to be comparatively small in this department. Prices continues at 15c in drums and 14½c tank wagon.

Turpentine.—The turpentine market is firmer. Although the top of the price continues at 68c as a week ago, the botton has moved up slightly in the trade and refiners report a quotation a couple of cents above that last given.

	Per gal.	
½-bbl. lots	69c	71c
1-bbl. lots	66c	68c
2 to 4 bbl. lots	65c	67c
5 to 10 bbl. lots	63s	66c

Lead and Zinc.—The lead market continues strong and, although the price of pig lead is slightly easier, it is still at a level above that indicated by the prices in the paint trade. Zinc continues firm at around 14c for 25 lb. irons, but there appear to be better supplies available than a few weeks ago.

Dry Colors, Etc.—Each week sees the supplies of certain colors getting shorter with the result that quotations for bright reds are merely nominal and a number of houses have withdrawn their prices on a number of shades; also on bright reds, imported blues and Japans in oil. With a continuance of the existing conditions some shades will disappear from the market and there are already numbers which certain manufacturers have ceased to put up. The high cost of whiting keeps putty very firm with an advance only discouraged by the slack state of the consuming market.

Glass.—There has been no change of importance in the glass situation and conditions continue very unsettled. Base quotations are more or less nominal for the time being.

TORONTO.

TORONTO, Ont., April 16.—The advance in the prices of mixed paints, etc., announced in Hardware and Metal last week and in previous issues, goes into effect on Thursday of this week. At the time when the tariff changes were made it was stated in these columns that this step would no doubt be made in due course. The necessity of this became more apparent as time passed and as the situation became more clearly sized up. All raw materials are more costly, and in the case of some dyes and chemicals are extremely difficult to obtain. It was, therefore obvious that the goods containing these materials would also advance. The lines affected are mixed paints, including porch paints, floor paints and enamels, which have in most cases advanced 10c per gallon. For colors in oil 1c per pound for greens; other colors, 2c per pound. Prices of permanent reds, vermilions, Prussian blues and Chinese blues have been withdrawn. Linseed oil has declined 2c, but turpentine has advanced 2c. Putty is un-

World's Largest Varnish Makers

Established 1858
Walkerville, Ont.

changed, but firm. The glass situation is unchanged and business quiet. Gasoline is moving more freely; collections are slow, but improving. The general feeling in the paint trade is more optimistic; city and country trade both showing considerable improvement.

Linseed Oil.—The market is very unsettled, and prices range from 78c to 85c per gallon. The former figure is more generally heard and is 2c lower than the prices quoted last week. The reduction was made to stimulate business, which is quiet at the present time. The seed market is firmer at Winnipeg. The following prices are being quoted in Toronto:

	Raw.	Boiled.
Single bbls.	78	81
3 to 5 bbls.	77	80
6 to 9 bbls.	76	79

Turpentine.—An advance of 2c in turpentine in the South has caused higher prices locally. Stocks have been further depleted by large shipments from Savannah and other ports. It is stated that the Farmers' Association controls the supply. "G" resin has advanced from 50c to 75c per barrel. The market is very firm for turpentine and the following prices are quoted in Toronto: Single barrels, 73c; 2-4 barrels, 72c; and 5-gallon lots, 80c per Imperial gallon.

Mixed Paints.—An advance of 10c per gallon is in effect to-day. This includes mixed paints, floor paints, porch paints and enamels. Bright reds have advanced 25c per gallon.

Colors in Oil.—Greens have advanced 1c and other colors 2c per pound. Prices of permanent reds, vermilions, Prussian blues, Chinese blues and Japan colors have been withdrawn.

White Lead.—There is no change in prices this week, but with pig lead going higher a further revision in white lead is not improbable. Prices are shown in current quotations.

Glass.—The situation is unchanged,, although it is reported that the manufacturers in the States have advanced their prices. If this is the case, and with the addition of the duty, glass could not be imported now to sell at a profit with the present schedule.

Putty.—Business is quiet, but prices are firm. The following prices are for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, bbls., 800 lbs.	$2.40
Bulk drums, 100 lbs.	2.60
Bulk drums, 50 lbs.	2.65
Bulk drums, 25 lbs.	2.70
Bulk drums, 12½ lbs.	2.95
Cased tins, 25 lbs.	2.90
Cased tins, 12½ lbs.	3.10

Gasoline.—There is more active demand for gasoline, which is quoted at 18½c per gallon. Prices of coal oil are given in the current market quotations.

Saskatoon Convention Program

Executive Officers Meet to Arrange the Course of Events—Addresses by Chicago Man on Efficiency and Rising Costs—Merchants Want List of Property Owners.

SASKATOON, Sask., April 14. —Arrangements are being rapidly completed for the big convention of Saskatchewan merchants here beginning May 11. The provincial executive met recently to further the plans along and for the purpose of placing on the slate the list of subjects for discussion.

The members of the executive present were G. A. Maybee, Moose Jaw; W. W. Cooper, Swift Current; J. L. S. Hutchinson, Saskatoon, and F. E. Raymond, secretary of the association.

The subject of the retailers improving their buying powers and their selling organization so as to reduce the cost to the consumer was discussed at considerable length. The Food and Supply Bill, methods of handling bankrupt stocks, fire insurance, and the proposed amendments to the Cities' Act were also discussed. In connection with the latter subject the association is to be represented at a meeting of delegates from cities of the province to be held in Regina on Tuesday, to discuss the proposed amendments, and a number of amendments were suggested which it was thought would be of benefit to the retail trades.

It was also decided to make a trial of a freight bill checking department in connection with the work of the association, which, it was considered, would be of great use and advantage to the members.

Want List of Property Owners.

Further discussion of the proposed arrangement with the Land Titles Office for an alphabetical list of property owners also took place, the idea being that an alphabetical list of all property owners, with a list attached to each name showing all the property they own would be of great use to the business men of the Province in connection with the credit system.

Considerable time was spent in making further arrangements for the big convention of retailers which is to be held in the city from May 11 to 13, when about 1,000 members of the association from every part of the province are expected to be present in the city. The sessions of the convention will only be open to members of the association and Tuesday morning will be principally occupied in receiving subscriptions of those who are already members and others who intend to become members of the association. The following may be taken as the tentative program of the convention:—

Tuesday, May 11.

9 o'clock—Registration of members and distribution of badges. Appointment of Resolutions Committee. Address of welcome on behalf of the city from Mayor Harrison, President Murray, and Malcolm Isbister, president of the Board of Trade.

Tuesday evening—Address by Frank Stockdale, of Chicago, on "Efficiency Through Co-operation." The services of Mr. Stockdale have been obtained through "Systems" magazine, and it is considered that this lecture alone will repay delegates for their trip to Saskatoon.

Wednesday, May 12.

Business session—Reports from Resolutions Committee. Other business.

1.15—Trip to the Quaker Oats Mill.

3 to 6—Business session. Address by J. L. S. Hutchinson, Provincial Treasurer, on topics of interest appertaining to the work of the association.

7.30—Banquet, followed by addresses from Professor Gray, of the University; F. Maclure Sclanders, Commissioner of the Board of Trade; President B. W. Zieman, of the Dominion Retail Merchants' Association, of Preston, Ont.; E. M. Trowern, Dominion Secretary, and other visiting secretaries and treasurers from neighboring provinces.

Thursday, May 13.

9.0—Business session. Reports from Resolutions Committee. Other business.

2.0—Annual meeting for election of officers. Reading of secretary's and treasurer's reports. Evening—Address by Frank Stockdale on "Keeping up with the rising prices," or "Salesmanship."

THE HUMAN SIDE OF A STORE.

A store is almost human. It is full off temperament. It affects each customer with the composite personality of its management and staff.

There are stores and stores. There are "grouchy" stores and "smiling" stores. There are flippant stores and dignified stores. And the peculiar thing about each is that the goods or the prices have little to do with the store's temperament. It is the personality of the store that colors and defines the character of the goods from the customer's viewpoint and wins or repels approval.

Paint is moving from the shelves

There is a good demand for the following lines—look over your paint stock and send in your sorting order for immediate shipment. It does not pay to wait too long—you may lose a customer to another store if you cannot supply the colors wanted.

SANITONE

The flat-drying oil-paint for walls and ceilings. Washable and absolutely sanitary. Made in 24 beautiful shades. Many of your customers will use this finish instead of wall-paper, if you push it.

COACH COLORS

A varnish gloss paint of great durability. Very serviceable for outside furniture, canoes, etc., as well as buggies, autos, and delivery wagons. Made in eleven bright, attractive shades.

SUN VARNISH STAINS

A combination of permanent pigment stains and durable varnish. For touching up chairs, furniture, wood-work and floors, etc. Made in 12 good shades.

FLOOR PAINTS

There is always a demand for floor paints in the spring. CP floor paints are tough, long wearing and made in the most serviceable and popular colors. Feature them in your window displays.

SUN VARNISH

Sun Waterproof Floor Finish, Handy Varnishes, Aluminum Paint, Art Enamels, Barn Paint, Gold Paint, Implement Paint, Screen Enamel, Waterpaints.

Make Your Local Advertising Pull Good Business

One of the best means at your disposal, for stirring up business, is intelligent advertising in your local newspapers. Have you felt the need of small cuts to put life and selling power into your advertisements? No doubt you have, but owing to the cost of cuts required for this, you have been prevented from going more thoroughly into the matter. Hardware and Metal has overcome this difficulty, and will supply you with cuts, at very low cost. They will cost you only fifteen cents each. We have two hundred of them in Hardware and Metal's Electro Service. Send for sample sheets, showing proofs of these valuable little cuts. Then make your selection.

RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."

"The Right Paint to Paint Right."

"SUN" Brass Blow Pipe is what they all want.

SUN LIGHT COMPANY
1525 Market Street, Canton, O., U.S.A.

Handle your Oils and Gasoline with the
Wayne Pump

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness.

Throws a pint, quart, half-gallon or gallon, and measures exactly.

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts accurately machined and thoroughly tested, and are interchangeable.

If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

Stephens

HOUSE PAINT

Stephens House Paint is made by experts for the use of both the Painter and Consumer.

The professional painter, as well as the amateur, is a steady user of "Stephens House Paint" because it saves him time and money, and always gives satisfaction. Stephens House Paint has wonderful weather-resisting qualities and no superior as a surface coverer.

If not already represented in your town we will be glad to explain our exclusive agency proposition. Write us about it.

PAINT AND VARNISH MAKERS

WINNIPEG and CALGARY

PILT!! PILT!!—

You could see their faces stiffen like gamblers at a horse-race.

Somewhere out in the harvest fields a guard was racing with a smoking rifle. And not 30 feet ahead a thing called Number-Three-Nine-Seven sprawled in the ripening barley.

The convict---the human---so much like ourselves. His hopes, ambitions, aspirations, the grind of the daily routine. His one determination to set himself right and breathe again the air of the free.

Robson Black, in his lucid style, gives us the true inside story of the Kingston "Pen." Read "A Town in Tethers" in

"More Like I Had Last Time"

Dealer's Success is Built on Re-Sales

That dealer prospers who has the same people coming in over and over again. This means he can turn over a good line several times and can buy enough of each to get the best discounts and rebates. When they come back for "More same as the last," you have the right line. The Benjamin Moore Co., Limited, Paint line will hold your own and get new customers. These are Pure Linseed Oil Paints, wonderful covering capacity, and permanent color. They look fine on display and sell themselves after the first trial. The store that stocks *Moore's House Colors—Sells the Most Paint.*

MOORE'S

PAINTS
that Guarantee Repeat Orders

MURESCO—*The Best Wall Finish*

THE SQUARE DEAL PEOPLE

Wall paper has to go 'way back and sit down when Muresco comes in. Put Muresco right out "front" and let the public see you have it. Most beautiful wall finish, all tints and colors. Easy to put on with a brush. Does not rub off, and is permanent. That's what makes it such a quick seller. Muresco prices allow a good profit. Write for terms on a trial order and descriptive literature.

Benjamin Moore & Co., Limited

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

A Straight Talk from the Advertising Manager

Since the Annual Spring Number of Hardware and Metal was issued, our editors have received letters of congratulation from dozens of Canada's most successful hardwaremen. And, almost without exception, these men have specially mentioned the importance they attach to ideas secured from reading the advertising pages. It is most significant that the big and successful hardware merchants are such close students of Hardware and Metal's advertisements.

There may be an advertisement in this very issue, which will mean hundreds of dollars to you, if you act upon it. Have you read ALL the advertising pages?

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

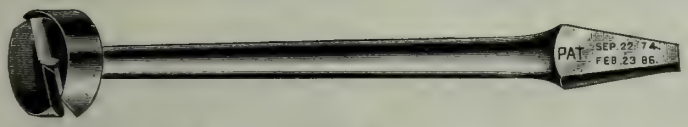
B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario St. East, MONTREAL



WHEN ORDERING TARRED FELT, BE SURE TO SPECIFY

DOMINION BRAND

We specialize in all kinds of Roofing Materials.

WRITE US FOR PRICES.

J. H. McCOMB LIMITED
MONTREAL

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

PINK'S LUMBERING TOOLS

The Standard Tools in every province of the Dominion, New Zealand, Australia, etc.

We manufacture all kinds of lumber tools. Light and Durable.

LONG DISTANCE PHONE No. 87.

Send for Catalogue and Price List.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

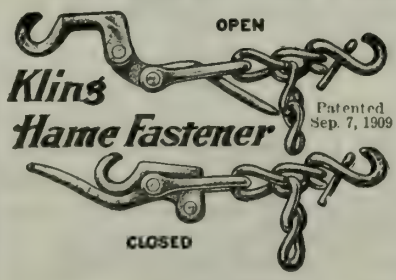
GEO. W. LAIDLAW, Vancouver, B. C.

The "NORCROSS" Line of Cultivator-Hoes and Weeders

HAS **EXCELLENT QUALITY, FINE FINISH** AND **SPECIAL PATENTED FEATURES** THAT MEAN EASY SALES AND LASTING SATISFACTION.

A little higher in price than imitations, but the service and satisfaction more than offset the extra cost.



Drop us a card for our 16-page Cultivator Booklet and address of nearest Canadian representative.

C. S. Norcross & Sons

Manufacturers

BUSHNELL - ILL., U.S.A.

MADE IN CANADA

Like the British Navy, there is no getting away from it. Always ready for instant use. On or off in a jiffy. Holds like grim death. So simple a child can fasten it. Keeps the hames always uniformly tight. Safe and Strong. A fast seller, with a big profit for the dealer.

All Jobbers should or do sell it. $2.25 per dozen.

261 MACDONELL AVE. TORONTO, ONTARIO

The No. 32 Torch

THE No. 32 C. & L. TORCH

is the best combination, quart torch ever made. The tank is made of heavy, seamless drawn brass, re-inforced, and fitted with non-leaking filler plug with leather washer recessed. The burner is made of special generator metal, producing greater heat, with less fuel than other makes; in fact the user will soon save the cost of his No. 32 in the saving of fuel alone. Jobbers will supply at factory price. Send for catalog—it's free.

CHICAGO STEEL BENDING BRAKES
(Made in all sizes)

Regarding the Steel Bending Brake we purchased last Spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.
Yours truly,
THE McCLARY MFG. CO., C. E. Main, Manager

The Steel Bending Brake Works Ltd., Chatham, Ont.

THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Easy Seller Because--

It is exceptionally convenient, quick acting and an oil saver.
Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted as the flow of oil stops the instant the pressure on the plunger stops.
A sure good sale and splendid profit.
Order it now.

Quality

STRATFORD ROPED EXTENSION LADDERS are made from strictly first-grade Yellow Pine and Rock Elm Rounds. They are bored at the proper angle to conform to the spread of the ladder, removing all strain and danger of springing. ABSOLUTELY THE BEST ON THE MARKET — AND THE LADDER SPEAKS FOR ITSELF.
ONTARIO LAWN SWING, the best and strongest lawn swing on the market. Made from selected, well-seasoned hardwood stock. Made two and four-passenger.
We also manufacture **Common Extension Ladders, Single and Step Ladders, Painters' and Scaffolds, Camp and Lawn Furnishings, Ironing and Bake Boards, Clothes Dryers, etc.**

A FILE

IS A SMALL THING, BUT IF THE RIGHT LINE IS HANDLED THE RESULTS ARE SURPRISINGLY LARGE.

The DELTA IS THE RIGHT LINE.

It has shown greater cutting and lasting qualities at every test and the price is reasonable. It will put your file department in the highest estimation of all file customers and leave you an excellent margin for profit.

The Delta is the only line of files from 3 to 24 inches that's made absolutely of crucible steel. This material has kept it on the job long after other makes have been scrapped.

A shape and size for every purpose—and each and every one is backed by our reputation and the trade-mark guarantee that's on the tang.

Write to your jobber: if he cannot supply you, write us. We'll see that you get prompt delivery.

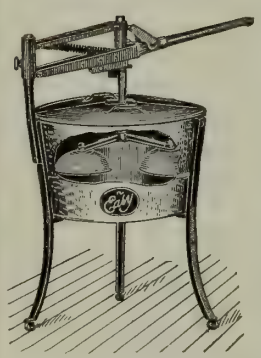
Many of Your Customers Don't Know How To Shoot

It is easy to learn with a Ross Cadet Rifle. One need not be a *boy* to use it. It's a good enough rifle for any man, and its accuracy is superior to that of any ordinary .22.



It's an easy rifle to sell at $12.00 these days. How is your stock?

Ross Rifle Company

QUEBEC, CANADA

THE "EASY" WASHER

HAS EXCLUSIVE TALKING POINTS THAT ASSURE EXTRAORDINARY SALES

Works by suction—not friction. Removes all the dirt without injuring the finest of fabrics. All metal. Will not rust. Sanitary—(will not absorb moisture or impurities).

Very easily operated. Strong, durable and noiseless.

CAMERON AND CAMPBELL, TORONTO

Hardware Manufacturer!

Are You Finding 1915 a Dull Year?

If so, what better policy can you adopt, than that followed by a firm like the American Radiator Co., as described in the April 8 issue of **Printers' Ink?** Note this extract, especially:

> "This policy called for advertising. In 1902 we started using modest space in the magazines, feeling that national publicity would add prestige and the flavor of world-wide renown to our products. But it was not until the panic of 1907 that the tremendous possibilities of advertising as business insurance were brought home to us. On the theory that the time to advertise is when business is dull, we experimented with big space and impressive newspaper copy that year. We came out of the campaign advertising enthusiasts, for our 1908 sales showed a heavy increase over the year before. From that time on, we have carried more 'business insurance' every year—in fact this year we will double the money which we invested last year in newspaper advertising alone. Nor will we shut down in the slightest on our magazine, farm paper or trade advertising."

So much for this progressive firm's policy. Here are the results of that policy:

> "The net earnings of the American Radiator Co. for 1912 were $1,312,052. In 1913 they climbed to $1,696,193; the next year they jumped to $2,081,267, and last year—admittedly an 'off' year for building—the balance sheet shows a net profit of $2,289,075, which is equal to 25.39 per cent. on $8,185,600 common stock."

Would it not be wise for *you* to carry more "business insurance" this year? You must know that stocks throughout Canada are light, and a big buying movement is likely to develop at any time. When Canadian hardware dealers suddenly find it necessary to replenish their stocks on a large scale, their orders will go to the firms whose goods have been kept to the front in Hardware and Metal's advertising pages, during these weeks when merchants are studying their trade paper as they never did before.

May we discuss the matter of "business insurance" with you?

The J. D. Aluminum Rake

A new invention. Nothing like it ever shown before. For stripping Dandelion Buds it is unexcelled. Does not allow the dandelion to bloom, hence **no dandelions** and is a great boon to all who appreciate a beautiful lawn.

A few reasons for use in selling this rake:

It is a self-cleaning Rake.

Will not injure the lawn as other Rakes do; will pick up matches, peanut shells, cigar and cigarette butts, acorns, pebbles, etc.

Endorsed and used by the City Parks and Garden Departments.

Positively does not injure the crown of grass.

It is not necessary to use a sieve for top dressing—this rake will do it.

The only tool made that will grade a lawn.

Made of aluminum—two-thirds lighter than any other rake.

MADE IN CANADA

(Improved)

Doust Self-Winding Clothes Line

UNIVERSAL
Food Choppers

Chop all meats, fruits, nuts, vegetables, etc., into clean-cut, uniform pieces, fine or coarse as desired, without tearing or crushing the food or wasting the juices.

The UNIVERSAL Food Chopper is profitable to handle and easy to sell. Housewives everywhere know its advantages and realize that it is a kitchen necessity —a time-saving, labor-saving, food-saving appliance, easy to operate and easy to clean. It does the work of the old-fashioned chopping knife and bowl in one-fifth the time.

With your first order for 1 dozen UNIVERSAL Food Choppers we send you, free of charge, a handsome "silent salesman" display stand, together with show-cards, lantern slides, newspaper electros, etc., such as you desire.

The UNIVERSAL is the only shear-cutting self-sharpening Food Chopper on the market. Every time the UNIVERSAL Food Chopper is used the beveled cutting edges sharpen themselves on the beveled edge of the disc against which they rotate.

This is a distinctive UNIVERSAL feature which means the greatest cutting efficiency with no sharpening expense and no dull cutters, even if the chopper is used a lifetime.

UNIVERSAL Food Choppers are made in four sizes:

No. 0—Small Family Size **No. 1—Family Size**
No. 2—Large Family Size **No. 3—For Hotels, Restaurants, etc.**

Prices range from $1.75 to $3.00

THE SHEET METAL PRODUCTS CO. OF CANADA LIMITED

MONTREAL TORONTO WINNIPEG

The Fight for Durability

Chapter XIII.

Too much attention cannot be paid to heat treatment of iron or steel all along the line.

To insure uniform heat in our annealing ovens no guesswork or judging of the temperatures by the eye is permitted. The temperature of the furnaces is accurately measured with the pyrometer, which is an instrument used for determining temperatures too high to be measured with the ordinary form of thermometer.

Hard places, stresses and strains make a sheet unfit for proper working qualities and are accelerators of corrosion, because they cause differences of potential on the surface of the sheet.

ARMCO IRON
Resists Rust

The annealing of American Ingot Iron by pyrometers guarantees a soft, ductile, workable sheet with stresses and strains entirely removed. Careful attention to every detail of manufacture places at the pinnacle of rust-resistance—Armco-American Ingot Iron.

The O.K. Sheet Metal Works, of Muskogee, Okla., has this to say of its working qualities:—

"I have just completed the Sheet Metal Work on the U.S. Post Office and the M.O. & G. Railway Shops, both in this city. On the former I used your ARMCO Roofing Tin, and on the latter your American Ingot Iron.

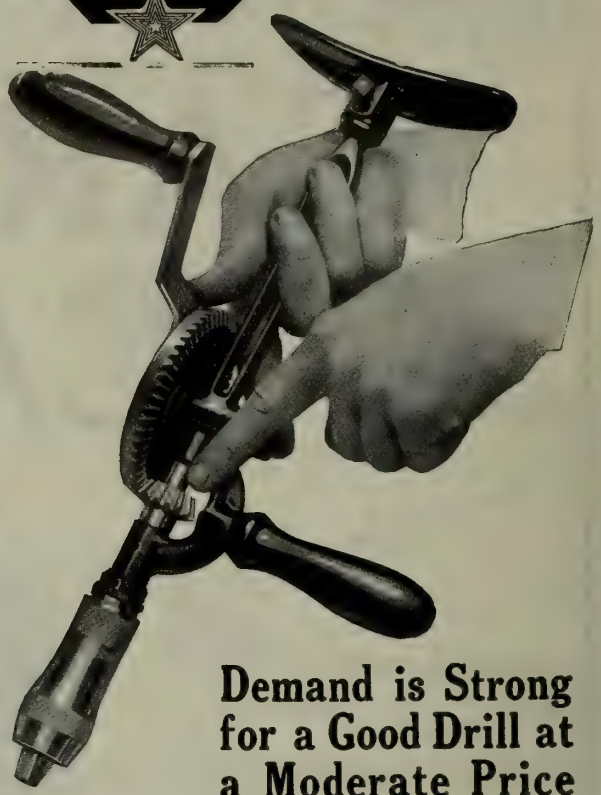
"I believe that if the Sheet Metal Workers would use more of this material it would not only help their business and make their customers permanent, but on account of its soft and pliable condition they would be able to save more than its extra cost in labor, as I have done in many cases.

"I wish you success in your efforts toward getting this material used more generally throughout the country."

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.



Licensed Manufacturers under Patents granted to The International Metal Products Company.

Speaks for Itself—

A Starrett Micrometer in a Plush-Lined Case

Ty Cobb values his glove and bat because of what he can do or has done with them. A musician values the instrument he plays because of his ability to make it produce melody. So also does a high-grade mechanic prize the instruments of his trade because they enable him to do fine work —to split hairs in measuring and to produce perfection in a machine part.

No tool is in more common use and none more highly regarded by machinists than the Starrett Micrometer. The most popular style is the No. 3—1″ micrometer with ratchet stop and lock nut.

There are many other types of Starrett micrometers for other purposes and it is safe to say that each style is in its class the recognized standard.

The fact that mechanics take so much pride in the possession of fine tools has made our *micrometer cases* very popular with them and consequently ready sellers for the dealer. This is because the case furnishes suitable protection for a highly prized instrument. The price of the leather-covered, velvet-lined case for ordinary sizes of micrometers is fifty cents. Price of 3″ micrometer $6.00.

Send for supply of catalogs No. 20-M.A. to distribute to Mechanics.

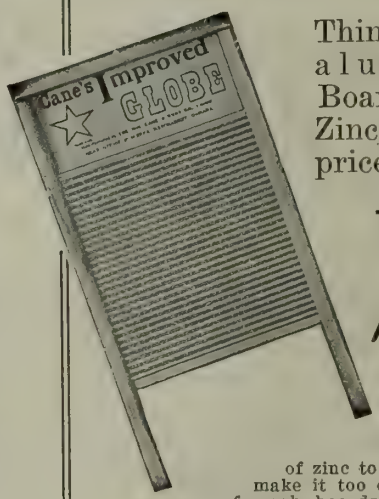
Stanley Tools



Stanley Nail Sets

¶ Made of a high grade of tool steel. Both ends hardened and oil tempered. Specially well knurled, giving the workman a feeling of security as to "grip." ¶ The point that comes into contact with the nail is "cupped" and the edges nicely rounded. Made in a variety of sizes four inches long.

¶ These are packed in attractive display boxes and every tool sold means a satisfied customer.

¶ You should have them in stock. They will prove themselves sellers.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

Think of getting an aluminum Wash Board in place of a Zinc at no advance in price!

WAR *has raised the price*

of zinc to such an extent as to soon make it too costly for the manufacture of wash boards. We are therefore making the offer of supplying our standard brands of washboards with aluminum instead of zinc face.

Of course, the aluminum is a much better material. Less liable to crack, split or carry defects that will tear the clothing. Easier to keep clean, and its brighter appearance makes it an article that will sell easier.

Just tell your customers you are in a position to supply, at their request, the well-known "Cane" models with aluminum instead of zinc face. They'll appreciate the extra advantages. Speak to them to-day.

Hints on Trade With Canada

Trade Commissioner for Canada Addresses Combined Meeting of Engineering and Metal Trades Section of the London Chamber of Commerce — Canadian Criticisms of British Methods.

C. Hamilton Wickes, H. M. Trade Commissioner for Canada, recently addressed a special combined meeting of the Engineering and Metal Trades Section of the London Chamber of Commerce, which, according to The Ironmonger, was not so well attended as it deserved to be. Mr. Wickes had some pertinent information to impart concerning trade conditions in the Dominion. Among other matters he dealt with the Canadian railway requirements. The railways of the Dominion were largely owned in England, said Mr. Wickes, but in spite of that fact the purchasing agencies and the practical control were to a great extent in the hands of Americans, and one result was that the United States received favorable consideration when materials were required. A good deal of machinery was likely to be wanted for new docks at Halifax, the money for which had been asked for in England, but the orders would probably go to the States. The engineers there who might secure the business would in all probability borrow British ideas in order to carry out the contracts. As far as he knew, no British stockholder in Canadian railways had raised a voice of protest against that sort of preferential treatment.

Broadly, all the merchandise which was imported into Canada could be divided into two classes: (a) Articles which found their way through wholesale and jobbing houses into the retailer's hands and thence to the public, and (b) articles which never reached the public at all either because they were required for national or municipal purposes, or because they were in the nature of machinery, material, and semi-finished material for use in Canadian manufactures. There seemed to be a lack of understanding that the man who could sell the first class of goods was rarely able to find a market for the second. In the second group the American had special advantages over British makers, arising from geographical position and similarity of standards and currency. What was required was a system of associating groups of makers into single selling agencies.

Mr. Wickes next referred to typical Canadian criticisms of British business methods. They were mostly respecting bad invoicing, inattention to details, shipment of goods without the documents, or the despatch of documents without the goods; but the speaker emphasized one new point arising out of differences of currency. Discounts which worked out satisfactory in British sterling prices did not always do so in dollars and cents; Mr. Wickes reminded his hearers that most of that work was done actually by principals, who often got tired of the difficulties involved. Turning next to the taking up of agencies in Canada for British firms, he did not advocate whole Dominion agencies; it was better to recognize geographical limitations and divide Canada into the East, the Prairie Provinces, and British Columbia. Business in hardware had to be done through men who worked on their own catalogue, which sometimes cost £3,000 to produce. Ten per cent. advantage was not always sufficient to induce such a man to remove an American name from the catalogue to make room for a British concern. These catalogues covered a very wide range of hardware, builders' goods, household ware, and edge tools in great variety. He pointed out also that in making quotations to a Canadian agent the price should include an adequate remuneration for the man on the spot. It was a curious fact that an agent was not always willing to go out for business with a net quotation to which he had added 5 per cent. for himself. He was much more enthusiastic if supplied with a manufacturer's quotation including 10 per cent. discount for himself, and would often take something off his own margin in order to land the business.

Mr. Wickes reminded his audience also that in some cases it was necessary to finance business, and that was a matter which wanted thinking out at a time when an agency was fixed. It was no good leaving it till there was a chance of securing an order. His remark referred particularly to specific orders for comparatively large amounts. He in-

(Continued on page 36.)

IN NEXT ISSUE.

The next issue of Hardware and Metal, appearing on May 1, will have, in addition to the many regular weekly departments, a number of features worthy of special mention. One article will give details regarding the law governing the sale of Paris green, wood alcohol and other poisons usually sold in hardware stores. Owing to the fact that Government officials have recently prosecuted a number of hardware merchants for not complying with the law governing the sale of poisons this article should prove very timely and instructive. Article No. 5 of the series, "How Hardware Goods Are Made," will also appear in the next issue. This article, splendidly illustrated, will describe in detail the process of manufacture of hand saws.

Another timely article by R. T. D. Edwards will appear. This article also illustrated, will show how attractive display cards can be made from advertisements which appear in this issue of Hardware and Metal.

A new addition to Hardware and Metal's electro assortment will also be introduced in the next issue.

"The Strength and Weakness of the Mail Order House," a special article by Duncan G. George, will also appear next week. Every small town merchant should watch for this article. In addition to the above there will be many other interesting features in next week's issue. Watch for it.

Live Problems of New Brunswick Merchants

Two Days' Convention in St. John Brings to Light Many Things That Are of Vital Importance to the Trade of That Province—Resolutions Were Many and Covered Wide Field —Fredericton Gets Next Convention.

Staff Correspondence.

ST. JOHN, N.B., April 21.—When the first convention of the New Brunswick Retail Merchants' Association closed last week in St. John, under the auspices of the Dominion body, there was not one among its steadily increasing roll of members but felt that the movement for organization in this province was a distinct success. The convention held in the Seamen's Institute was well attended; the delegates came from different parts of the province; they heard addresses of interest on many matters pertaining to the welfare of the retail trade; they discussed freely among themselves items tending to promote the better interests of all; and they realized the force of the time-honored maxim regarding unity and strength.

The convention was a success. All those in attendance at the sessions felt that they had profited considerably thereby. The discussions on the various resolutions submitted brought out much valuable information regarding methods of business in New Brunswick, and showed wherein the retailer could benefit himself and his customers if there was an adoption of the improved modes suggested. Undoubtedly much good will result from the convention. The delegates were enthusiastic concerning it, and before the next annual session, which is to be held in Fredericton, convenes, it is anticipated that there will be a big increase in membership.

A. O. Skinner, of St. John, presided at the meetings, and was honored with being re-elected to the office of president.

The Opening.

Following the preliminaries attending the opening, such as registration, issue of credentials, and other details, the convention settled itself into a business-like routine. The chairman gave an address concerning the growth of the association, expressing satisfaction with the large attendance, and extending a hearty welcome to the out-of-town delegates. There were, he pointed out, already over 1,000 members enrolled in the province, and the number was rapidly increasing. The various retailers of St. John paid in the neighborhood of 75 per cent. of the taxes of the city. After expressing his delight at seeing so large and representative a gathering, the president introduced his Worship Mayor Frink, who, in a few well-chosen words, welcomed the delegates to St. John and wished them every success in their efforts to promote the best interests of the cause they represented.

A reply in behalf of the delegates was given by E. M. Trowern, of Toronto, Dominion secretary, who voiced the gratitude of the gathering for the kindly words spoken, and spoke of the pleasure the association felt in holding the convention in this city, paying a neat tribute to St. John as an excellent location for the development of trade, and for its value as a port to the Dominion.

A. E. Murray, of Fredericton, made many suggestions concerning the retail trade in the province and spoke of the different problems with which the average dealer had to contend in the course of business.

Resolutions.

Various important resolutions were dealt with as follows:—

"Resolved, that having received a number of complaints from the mer-

chants doing business in the border towns that goods are being smuggled in without paying duty, wewould recommend that this matter be referred to the Dominion Board to be taken up with the Minister of Customs and endeavor, if possible, to have this evil remedied.''—Carried.

"Resolved, that as taxes are being collected from all retail merchants throughout the Province of New Brunswick for the purpose of maintaining the various towns, cities and villages, and licenses are being paid to maintain those municipalities, a large amount of trade is being done through the mail order houses, which are taking away a large percentage of the business which properly belong to the province, and that no remuneration is being received by those municipalities for this loss of business; and that this meeting recommend that this subject be referred to the incoming executive, and that they advise some plan for its remedy, and submit the same at the next meeting of the Dominion Board.''—Carried.

"Resolved, that it is the opinion of this meeting that it is advisable that a Bulk Sales Act should be placed upon the statutes of this province that should make provisions so as to be applicable to all commercial classes, and we would suggest that a recommendation should be sent to the Dominion Board asking them to consider the advisability of having a Bulk Sales Act applicable to the whole Dominion and placed upon the Dominion statutes.''—Carried.

It was explained that a Bulk Sales Act had been before the Legislature of the province at the present session, but had been opposed by the merchants, their opinion being that such an Act should be adopted by the Dominion Parliaments.

"Resolved, that it is the opinion of this meeting that if it is deemed advisable to make any change in the Assessment Act of the province, that the executive be requested to see that the interests of the retail trade be properly protected.''—Carried.

At a subsequent meeting held on the same evening it was unanimously decided to appoint a special committee to bring in a report on this subject.

Want Amendment Re Garnishee.

"Resolved, that it is the opinion of this meeting that some system should be devised whereby small accounts could be garnisheed, and that the Garnishee Act should be amended to meet this requirement.''—Carried.

"Resolved, that this meeting endorse the proposal recommended by some of our sister provinces, that a change be made in the 'Lord's Day Act,' whereby customers who purchase goods on Sunday be held equally liable with the vendor selling the same, and that this matter be referred to the Dominion Board.''—Carried.

"Resolved, that as some members of our association have requested that the subject of the association having a fire insurance department and also a fire adjuster to protect the interests of the members be considered at this convention.'' Referred to the executive for further consideration.

Would Abolish All Premiums.

"Resolved, that it is the opinion of this meeting that an amendment be made to the criminal code, whereby all lottery, guessing and voting contests, as well as premiums placed in or on products by manufacturers, be abolished.''—Carried.

"Resolved that, in view of the fact that freight charges are being paid by some merchants and not by others, that we deem it advisable that all our members be notified that if they do not wish to pay cartage charges that they specify this when purchasing their goods.''—Carried.

"Resolved, that it is the opinion of this meeting, and that this convention recommends that it would be a great advantage to the retail merchants of this province, that when any changes are being made in our provincial laws that the same be submitted to the Dominion Board, and that information be received as to how such proposed legislation, if in force, operates in other provinces.''—Carried.

"Resolved, that it is the opinion of this meeting that the system adopted by a few retail merchants to advertise well-known lines of goods at or below cost, in order to induce customers to purchase other lines of goods, out of which they make large profits, is not in the best interests of retail merchandising, and it is deceptive to the general public.''—Carried.

Unfairness of the Farmer.

"Resolved, that in view of the fact that the Dominion Government is spending large sums of money to encourage farmers to increase their products, and also in experimental stations and in educational campaigns, which money comes out of the common treasury of the Dominion, and which money is paid to a large extent into the treasury by the retail merchants when they pay duty on the goods they carry in stock; and in view of this fact, we greatly deplore the action of some farmers, who evidently have not the welfare of Canada at heart, in advocating the abolition of retail merchants, by buying goods in carload lots for the purpose of distributing them among themselves, thinking thereby that they are saving money, whereas they are doing an injury to themselves as well as to the retail merchants and the public at large, and we, therefore, recommend that this meeting ask the Dominion Board to take this matter up, and take such action as they deem advisable by calling the attention

Queen's Square, St. John, N.B., which is a popular part of the city in the spring and summer months.

of the Dominion Government to the same."—Carried.

"Resolved that, whereas in our opinion if any error has been committed in the purchasing of some war supplies, it has been on the part of the heads of the departments of the Government in not consulting with qualified retail merchants who understand the quality of the products made by the manufacturers of Canada, and who could have advised the Government as to the prices and the quality of the goods they desired to purchase, and who would furthermore have been only too pleased to have given their advice absolutely free had the Government notified the retail merchants either directly or through the officers of the Retail Merchants' Association of Canada; and this meeting, therefore, ask that a copy of this resolution be forwarded to the secretary of the Dominion Board, so that a copy of the same may be submitted to the secretaries of other provinces and forwarded to the Premier of the Dominion, as well as the Department of Trade and Commerce."—Carried.

"Resolved, that it is the opinion of this meeting that for the purpose of securing the better enforcement of the 'Pedlar's License Act' throughout the Province of New Brunswick that a license fee be charged by the Provincial Government to all pedlars, and that a portion of this be given to each municipality for the purpose of seeing that the law is enforced."—Carried.

"Resolved, that whereas no provision has been made up to the present time, either by the Provincial or the Dominion Government, to provide a proper system for prosecuting those giving short weights and measures in any municipality throughout Canada, that this meeting recommends that some provision be made for the same, and that this matter be referred to the Dominion Board."—Carried.

It was asserted in the discussion upon this resolution that old-fashioned scales were being used in St. John that were by law made illegal over a year ago, and apparently no one was being prosecuted.

"Resolved, that whereas provision has been made by the Provincial and Dominion Governments to have Ministers at the head of the various departments of the Government, such Ministers of Agriculture, Ministers of Labor, etc., that we regret that no provision has been made in this Province for Minister of Inland Trade whose time and attention could be given to the question of retail distribution and retail distributors, who have more money sunk in their operations in this province than all the other interests combined, we therefore urge the Government that such a Minister be appointed."—Left to executive.

"Resolved, that it is the opinion of this meeting that the same rights and privileges be given to all retail merchants, as is now given to hotel keepers who have the power under the Criminal Code to arrest and prosecute their delinquents who endeavor to escape their bills."—Carried.

"Resolved, that it is the opinion of this meeting that greater co-operation between the press and the retail merchants of this province would be in the best interests of both as well as the general public."—Carried.

"Resolved, that in the opinion of this meeting it would be a great benefit to the merchants of this Province if a Dominion Act was passed whereby inter-provincial judgments could be secured throughout Canada, and that we recommend this matter be referred to the Dominion Board to be dealt with."—Carried.

The Adulteration of Food.

"Resolved, that whereas considerable annoyance has been given some merchants who have been prosecuted for having in their possession adulterated goods, which they were not aware of, and they have been forced to pay fines, we recommend that all such cases be forwarded to the secretary of the New Brunswick Board, and that letters be sent out to the members of the section of trade so interested, advising them of the name of the manufacturer selling such adulterated goods, and that the same be communicated to the Dominion Board, so as to have the matter placed before the members in other provinces, and in this way warn the merchants against handling these goods, and stop the sale of same."—Carried.

"Resolved, that we recommend that an 'early closing' Act be applied for in this Province and that it contains provisions to operate for any afternoon in the week, as well as for certain hours during the day."

This resolution evoked considerable discussion and was strongly opposed by several delegates. It was contended that the proposed legislation was unworkable and could not be made applicable to all localities. It was finally withdrawn.

"Resolved, that whereas the Dominion Board of our association in convention assembled has adopted the resolutions passed by the Provincial Board of our province, that the fees for the inspection of weights and measures be abolished, as the inspection is for the benefit of the general public and should be paid for out of the funds of the Dominion treasury that we endorse the action of the Dominion Board, and forward this resolution to them, and promise to give them all the assistance that we can in having this resolution carried out."—Carried.

Delegates were very emphatic in condemnation of the present system of inspection and especially the collection of fees and cartage.

"Resolved, that it is the opinion of this meeting that we should place ourselves upon record as being opposed to the principle of any municipality going into competition with retail merchants who pay taxes in the municipality."—Carried.

"Resolved, that it is the opinion of this meeting that a Provincial Act be placed on the statute books defining the quantity of butter fat at which milk should be sold at, and regulating the conditions under which milk should be sold."—Carried.

Some very strong sentiments were expressed by delegates on the kind and quality of milk sold in St. John under present methods.

"Resolved, that we urge every newspaper in the province publishing wholesale prices of foodstuffs or other merchandise to discontinue same, as it is of no value to either the retail merchant or the consuming public, and it creates an impression among the consumers that retail merchants should sell at the prices advertised. This we feel is an injustice to the retail merchant."—Carried.

"Resolved, that it is the opinion of this meeting that the press of this province should be asked not to accept any advertising from retail catalogue houses, as it is not in the best interest of the community to advertise or advocate sending money away from the home town."

It was ordered that this be left in the hands of the executive to consult with the newspaper proprietors concerning the same.

"Resolved, that it is the opinion of this meeting that as the Landlord and Tenants Act is not satisfactory to our members, that the Executive be requested to prepare amendments to the same and report at the next convention."—Carried.

It was shown in the discussion upon this resolution that where a tenant moved out of a property without paying the rent that the goods of any incoming tenant could be seized for the same and merchants had frequently lost goods such as carpets and housefurnishings by placing them in houses where the rent had not been paid.

Favor Daylight Saving Scheme.

"Resolved, that this convention considers that it would be an advantage to have a daylight hour put into operation in such localities as may require the same and that this matter be left with

The delegates to the Convention got their pictures taken in the grounds of the Atlantic Sugar Refinery. This is always one of the pleasant features of merchants' conferences.

the Executive to submit to the various branches."—Carried.

"Resolved, that this convention recommend that if any member of any branch of our association in this Province, receives what he considers to be unfair treatment from any commission agent, manufacturer or wholesaler, either in this or any other province, that the same be submitted to the Secretary of the Province so that it can be investigated and action taken thereon, if it be deemed advisable."—Carried.

"Resolved, that whereas it has been called to our attention that certain manufacturers of nails in Canada are selling their products at a less rate to retailers in the border towns of the United States, than they are to those in Canada, and as a result customers of merchants in Canada are buying their nails from across the line instead of in their home town, that the matter be taken up by the executive with the manufacturers."—Carried.

"Resolved, that a most hearty vote of thanks of this convention be extended to E. M. Trowern, secretary of our Dominion Board for his attendance at this convention and for the great amount of information and assistance he has rendered to us by his presence, and to every manufacturer and wholesale merchant who has assisted by their individual efforts, or by their advertisements in our programme to make our first annual convention the unqualified success which it has attained.

"Further Resolved, that our special thanks be extended to Mr. Bissell as representing the management of the Atlantic Sugar Refinery for the courtesies extended to our association in allowing us the privilege of a tour of inspection of their splendid up-to-date refinery.

"And Further Resolved, that our appreciation and thanks be extended to every citizen and merchant who so kindly placed their autos and in many cases their own services at the disposal of our members in the excellent sight-seeing tour of our city yesterday afternoon, and also to the management of the Imperial Theatre for their kindness in granting us special privileges at their evening performance, and for their courtesies extended in a tour of inspection of the whole building after the performance.

"We also desire to extend a hearty vote of thanks to the Press and Trade Papers who so generously reported the proceedings of this convention, and be it

"Further Resolved, that a letter conveying the above resolution be sent to those who in any way contributed to the success of our convention."—Carried.

The election of officers was then held which resulted as follows:

President—A. O. Skinner (re-elected) St. John.

Vice-President—A. E. Murray, Fredericton.

2nd Vice-President—Dr. E. O. Steeves, Moncton.

Treasurer—Wm. Hawker, St. John.

Secretary—N. C. Cameron (re-elected) St. John.

The Social Side.

While many important matters of business were dealt with in convention, the gathering had a delightful social phase as well, and the various events in the field of recreation afforded much pleasure. Of primary interest was the banquet held in Bond's cafe. Addresses of interest were given by President Skinner, Mayor Frink, E. M. Trowern, J. A. Likely, president of the St. John Board of Trade, O. C. Bissell, sales manager of the Atlantic Sugar Refinery for the Maritime Provinces, A. H. Wetmore wholesale dealer, and others.

Mr. Trowern dealt with the importance of retailers to the community. He said that this gathering represented all branches of the retail trade in Canada, though some people did not care to know what they represented, speaking of them contemptuously as "the middle men who take the profits." The reason why this might be so, was that the retailer had not made himself known in the past. It was now time to go to the customers and ask them what they thought of the retailers. There were some 250,000 retail merchants in Canada, and if the capital invested in agriculture and manufacturing in the Dominion were taken, and added to the stock of the banks, the capital of the retailers would still show a surplus. If it were not for the retailers the cities would not be worth while living in. The retailers paid more taxes, hired more men, owned more horses, and had to put up with more complaints, than any other section of the populace. Because they had not organized they had always endured the "kicks" but now they are hoping for better things—they were out to tell the customer of the importance of the retailer.

Besides the banquet at which the attendance was large, there were automobile tours of sightseeing to various points of local interest, and a theatre party which provided enjoyment. The visitors were warmly received by the St. John members who extended every hospitality and who proved themselves capable hosts.

Dealer Profit and Nationally Advertised Specialties*

BY BEVAN LAWSON.

Sales Manager, Auto Strop Safety Razor Co.

Every retail hardwareman should read the accompanying article, on Dealer Profit and Nationally Advertised Specialties. The article deals with a subject that has been paper. It has also been discussed taken up on many occasions by this at retailer's convention. Hardware and Metal would like to hear from retail hardwaremen regarding their views of this question.

FOR some years now it has been a problem among national advertisers of specialties to secure a proper focus in the minds of retailers regarding profit. Every year the retail trade associations at their conventions get together and by vote settle upon an average cost of doing business—a figure which they then call their fatal cost of doing business, and shove in the face of national advertisers of specialties to prove that the profit we offer is too low.

The matter is important, for it has taken the form of united pressure from all sides among retailers of all types to compel recognition of their principle that specialty goods should yield a standard convention agreed upon ratio of profit, regardless of every other consideration.

I believe that specialty advertisers should agree in formal concert upon what they now agree individually and informally—that the retailers need to be shown that profit cannot correctly be computed by a crude percentage figure, and that the specialty is an individual factor, separate in kind and turn-over profit value from the staples which comprise the basic identity of the store.

I write this so that sales managers and officials in many lines may join in this necessary work and make the matter clear to still more dealers than those who now fully recognize the facts and profit by them.

Let us examine the position of the dealer with regard to what he is fond of calling his "fatal cost" of doing business.

Every dealer at some time or another takes himself seriously to task upon the question of overhead profit, and forms some conclusion upon the cost of conducting his business by considering his running expenses against his gross volume of turnover.

Sometimes he is surprised to find that his percentage of operative cost for a completed year has run so high that many excellent articles which he has freely sold are showing very little profit on paper when the margin between his running expenses and the discount afforded by such articles is considered.

For example, a dealer may figure that his cost of doing business is from 15 to 20 per cent., whereas he buys many staple novelties at a discount of 25 per cent., and, consequently, he may find himself almost persuaded to discontinue the sale of such articles, or at least he may mentally resolve not to unduly push their sale, despite the fact that he has formerly done a very nice trade with them, and they sell on demand.

One problem faces him, and he can see that problem only: "If his overhead is around 15 to 20 per cent. it surely does not pay to sell goods which only afford 25 per cent."—and it looks like a question with only one answer.

He does not stop to consider how many times he is able to turn over that article in a year and, therefore, how often he can use that same investment to bring in a ready profit, nor does he stop to realize that if he throws out that particular line from stock his business will not be increased; nor will his running expenses be decreased; but, on the other hand, his expenses already calculated with the return from such articles included, will be proportionately increased because of loss of volume with such salable articles withdrawn.

If all stock were equally salable so that a dealer could surely turn over all of his merchandise several times a year, his operative expenses would not be any serious part of his worries, but it is also a fact that a dealer has to carry a large volume of very expensive stock in trade, and his expenses climb high—not because of the stuff he is selling, but because of what he is not selling.

Small profits and quick returns is one of the oldest and truest slogans in busiess, and the Woolworth Building in New York was built on the rapid profits from small novelties and cheap staples—so small and so cheap that excepting for the quick and frequent turnover there would be no element of profit at all if it were considered on certain few classes of the goods sold.

Supposing that a business shows an annual running expense of 20 per cent., this logically means that theoretically every single article sold bears its actual share of this 20 per cent. cost of selling, seeing that in theory during every day of that year the average 20 per cent. is a burden constantly existing and to be considered in every sale.

The argument, therefore, would be that every time an article purchased at 25 per cent. discount is sold, the profit on that article is only a bare 5 per cent., and that time spent in selling that article is not sufficiently profitable, and it should be discontinued.

Granting that a dealer sells a well advertised line at any profit, there is really no reason to avoid sales which have not a large margin, provided that the sale of such goods do not increase the overhead cost of selling them; but, on the contrary, if a dealer's expense is more or less constant from year to year, and he can add lines which are advertised, without increasing his selling cost, it is logical that the additional profits from such goods are net gains, and in practice if all dealers were to discard from their stock all goods which did not show really substantial profits, they would find their overhead would materially increase.

You might argue that this does not apply, of course, to the impecunious dealer whose till is his bank, and whose very existence depends upon the daily profit on a limited number of articles sold, but it does indeed apply to all dealers when specialty articles are considered. There is a vast difference between a staple and a specialty; staples are not generally advertised; specialties are. A dealer's overhead is, generally speaking, established by his sale of staple goods which he usually sells to the output capacity of his store; if he lacks staple goods and loses sales because of that lack, he buys more to supply the need; but, more generally speaking, he satisfies the demand for staple supply and then turns his attention to sales, and all sales so made are in excess of his general business which carries the specialties to increase the sphere of his overhead.

For example, supposing that on a certain day the dealer's store is closed for

*Reprinted from Advertising & Selling.

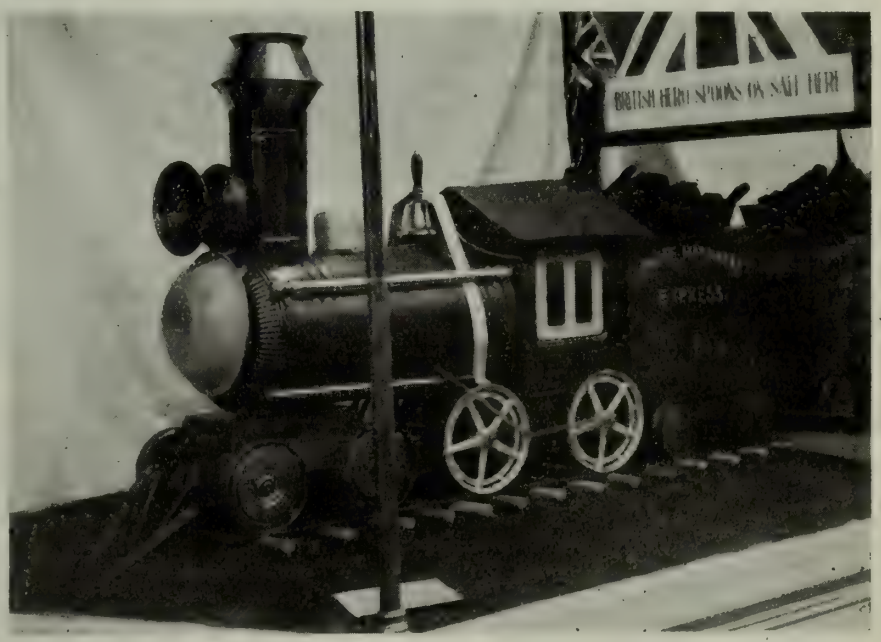
the evening, and closed, of course, with the same daily running expense of 20 per cent.; the cash is counted; the day's business ended, and the door is locked. Someone taps at the window and he is admitted, and the dealer sells him an article which virtually shows only a 25 per cent. margin; and while selling it, someone strolls in and buys another of the same article. Are expenses for that day still this 20 per cent., or have they been materially lowered by this extra profit of $2.00 or $5.00 or $10.00?

Volume of turnover is the safest aim of every successful dealer; to keep the crowd coming; to have his shelves filled with salable goods of all kinds, provided they show any reasonable margin of profit or indeed any profit at all.

The overhead expense of most retail dealers is, generally, speaking, in more direct ratio to his volume of business than to the actual graduated scale of profits on his various lines. "Small profits and quick returns" is more than a slogan; it is a business axiom that has built up more fortunes than any other. Live department stores watch turnover as an engineer watches the steam gauge —because they know it alone tells the vital tale. If we who are national advertisers could get judged for our turnover value mainly, much misunderstanding could be avoided.

To impetuously decide to discontinue well-advertised articles is indeed no cure for high business expense. Possibly those very articles, by their popularity and steadily increasing demand, have been the very means of reducing a much larger overhead expense by the added volume which they bring to the business. Such novelties are, in a sense, a side line, and their sale does not in any way reduce the gross sale of staples, and as novelties they should not be taxed with the same overhead expense that the general business should be taxed with (theoretically, yes, but practically, no), for possibly the last year's high cost of conducting business would have been much higher if these extra articles had been eliminated. Their cost as an investment is not high, because they can very quickly be supplied as they are needed, and if a dealer were to go without them because they only bring 25 per cent., he would merely be robbing himself of that 25 per cent.—in no way adding to the volume of turnover.

Expenses are incurred in a business and profits are also made out of business. Neither expense nor profit is a constant amount, and both are influenced by innumerable causes.



A dealer's business is either a popular one or an unpopular one; either successful or unsuccessful —dependent almost entirely upon the volume of turnover. A dealer may make his windows attractive by constantly changing them; he may advertise to bring his customers to his store, or he may seek to surround himself with a pleasant, painstaking staff of clerks—and all to be ready for the customers when they come in. Yet, with it all, he must aim to have the goods which sell—not necessarily the goods with large margin of profit—but the goods which move irrespective of their degree of profit. An advertising manufacturer will create much of that demand for the dealer, and resulting sales are made without effort or direct expense, and naturally some of the dealer's profit has already gone into that scheme of advertising.

In spite of a dealer's economy, his overhead expense may be 15 or 20 per cent., or even more; and yet his neighbor, in spite of much greater economy, in spite of less rental, fewer clerks and smaller actual running expense, may find his business costing him 25 per cent. or 30 per cent., or even more. Analysis of these two businesses would not point to careful choice of marginal profits, but on the other hand, it would point always more to volume of business in all classes of trade, regardless of analytical question of highly profitable margin.

The "fatal cost" is ever present in every man's business. It is a first lien on his profits, and is, therefore, to be correctly regarded as the most important factor in his business. Operative cost flourishes on lack of system and ill-assortment of stock; it fattens upon lethargy and careless indifference; it lives in a rut and feeds on ignorance. Enterprise is its greatest opponent, and it flees in the face of system. The remedy is more often a question of domestic regulation than of reduction in range.

The successful merchant carefully avoids a surplus of staple goods, and

(Continued on page 43.)

The above is a picture of a hardware window in R. Blain, M.P.'s hardware store, Brampton, Ont. The window was dressed by R. Blain, Jr., with hardware goods from the store. He tried to make a model of a railway engine. The following gives a description of same:

The bottom of the window was covered with coal siftings. The railway ties being hammer handles, on which are placed two lengths of 6-foot barn door track. The wheels consisted of four 10-inch lawn mower wheels for the front truck, the drive wheels being four 12-inch lawn mower wheels. The body of the engine is a sheet-iron coal stove heater, with a wash bowl in front of same with No. 104 printed on bottom of it, 104 being the firm's telephone number. The smokestack was one three-quarter length of 7-inch stove pipe, one large-size funnel with a milk strainer turned upside down placed on the top of funnel. The head-light is a cuspidor. The stove is placed on two ordinary meat roast pans turned upside down. The steam dome on top is a glue pot, with a hand bell to represent the ordinary bell. The driving rod connecting the two 14-inch wheels is a 2-foot Stanley rule, connected to a spray pump which represents the cylinder. The engine-driver's cabin consists of one 1-burner Perfection coal oil stove oven, set on a roast pan turned upside down, the glass oven door being turned to the front, which makes the window. The top of same is covered with a piece of sheet iron bent in the centre to form a roof. The coal tender consists of a two-burner Perfection oil stove oven, on top of which is set a large roast pan the same size as the oven top and filled with charcoal. The wheels are four 6-inch pulley wheels. The cow-catcher consists of six 10-inch flat files.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, APRIL 24, 1915 No. 17

GOOD CREDIT in the markets of the world enables every merchant to add to his ability to do business. It gives him the use of enlarged capital, thus enabling him to carry a more complete stock, increase his sales, and magnify his profits.

* * *

A MERCHANT who desires to serve his own best interests should recognize that his most valuable possession, apart from his actual assets, is a sound, substantial and unquestioned reputation as a credit risk, and that under the prevailing conditions and demands of business, the most effective and eminently the best way to prove his basis for credit, is to be willing to submit a statement of his financial condition.

* * *

LARGE ASSETS are not always necessary to the creation of credit; what is most desirable is, that credit be in relative proportion to the actual assets, and in harmony with conditions which create and maintain it. A merchant's capital is the sum of his net available resources, plus his credit. The giver of credit is a contributor of capital, and becomes, in a certain sense, a partner of the debtor, and, as such, has a perfect right to complete information of the debtor's condition at all times. Credit is given a merchant because of the confidence reposed in him. Requesting a statement when credit is asked is not a reflection on one's character, honesty, or business ability, but is done to secure information to enable business to be conducted intelligently.

* * *

IN ANNOUNCING their disapproval of trading stamp schemes, Marshall Field & Co., the large wholesale and retail concern at Chicago, gave out some information regarding their business policies that should prove interesting to the retail hardware trade. They say:—

"The wholesale and retail buying organization of Marshall Field & Company has been in the process of building for fifty years.

"It has been trained to study the many intricate phases of merchandising to the end that the buying public could obtain the highest degree of service in the merchandise purchased.

"Its ideal has always been 'The best possible service in merchandise.' The fulfillment of this ideal for so many years has developed the great confidence that the public has in the ability and the integrity of this organization."

JOHN WANAMAKER, the millionaire merchant, is said to be the most heavily insured man on earth. Whether this is correct or not, we cannot say, but at any rate, Mr. Wanamaker in a recent speech made some remarks about life insurance, which are worthy of consideration. He said in part:

"Life assurance is a savings bank, if you choose to put it on the simplest, plainest base platform. It is not only a savings bank, but it is collateral.

"I would not have been prepared to build my building if I had not saved two and a half millions, little by little, through life assurance. I did not realize what I was doing. I think I would take a journey to San Francisco just to shake hands with the man who started me, if he were living.

"I said life assurance was a savings bank. I will add that some of my policies were so written that when you could not get any money out of banks or on Government bonds, the insurance companies loaned money on them. So you see taking out a policy is quite a different thing from just getting ready to die."

* * *

A BULLETIN issued by the Census and Statistics office on April 16, and giving the results of the usual inquiry as to the stocks of grain and other crops remaining in the hands of the farmers on March 31, shows that of the total estimated yield of wheat in 1914, 12½% or 20,247,000 bushels remained in the farmers' hands at the end of March. The quantity of wheat remaining this year in the hands of the farmers, is smaller than in any previous year on record, the light crop and the high price being together responsible for this result. Of the remaining grain crops the proportions of the previous years production estimated to be in farmers' hands on March 31 are also smaller than in previous years.

Correspondents throughout Canada report that the past winter has been exceptionally mild. In most of the provinces live stock have in consequence come well through and are in good condition. In some parts, notably in Saskatchewan, the light crops of last year rendered feeding difficult, and animals at the close of the winter were thin. In these cases however, matters would have been much worse had the winter been of normal severity. An early spring was anticipated, and the prospects for the coming season were hopeful. Farmers were preparing for a big increase in the acreage to be seeded, their efforts being facilitated by the large amount of fall ploughing completed last year.

THERE HAVE been many failures as well as successes in the mail order business. Early last year we announced in this paper that a new mail order concern had commenced business in Winnipeg. The concern carried on business for approximately three-quarters of a year, and about two weeks ago the assets of the firm were sold practically on a basis of 80c on the dollar. As a result of the venture the stockholders lose their money, and creditors, of whom there are approximately 400, representing roughly $200,000 will lose practically the bulk of that amount. The stock is valued at about $90,000 and has been taken over by another mail order concern. For some time this house has been doing a mail order business and it would appear that they intend going into it further.

Some concerns have made phenomenal successes of mail order businesses, while others have turned out failures. While a great many people have the idea that a mail order business is a very profitable undertaking, it must be remembered that the mail order business is like any other business and must be properly managed in order to be made a success.

The New Brunswick Convention

THE first annual convention of the New Brunswick Retail Merchants' Association, under the auspices of the Dominion body, held at St. John, N.B., last week, was a success from many standpoints. The attendance, considering that it was the first convention, was very satisfactory, and there is every reason to believe that there will be a much larger attendance next year. A partial report of the convention appeared in last week's issue of this paper and a complete report appears in this issue. Reference to the report will show that several important and vital resolutions were dealt with. The retailers expressed themselves as being desirous of co-operating in every movement that would assist in advancing the interests of trade and commerce in Canada. It was pointed out, however, that some manufacturers are marketing their goods through the jobbers, and at the same time selling to the catalogue houses at jobber's prices, thus allowing the former to sell goods retail, at jobber's prices, in competition with the retail trade. It was claimed that this discrimination forced the retailers to import foreign-made goods in order to meet the competition of the mail order houses. Another resolution dealt with lottery, guessing and voting contests, premiums, etc., and it was the opinion of the meeting that an amendment be made to the criminal code, whereby all these be abolished. In this connection it is well for merchants to remember that many of these advertising schemes are already prohibited under the trading stamp act. A resolution was carried requesting the newspapers not to publish the wholesale prices of merchandise.

Another resolution was to the effect that in the opinion of the meeting the press of the country should not accept advertising from retail catalogue houses. This is a matter that can be remedied by the merchants themselves. If they advertise in, and help to support their local papers, there is not much danger of the local publisher soliciting the trade of the catalogue houses. The retailers were also of the opinion, that in the purchasing of supplies for the war office, the Government should have consulted the retail merchants through the officers of the R.M.A., who would have been glad to give advice and assistance without charge. The retailers also deplore the attitude of some farmers, who advocate the abolition of the retail merchant, and who encourage buying the goods in carload lots for distribution among themselves, and other co-operative buying schemes that work out to the disadvantage of both the retailer and the farmer.

Every reader of this paper should study the complete convention report as it appears elsewhere in this issue. Many questions of vital importance to the retail trade were dealt with.

Assisting Mail Order Houses

HARDWARE and Metal pointed out in a recent issue how mail order houses of Canada were saving large sums of money by sending their catalogues by freight to local post offices and having them distributed from there at the first zone rate. The Retail Merchants' Association have further information that at least one mail order house is employing local postmasters throughout the country to assist them in distributing their catalogues. These postmasters are asked either to send in a list of possible mail order buyers in their respective districts or to check over lists that already have been made in order to eliminate the "dead-wood"—that is people who have left the district—and to add on any new possible customers who may have taken their places. Instances are mentioned where the mail order houses have given postmasters insurance policies covering a year to perform this work.

Trade Paper Stands High.

THE trade paper has, of recent years, been rapidly gaining the recognition it rightfully deserves. Anyone who studies business conditions to-day realizes that the trade paper specializing on particular lines of trade is fulfilling a mission that could not be dispensed with.

W. J. Egan, Canadian Trade Commissioner in Cape Town, South Africa, in his last report to the Government, gives his views of the trade paper. These views must be considered unprejudiced and as representing his personal convictions. The report says:—

"The files in connection with the Canadian daily and trade papers have been reorganized. The Canadian newspaper list is confined to one daily business paper and the *trade paper* file has been increased from six publications to seventeen.

"The trade papers are much appreciated and there a number of regular callers who read them; this number is growing for two reasons; when making a local call on any particular subject, the Canadian trade paper of the subject in hand is taken, always reminding the party interested that trade papers of all kinds are on file, and in correspondence up-country firms are reminded of the Canadian trade papers on file in Cape Town." (Note the big increase in the list of trade papers.)

Read in connection with the item in a recent issue as to what the Commercial Attache in London, Eng., of the United States government thinks of the trade paper, the evidence that its importance and value are constantly and steadily growing is ample. The trade newspaper is undoubtedly performing a most useful service to business interests.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which Item is Taken—Bethlehem Steel—Exaggerated Reports of War Contracts—To Pass an Examination.

Bethlehem Steel.

From Wall Street Journal Straws.

It develops that the best customer of the Bethlehem Steel Corporation previous to the European war was Germany. Over 50 per cent. of the ordnance exported by the Bethlehem Company went to Germany. The country has been a steady buyer of Bethlehem's products for over ten years. Hundreds of Bethlehem guns are now firing shot and shell into the ranks of the allies as well as the Germans. Germany cannot get any more ordnance from the Bethlehem Company, due to the blockade, but the loss is more than made up by exports now being made to the allies. It is estimated that Germany owns about 20 per cent. of the securities of the Bethlehem Company. Germany, in fact, is drawing interest and dividends from profits derived from sales of ammunition intended for her destruction.

* * *

Exaggerated Report of War Contracts.

From New York Evening Post.

American manufacturers who have been approached by agents of European Governments with contracts to supply large amounts of ammunition are exerting extreme caution in accepting these orders. It developed to-day that several important railroad equipment companies whose plants have been idle over a period of many months have refused orders for guns, shells, and cartridge cases, on the ground that they did not choose to enlarge their mills, or install special machinery, in view of the present possibility of an early end to Europe's war.

Contracts have been offered for the consideration of a number of companies which would enable them to re-employ much of their present equipment, and at the same time enlarge their plants to return handsome profits. So far as these companies have been able to accept contracts without involving a heavy outlay for new machinery, they have accepted these orders. But in instances where acceptance of contracts would involve heavy initial expense in adapting present machinery for use of ammunition manufacture, or of extending plants, many of the contracts have been declined. This is owing to the fear that machinery now installed will be made useless by an early end of the war.

Possibly it is because of the caution exercised by manufacturers that actual orders booked are falling so far behind estimates that are appearing. An example of the difference between the actual placing of orders and estimates was given to-day. A Pittsburgh dispatch reported that the Westinghouse Air Brake Company had closed a contract with representatives of the French Government for 1,000,000 three-inch shrapnel shells, cartridge cases, and time-tubes for what is known as the 75-millimetre Schneider gun. This contract was said to aggregate $20,000,000.

As a matter of fact, the contract closed by the Westinghouse Air Brake Company for cartridge cases was declared by an officer of the company this afternoon to represent a total value of no more than $750,000. A few days ago the American Locomotive Company was said to have booked $20,000,000 war orders. This report has since been denied.

In spite of the refusal of many orders, a vast amount of shrapnel business has been and is still being distributed in this country by a Canadian interest which has an $8,000,000 contract with Russia, but with this as with a good deal else in war-supply lines there are complications which make negotiations long drawn out. The "Iron Age" says:

"The disposition is growing to proceed very conservatively in regard to war contracts, where many intermediaries are at work.

"March contracts with foreign buyers of iron and steel products were probaly in excess of 250,000 tons, not including 100,000 tons of shrapnel bars recently closed for France. No order has yet been placed here for 40,000 tons of rails for France, as reported, and the fantastic story of a large French order for bridges to span the Rhine scarcely needs denial."

* * *

Heating Engineers to Pass an Examination.

From Sanitary Engineer, Plumber and Steamfitter.

A bill has been introduced in the New York State Legislature which, if enacted, will compel every employing steam and hot water fitter in the State to secure a certificate of competency. For this purpose the proposed law provides for an examining board of steam fitters and general power pipe fitters, whose duties will be similar to the present Examining Board of Plumbers. Each city will have its examining board, to be appointed by the mayor and to consist of two master fitters, two journeymen who have worked at the trade for ten years, and one mechanical engineer.

Commenting upon this matter, we feel that this is another step in the right direction, and one which should be considered in Canada. For some time The Sanitary Engineer has been advocating that all heating and ventilating plans should be certified by an engineering department of the boards of health.

Plumber and sanitary fixtures are under the jurisdiction of the board of health. Why not heating and ventilation?

In Toronto there is a motion before the city fathers to force every builder and owner to furnish sufficient boiler and radiating capacity to heat the buildings constructed and if we can get the co-operation of the boards of health to move in this matter, better days will soon be in store for both the public and the heating engineer.

As things are to-day, every man can install just as little or as much heating as he himself wishes to do, he can build houses for speculative purposes, install insufficient radiation, or too small boilers and get away with it, and the innocent buyer finds that he would have been money in pocket if no system had been installed. In connection with the competency or incompetency of the so-called steamfitter, he too may be anything. There are hundreds of men working as steamfitters and drawing big pay who do not in actual fact know how to thread a pipe properly.

Practical Course for Sheet Metal Workers

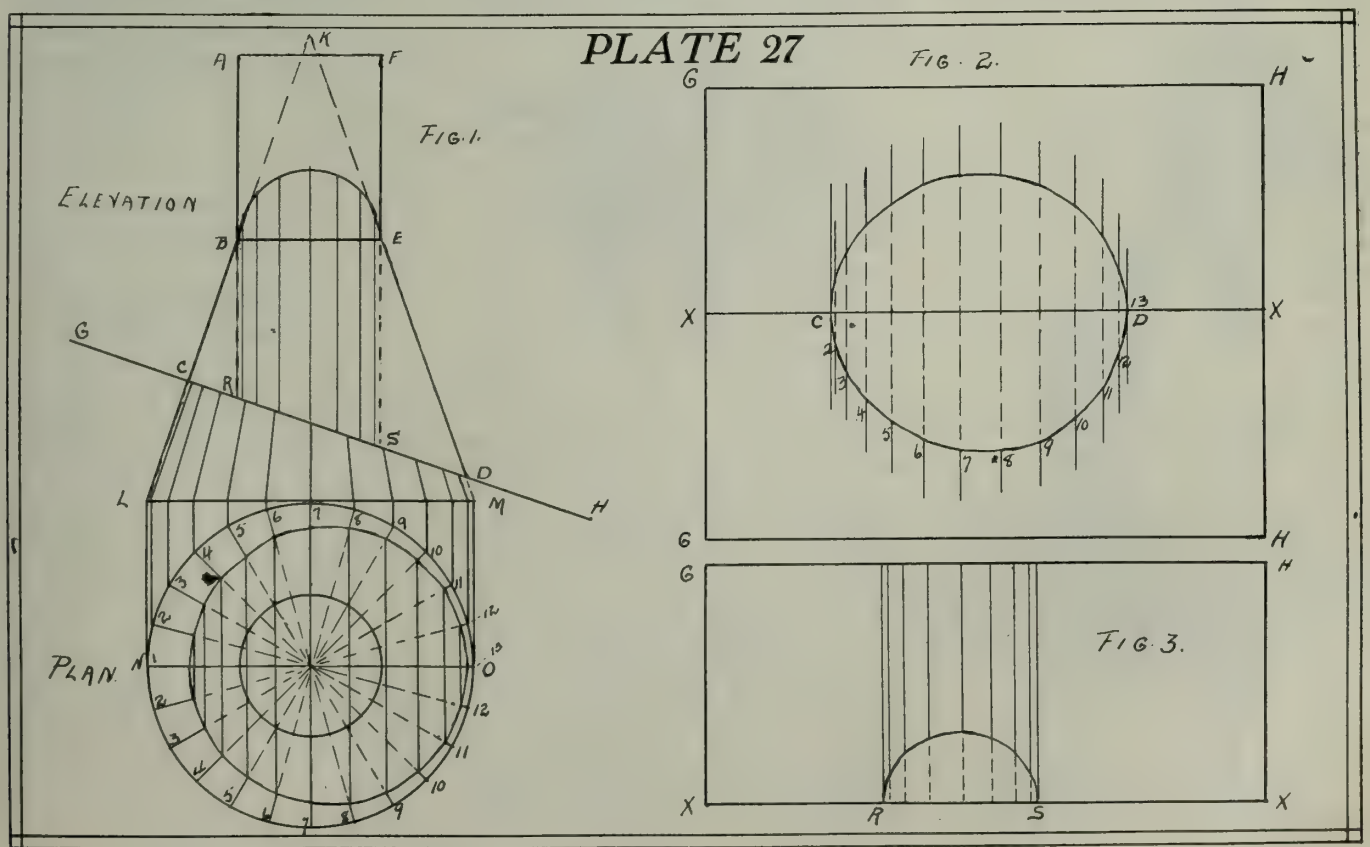
Article No. 27 of Series

By CHARLES SEIVERS

IN this article is shown further development of flange shown in plate 25. At A-B-C-D-E-F and G-H in Fig. 1 is shown the elevation of pipe, with roof flange and cone flange between the two.

At a point below the base line L-M and parallel to it, draw a line as N-O, and, on this line draw a circle of same diameter as base of cone at L-M, the centre of circle being placed at a point at right angles to the centre of the line L-M.

With the compass divide circumference of circle into a number of equal parts as shown by 1, 2, 3, 4, 5, 6, etc., draw lines at right angles to L-M from each of these points to the line L-M.



From each of these points on line L-M draw a line toward the apex of cone K, intersecting the line C-D. From each of the divisions on circle in plan draw lines to centre. The lines drawn from points on circumference to centre of circle show a plan of the lines drawn from L-M to apex of cone on elevation. To obtain the plan of opening on line C-D draw lines at right angles to N-O from each of the points of intersection on the line C-D, extending them until they intersect the corresponding line in the plan. The line from point C or 1 intersecting line from point 1 on plan, from point 2, intersecting point 2 on plan and repeating from remaining points in the same manner. A line drawn through the points obtained will give outline of plan view of opening on line C-D.

The accompanying article is No. 27 of a course of practical problems for sheet metal workers prepared, especially for the readers of Hardware and Metal, by a practical mechanic who is constantly in touch with new problems which are arising in the sheet metal trades. These articles are a weekly feature in Hardware and Metal, Canada's only weekly hardware paper.

At Fig. 2 is shown the flat flange, G-G and H-H through the centre draw a line as X-X, on this line X-X mark off the spaces on the line between C-D of elevation, from each of these points draw lines at right angles to X-X as shown. The spaces just marked off on line X-X give the length of the opening on bottom of cone flange and of points between, the widths are shown on the plan of cone on line C-D. With compasses measure distance from line N-O on plan to the outline of plan on line C-D, marking the distance to point 2, on both sides of X-X on line 2, distance to point 3, on line 3, and repeating in same manner on remaining points 4, 5, 6, etc. A line drawn through the points obtained will give outline of opening in flat flange to receive cone.

In Fig. 3 is shown a half of the flat flange with opening for pipe only, the spaces from R to 5 on line C-D being marked off on centre line and the distance from B-E to each of the points in half section being set off on their corresponding lines from line X-X. A line drawn through the points obtained give outline of opening. There must be seam allowance provided for.

Our readers will find that by developing these problems about 4 times the size given, they will not only be learning how to develop the patterns shown but will also gain considerable insight into the art of general pattern developing.

Junior Clerk's Page

Clerks and Commissions

Story of the Fellow Who Wanted a Commission—How a Commission Moved Slow Sellers—What is the Reason?

By W. E. MEYERS.

YOU no doubt remember the story I told some weeks ago about the clerk I found serving behind a counter who had never heard of two-inch tacks.

I am going to tell you of a clerk I met in another store.

During the second week in March I called upon a merchant in a good-sized Quebec town. While I was chatting, a youth entered the store, and after exchanging a few words with the clerks, retired to the rear.

"That young fellow," said the merchant, "is an old clerk of mine. He is as capable a young man as any in this store. At present he is looking around for odd jobs. Now and again I give him an account to collect, and pay him a commission if he gets it."

"You say he is capable," I broke in. "Then why don't you keep him on your staff? Is he a good salesman?"

"None better," the merchant replied. "I had him in here during the Christmas rush, and paid him a commission on his sales. He made money in three days equal to two week's salary. His sales exceeded those of any man in the store."

"Then why not put him on salary," I asked.

The merchant smiled.

Where He Fell Down.

"I have had him in this store for ten years," he said, "but on no condition will I engage him on salary again. Unless offered a special inducement he does not begin to earn his salary. When he was with me, I had two girls on my staff. The sales of one of the girls were sometimes several times greater than those of this fellow."

He hesitated, as though going over the past, then continued.

"I did everything a man could do to assist that boy. I tried him out with a promise to make him manager of a branch store, but he failed miserably. It was not because he could not sell. That was not it. I tried him out in competition with the other clerks one day, and he came out on top. Finding that he fell down on the salesmanship end, I offered him the position of bookkeeper. I paid his expenses at a business college, allowing him to leave the store early to attend his classes; but he failed there too. Eventually I had to let him go."

Now isn't that a tragedy. How many clerks I know who read these pages, far removed from towns and cities, who would work their heads off if given the opportunity this boy so flagrantly abused. The saddest feature of it all is that he was blessed with brains to understand and sell hardware, yet went and hid his talent in the ground.

Question of Commissions.

I was chatting with a merchant the other day who brought up the question of paying clerks commissions. He told me that on one occasion he found a lot of goods on his shelves that were rapidly becoming dead stock. He offered his clerks a commission on all sales of these goods. The effect was miraculous. In a very short time the whole line was cleaned out, and some of the clerks doubled their salaries.

"Why," he asked, "could those boys not do the same without being offered a commission? I was paying them a good salary, and I was entitled to the same services as I secured by offering this inducement."

It is lamentable, yet true, that some people are trying every day of their lives to do as little as possible for the money they are paid. My experience with the hardware business has shown me that it is those who are at top of the ladder who, when they were clerks, did more than they were paid to do.

THE TEST OF A MAN.

The test of a man is the fight he makes,
The grit that he daily shows;
The way he stands on his feet and takes
Fate's numerous bumps and blows.
A coward can smile when there's naught to fear,
When nothing his progress bars,
But it takes a man to stand up and cheer
While some other fellow stars.

It isn't the victory after all
But the fight that a brother makes;
The man, who, driven against the wall,
Still stands up erect and takes
The blows of fate with his head held high,
Bleeding, and bruised and pale,
Is the man who'll win in the by and by,
For he isn't afraid to fail.

It's the bumps you get and the jolts you get
And the shocks that your courage stands,
The hours of sorrow and vain regret,
The prize that escapes your hands,
That test your mettle and prove your worth;
It isn't the blows you deal,
But the blows you take on the good old earth
That shows if your stuff is real.—Ex.

HINTS ON TRADE WITH CANADA.

(Continued from page 25.)

stanced one case of a firm who secured an order for £13,000 worth of machinery for the Government, half of which was to be paid for when the goods were on the job and the balance when the machines were erected. To the cost of the material there had to be added £2,000 for customs and £600 for freight. It was more than the credit of the firm who got the business could "swing," and yet, although the manufacturers knew for whom the tools were required, they demanded payment against documents before the goods left England. It was that kind of thing, said Mr. Wickes, that crippled the Britisher's chances of getting business.

Offered Canadian Hardwaremen

NEW MARBLE KNIFE.

The latest addition to the Marble line of specialties is a new hunting knife known as the Woodcraft Hunting Knife.

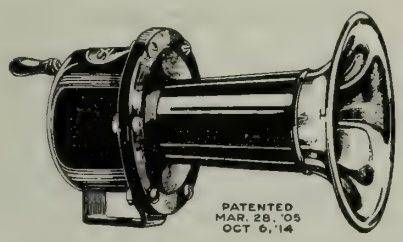
It has the weight and strength in hilt and the sharp, penetrating point necessary for sticking—the curved blade is just the right shape for rapid skinning—the back of blade close to handle is checkered to give a firm grip with thumb or finger—the back of point is bevelled for chopping, breaking bones, etc. The thick back, with tapering bevel blade, carries the strength from handle to point, allowing it to serve the purpose of a thin blade, and yet it has a surplus of strength ordinarily found only in much heavier knives.

The makers state that the Marble Woodcraft knife is an all-purpose knife developed from ideas submitted by hunters of well-known experience and repu-

Woodcraft Hunting Knife.

tation. It is designed to meet every requirement of the hunting, fishing or canoeing trip.

The blade is 4½ inches in length.

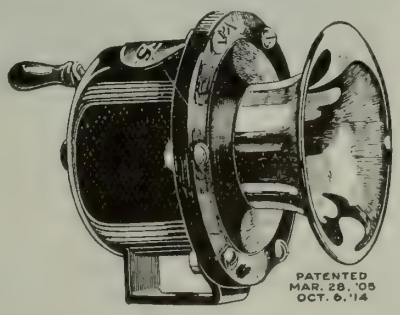


The handle is of laminated leather. It is properly proportioned for the length of blade and size and hand.

Further particulars may be secured from the Marble Arms & Mfg. Company, Delta avenue, Gladstone, Mich., U.S.A.

SEISS HORNS.

The Seiss Mfg. Co., 538 Dorr street, Toledo, Ohio, are placing on the market the new Seiss Horn which is double acting, mechanical operated, can be run either right or left, gives a continuous sound same as a motor driven horn or a sharp blast is given with a slight touch of the hand, the volume of sound carries a long distance and can be varied at the will of the operator from a low tone to a loud penetrating signal. The sound is produced in the same manner as in electrical motor driven horns by the toothed wheel coming in contact with the diaphragm producing a loud and far reaching signal.

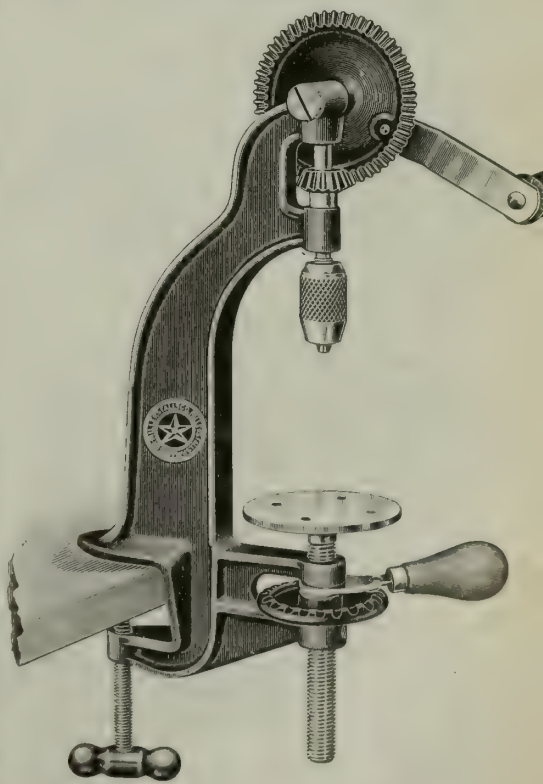


The makers state that Seiss horns have no spring and only three bearings—constructed from the best of material — Vanadium steel diaphragm—Gears are machine cut—Contact point and toothed wheel are tempered—Enamel is baked at 300 degrees Fahrenheit, which gives a durable and lasting finish—finished in

One of the New Seiss Horns.

black with highly polished nickel bell or black with brass bell or all black.

It is said that the present horn has been tested by attaching power to same turning the crank at 160 r.p.m., driving the tooth wheel shaft at 1,000 r.p.m., making 30,000 blows a minute or vibrations of the diaphragm, figuring on a basis of fifty signals per day, and having run same for 20 hours continuously,



Another Type of Seiss Horn.

would give 20 years of service, and without any adjustments or without showing any sign of wear when the horn was taken apart and inspected, therefore any part found defective will be gladly replaced free of charge at any time when defective part or parts are returned to the factory.

The two models illustrated are for use on automobiles, trucks, light cars, motorcycles and motor boats, various styles of brackets, not shown here are universal so that they can be used for either horn or attached to motorcycle frame, cross tube, handle bar cross tube or automobile door moulding or side.

BENCH DRILL PRESS NO. 208.

An attractive bench drill press of very moderate cost and known as No. 208, has just been put on the market by the Millers Falls Company, of Millers Falls, Mass. The illustration herewith will show its general lines and character. The finish of the standard is gray with red edging, and such parts as chuck and crank are nickeled. The chuck has a capacity of 0 to ¼ inch for round shank drills and is of the popular Star pattern with three jaws operated by springs that are protected from injury and guaranteed not to get out of order. The small gear is of steel and the tool is equipped with ball bearings. The chuck is held rigidly close to the main frame and feed is obtained by raising the table with a ratchet lever. The table is provided with holes for the insertion of pins or screws to act as stops or rests for the work. The height over all is 18 inches; maximum distance from chuck to table, 4½ inches; speed of gears, 3½ to 1; weight, 7½ lbs.

Bench Drill Press No. 208.

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Business Changes.

Kildonan West, Man.—Tully & Davey have succeeded J. De Wilde, hardware merchant.

Edmonton, Alta.—McBride & Co., tinsmiths, have been succeeded by L. M. Webster.

Secures First Prize.

The Mills Hardware Co., Hamilton, have added another first prize to the large number they have secured in window trimming contests. The most recent is First Prize ($50) in the window dressing contest conducted by the Wiss Shear Co.

Obituary.

Bancroft, Ont.—The death occurred here of Wm. Ashley, hardware and grocery merchant.

The death of De Blaviere Carritte, one of the most prominent business men of St. John, N.B., occurred on April 15, after a short illness. Mr. Carritte was president of the Carritte-Patterson Manufacturing Co., and connected with many other business enterprises. He was 59 years old.

Hardware Burglarized.

Several hardware establishments in Halifax were broken into by burglars on Friday night, April 16, but altogether they did not get much more than $50 in cash. Among the places entered were those of The Lawrence Hardware Co., J. Starr, Son & Co., Ltd., and Webster, Smith & Co.

Personals.

William H. Evans, the Montreal representative of Wilckes-Martin & Wilckes, the lamp-black makers of New York, has been spending a few days in Belleville, Ont. Mr. Evans states that he noted some splendid examples of paint window dressing in that city, and remarked that there was not a vacant store to be found.

Moved to New Offices.

B. & S. H. Thompson, who were formerly in the Transportation Building, have moved to 906 McGill Building, Montreal.

Franke, Levesseur & Co., formerly the Austrian Import Co., of 113 Youville Sq., Montreal, have gone into new splendidly-equipped premises at 150 Craig street west. Many of their lines were cut off when war broke out, and they are now pushing electrical supplies as a substitute.

M. H. Watson Promoted.

Mark H. Watson, who has managed the Saskatoon branch of the Winnipeg Paint & Glass Company, Ltd., for the past three years, has been promoted to have charge of the sash and door sales for the company's various branches, with headquarters at the Winnipeg offices. Mr. Chas. Whetham, who has travelled for the same firm for several years, with headquarters at Moose Jaw, will remove to Saskatoon, and succeed Mr. Watson as manager of the local branch. Mr. Watson and family will leave for Winnipeg on Friday.

Winnipeg Notes.

Mr. Lynch, buyer for the Miller-Morse Hardware Co., Winnipeg, is back at his desk, having completely recovered from the attack of sciatica, which confined him to his home for three or four weeks.

Stanley Brock, who represents a number of Eastern lines in Winnipeg, has returned from a two-month visit in the East. According to Mr. Brock, conditions in Winnipeg are as good as in any of the large Eastern cities. He does not seem to think those doing business here have much cause to complain. The stability of Western Ontario, however, seems to have impressed Mr. Brock strongly.

Death of Lieut. Warren.

Toronto, Ont.—Lieut. Trumbell Warren of the 48th Highlanders, one of the most popular of the younger officers of the city, has been killed in action in France. Lieut. Warren was president of the Gutta Percha & Rubber Company, which was organized and conducted for many years by his late father. Lieut. Warren was Assistant Adjutant in the 48th Highlanders' quota in the first contingent, and on the wounding of his chum, Capt. Darling, succeeded the latter as Adjutant. He was twenty-nine years of age, and received his early education at Upper Canada College, graduating later from the Royal Military College at Kingston.

Previous to his father's death four years ago, Trumbell Warren worked in the factory of the Gutta Percha & Rubber Company, learning the business in a thorough and democratic manner. After his father's death he entered the office as Acting Treasurer, his mother being at that time President of the company. Two years ago he was made president of the company, and his love of work and his sense of responsibility carried him through with eminent success.

Ontario Incorporations.

Franklin Steel Works, Ltd., capitalized $40,000, head office, Hamilton, Ont., to manufacture, sell and deal in toe calks.

William R. Perrin, Ltd., capitalized $40,000, head office, Toronto, to manufacture, buy and deal in packing house machinery, apparatus and supplies, etc.

Dominion Sheet Metal Co., Ltd., capitalized at $300,000, head office, Hamilton, to carry on the business of manufacturing, buying, selling and dealing in and with sheet metal, and of rolling, tinning, galvanizing, coating and plating metals, etc.

Dominion Incorporations.

The Rathbun Match Co., capitalized at $25,000, head office Deseronto, Ont.

American Nitrogen Co., Ltd., capitalized at $4,000,000, head office Montreal.

Kerosene Burning Carburetor Co., Ltd., capitalized at $100,000, head office, Berlin, Ont.

The Sarnia Metal Products Co., Ltd., capitalized at $100,000, head office Sarnia, Ont.

Reid Appliance Co., capitalized at $50,000, head office Windsor, to make and sell automobiles, gas engines, aeroplanes, etc.

Dominion Bridge Co., Ltd., has had its undertaking extended so as to include the following purposes and objects: to mine, smelt and otherwise work in copper, and to manufacture and deal in shells, bombs, cartridges, and all kinds of ammunition, etc., and to manufacture and deal in guns, mortars, howitzers and cannon of all calibres.

Twenty Years Ago
In the Hardware Trade

The following items are taken from the issue of Hardware and Metal of April 20, 1895:

John M. Taylor, manager Toronto Radiator Mfg. Co., is on a three weeks' tour of some of the larger American cities.

Editor's Note.—John M. Taylor is still actively engaged in business as president of the Taylor-Forbes Co., Ltd., Guelph, Ont.

* * *

The death occurred last week of Edward Davis, a large shareholder and one of the directors of the Jas. Smart Mfg. Co., Brockville. Mr. Davis was one of the best known travelling men in Canada, and had charge of the travelling staff of the Smart Company, for many years.

The death occurred suddenly at Fenelon Falls, Ont., last week of Mrs. Heard, wife of Joseph Heard, hardware merchant. The remains were interred on Thursday of last week and among those attending the funeral were the following commercial travelers: J. R. Hogan, Wood, Vallance & Co., and P. McCulloch, of the Copp Bros. Co., Hamilton; S. R. Kennedy, of M. & L. Samuel Benjamin & Co., Toronto; J. P. Conklin, of Sanderson Pearcy & Co., Toronto.

* * *

McLennan, McFeeley & Co., Vancouver, B.C., have incorporated.

Editor's Note.—McLennan, McFeeley & Co. are still doing business at Vancouver, and their business has grown rapidly during the past twenty years.

* * *

Tarbox Brothers, Toronto, have moved their offices and factory from the second to the fourth floor of the Truth Building.

Editor's Note.—Tarbox Bros. factory is now located on Dundas street, Toronto.

Beatty Bros. Eastern sales and office staff attending the convention. Officers of the company are: (1) *W. J. Beatty, general manager;* (2) *George Beatty, president;* (3) *M. J. Beatty, sales manager.*

BEATTY BROS. CONVENTION.

Beatty Bros., Fergus, Ont., with branch offices at London, Ont., and Winnipeg, Man., recently held their first annual sales convention at the head office. Thirty of the traveling staff were present. The convention was held largely for the discussing of more intensive sales methods.

Among the subjects taken up and discussed at the convention were manufacturing, buying of materials, quality of materials, advertising and selling policies, etc.

Thirty of their salesmen were present at the convention, which was held in the interests of more intensive sales methods. The process of manufacture was studied and the labor-saving machinery. The buying and quality of materials in the goods were discussed. The advertising and selling policies were talked over and the best points to use in handling the line brought out.

The firm of Beatty Bros. has gradually developed to be one of the most important of Canadian implement manufacturers. The BT. hay tools, steel stalls and manure carriers are very well and favorably known to farmers and implement men everywhere.

The firm was founded in 1873 by Messrs. George and Matthew Beatty, and made a line of ploughs, mowers and reapers. In 1886 Matthew Beatty died, and George Beatty continued the business alone until 1901, when his sons Will and Milton joined him. They were making hay carrier goods at that time and recognizing the immense field for barn equipment commenced to specialize on it. As the business grew the plough and reaper business was disposed of.

In 1912 they bought out the Wortman & Ward Company, of London, and have ever since been making the Wortman & Ward pumps, churns, washers and grain grinders. These lines have brought Beatty Bros. very closely in touch with the hardware trade. Hitherto they had been known to hardware merchants only for their hay tool goods and ladders as the steel stalls and manure carriers were handled mostly by implement men. Since 1912 the W. & W. lines have been rapidly developed both in quality and volume of sales.

Beatty Bros. have many laudable ideals which are faithfully carried out in the manufacture and marketing of their goods. "BT stands for Best," that is their trade mark and motto. "What we save by careful buying and scientific manufacture we put into the goods and both dealer and consumer benefit," is another fundamental principle of their business policy.

Catalogues and Booklets.

The Steel Co., of Canada, Ltd., Hamilton, have issued an attractive poster card in colors, featuring "Bell" brand horseshoes and drawing attention to six features of the "Bell" brand shoes. The cards are for distribution to the trade and can be secured by applying to the above named firm.

Hammacher Schlemmer, No. 500 Catalogue.

Hammacher Schlemmer & Co., New York, have issued a handsome 1,200 page catalogue of hardware tools and supplies for manufacturers, individuals and institutions. The catalogue has been prepared with great care and was built for convenience and to save time.

Wheeler & Bain Catalogue.

Wheeler & Bain, Toronto, Ont., have issued a 56-page annual spring catalogue of galvanized iron roofing supplies, eave troughs, corrugated pipes and elbows, corrugated sheets, skylights, cornices, galvanized iron sheets and tin plates, etc. Copies may be secured on request.

Death of Wm. Disston.

The death occurred on April 5, of William Disston, president Henry Disston & Sons, in Philadelphia and Toronto. Interment took place on April 8, at Laurel Hill cemetery, Philadelphia, Pa.

Incorporations.

Wilcox, Sask.—Tanton & Widmore, Ltd., hardwood implements, have incorporated.

Weekly Market Reports

Statements From Buying Centres

The Markets at a Glance

The advent of warmer weather has had a good effect on the hardware business and spring lines are moving out in fair volume. City trade is still quiet for this season of the year, but country trade has opened up in a very satisfactory manner. One of the chief features of the market during the week was the break in tin and quotations are now ranging from 50c to 54c at Toronto and Montreal. Copper is firm and is now quoted at a high figure. Spelter is soaring again and has reached a record-breaking price. Antimony has also reached the highest price on record, while lead remains practically unchanged. In the paint trade, business continues fair and country deliveries are very satisfactory, although city business is inclined to be dull. Linseed oil is again showing firmness, although the market is very unsettled and a wide range of prices is quoted. Hardware markets are settling after the many price changes caused by tariff changes and new conditions created by the war. In Western Canada, business is moving steadily along, and, although there is no great rush of orders, spring business is coming in regularly. April, so far, gives further evidence of an improved condition. Galvanized wires have advanced at Winnipeg. The advance is about 15 cents per 100 lbs. Sheet zinc and bluestone have also advanced in the Winnipeg market.

MONTREAL.

MONTREAL, April 22.—With warmer weather there is a better inquiry noted for spring lines and with the opening of navigation and the canal service commencing the heavy spring shipments have been despatched in good order. Altogether the trade sees much to regard with optimism and satisfaction under all circumstances, despite the quiet conditions which continue in the cities and manufacturing centres. The spring shipping to country districts has been particularly good and is generally considered as an improvement on a year ago. The opening of navigation and the warmer weather are also reported as having a favorable effect on the heavy metal trade, which has been very quiet for some time. Builders' hardware and building materials are in slack demand, although there is a better inquiry for the cheaper lines of door fittings.

The metal markets continue to puzzle the trade and all rules for gauging the usual developments are good for nothing. Tin is higher in Montreal, although New York is weakening. Copper is strong and continues to rise. Spelter is again soaring and has reached 13c; antimony is at anybody's price with 30c quoted and lead holds to 5¾ to 6c, although shading slightly lower. The war situation has developed a strong demand for certain metals which are in limited supply, especially as some sources of import are cut off, and the quotations are just as uncertain as is the probable life of the conflict itself.

Tin.—While the situation is materially eased in New York, the local tin market is very firm and prices are quoted a couple of cents higher. Here quotations are ruled by the available supply which is short and in strong demand; the conditions referred to in New York should have a tendency to bring a lower market later. The American situation has been transformed by the arrival earlier than expected of three cargoes of tin at Boston from the East Indes. These cargoes will be delivered at a time when they will have a bearing on the April market and this has had the effect of causing sellers some anxiety as to securing the present premium and concessions are offered. Quotations: New York, 46c as compared with 57c a week ago; Montreal 54c to 56c as compared with 52c and 54c.

Copper.—The local market is unchanged at 18¾c but the tendency is for higher prices on continued strong demand. New York quotes 17½c to 17¾c as compared with 16 2-3c a week ago, and London is very unsettled. Americans believe that stocks have largely passed into their control, as Japan, Australia and Chile have evidently sold out.

Solder.—Continued high prices for tin are having their effect on the solder situation despite the inclination of makers to encourage consumption by holding the prices down. The tin market has held its position so long that high priced raw material is being used to an extent which is steadily increasing. Quotations are advanced about 1c this week.

Spelter.—A material advance is given this week in the price of spelter, which, in Canada, never felt the full effect of the evident reaction in the Amerivan market, and 13c is now quoted as compared with 11½c a week ago. The low period in the American market is believed to have been largely artificial, the quotation being merely nominal, as makers had entirely booked to their capacity and were delivering on the higher prices. New York now reports an advance of 1½c for the week, to 11½c, and a peculiar situation existing, with buyers for whom there are no sellers. Except for occasional car load lots, producers claim that they are sold up to July, which would indicate that second-hands may manipulate the prices to higher levels.

Lead.—The lead market shows little change; the price is holding but the demand is dull. It is considered remarkable in New York, in view of the war demand, that lead has advanced to such a comparatively small extent, while the price of antimony has quadrupled, spel-

MONTREAL QUOTATIONS.

Tin	54c-56c
Spelter	13c
Copper	18¾c
Lead, Trail, cwt.	5¾c-6c
Lead, Imported, cwt.	5¾c-6c
Antimony	30c
Solder, ½ x ½	27 to 31
Solder "strictly"	29 to 33
Aluminum, Ingot	23c lb.
Aluminum, Pattern	24c lb.
Wire Nails	$2.40 base
Cut Nails	$2.50 base
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp	12½c base
Sisal	10½c
Lath Yarn	9¾c

ter doubled and tin has gone all over the market.

Antimony.—The Montreal market has taken antimony to the $30 mark which has prevailed in the States for some weeks, and New York has gone to $32 for Cooksons. These prices are largely nominal and for the future, until the stocks of English are exhausted, quotations will be largely at the dictate of holders. England is not exporting and the time is in sight when, with a continuance of the conditions existing, only Chinese and Japanese supplies will be available. However, so far as supplies for ammunition are concerned, England is likely to make some concessions so as not to hamper manufacturing operations.

Ammunition.—When the Montreal Association arrived at the prices for ammunition announced a week ago, it was thought that a basis had been reached, but since then there have been further negotiations with the result that the discounts are now fixed as follows: Crown, Sovereign, Regal, Imperial and Canuck shells are all 30 and 2 per cent. Remington and Nitro Club are 25 and 7½ per cent.; New Club 25 per cent., and Arrow 30, 10 and 2½ per cent.

Builders' Hardware—Demand is dull for this season of the year, although there has been a little better inquiry of late particularly for the cheaper door sets. New price lists have not been received and the old list is still being used with a general 7½ per cent. increase.

Building Materials.—Movement of building materials is slow as might be expected under the existing conditions. However, a little better tone has been noted in the market, with the movement of the boats and the arrival of warmer weather.

Tools.—A better inquiry for carpenters' tools is noted although the improvement is hardly what might be expected at this season. There is also a continued demand for fine tools used in the metal trades engaged in shell making, particularly calipers and other precision tools.

Housecleaning Lines.—The demand for mops, polishes and other housecleaning utensils continues strong, particularly to the outside districts and the trade is altogether pleased with the movement.

Seasonable Lines.—The warm weather has resulted in a better inquiry for lawn equipment, particularly mowers and hose. The demand so far for ice cream freezers has been very fair but not brisk. Garden tools are moving well.

Rope and Twine.—In the country districts there is a very fair demand for general purpose ropes. The commercial and industrial demand is comparatively light although the opening of navigation brought some inquiry from the shipping trades.

Utensils.—While there has been no change of late in the prices of made-up utensils, there is a possibility of a further advance before the end of the week; if not in that time, shortly after. The high market for tin, copper and spelter has continued so long that costly raw materials are being used to a greater extent all the time and as the market shows little chance of material reduction higher prices are logical.

Nails and Fencing—There is a little better demand for nails noted recently. Shipments of fencing are practically all made with the exception of some reorders. Altogether it has been a splendid fence season. Prices are shown in current market quotations.

Bolts and Nuts.—The general industrial depression is being noted in the demand for bolts and nuts, although there is a fair movement to the country in general lines.

Fittings.—There was an advance recently made in pipe fittings, but it does not generally affect the hardware trade except on commodity rates. Where concessions on quotations had been granted on medium quantities these concessions are now confined to the larger orders.

Plates and Sheets.—Although the demand is below normal there has been a better inquiry noted during the week, probably encouraged by the water transportation facilities and the warmer weather. Prices remain firm.

Lead Pipe.—A slight improvement has also been noted in the demand for pipe. The market is firm at 8c for lead pipe and 9c for lead waste pipe.

Stoves.—There is a very fair movement of gas and oil stoves, particularly to the country districts. There is also some inquiry from the country for wood cooks, but business generally continues below the normal.

TORONTO QUOTATIONS.

Sisal Rope	10½c base

TORONTO.

TORONTO, April 22. — General conditions continue to improve and a more optimistic spirit prevails in hardware circles. The improved weather conditions are welcomed by the trade, and there has been a noticeable increase in the demand for garden tools and other seasonable lines. The farmers are commencing operations for the season, and the various lines used on the farm are beginning to move freely. Seeding has begun under very favorable conditions, which is encouraging to the farmer, and will stimulate trade in the country districts. The city trade is still comparatively quiet, but is a little more active. The building trade, which has been dull for several months, appears to be picking up, as quite a number of permits have been taken out during the week, due, no doubt, to the improved weather conditions. On this account a slightly better demand may be expected for builders' hardware and supplies in the near future.

There are few changes of importance to note this week; adjustments due to the increased tariff have practically all been made. The continued strength in the metal markets, especially tin, copper and spelter, may affect some lines unless there is a reaction in the near future. Galvanized goods, copper and tinware are the lines most likely to be affected. There is a seasonable demand for shelf hardware and utensils, but stoves and heaters are quiet. The metal markets are firm, copper and antimony having advanced. Tin is weaker and the market unsettled.

The Metals.—The effect of the war on the metal markets is very noticeable this week, and the markets are with few exceptions very irregular. Tin has receded from the high level of last week, and the market is easier for spot metal. Copper is very strong on heavy demand, and has advanced. Spelter has again advanced sharply after a period of comparative quietness. Antimony has reached a new level, being nearly five times higher than a few months ago. Lead is quiet and unchanged, as also is aluminum, the latter being quoted 23½c per pound. Solders are weaker following the decline in tin. The local demand is improving, but consumers continue to buy from hand-to-mouth. A considerable amount of lead and antimony is being used for shrapnel bullets, but the demand for metals for ordinary purposes is light.

Tin.—The New York market is still upset and irregular owing to the restrictions imposed by the British Government on the export of tin. Spot metal is scarce, but the market is easier, although for futures it has an advancing tendency. There is a possibility of the British Government removing some of the restrictions, in which case the situa-

tion would be considerably relieved. Prices have declined and are nominal at 50c to 55c per pound.

Copper.—The market is very strong, due to the extraordinary demand for copper for war munitions. It is more than likely that the demand will increase rather than decrease, as the expenditure of ammunition is enormous. Production is being increased, but it is believed that all the metal has been contracted for up to July. The market has advanced 1¾c, and copper is now quoted at 19c per pound.

Spelter.—The scarcity of spelter is becoming more acute, and buyers are experiencing great difficulty in obtaining deliveries. The situation is serious, and there are no signs of any immediate relief. The market is strong, and prices have advanced 1½c. Quotations are nominal at 13c-13½c per pound.

Lead.—The lead market is quiet, and there is a feeling of uncertainty in regard to the outlook. The trust prices are being maintained, but it is stated that the independents are holding at a considerably higher level than the present market quotations. Quotations are firm, but unchanged, at 5¾c per pound.

Antimony.—The consumption of antimony principally for war munitions is running far ahead of production, and stocks are being steadily reduced. The market consequently is very strong and prices are nominal. Antimony is quoted at 32c, which is a record figure, several times higher than a few months ago.

Solder.—The decline in tin has been followed by lower prices for solders, varying in range from 2c to 5c. Half-and-half is quoted at 33c; wire solder, 35c; wiping, 27c, and tinkers' bar, 35c per pound. Other solders are given in the current market quotations.

Scrap Metals.—The market is strong for copper and brass scrap, and prices are firmer, heavy copper having advanced 1c and heavy and light brass ½c per pound. Prices on other scrap are unchanged, and the market quiet.

Pig Iron.—Prices of English pig irons have advanced, and there is little probability of any of these brands being imported under present conditions. There is no change in the general situation. Victoria and Hamilton brands are quoted here at $19 per ton.

Bar Iron and Steel.—Prices are holding firm at $2.05 base. There is, however, little change in the situation.

Lead and Iron Pipe.—With the outlook in the building trade showing some improvement there should be a better demand for pipe. Prices of lead pipe are firm at 8c and for waste pipe 9c net. Iron pipe quotations are given in the current market quotations.

Wire Nails.—Prices for wire nails are being maintained at $2.35 base, and cut nails at $2.75 base. Business is picking up, but the demand is comparatively light.

Rope and Twine.—The situation as regards raw materials show little improvement; costs are higher, and supplies are difficult to obtain and uncertain. If the demand were normal there is little doubt but that prices of rope would advance. Even under present conditions there is a possibility of a revision. Business during the week has been much better, and there is a more hopeful feeling in the trade. Prices are shown in current market quotations.

LONDON.

LONDON, Ont., April 22.—Spring lines are moving splendidly. There has been a good improvement in business during the past week, due to some extent to the good weather conditions prevailing. Very few price changes have occurred during the past week.

The recent change in the price of loaded shells has been cancelled, and they are now back at the old prices.

Linseed oil remains at the same price as last week, and is quoted as follows:

	Raw.	Boiled.
1 to 2 barrels	78c	81c
3 to 5 barrels ...	77c	80c
6 to 9 barrels....	75c	87c

Lead remains unchanged, and is quoted for Government pure grades in ton lots at $9.10 per 100 lbs. and in less than ton lots at $9.40 per 100 lbs.

No change has taken place in turpentine since the advance of last week, and it is quoted in barrel lots at 73 cents per gallon in single barrels; 2 to 4 barrels, 72c per Imperial gallon; 5-gallon lots, 80c per gallon.

WINNIPEG.

WINNIPEG, April 22.—Business seems to be moving steadily along. There is no great rush of orders. On the other hand, business is coming in regularly, and the indications still are that with at least a fair crop assured, there will be a very brisk summer and fall trade. April so far seems to give further evidence of an improved condition. Further wheat money, which is coming in as the result of navigation opening up, seems likely to enable a number of farmers to reduce their liabilities to the dealers. A better condition is certain to come as a result of this.

Shovels to Hold Steady.

A little time ago it was stated that shovels would almost certainly advance 25c a dozen on the 1st of May. Even last week such a rise seemed assured, but since then there has been a change,

Wire Nails, Etc.

Wire nails are in fair demand. The present price is $2.35 base for wire and $2.70 base for cut nails. Most of the larger buyers booked for wire nails some time ago when quotations ranged around $2 base. Wire from stock is quoted as follows:

	Per 100 lbs.
Barb	$2.55
No. 9 soft, galv.	2.30
No. 12 soft, galv.	2.45
No. 13 soft, galv.	2.55
9-coil spring	2.35
Oiled and annealed, No. 10..	2.46
Oiled and annealed, No. 11..	2.52
Oiled and annealed, No. 12..	2.60

Galvanized fence hooks are quoted at $3 per 100 lbs. and $3.25 per 100 lbs. in 25-lb. boxes. Fence staples, bright, are $2.60 per 100 lbs. in kegs; $2.85 per 100 lbs. in 25-lb. boxes; galvanized, $3 per 100 lbs. in kegs, and $3.25 per 100 lbs. in 25-lb. boxes. Poultry netting remains at 45 per cent.; screen wire is quoted at $1.55 in 100-ft. rolls and $1.60 in 50-ft. rolls.

Ropes and twines are firm at the following prices:

Pure Manila .....14½c lb. base	
British Manila .....12½c lb. base	
African Hemp .....12½c lb. base	

The new prices on twine are as follows:

650 ft. ....12¾c lb.	
600 ft. ....10½c lb.	
550 ft. ..... 8¾c lb.	
500 ft. .... 8½c lb.	

⅛c per pound allowance on 5 tons.
¼c per pound allowance on 10 tons.
Terms November 1.

and the present quotations appear likely to hold indefinitely. There has been some price cutting by the manufacturers in the States, and evidently this has resulted in the determination of Canadian manufacturers to hold their prices steady, irrespective of the higher cost of raw material. It is hard to say how long this state of affairs will last. Dealers, however, have an opportunity to buy at a lower cost than might have been expected for the present at least.

Wire at Last Goes Up.

The week has seen the advance in wire which has been predicted for some time. Generally this rise is 15c per spool, but the details are given in the Winnipeg hardware quotations. It is a rise, of course, resulting from the higher cost of galvanizing the wire, and from the increased duty. Even at the new price, the margin of profit to wholesalers is exceedingly low. Still, unless there is some further rise in raw materials, it hardly seems likely that barbed wire will be advanced further for some little time.

Sheet Zinc Away Up.

Sheet zinc is quoted very much higher this week. Some car load lots have during the past few days sold at more than 1c higher than the cask lot quotations in our market report last week. As the stocks of wholesalers are low, the inevitable result was a very marked advance. Cask lots now are quoted at 16c and small lots at 16½c.

Zinc Affects Other Lines.

The advance in zinc makes a rise in batteries seem almost inevitable. It was estimated last week that the difference in the price of zinc was increasing the cost of each battery over 1c. With this further advance the increased cost will, of course, be greater, and with the other ingredients also up, it seems certain that higher levels will be struck.

Blue Stone Rises 1 Cent.

Blue stone has moved from 6c to 7c per lb. As a matter of fact this product rose with copper over two months ago. Wholesalers were at 6c selling for less than they could import the vitriol for, but it was determined to keep the price down as long as it was needed for seeding. Now the need of blue stone for treating the seed has passed, and the price has gone up, it being felt right that a fair profit should be taken for whatever of this product is sold for purely commercial purposes.

There is no further advance in linseed oil, nor has there been any change in the price of glass. Ordering of these lines is comparatively quiet for the time. For paint, however, there is a good call, the higher prices recently struck seeming to make no difference there whatever.

WEEKLY PAINT MARKETS.

(Continued from page 46.)

figure being more generally accepted. Flaxseed has advanced and is $1.80 per bushel at Winnipeg; this, in addition to the decline in price of oil cake, indicates the possibility of higher prices for oil. The demand, however, is light and tends to keep prices down. An advance of 2c is to be noted. The following prices are being quoted in Toronto:

	Raw.	Boiled.
Single bbls.	80	83
3 to 5 bbls.	79	82
6 to 9 bbls.	78	81

Turpentine.—Stocks in the South have been considerably reduced recently but new turpentine is beginning to come in, although in smaller quantities than last year at the corresponding period. It is stated that the Farmers' Association have no stocks on hand which may unsettle the market. Prices are firm and unchanged at 73c, although 68c is being quoted by one interest. The resin market is advancing. It is stated that speculators have bought up all the resin at the principal points in the South and that sales have been very large lately. The following prices for turpentine are being quoted in Toronto: Single barrels 73c; 2 to 4 barrels, 72c, and 5-gallon lots, 80c per Imp. gallon.

Gasoline.—Gasoline is moving freely and prices are firm at 18½c per gallon. The demand for coal oil is falling off.

Glass.—The situation is still very unsettled, chiefly due to the attitude of the American manufacturers. Definite action to meet the conditions is under consideration and a new price list may be issued shortly. It is proposed to base the new price list on manufacturing costs which will probably show an advance of approximately 10 per cent. except in those sizes not often called for.

Putty.—Prices are very firm and an advance may be expected any time. Dull business is the chief reason for maintaining the present prices. The following prices are for standard putty in less than ton lots:

	Per 100 lb.
Bulk, bbls., 800 lbs.	$2.40
Bulk drums, 100 lbs.	2.60
Bulk drums, 50 lbs.	2.65
Bulk drums, 25 lbs.	2.70
Bulk drums, 12½ lbs.	2.95
Cased tins, 25 lbs.	2.90
Cased tins, 12½ lbs.	3.10

DEALER PROFIT AND NATIONALLY ADVERTISED SPECIALTIES.

(Continued from page 31.)

guards against an overload of accumulated stock. He is in business chiefly for the sale of the merchandise which classifies his store, and he aims to keep a supply proportionate to his average distribution. If, in a general sense, he has a sufficient surplus of his own established trade, it avails him nothing to fill his storerooms with more of these articles, and to considerably increase his working stock of standard staples would not bring him more customers; or to have six storeys piled up with the same goods would not reduce his overhead. The staples which establish the character of his business demand a certain cost to exploit them. He knows what his average year's sales amount to, and from this he learns the operative cost. If his stock is considerably larger than his opportunity to sell it, his overhead increases, but if he needs more stock than he is selling, he buys it, sells more goods, and reduces his overhead.

When he is selling to the capacity of his trade and is stocked to that capacity, he looks around for something to increase the field of his opportunity and to enlarge his sales. He buys his specialties. They are not staples; they are articles in excess of what he is compelled to carry, and they represent a profit additional to his classified business. He has found new channels for trading and making a profit. Generally, they are advertised articles, advisedly they should be, for they are foreign to his business or they would not be specialties. Their profit is an agreeable profit, not springing from his staple trade, but additional to it without added expense.

If he sells enough advertised goods to warrant their purchase in large quantities, they become staples, and by buying in quantity he can earn a higher discount, which will meet the added cost of stocking and selling a staple line.

The successful dealer in any class of business is always found to be the man who is larger than the small argument and broader than the narrow policy.

Obituary.

Berlin, Ont.—The death occurred here of Andrew A. Voelker, assistant manager of the Merchants' Rubber Co.

Personals.

J. A. Hossack, sales manager for the Lufkin Rule Co., of Canada, while on a trip through to the coast, was taken down with pneumonia, and is now at the General Hospital, Winnipeg. Mr. Hossack's many friends will be glad to know that he was placed under treatment in good time, and the doctors now believe his recovery is assured. It will, however, be three or four weeks before Mr. Hossack will be able to leave the hospital.

Paint Department

Advancing Retail Paint Prices

One Merchant Had Reading Notice Published in Local Paper—Advance Slight, When Present Conditions are Considered.

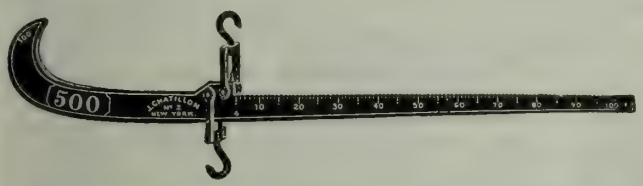
THE advance in manufacturers' prices on various lines of paints and varnishes, announced in last week's issue of Hardware and Metal, were not unexpected. Hardware and Metal's market reports stated on several occasions that advances were bound to take place as a result of tariff changes and new conditions created by the war. It is well known that a great many orders were placed early on account of predicted high prices, and that dealers took advantage of the advance information handed out to them. Although many good stocks were put in, there was no overloading, for the majority of retailers realize that this is not a time for overstocking, and that even though higher prices have to be paid, it is in many cases better to buy in smaller quantities and often. This, of course, depends on conditions in each locality and the merchant himself must be the judge of which buying methods are most suitable for his particular business. Although there may be a difference of opinion on buying problems there is no difference on the part of merchants when speaking of retail selling prices and nearly all are agreed that the retailer is justified in advancing the retail prices on paint.

Paint is undoubtedly worth considerably more than it was a few months ago. One retailer who is well known to readers of Hardware and Metal has written stating that he has advanced the prices on all lines of ready mixed paints and varnishes, and in order to facilitate sales and make the buying public acquainted with the fact that paint has advanced in price, he approached the local newspaper publisher and suggested that he run a local reading notice regarding paint prices.

The merchant in question is a good advertiser in the local paper, and his request was granted. The merchant in writing to Hardware and Metal, said in part:—"I am having the enclosed inserted in our local paper this week. I think any town newspaper would insert same for an advertiser; to pave the way for the advanced prices we will have to ask for ready mixed paints at once. If it helps my competitor to get the advance with the minimum of trouble, I feel it will doubly help me."

The notice inserted in the newspaper read as follows:—

"During the past week the manufacturers of the higher grades of mixed paints and other paint products have announced a slight advance in the price of their goods. The increased cost of practically everything entering into the manufacture of paint has made this necessary in order to maintain a high standard of quality. Considering the heavy advances in the white lead and linseed oil markets, as well as all coloring materials, the advance announced of a little over 5 per cent. seems modest, and we are sure will not interfere with any painting which our citizens have in view. We hope the 'Paint-up and Clean-up' campaign will be carried on vigorously this spring, and keep our town in the enviable position she has so long held, as one of the finest residential towns in Ontario."



The example set by this merchant could be followed by many others. The advance in price is only a slight one, and should not cause anyone to postpone any painting jobs they may have had in view.

An exceptionally well-arranged window display of paints and varnishes.

Every scale in our line is guaranteed to be sensitive and accurate, giving justice to both the buyer and the seller. They are legal for use under the weights and measures laws of the Dominion. The best material is used in their construction, great care taken in their assembling, and with proper handling these scales will last a lifetime. Fully guaranteed to be perfect in material and workmanship and to give absolutely correct register on all weights up to their capacity.

Chatillon products are a Standard gauge of Quality.

This line should be in your stock—It will add to your reputation to carry Chatillon Products. It's Profitable.

Weekly Paint Markets

MONTREAL.

MONTREAL, April 22. — The paint trade appears to have absorbed the general increase in prices without any material check to business. While there was undoubtedly a tendency towards more general buying before the advance and a more conservative attitude is now displayed, the spring activity continues. Country deliveries are very satisfactory, and have been heavy throughout the month, while demand continues fair, indicating that in some sections of the trade the hand-to-mouth policy has been continued, despite the ascending market. City demand continues dull and the West shows little improvement.

Following the general advance on all mixed paints, which went into effect on the 15th of the month, as already announced, there have been other price increases in varnishes and other lines. These miscellaneous changes are not being made jointly in the trade; and, while there are increases of as much as 25c a gallon in some lines by certain houses, other quotations have not as yet been altered. However, this is largely a matter of adjustment, and within a short time it is expected that all quotations will be on the higher level to which prices have been forced by the tariff and the increasing costs of raw materials. On certain lines in which imported materials play an important part the market may be expected to be somewhat irregular, and prices will probably vary, according to the individual position of the maker. At the same time, some "numbers" will be forced from the lists as supplies are exhausted which cannot be replaced while the war conditions continue. For most of these there will be something "almost as good," so that the general public will be able to satisfy its needs in the great majority of cases.

Linseed Oil.—There is a marked advance in the price of linseed oil this week, the refiners having made a change of 2c, which, following on other recent increases, has had a more marked effect in some of the dealers' quotations. At the same time, the state of the market is such that some firms have not materially advanced, the price being maintained in relation to the buying cost on the lower market. As low as 80c and 83c is heard, and several quotations are at 81c and 84c; from this the range is up to 88c and 91c, a level which has just been set and to which a number of firms have advanced. The situation is reported as firm, with the tendency higher. Following are the figures over the range, the usual wide spread being emphasized:

	Raw.	Boiled.
1 to 2 barrels ..	81-88c	84-91c
3 to 5 barrels ...	80-87c	83-90c
6 to 9 barrels ...	79-86c	82-89c
10 bbls. and over	78-85c	81-88c

Gasoline and Benzine.—Shipments of gasoline and benzine have been very heavy during the week, with the opening of navigation. Orders continue very satisfactory from the country districts, and the season promises well. The city consumption continues comparatively small. Prices continue at 15c for drums and 14½c for tank wagon.

Turpentine.—An advance is noted in turpentine. Refiners quote the price as being up 2c, and, while the increase in the trade is hardly so abrupt, there are higher quotations all round and further advances are likely to be made.

	Per gal.
½-bbl lots	70-72c
1-bbl. lots	67-69c
2 to 4-bbl. lots	66-68c
5 to 10-bbl. lots	65-67c

Lead and Zinc.—Lead continues very firm on the recent advances, and the tendency is reported to be still higher. A slightly easier tendency has been noted for pig lead, but this is overbalanced by the advancing market for oil. Zinc is very firm also at about 14c.

Dry Colors.—The situation in dry colors is so unsettled as to be almost beyond definition. The position of each maker depends upon the stocks which he has on hand, with the result that for many lines quotations are merely nominal, and are usually only given with any degree of definiteness when applied for. For some colors, particularly bright reds, prices, when quotations are given, show a remarkable advance.

Colors in Oil.—Colors in oil were directly affected by the new price schedule which went into effect on April 15th, the following quotations now being in Montreal:

Venetian red, pure, 1-lb. tins.....	16c
Chrome yellow, pure	24c
Golden ochre, pure	15c
French ochre, pure	14c
Chrome green, pure	12c
French permanent green, pure.....	16c
Signwriters' black, pure.....	22c

Varnishes, Enamels, Fillers, etc.—In the varnishes and other miscellaneous lines there will be general advances in prices by the makers. Some increases as high as 25c a gallon have already been made; other prices are in process of adjustment; while still others are left to stand for the time being. Paste wood filler will be increased almost immediately to the extent of 2½c to 3c a pound and orange pigments are quoted 9c to 10½c.

Glass.—There is no material change in the glass situation, the old basis still holding, although there is some spread in the quotations of different houses.

TORONTO.

TORONTO, Ont., April 22.—The seasonable weather has had a stimulating effect on the paint trade and increased volume of business is reported both in the city and from the country trade. A feature to be noted is the considerable number of small orders for mixed paint being received from people doing their own painting around their homes. The aggregate of these orders makes a useful increase in the total volume of business. The advance in prices has not apparently affected business. There have been no further changes of importance in prices although some adjustment in dry colors will no doubt be necessary. The supplies of some colors are becoming very limited and in some cases prices have been withdrawn. The situation in some respects is serious and it is difficult to say what will happen. Linseed oil has advanced, due to the increased cost of seed. The glass situation is getting more complicated and an advance in prices is being considered. Collections are fair.

Linseed Oil.—The market is firmer, following the decline last week and is still irregular. Quotations now range from 80c to 85c for raw oil, the former

ANNOUNCEMENT

Sell The Best

Sell only the best of every class of article you handle and you will develop a good-will and reputation which your neighbor storekeepers may well envy. Ultimately you will make more money than them all, for the whole community will believe in you. They will have faith in you and the goods you recommend, and will gladly pay a fair profit on your quality merchandise.

Knowing that the "quality" merchant is invariably the most successful merchant, Beatty Bros. build their goods for this class of trade. Our aim is to make our trade-mark, the big "BT," stand for the BesT in all our lines. "BT stands for BesT" is our ideal and motto.

Beatty Bros. make the well-known Daisy Churn, the Bonnie, Vollmar, Cyclone and Ideal Washers, and the Cyclone and Daisy Grinders, formerly made by Wortman & Ward, of London and Winnipeg. The BT Ready-to-ship Pumps are the best values in pumps to be had—best in construction, best and easiest to handle, best to sell and best in price. Beatty Bros. make the BT Extension Ladders, known for their lightness and strength, and the BT Step Ladder with the Galvanized top. We make most of the hay tool goods sold in Canada.

Handle the BT Goods, for they bring not only the best profit but the best satisfaction for good customers. Send for General Catalog No. 23 and Spring Proposition to the trade.

Beatty Bros., Limited, Fergus, Ont.

Western Branch: Winnipeg, Man.

"Phenomenal Sales Increase"

Says Long Established Booth & Law Co.

WHEN a man who has been at the helm of a hundred year old business for nearly half a century says that the sales increase of his company on Pratt & Lambert Varnishes has been phenomenal, it pays to listen. Such long experience in selling various lines of varnishes and in judging of varnish quality make this statement of unusual significance. Read Mr. Law's letter which points out some of the reasons why such gratifying sales results have been possible for them and are possible for *you*. If you will read this letter and act on it, you will be taking a straight and direct course to successful varnish sales.

NEW HAVEN, CONN. Jan. 5, 1915.

Pratt & Lambert,
185 Madison Ave.,
New York, N. Y.

Gentlemen:

Although we have been in business as you know almost a hundred years, it is only recently that the modern force of advertising has become a big factor in business. Thus in recent years we have been able to greatly increase our business through the handling of advertised lines. It was our study of what constituted good advertising backing of a line of goods that led us to adopt Pratt & Lambert Varnishes a few years ago. We have not been disappointed with the results. Our first order while small has grown until now we order in carload quantities and our sales increase in this time has been phenomenal.

Your magazine advertising, dealer helps of all kinds, painters' magazine, "Varnish Talks", letter promotion campaign to home builders, Architectural Department which is getting the good will and co-operation of architects and securing their specifications for Pratt & Lambert Varnishes, your Advisory Department, method of referring inquiries, in fact every other detail of your advertising plan is in our opinion 100 per cent efficient and is pulling the results for us. This can be easily seen from the fact that despite all the "calamity howlers" of the past year, our business has shown a decided increase and due to the fact that you have advertised harder than ever during the past year while some of the other fellows seem to have let down. With the indications of returning prosperity this Spring, we look forward to the greatest year on Pratt & Lambert Varnishes in the history of this company.

Yours for Success.
Walter B. Law
Pres.
THE BOOTH & LAW COMPANY.

RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."

"The Right Paint to Paint Right."

Manitoba Bridge & Iron Works, Limited

WINNIPEG, MAN.

A "Brighten-Up" Campaign in Your Town

will increase the sale of paint, garden tools, and other lines you carry. If you have not read the April SWP—do it now—and get busy with the plans outlined.

The demand for Sherwin-Williams Paints and Varnishes is gaining each year—make the best of the S-W Agency. Advertise your store as the place to buy Sherwin-Williams paints, and varnishes, and high quality hardware lines, etc.

A little of your energy, and enthusiasm for bigger business and more profits will enable you to make a big success of the Clean Up and Paint Up Week in your town. Start to-day!

SHERWIN-WILLIAMS PAINTS & VARNISHES

A FINISH FOR EVERY PURPOSE

THE SHERWIN-WILLIAMS Co. of Canada, Limited: Montreal, Toronto, Winnipeg, Calgary, Vancouver, Halifax, N.S., London, Eng.

Back to Nature

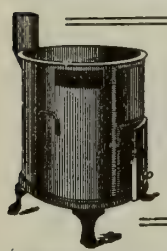
NATURE is calling aloud these days to the people with red blood in their veins. The sky is blue, the air balmy and warm, while the ground underfoot is drying and taking on its mantle of green. Now is the time to prepare for the business this life in the open creates. The small boys are getting anxious about new baseball outfits, bicycles, wagons, lacrosse sticks and footballs. The mothers' thoughts turn to baby carriages or go-carts in which to give their little ones the fresh, sweet air which good old Nature provides. The young people are looking forward to tennis, croquet, quoits, bowling, or a restful hour spent with a book in a well-placed hammock. The men are planning their fishing trips or their Saturday afternoon at the traps.

In fact the world, his wife and children are eagerly getting out in the open, "back to Nature," and you want to be in a position to supply them with their many Sporting Goods needs.

To do this successfully you should deal with the largest Sporting Goods Jobbers in Western Canada. We have the very best lines and a widely varied assortment. Our Mail Order Service is unexcelled, therefore when in need of Sporting Goods or information about them, write to—

MILLER-MORSE HARDWARE CO. LIMITED

"THE BIG WINNIPEG HOUSE"



DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps
They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

A Straight Talk From The Advertising Manager

What's Doing in Hardware?

You subscribe to Hardware and Metal because you want to know what is going on in the trade all over Canada.

Do you realize that some of the most important developments in hardware — developments of a dollar and cents value to you — are featured exclusively in the advertising pages?

Here, you can learn about the very latest goods that are offered to hardware merchants. And you will notice that advertisers are constantly using their space, not so much for the sake of urging you to buy their goods as to explain how you can sell them at a profit.

Many times a week it may help you to swing a sale for a stove, or refrigerator, or some other big article, if you and your sales staff have studied the advertisements in the previous issue of Hardware and Metal.

Make it a point to read Hardware and Metal's advertising pages every week, and see how this habit will put money in the bank for you.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware & Metal.

SITUATION WANTED—BY LIVE, CAPABLE hardware salesman, with fifteen years' first-class experience, position with Western retail or wholesale firm. Box No. 180, Hardware and Metal. (19)

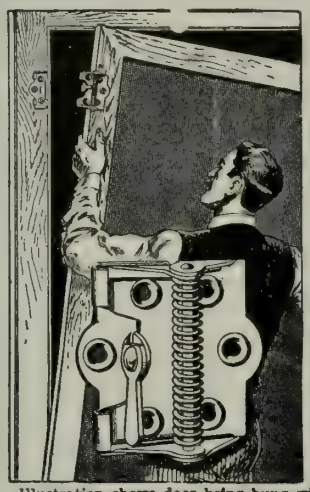
THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.



HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Hardware and Metal's Electro Service

AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont. Series No. 1.

Russell Jennings Auger Bits

Two styles of shanks,— three threads for boring all woods

Patented by Mr. Russell Jennings in 1855

Russell Jennings Mfg. Co., Ltd.

St. Catharines, Ont.

PEERLESS ORNAMENTAL FENCING

It's Made of Heavy Open Hearth Steel Wire

with all the impurities burned out and all strength and toughness left in. Heavily galvanized. Every intersection is locked together with a Peerless clamp. Top and bottom wires of Peerless Poultry Fencing are extra heavy—extra strong. Consequently fewer posts are required. **Peerless** fencing can't sag—can't rust—can't get out of shape—can't help giving absolute satisfaction.

You can sell our fence with a clear conscience and make money, too.

Send for our dealer's proposition. It's attractive. It will interest you. It's well worth a stamp. Send today.

"The Chum of The Chain Bolt"

1066—10-inch
Cut Half Size

Here's what may be termed the Chain Bolt's other half, the new 10″ Stanley Foot Bolt. This Wrought Steel Foot Bolt is strongly built, handsomely finished and exemplifies "Stanley Quality" throughout.

Made for Heavy Garage and Warehouse doors in the 10-inch size shown, but we are ready to supply the same model in 3″ and 6″ sizes.

One indication of the quality in this Bolt is shown by the Stanley Sherardized Spring. This process absolutely prevents rusting and breaking. Ordinary strains won't break this bolt. **And it's as strong a seller as it's strong in service.**

10″ style, packed one in a box, with screws to match and with rectangular floor plates having oval-shaped holes to take care of shrinkage in the door. Cap and Release of Solid Bronze. 3″ and 6″ sizes, packed ½ doz. in a box.

Ask your Jobber.

Visit our booth at the Panama-Pacific Exposition in Palace of Manufactures, Block 26, Corner of 5th Street and Avenue D.

For Would-be Home-Guarders

There is no better arm for home-guards than the Ross Sporting Models which give maximum power and efficiency, and after the emergency has passed, serve as an excellent sporting arm.

For the juveniles, the Ross Cadet, the officially adopted Government Cadet Rifle,—is a splendid .22. It is accurate and strong, shoots the .22 short, long, or long rifle cartridge, and is not only good for training purposes, but also for use on farm or in camp.

Here's the Carborundum File

It's One of the Handiest Abrasive Tools We Know of

You can sell it—sell it quick to the farmer, gardener or caretaker for sharpening mower sections, or lawn mower knives; for edging spades, hoes, etc. For sharpening almost any edge farm or garden tool. It's a tapered four-sided shaft of Carborundum fitted with wood handle—just the right, handy size—right grit for all-around work—cuts fast and clean, shows long life. ¶ And don't forget these customers are also in the market for the new farm grinder and Carborundum Niagara Scythe Stones.

Write for prices, discounts, trade helps.

The Carborundum Company, Niagara Falls, N. Y.

The UNIVERSAL Mayonnaise Mixer and Cream Whip

Makes perfect mayonnaise dressing in a fraction of the time required by the hand method. No special skill is required and any recipe may be used.

The UNIVERSAL Mayonnaise Mixer eliminates all difficulty in mixing the oil and egg while the salad is being beaten, as the oil cup is equipped with a valve adjustment which regulates the flow of oil from a single drop to as great a quantity as desired.

The dasher travels around the jar as well as revolving the blades and this double motion mixes whatever is in the jar more thoroughly and in less time than any other mayonnaise mixer.

These features alone make the UNIVERSAL Mayonnaise Mixer superior to any other on the market and are points which every housekeeper will appreciate.

The bowl is entirely open at the top and the inside is perfectly smooth with no grooves. It is not fastened to the frame and is easily removed, for cleaning, by loosening the thumb nuts at the sides.

When these thumb nuts are loosened the entire operating part may be removed from the bowl.

All metal parts are heavily tinned, thus insuring freedom from rust.

A large clamp holds the mixer securely to the table, making it easy to operate.

The UNIVERSAL Mayonnaise Mixer is remarkable for its simplicity of construction and the ease with which it may be cleaned.

No. 150. Mayonnaise Mixer. Mixing Capacity 1 Pint. Each $2.00

It may be used, with excellent results, for beating eggs, and mixing all light batters, and as a cream whipper it is unexcelled. A pint of pure cream, taken from the ice, can be whipped stiff in one minute and the whites of two eggs can be beaten stiff in less than two minutes.

The UNIVERSAL Mayonnaise Mixer is adapted to all mayonnaise recipes, preparing them with less work and in far less time than can be done by hand.

For prices, etc., write to your Jobber or direct to us.

UNIVERSAL

"GOLD COIN"

(Trade-Mark Reg.)

Wallboard

Advantages Over Plaster

Cheaper than efficiently applied lath and plaster.

Cleaner. No dirt and mess as with plaster, the stains of which frequently ruin floors.

Safer. There is no danger as with falling plaster, which yearly injures many people.

Requires no skilled labor to apply. Any man who is handy with tools can apply "Gold Coin" in a multitude of ways. It is a pleasurable recreation.

Applied in any season. Expert labor for plastering is difficult to obtain in small towns and still more so in the country. These worries and obstacles "Gold Coin" overcomes. It can be applied in mid-Summer or the depth of Winter without skilled labor.

Advantages Over Lumber

Cheaper in first cost and in time for applying. Absolutely no waste. "Gold Coin" is supplied in sheets 32″ or 48″, and in lengths 6′, 7′, 8′, 9′, 10′, 11′ or 12′.

Safer. Inasmuch as "Gold Coin" is a dense pulp board consisting of 3 layers board and 2 layers refined asphaltum, it affords better protection against fire than lumber.

More artistic. Endless decorative effects may be had with the use of "Gold Coin" and moulding. A 1″ half round for panelling or a wide and deep batten to produce appearance of heavy beam panelling.

Colors. With the use of "Gold Coin Tone" a flat oil finish in any conceivable tint is to be had. Write for our **Color Card.**

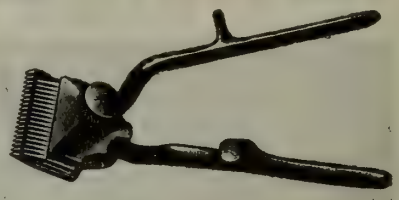
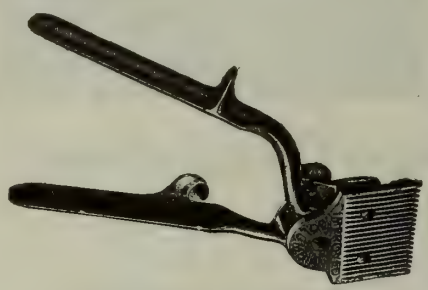
PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.



present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.



STANDARD No. 0, No. 1, and No. 2.
Retailing at about $2.50. High-class barber's clipper.

No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25.

You May Never Need a Pistol but ONCE

But when that ONCE comes to you your pistol should be the unfailing kind—a Colt.

Many people who have bought pistols for home protection have come face to face with a crisis only to find their weapons unresponsive. Many have fancied a crisis and found their pistols too ready, to their everlasting regret.

The COLT Automatic

when loaded and cocked is positively locked against unintentional discharge by the unique safety device in the grip. You must purposely **grip the grip** and pull the trigger. That's why "You can't forget to make a Colt safe." That's' why "The Colt fires the first shot first."

The Colt was adopted by the U.S. Army and Navy because of its "Marked superiority to any other known pistol."

Automatically Safe

New Machines with an Old Trade-Mark

Both are Cummer-Dowswell's

Always use C-D Wringers with C-D Washers. The Combination gives Unequalled Results.

The "MAGNET" is one of the easiest running and most convenient to operate hand washers of the many we have produced. It can be operated sitting or standing. The mechanism is attached to side of tub (instead of cover), and can be belted to either gas, gasoline, steam engine, windmill or electric motor power without any change to gearing. Cover can be lifted without removing belt or stopping power.

The "NEW CENTURY JUNIOR" is a swinging tub hand washer built on the well-known and time-tested NEW CENTURY principle, but without a rod up through centre, leaving nothing inside the tub but two rubbing boards.

Both have the same perfection in construction, materials, easy running and lasting qualities that have made our products known and used from Halifax to Vancouver.

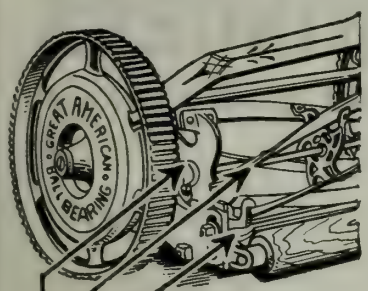
Time to Order

FREEZERS

Whether you stock the LIGHTNING, GEM or BLIZZARD, you get a Freezer that has made good for more than a quarter of a century—one that has won its way into the hearts of the housekeepers by service that satisfies—backed by quality that creates confidence in both merchant and manufacturer—one that's well advertised and in demand — one that brings trade and helps you keep it.

The BLIZZARD, being a low-priced Freezer, makes a good running mate with either the GEM or LIGHTNING. Now is the time to place your order. Shipment can be made any time you specify.



BE SURE to INCLUDE the LIGHTNING ICE CHIPPER No. 1. You can sell one with every Freezer. It chips a block of ice into small uniform pieces in a jiffy, just right to pack closely around the can and shorten the time of freezing. So much easier to make Ice Cream. They help the sale of Freezers.

Your Jobber will Supply You.

ST. CATHARINES, ESTABLISHED 61 YEARS ONTARIO

Hardware Dealers—An exact duplicate of the ad. below appears in the April 29th and May 6th issues of "Canadian Machinery." Tear off here and paste on your window with a display of Starrett Tools.

Starrett Vernier Calipers

Where Used

Starrett Vernier Calipers should be used by high-grade machinists and toolmakers for accurate work on all measurements where a micrometer cannot be conveniently used. They are equally accurate for outside or inside measurements, and may be used on a wider range of work than can a micrometer.

Superiority of Graduations

In using the Vernier for readings up to .001 of an inch the accuracy of the measurements depends on the graduations of the instrument. The Starrett graduations are more accurate than those obtained by any other process—they are cleaner, finer, and sharper than on other instruments. Examination under a microscope will prove this assertion. Our secret etching process produces this result.

In Plush-Lined Cases

To keep the vernier safe from rough handling and from contact with tools or other objects which might scratch it, we furnish with each instrument a plush-lined wooden case, very attractive and a perfect protection.

Prices

The prices for Starrett Vernier Calipers, including cases, are as follows:

4″—$13.00
6″— 15.00
9″— 18.00
12″— 20.00

"EASTLAKE"

The finest shingles that ever shed water off a roof!

Sell them for Houses! Sell them for Barns!

TINSMITHS—Let this fact sink in—and profit by it

You can to-day buy and lay Galvanized "Eastlake" Shingles on house roofs, ADDING A GOOD ROUND PROFIT, for practically the same money as a carpenter charges for wood shingles

DO YOU REALIZE WHAT THIS MEANS? ONE THING THAT IT MEANS IS

THOUSANDS of DOLLARS' PROFITS to TINSMITHS!

Will you investigate? Will you write us for proof of our statement? Will you ask us for a supply of advertising literature to help you get your share of these profits?

Note these arguments in favor of "EASTLAKE" as against wood shingles:—

First cost practically same—Last 3 or 4 times as long—Fire and spark-proof—Lightning-proof—Increases property value—Reduces insurance rates—Benefits community by reducing fire hazard—Sheds clean rain-water and more of it—etc.

DON'T YOU THINK YOU CAN BEAT THE WOOD SHINGLE MAN WITH ALL THESE ARGUMENTS IN YOUR FAVOR?

DO IT NOW! WRITE US AT ONCE AND GET STARTED

Tell Your Customers

to beautify their homes by fencing the lawn and garden with Peerless Ornamental Fence.

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

PEERLESS

Ornamental Fencing

is made of strong, stiff, galvanized wire that will not sag In addition to galvanizing, every strand is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless Ornamental Fence is made in several styles. It's easy to erect, and holds its shape for years.

Send for free catalog. If interested, ask about our farm and poultry fencing. Agents nearly everywhere. Agents wanted in open territory.

GOODELL-PRATT

1500 GOOD TOOLS

No. 306 Bench Grinder with Lathe Attachment

Partial List of GOODELL-PRATT TOOLS

Breast Drills	Hack Saw Blades and Frames
Hand Drills	Screw-Drivers
Chain Drills	Braces
Bench Drills.	Bench Grinders
Vises	Precision Tools
Levels	

This Bench Grinder with a lathe attachment is designed for the man who wants to do occasional odd jobs of light wood turning. It will handle all kinds of work up to 5 inches in diameter and 12 inches long.

The grinder can be clamped to any ordinary table or work bench and the treadle adjusted to the length. The bench grinder from which the lathe attachment can be removed if desired, is similar to our No. 109, a very high-grade tool with machine cut gears guarded to prevent pinching the fingers or tearing the clothes.

The alundum wheel which is made especially for Goodell-Pratt grinders is 4 inches in diameter with a 1 inch face. Combined with the nut which holds the grinding wheel is a spur denter for the lathe. The tail stock has a spindle with a center on each end so that it is reversible. The adjustable hand rest is extra long.

How many can you sell for $7.50 apiece?

CAMERON AND CAMPBELL, TORONTO

OF late a few so-called hand lanterns, equipped with 1½ volt lamps, have appeared and the public was led to believe that any ordinary No. 6 cell would give a strong, steady light and that it would give forty to fifty hours' steady service. Some claimed even as much as seventy-five hours. Our extensive tests proved only 10% of these claims. We have refrained from bringing out a similar lantern to burn on one No. 6 cell, knowing how useless it is for a practical purpose.

After extensive experimenting we have succeeded and have produced our new RADIO NITROGEN BATTERY, which will serve the purpose and give the desired results. The illustrated article used with our 1009 battery and our FRANCO lamps opens a new field in miniature lighting.

Future of Mail Order Houses

Will Mail Order Houses Flourish in the Future as They Have in the Past?—Why Mail Order Houses Succeed—Their Opportunities Compared With Those of Local Merchants.

By DUNCAN G. GEORGE.

WILL mail order houses continue to grow in the future as they have in the past? This question is being discussed to a considerable extent at the present time, and especially during the past few weeks following an announcement of the failure of a mail order concern which started business in Canada about a year ago.

There are many sides to the much-debated mail order question. It must be admitted that during the past twenty years mail order houses in America have met with phenomenal success, and have secured huge volumes of trade over the heads of local merchants. During recent years many retail merchants, especially those in the smaller towns, have been complaining bitterly about the mail order menace—about the inroads of the mail order houses on the trade of the small town merchant.

What is said to be the first mail order house in America was started in Chicago in 1872 by Montgomery Ward, who was then a young man, and who had had some years' experience as a retail salesman, and had traveled for a time representing a wholesale house. During the early 70's there grew up an organization of American farmers called the Patrons of Husbandry. This organization conducted a co-operative buying system such as is being carried on in some parts of Canada at the present time. The locals of the organization were called Granges. Montgomery Ward made arrangements with a number of the country granges scattered throughout the Middle West to act as their buying agent in Chicago.

Gradually a large business was worked up, but in the course of time—and this usually happens in co-operative schemes of this kind—the buying features of the granges did not prove satisfactory to the farmers, and Montgomery Ward changed his position from that of a buyer for the granges to that of a buyer for individuals. At first, he did business on a commission basis, and gradually worked up a connection. In time he began to carry a stock, from which he filled orders, and so arose, it is claimed, the first consumers' mail order house. There are now over 1,200 mail order concerns in the United States and a score or more in Canada.

Montgomery Ward's present catalogue consists of about 500 pages, and the annual sales amount to about $50,000,000.

Possibly the chief of present-day mail order houses is that of Sears, Roebuck & Co., Chicago, a retail concern now doing business that exceeds $100,000,000 annually. This immense concern had a very small beginning.

R. S. Sears, the founder of the concern, and whose death took place a short time ago, was a station agent in the latter 80's and early 90's in a Minnesota town. One day a package of watches arrived C.O.D. for a local jeweller. The local jeweller refused the goods and the shipper of the watches made a proposition to Sears, the station agent, offering him a commission if he would dispose of the watches. Sears sold the watches in a very short time, and the watch concern wrote back suggesting that Sears sell more watches for them in the same way.

Sears, it is said, made about two dollars' profit on each watch, and found the watch business so satisfactory that in a short time he gave up his job as station agent and started a mail order

The above cut shows a view of a Belgian hardware store. The photograph from which the above reproduction was made was sent to the Editor of Hardware and Metal by Geo. E. Pearson, associate editor, who is at the front with the Princess Pats. Mr. Pearson states that many of the Belgian merchants are doing business under shell fire and that they are stocking English and American-made goods to meet the demands of the British soldiers. Mr. Pearson has been through some heavy fighting and was next to the late commanding officer of the Princess Pats, Col. Farquhar, when the latter was fatally wounded.

watch and jewelry concern. The business was first started in Minneapolis and moved to Chicago in 1895. Sears continued in business until 1906, when he dropped out and a former employee took charge. Since that time the business has grown at a rapid rate, and, measured by its sales, is now one of the largest retail concerns in the world.

The total mail order business of the United States, exclusive of mail order sales by regular stores and small mail order concerns, is estimated from $250,000,000 to $500,000,000, or about 4 per cent. of the business transacted through retail stores. It is estimated by men who keep closely in touch with conditions that in the country districts the mail order business averages 8 or 10 per cent. of the total.

The readers of Hardware and Metal have been told before of the humble beginning and the tremendous growth of Canada's largest mail order concern, one that in volume of business rivals many of the largest mail order houses in the United States. The activities of this concern—a concern that tries to please the buying public and give the public a square deal—extend into all parts of Canada, and more especially into the rural communities where its percentage of sales run very high. Now it is generally admitted that the small town dealer—the dealer who caters to the small town resident and the agriculturist—is the one who suffers most from mail order competition. True, the large town and city dealer also loses some business to the mail order house, but not to the same extent as the small town dealer.

Why do the mail order houses succeed over the small town merchant? It is frequently asserted that the mail order houses succeed for four reasons:

First—It is often claimed that the mail order house can retail the goods by mail at less expense than the retailer can over the counter.

Second—The big mail order houses have much greater buying power than the small town merchant, and because they under-buy they can under-sell.

Third—The advertising and selling methods of the mail order houses are much more efficient than those of the small town merchants.

Fourth—The mail order houses, having such a huge outlet, can carry a greater assortment of goods than the small town merchant. Let us study these points one by one.

First, let us compare the percentage cost of doing business of the mail order house and of the small town merchant. Is the mail order house method more economical over the regular methods? Figures from authoritative sources indicate that the mail order cost of doing business, based on figures supplied by ten large mail order concerns, run from 16 to 26 per cent. of sales, the average being 22 per cent. of sales.

Taking 22 per cent. as the average cost of doing business by the mail order method, there must be added other items of expense, such as expense of sending the letter and money order, interest on money during the wait for the goods, and in many cases transportation charges. It is estimated that this average transportation and other expenses amount to about 10 per cent. of the order. Thus, without considering net profits, the cost of 22 per cent. is raised to 32 per cent. of sales. Now, the bulk of the goods sold by the mail order house can be handled through the regular channels of distribution—the jobbers and retailers—on a margin of 30 per cent. of what the consumer pays. In the expense of distribution the mail order house has no advantage over the regular retailer who conducts his business in a business-like manner.

Let us now take up the second assertion. The mail order houses are heavy buyers, and they undoubtedly get better prices on some lines than the average town merchant. The mail order house very often takes the whole output of a factory and makes big contracts on terms very favorable to the mail order house. It must be admitted that the mail order houses get close prices on some lines, and the chief remedy from the retailer's standpoint is for the latter to study buying problems more closely. Too many retailers take it for granted that the price they are paying is the lowest going, when, as a matter of fact, by making inquiries and studying the market they could secure much better prices on many lines. It has been very often suggested that retailers through associations demand prices as good as those given to the mail order houses, and often tried, but the retailers have not met with much success in this respect.

The mail order house with its tremendous buying power has an advantage over the small retailer in the buying of some lines; but have you ever noticed how seldom the mail order house uses this lever? It is true that the mail order house has leaders, but if you go through the mail order house catalogue you will find (this refers to hardware lines in Canada) that in the majority of cases the retail hardwareman can sell the same goods at mail order prices and still obtain a good margin of profit.

The third question is that of advertising and selling methods. It must be admitted that the mail order houses are using superior methods of advertising and salesmanship than the average small town retailer, and although the mail order houses secure huge volumes of business, it is a wonder that with their business-like methods they do not get more business. Their advertising is scientific, because it does just what they want it to do—and there is no mystery about their methods.

Some small town merchants and their salesmen are too far behind the times in advancing the idea of service, and in so far as this defect is due to laziness, the trade deserves to be lost, for the time has long since arrived when every retailer and retail salesmen should make a study of advertising and selling methods, and in this way train himself to be efficient in his calling. The small town merchant, if he wishes to hold the trade, must make his store and service to fit the public and get away from the idea that the public will fit itself to his store.

The foregoing is not meant as a reflection on the scores of small town merchants who are successfully combating mail order competition by employing up-to-date methods, and who have fine stores, of which they may be justly proud. It is meant for the merchant who is waiting for some miracle to suddenly put the mail order house out of business and restore his former trade to him—a miracle which will never be performed.

The fourth reason mentioned is that the mail order houses offer special inducements in the form of low prices on certain goods—using them as leaders. Retailers admit that this has brought business for the mail order houses. There is nothing to prevent the retailers from using leaders, and many successful retailers are doing so.

As to the future of mail order houses, it is hard to tell whether they will win or lose ground. Many merchants claim that the mail order houses will not continue to grow in the future as they have in the past. Personally, I believe that the mail order houses will continue to grow, provided they continue to sell service, sell good merchandise which they will guarantee, and treat the public right, unless within the next few years there is a more determined effort on the part of small town retailers to offset mail order competition and to create a better feeling among agriculturists toward the home community.

Mail order trade is largely country trade. The country dweller in this country and in the United States gives his trade to mail order houses largely because he has little or no interest in his nearest town, and this has been caused to some extent at least by the apathy of small town merchants.

In European countries mail order concerns do not flourish as they do in America. The farmers in European countries, such as France, Austria and Ger-

SHOW CARDS THAT YOU CAN MAKE

using illustrations from last weeks Hardware & Metal

by R. T. D. Edwards

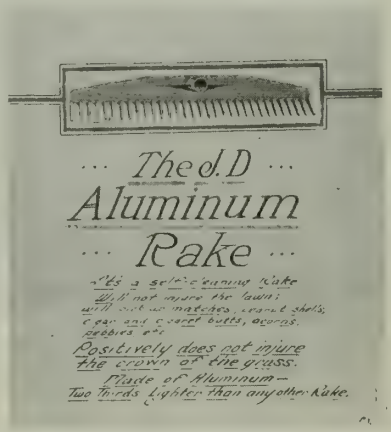
IN a recent issue of Hardware and Metal I showed how attractive show cards could be made from advertisements which appeared in a previous issue of Hardware and Metal, and submitted four suggestions for cards featuring the following lines:—Lawn mowers, lanterns, breast drills and extension bit holders.

The illustration used in preparing the above show-card was taken from an advertisement in last week's issue of Hardware and Metal.

In this article I will show three show cards, in the preparation of which I used illustrations from last week's issue of Hardware and Metal.

The card showing the aluminum rake can be easily prepared. The original measured 11 x 14 inches. The illustration appeared in the advertisement of the Doust Specialty Co., Ltd., on the inside front cover of last week's issue of Hardware and Metal. After cutting the illustration from the advertisement and placing it on the card, I surrounded it with a grey outline. This was done with a small brush. The grey color was made by mixing black and white. All the lettering on the card was made with a coarse, ball-pointed stub pen. It will be noted that the three top lines, as follows: "The J. D. Aluminum Rake," are much heavier than the reader. This was accomplished by placing greater pressure on the pen.

The Gas Heater Card measured 11 x 14 inches. The illustration of the gas heater was taken from the advertisement of the Jas. Morrison Brass Mfg. Co. on page 16 of last week's issue of Hardware and Metal. The ruling on this card was made with a stub pen.



The two top lines of reading matter were made with the same pen as used in making the rule lines. The heavy lettering, "Stack Gas Water Heater," was made with a No. 6 red sable brush. The remaining lines were made with a heavy round writing pen.

The Brush Card is a very timely one, especially in view of the fact that we are now in the midst of the painting season. The brush illustrations used in the preparation of this card were taken from the advertisement of Meakins & Sons, Ltd., on page 12 of last week's issue of Hardware and Metal. The card measured 10½ x 13 inches. In preparing this card—an easy one to make—I first cut the illustrations from the advertisement and placed them on the sheet of white card board, taking care that they were pasted on in such a manner as to present a uniform appearance. On this card I used a stub pen and a round writing pen, using the stub pen in writing the top line and using the round writing pen for the balance of the lettering. The outer line on the card was plain grey, and was made with a small brush.

The illustration used in preparing the above show-card was taken from an advertisement in last week's issue of Hardware and Metal.

This card can be easily made by any clerk who will follow the suggestion shown on this page. In making the three cards the following materials were used: White cardboard, photo. paste, cardwriters' black, cardwriters' ink, ruler, No. 4 and No. 6 cardwriters' brush, red sable brushes, scissors, stub pen, round writing pen. The cards shown here are very seasonable, and can be made up in a short time at very little cost. They would certainly add to the value of any window display, or could be used as show cards in any part of the store.

The illustration used in preparing the above show-card was taken from an advertisement in last week's issue of Hardware and Metal.

E. R. Paine, Hardware.

Alberni, B.C., April 12th, 1915.

The MacLean Publishing Co., Ltd., Toronto.

Dear Sirs,—Please find enclosed my check for $2.00, my subscription to your valued paper, Hardware and Metal.

It is with pleasure I look forward to each copy of same, as it comes to hand and I consider it great value for the money.

Yours truly,

E. R. PAINE.

View of interior of the C. A. Phair store in Lillooet, B.C., showing goods on the counter put up for miners and tourists—trophies of the hunt on the floor. Lower cut shows exterior of the Phair store, and the one in the upper right hand corner freight teams coming into town. Since the lower picture was taken the store has been enlarged to twice the size.

Old-Time Business in British Columbia

A Most Interesting Article About Lillooet Among the Mountains and How Merchandising Was Done There a Few Years Back—Indians, Miners and Hunters Chief Sources of Business—Modern Equipment Replacing the Old.

Written by A. W. A. PHAIR, for Hardware and Metal.

LILLOOET, a pretty little village of a couple of hundred persons, is by nature a distributing centre among the Rockies in British Columbia. It is built on a bench on the left bank of the mighty Fraser River about 200 miles from its mouth and where Cayoosh Creek joins and where the Pacific Great Eastern Railway (some day the main branch of the Grand Trunk Pacific) is to cross the Fraser. The Bridge River Valley, a gold mining centre which promises to surpass anything in British Columbia, is tributary to Lillooet, and many acres of the finest apple and peach lands lie in this valley. Our climate cannot be surpassed and is acknowledged by all who have visited here to be all that was desired. We are not too far from the coast to have our winters moderated by the influence of the Japanese current and our hot summers are helped out by an occasional rain storm. At the same time our mountains rising to eight and ten thousand feet save us from the excessive rainfall of the western slopes of the Coast Range.

Trade of Miners and Hunters.

Mining and big game shooting have helped to keep Lillooet up for many years. Lillooet is truly a sportsman's paradise, as deer, mountain sheep, grizzlies, mountain goat and other game are found in great numbers. Fish are also to be found in countless numbers in nearly all the lakes and streams. For years sportsmen from all over the world have hunted here. One of the first sportsmen to bring Lillooet to the notice of outsiders as a sportsman's paradise was Admiral Sir Clum Seymour, commander of the Pacific fleet about 1885, who hunted here with Arthur Martley, one of Lillooet's first guides. They killed somewhere about 13 rams, some of which must have had record heads, as Rowland Ward had the measurements of one or more in his book of record heads. Some ten to fiftten parties have been hunting here yearly and there is still the best of sport to be had. In fact, mountain sheep are on the increase since the Government have been giving a good bounty on golden eagles, It would pay the Government to even do more towards protecting game, although they are now doing quite a bit.

Lillooet has had very many ups and downs, the ups being mostly mining booms, and I should think people could be found in nearly every mining camp who have been here at one time or another. First there was the famous Cariboo gold rush in 1858. Lillooet was then a town of some 6,000, and was figured as the starting place for the Cariboo, as all mile posts to this day along the Cariboo Road are figured from here. In 1885 very rich placer diggings were discovered on Cayoosh Creek, but the Chinese were the only ones that benefited by this and it is estimated that they sent millions of gold to China. Rich quartz was found in 1896. Gold

dredging was tried on the Fraser river for several years by both English and American companies, but being so far from transportation it made operating expenses too great, besides there was a lot of mismanagement in most cases. Several big enterprises are now under way. Construction on the P.G.E. is about through and now that this boom is over we have a short space in which to consider what is happening. Before spring passes some of the oldest towns in B.C. will for the first time hear the train's whistle. No one can tell the changes that are to be wrought in this valley and central B.C. by the advance of civilization—the advent of the "iron horse."

18 Years a General Merchant.

Old trading customs which originated with the Hudson's Bay Co., will certainly be a thing of the past. Having spent the greater part of my life here and 18 years or so in the general store business, I have noticed these old customs gradually dying out and business becoming more up to date. The old type of Indian is disappearing very fast and "fire water," and disease are quickly killing out the younger generation and the mortality amongst infants is very great. It is not very often now that we are reminded we forgot to put in a spool of "give away" thread, a needle and a few buttons with a purchase of calico. Nor do Indians sit around on the floor near the stove smoking ca-nic-a-nic for hours before making a purchase. The odor from ca-nic-a-nic (the native tobacco) soon reminds a person of an Indian habitation that hardly fits in very well in a grocery store.

July 1 is still the great day with the Indians and is looked forward to by all. They come in for hundreds of miles and this is the one day that the Chilcootins, a half savage race still living by hunting, visit town and trade a few skins for sugar, tea and cartridges. Horse races, foot races and an exciting tug of war—Indians vs. Whites are indulged in—the Indians generally being victors in the tug of war. Last year for the first time moving pictures were taken of some of the events, the most interesting being the "Klutch Race," Indian women riding race horses. They are good riders and make the horses go for all they are worth.

Reputation as a Medicine Man.

For years our store was a low ceilinged room, 27 by 15, with small windows and a big verandah in front; a warehouse 9 x 27; a small cellar, an oil house, and a room for the manager at the back. A counter ran down one side and another along the back end. The shelves were very narrow and ran down one side and end of the room. A few gaudy prints, shirtings, white cotton, bright colored shirts, overalls, blankets and a few other necessities constituted the dry goods stock, and a few hat boxes filled the top shelves. In one corner at the lower end there was a small bar—a few bottles of the best brands—and a barrel of rye in the cellar made up the liquor stock. The remainder of the shelves were filled with groceries, a little hardware and some patent medicines. A merchant gained a great reputation among the Indians as a medicine man, and Perry Davis' Pain Killer, Jamaica ginger, and a few pills had to work wonders.

A big box stove about four feet long was set near the middle of the room and a chair and a bench or two were arranged near this for the visitors (the village loafers). Every evening saw a

(Continued on page 36.)

MERCHANTS HERE PURCHASE GOLD.

By A. W. A. Phair.

During the spring the Indians of Lillooet engage in mining on the Fraser River and some make as high as $2 a day. All make from a dollar up, which is a great thing for them these times.

One has just come into the store and asked me "Tum Tum Sclow?" (meaning do you want to buy any gold to-day). The mining only lasts a few weeks, after the ice goes out and before the water rises.

At one time all the banks and bars of the Fraser River were rich in gold, but all that could be reached was mined out long ago. It is only below the low water line that much gold can now be got. Some have long-handled shovels, others put in wing dams. They fill a pan with earth and putting it into the water shake it around till all the earth and stones are washed out of the pan. The gold being heavy, drops to the bottom of the pan. There is a great art in handling the pan or the gold will be washed out of it as well as the gravel. Most of the gold comes in tiny flakes, but pieces have been found weighing 8 or 10 ozs., which would mean $128 and $160 respectively—a pretty good day's work.

Top picture is view of Lillooet, B. C., a little town among the mountains, and the one below is that of a fruit farm on the Fraser River. A close inspection of this cut will show a few trees in bloom, and picture was taken in April.

These cuts show chief sources of retail business in Lillooet, B.C. The one above is that of pack horses off for the Big Horn country; lower one is "Little Blackwater," where fishing is said to be fine—no trick to catch a dozen 3-lb. Rainbows in half an hour.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, MAY 1, 1915 No. 18

WORKING out problems.—Don't look for the answers in the back of the book, work out your own problems then you will know "why."

* * *

IT IS announced that an increase in the freight rates from the far East is about to be put into effect, the advance being in common with generally higher transportation charges prevailing on the ocean services. The hardware trade will be particularly interested in the increases as affecting bristles, camphor, hemp, ingot, antimony, lacquered ware, matting and tin. The rates on these articles and commodities will be about 20% higher.

Spelter is High

CANADIAN manufacturers who use spelter, and retailers who follow the metal markets have watched with interest and in some cases a disturbing sense of expectancy the recent movements in the price of spelter. The market has been very unsettled for some time past and prices have gradually risen until they have reached a record price. Spot stocks in many Canadian centres have almost disappeared and there is a possibility of some manufacturers being held up owing to the scarcity of spelter. London and New York markets have advanced rapidly and the market is strong with an advancing tendency. The American Metal Market, New York, in commenting on the spelter situation this week, says:

"The feature is a heavy demand for deliveries as far ahead as November, the basis of which is the demand for war orders into which spelter enters largely. The demand for war munitions is increasing every day, and is expected to reach much higher proportions in the future than anything that has yet been experienced.

"The fact that buyers are covering orders up to almost the end of the year, and even then with some difficulty, gives the market an appearance of strength such as has not been experienced at any time during the recent sensational advance. If indications go for anything, spelter, high as it is, will go still higher."

Advances have already been made on galvanized hardware goods and in all probability manufacturers of some lines will be forced to still further advance prices.

Mail Order Craze

ELSEWHERE in this issue appears an article on the future of the mail order business. The article deals with many phases of mail order selling and should be read by every retail merchant. If any merchant holds opposite views to those expressed in the article, he is requested to communicate his views to Hardware and Metal.

Retail merchants can do a great deal in the way of curtailing the operations of the mail order houses. If the merchants advertise intelligently in the local papers, it will pay them and at the same time gain the support of the local publisher in the movement towards creating a more loyal feeling toward the home community. The spirit of "Home Loyalty" is being encouraged in many sections and the following notice which has appeared in many rural newspapers will show how the small town publishers are taking up the matter. The following is from a Vernon, B.C., paper:

"It is worth while to stop and think seriously what this sending of money to mail order concerns means locally. It means poorer schools, poorer roads, higher taxes, unemployment. To buy cheap things cheaply never did and never will mean prosperity.

"There is involved in this thing of sending money to large cities for goods which can be purchased from the home merchant, the question of local prosperity. It is a poor policy to tear down the business stability of the home town in order to swell the prosperity of the large city.

"In the long run there can be no gain to anybody in patronizing foreign business concerns at the expense of local concerns. If local merchants cannot get sufficient business to pay the expense of operation, it means that smaller stocks will be carried and that the range of selection will be restricted. It means that fewer clerks will be employed; it means that fewer houses will be built or rented; it means that the growth of the local town or city will be retarded. This means in the long run that the amount of taxes which the rural districts will have to pay will be increased or that the public highways and other conveniences which make for better things will be sacrificed.

"This thing of sending out money in large volume which should be spent at home always strikes back some way or other. The school teacher may send away for her gowns; the boarding house keeper sends away for her groceries; the landlord sends away for his needs. Then comes the cry that reven-

ues from local taxation because of decreased business are not adequate to meet expenses. Then school boards are confronted with the necessity of cutting salaries; the patrons of the boarding house become fewer; the sign 'for rent' is seen conspicuously posted on buildings.

"The whole question of local betterment is involved in this foolish mail order craze. If a community is foolish enough to spend its money abroad which should be spent at home, then that community must satisfy itself with poorer schools, churches, roads, theatres, mean-looking towns, everybody in debt, mortgages foreclosed and general business depression.

"If the people would cut out the mail order nonsense for six months, there would be a local prosperity which would surprise everybody. When all the people learn that their own community is most worthy of consideration, when they learn the folly of building up great cities at the expense of their own local towns, then they can be called rational, and not till then."

Orders for Shells

MANY Canadian machine shops are busily engaged in filling shell orders—in fact there are some shops dependent upon war orders entirely for business at the present time. The industry is an important one, in fact one of the most important in Canada to-day—important not only because of the rapidity with which it has developed, but because it brings a very material cash income at a time when it is much needed. Information was recently given out at Ottawa to the effect that to date orders for shrapnel amount to nearly $80,000,000 and that factories from one end of Canada to the other are turning their energies to the manufacture of war munitions.

The Financial Post, in referring to the shell business, says in part:

"From an economic standpoint the shell industry particularly helps the industrial outlook because of the fact that Canada produces practically all of the raw materials, and that a large proportion of the total amount involved is represented by labor. The shell committee states that, with the exception of copper, the materials are mined and smelted within our own country.

For the immediate future the development of the war missile industry seems to be limited only by the capacity of the manufacturing establishments to turn out the goods. In addition to the British orders there are big calls from Russia, and much business is being turned to the United States from the fact that Canadian plants have all the orders they can execute within a reasonable period—and time, of course, is an important factor.

The shell committee proposes to go further. Investigations are now being made in connection with the supply in Canada of propellants and high explosives and with prospective orders from the Russian Government for rifles and ammunition. Cordite and powder are already being manufactured.

The war orders are certainly helping Canadian industry at a time when that help was needed. There is, however, one feature which should be carefully considered, and that is the overhead expense. It is not to be expected that orders for war munitions will continue indefinitely, and the cost of equipment must, therefore, bear a direct relation to the enterprise. Machinery and tools are costly, and the manufacturer who proposes to make war missiles must figure that there will be sufficient profits on the orders in sight to compensate for the necessary changes and equipment."

The Saskatoon Convention

SASKATCHEWAN merchants have a duty to perform in attending the provincial convention of the Retail Merchants' Association, which opens in Saskatoon on Tuesday, May 11. Officials of the association have been working tooth and nail to make this meeting a success. They have bent their efforts to the provision of a programme that when deliberated and acted upon will produce vast benefits to the trade of that great prairie province.

Apart from the legislative matters, there will be a couple of addresses by Frank Stockdale, of Chicago, on "Efficiency Through Co-operation" and on either "Keeping Up With Rising Costs" or "Salesmanship." These addresses alone will undoubtedly be worth the time any merchant spends in attending the convention. These are questions which we cannot learn too much about and we should hear more of them at these annual conventions. Hardware and Metal believes that while legislative matters are important—and some of them exceedingly important—yet they should not occupy all the time. At every convention there should be several addresses on business topics by prominent men in the trade and these should be brought on early on the programme—not after half the delegates have left to catch the trains.

It is to be hoped that the merchants of Saskatchewan rally to the call and that there will be a big gathering at Saskatoon on May 11, 12 and 13.

Bankrupt Sales

SHOULD signs announcing bankrupt sales be allowed?

This is a question which the retail merchants of Saskatchewan are discussing to-day and which they have carried to the Government of that province. They want a law passed prohibiting such signs and have asked for legislation covering their request.

While this may appear to be a radical move, yet there is undoubtedly some reason for it. A bankrupt sale is the legacy a business failure leaves behind. It means that a stock of goods is—in most cases—being sacrificed in price and this injures the trade of the legitimate retailer who has paid a hundred cents on the dollar for his goods and who is struggling against competition to get his money and a living out of the business. The first thing he knows someone comes along with a bankrupt stock and loads many of his customers up with goods they do not want or which will require a long time to consume. Cash has to be paid for such goods. This means that the legitimate dealer loses trade through no fault of his own and he has to wait longer for much of his money.

A large manufacturing concern selling goods all over Canada told the writer recently that in case of a dealer going bankrupt they took back all their unsold goods from his shelves and allowed the creditors a hundred cents on the dollar for them. One reason for this policy was to prevent these goods from being sold at cut prices which they claimed tended to demoralize the remainder of the trade in the locality. If every house did this there would be few bankrupt stocks on the market.

FUTURE OF MAIL ORDER HOUSES.

(Continued from page 29.)

many, live largely in the villages, and their interests are village interests. They go out to the land to work, not to live. Their interests are village interests. They get together with the retailers on matters of education, religion, politics and health, and they also get intimate with the retailers on matters of trade. You can't do a mail order business with farmers whose interests are so closely identified with those of the small town or village merchants.

In Canada and the United States conditions are different. The farmer takes very little interest in the city or town schools, churches or politics. Taking no direct interest in the affairs of the small town or city, the farmer finds it quite easy to send to the mail order house for his goods. The mail order catalogue is fascinating, and the descriptions of the goods, together with illustrations and prices, make a deep impression on the farmer and his family. Farmers should be made to realize that their interests and the small town merchants' interests are identical. They are inter-dependent. The farmer of to-day wants to enjoy more social life than the pioneer farmers. With a little effort on the part of small town merchants the farmers could be made to take a greater interest in the welfare of the small town. The farmer needs the small town and the small town merchant needs the farmer's trade—but the small town merchant cannot expect to get the farmer's trade on the grounds of friendship alone. Business is business, and the average farmer is a shrewd business man, and studies the markets to an even greater extent than many of the small town retailers.

The only small town merchant who needs to fear mail order competition is the merchant who is inefficient. If mail order competition is going to be met and eventually overcome the merchant must educate himself and his sales-people; he must buy and sell intelligently; he must study the markets, keep his stock up-to-date; he must advertise intelligently. To survive, he must meet mail order competition under equal conditions, and he can if he wants to. If he cannot meet mail order competition, he will be bound to lose a good portion of trade.

If your community has the mail order habit, why not get busy with your fellow merchants and take steps to meet the competition. The retailer has many advantages over the mail order house.

Regarding community habits, I am going to quote an editorial that appeared in Hardware and Metal some weeks ago:

"Be loyal to your own community," is a slogan that has been taken up by a large number of retail merchants throughout Canada. Movements of various kinds have been undertaken to impress upon the public the importance of supporting the home town or rural community. During recent years a great many communities have developed very bad habits. People in these communities have apparently forgotten that the country and town are inter-dependent. Merchants in many instances have also lost sight of this fact, and the result has been that many communities have developed the mail order habit to the detriment of the communities and to the rural towns. The small town merchant and the farmers should get closer together. For some years past they have been drifting apart. The existence of the small town retailer is being threatened by the mail order peril. Why not introduce the get-together-habit. Both the farmer and the small town merchant will benefit. Communities are like humans; they get habits. Each community makes its own collection, selects the particular kind it likes. This makes it a peculiar place—as the phrase goes—"gives it individuality, really makes it different from the rest. Now the character of a community—whether it is good or bad—depends on the kind of stuff it packs into its habit trunk.

Furthermore, communities sometimes get chronic. They get "sot in their ways." The habit rut gets deep. Judgments about these things get twisted. Ambition gets tired and quits. Whatever the community is it stays until it begins to back—back perhaps to the condition of that New England rural community, which finally raised two crops a year—"huckleberries in summer and bell in winter."

OLD-TIME BUSINESS IN BRITISH COLUMBIA.

(Continued from page 33.)

goodly crowd of the faithful, who spun yarns until the manager started to pull the blinds down at 9 p.m. Then all had a drink and departed.

Much Was Expected.

We also had the post office, but luckily the mail only came in once a week. It was a wonder how such a varied stock could be carried in such a small space and kept so things could be found. One man attended to everything. Then, as now, we were supposed to have anything a person might think to ask for—and one might think it wonderful how very seldom we were out of what was asked for.

But a merchant carrying all the business in his head soon got to know just about how much of each article was needed, and what people are going to ask for a year ahead, as the population changed very slowly. Now and then when a new bunch of people came in whose tastes were different from the old times, we were stuck for a while.

The Old Bookkeeping System.

Then there was the old journal system of entries and lots of them, too. Anyone that was good, paid up once a year, or once in six months and those that were bad didn't pay at all, but somehow or other the business seemed to exist.

Some 15 years ago when I took the business things were quiet. There were eleven stores run on about the same principles. Travelers found me an easy mark, and I soon had all kinds of goods and all kinds of accounts to pay. Thanks to the trade papers, I saw that a tight system of looking after accounts was the only one, so gradually credit was improved with us. Although many of our old customers got sore at these new methods, we have had to enlarge our store three times during the past few years. But it was only the last few years that we put in a cash register, silent salesmen, account registers, etc.

CATALOGUES AND BOOKLETS

Stratford Mfg. Co. Catalogue.

The Stratford Mfg. Co., Stratford, Ont., have issued catalogue No. 5, featuring their lines of kitchen cabinets, tables, ironing boards, clothes dryers, bake boards, gliding settees, lawn swings, ladder chairs, garden seats, park seats, folding chairs, step ladders, camp stools and cots, sectional ladders, trestles, etc. The catalogue which contains 36 pages is attractively gotten up. Many of the illustrations are in colors.

S. A. Daniell, Ltd., Catalogue.

S. A. Daniell, Ltd., Lion Works, Edward Street, Parade, Birmingham, have issued an 84-page illustrated catalogue and price list, featuring their lines of engineers', gas fitters' and smiths' screw stocks, dies and taps, wrenches, reamers, twist drills, ratchet braces, tube cutters, tube wrenches, tube vises, joiners' sash and flooring cramps, engineers' vises, pulley blocks, pliers, bench screws, brake screws, and bottle jacks, fly presses, stamped metallic labels, etc. The catalogue is splendidly illustrated and specifications are given for each line featured. The firm also has list S.m 2, of screwing machines and accessories for iron gas tubes and bolts.

How Hardware Goods Are Made

Fourth of a Series Showing How Hardware Goods are Made — Describing the Care Taken in Manufacturing High-Grade Saws—From the Steel to the Finished Product — Care Taken in Inspecting the Saws Before Packing.

THIS article, the fourth of a series on "How Hardware Goods are Made," prepared especially for the readers of Hardware and Metal describes the process of manufacture of hand saws. Hardware and Metal is indebted to the Simonds Canada Saw Co., Ltd., Montreal, Que., and Fitchburg, Mass., for the information contained in this article and also for the illustrations. The hardware clerk in showing a hand saw to a customer does not always realize the amount of labor and experience that has entered into the saw—that is, if the saw is a good one—made by a reliable maker.

The carpenter who guides a hand saw through a board, cannot always explain why it glides into the cut so easily. Perhaps he does not stop to think that into the making of the tool has gone the skill and energy of an army of workmen.

The making of the hand saw begins with the steel. The bars of Swedish iron are sheared into small pieces, and carefully weighed into the crucibles with the carbon and alloys. These are fused in closed pots for about four hours, at a temperature of about 3,000 degrees F. The pots are then "pulled out" and emptied into a common ladle to give uniformity to the mixture. A sample of each "heat" is taken and analyzed in the chemical laboratory. The steel is then poured into ingot moulds.

The ingots are heated to redness as they are needed, and passed back and forth through the rolls until they are reduced to plates of the proper gauge.

Crucibles of steel being taken from the furnace.

These hand saw plates, sheared to rectangular form, are shipped to the factory, and placed on racks in store-room.

The first operation in the making of a saw is to shear each plate diagonally to make two saws. Each blade is then stamped with the quality number of the steel and the number of points to the inch required.

How Teeth are Cut.

The teeth are cut by a rapidly operating toothing press, which can be adjusted to cut coarser or finer teeth as may be required. Teeth may be cut with any pitch desired. A "V" shaped tooth, with no pitch whatever, is used in perforating paper. The cross-cut tooth is nearest to this, having but a slight pitch. The compass and pruning saws lean farther to what is called "compass pitch." The rip saw teeth have the face at right angles to the back.

Various trimming operations now take place, such as hollowing the back, squaring the smaller indentation to break the long line of the back. The heel is rounded a little to protect the workman. A slight breast or bow is sometimes given to the teeth where most of the cutting takes place.

The saw has now its proper form, but it is soft. It has been easy to work, but is useless as a tool. The next change must therefore be made in the steel—a new arrangement of the molecules. This is accomplished by the hardening and tempering processes.

First the saws are heated to cherry red in a hot oven and plunged suddenly into an oily liquid. Some new disposi-

Shearing saw plates.

Showing the grinding of saw blades.

Toothing machine in operation.

tion of the carbon has now taken place. The saws have become brittle as glass. This makes them as useless as before. They are heated again to about half the former temperature, this time under pressure.

Gives Them the Spring.

From this tempering furnace they come forth very flat, and with wonderful spring. This is tested by bending the steel over a wooden block or in the hands, watching it regain its form.

The profound changes through which the saws have passed in the hardening room have caused some slight strains and irregularities in the steel. These are corrected on the anvil by the smith; and this is the most skilled operation in saw-making, because hammering a saw will quickly ruin it unless done with skill and judgment.

The saws are black from the heat treatment. This surface must be ground off, and the saw reduced to proper gauge The best saws are taper ground, i.e., the teeth are kept at uniform thickness, but the blade grows thinner from teeth to back and from heel to toe. This lightens the weight of the saw and gives splendid clearance. Yet the stiffness is kept to prevent buckling.

The saw undergoes two or three polishings with emery powder of different degrees of fineness until it receives a high gloss finish.

Setting the Teeth.

Now the teeth are set and filed. Every other tooth is made to lean away from the workman, so as to give clearance in the cut. The cutting edge is given the teeth with a three-cornered file. To file a saw properly is an art that is acquired only after much experience and training. The saws are now laid on a board and side dressed with a flat file to make the teeth smooth.

The next step is the etching of the name on the steel. Well-inked labels are applied that leave their impression when the paper is washed away. An acid brushed over the ink eats its way into the lettering that has been left blank. The saws must then have their etching filled with the coloring.

The best handles are made of apple wood, which shows a fine grain under polish. The logs are cut into boards, which are allowed to season in the sheds for three years. They are then reduced to short lengths, several of which are nailed together, and the pattern marked on the upper block. The outline is cut with a small band saw; the inner line with a jig saw. The square edges are rounded off. Then the wood is sanded, stained and polished. The carving is done with a small circular cutter.

Getting the Right Hang.

Now the blades and handles are brought together. Each must be fitted individually, to be sure of the right

Hammering saw blades, an important operation.

Spring test for temper.

Putting handles on the saws.

Etching trade mark on saw blades.

hang and firmness as well as the general appearance.

The inspector makes his final examination, omitting no detail. The reputation of the company depends largely upon his eye and hand.

The saws are carefully cleaned and rubbed with dry lime or charcoal. They are then slipped into wax paper sleeves, and inserted into individual pasteboard carbons, or packed four to a box.

From here they go to stock or to the shipping room. A large stock of saws in a partly-finished condition is always kept on hand. So many varieties are called for that it is necessary to be prepared to give prompt service.

CLEAN-UP AND PAINT-UP.

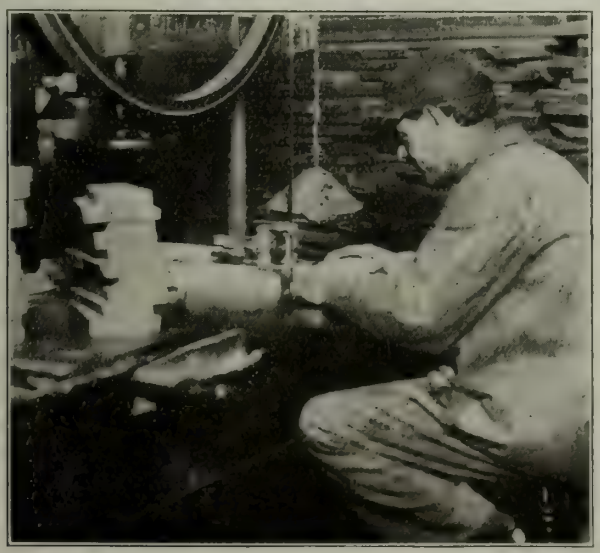
Programme Arranged for a Busy Week in Montreal This Spring.

Montreal's clean-up week will be for a full seven days, commencing with Sunday, May 16. The first day, as might be expected, will be one rather of clean-up thoughts than clean-up deeds, and the ministers of the different churches in the city are requested to remind the members of their congregations of the campaign to commence on the following day. Friday, the 21st, has been set apart as the paint-up day, and citizens are admonished to get very busy with brushes and paint cans in order to brighten up both inside and out. Following is the programme which the committee has adopted:—

May 16th, Sermon Day—It is expected that the ministers of the local churches will refer to the work of the campaign committee during the sermons.

Monday, the 17th, Fire Prevention Day—"Bear in mind that carelessness is the chief cause of fires, and that this carelessness has indirectly cost $10.00 last year to every head of a family in Montreal."

Tuesday, the 18th, Front Yard Day—"Make the surroundings of your home congenial by sowing grass seed on the lawn, planting flowers and taking care of the trees."



Wednesday, the 19th, Back Yard Day—"Clean your back yards of all rubbish; make it a small vegetable garden; keep the fences in order."

Thursday, the 20th, Sanitation Day—"Remove all rubbish; clean all carpets; ventilate your cellars; scrub everything well, using plenty of soap and water."

Friday, the 21st, Paint-up Day—"Make everything radiant with fresh colors; be bright and keep bright."

Saturday, the 22nd, Children's Day—"Fifty per cent. of the newly-born babies die before they are one year of age; do something to stop these needless deaths. It is worse than murder to keep infants unclean and to give them foods that are worse than poison."

A woman and her money are soon parted in a ten-cent store.

Band sawing out handles.

Inspecting the finished saws.

Practical Course for Sheet Metal Workers

Article No. 28 of Series

By CHARLES SEIVERS

IN this plate is shown the manner of cutting a mitre pattern for mouldings for the purpose of illustrating same. a section of an eavetrough is shown at A, B, C.

To lay out pattern as shown in Fig. 1, draw plan of trough for moulding as shown by D-E-F-G-H-K joining the two points E and H, thus showing mitre line in plan.

Divide both the curved portions of section into equal number of parts and from each of these points and also from the ends or angle of the straight members, draw lines parallel to A-B extending them downward at 90 degrees until they intersect mitre line E-H on plan. Next draw a line at right angles to D-E as shown at L-M, using this line as a base from which to measure.

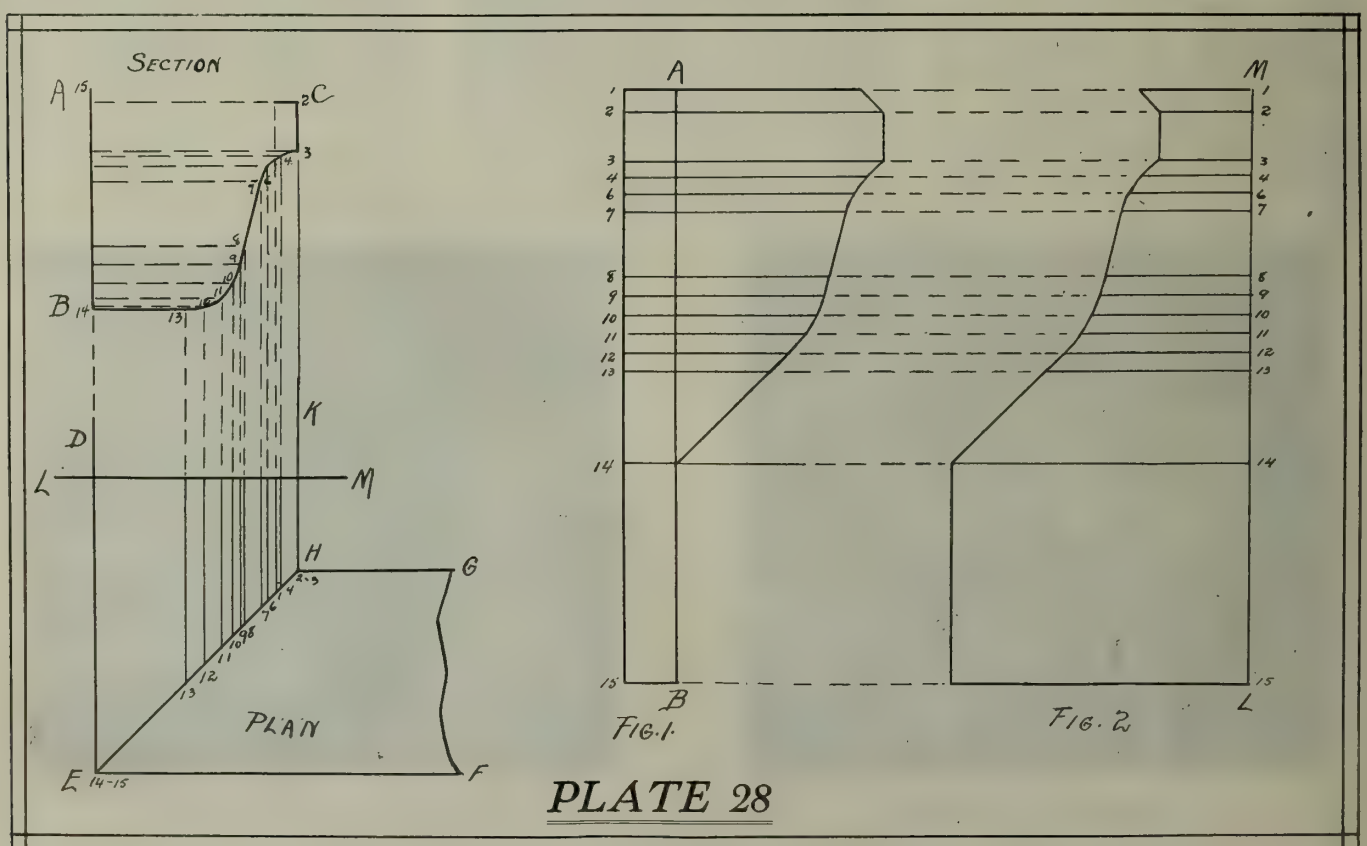
Now draw line B-L and from it erect the two lines B-A and L-M. On B-A and L-M, Fig. 1 and 2 which are really stretchout lines for the mitres mark off the spaces on section shown by 15, 14, 13, 12, etc., and draw lines joining corresponding points as shown at 14 to 14, 13 to 13, etc.

With compasses or dividers measure from line L-M on plan on each of the lines drawn from divisions in section and set off on corresponding divisions from L-M at Fig. 2. It must be noted that as points numbered 15 and 14 come on exactly same line, the distance from L-M to E will, of course, be the same for both points and will be so set off by simply allowing the actual distance from L-M at Fig. 2 or as shown in back portion of eavetrough in section A-B, 14 and 15. Now proceed in the same manner with remaining points 13, 12, 10, 11, etc. A line traced through the points obtained will give outline of pattern in this case an inside mitre. If an outside mitre pattern were required it would be necessary to place section in its correct position with reference to plan, that is line A-B at back of section placed on line H-K of plan, when the balance of procedure remains same as already described. Another method more commonly used for square mitres is shown by pattern at Fig. 1. From each of the points on section as 1, 2, 3, 4, etc., draw lines to A-B, as shown. Using the line A-B on section as a base to work from measure to points 13, 12, 10, etc., and set off from line A-B at Fig. 1. As points 15 and 14 are on A, B, of section they are on same points at line A-B of pattern. A line drawn through points thus obtained will give outline of pattern for an outside mitre.

To further explain to our readers what is meant by the terms "inside and outside mitres." To define an outside mitre would be, the mitre of say, an eavetrough which is required to fit into a corner made at a valley of a roof. An outside mitre would be required to carry

(Continued on page 47.)

The accompanying article is No. 28 of a course of practical problems for sheet metal workers prepared, especially for the readers of Hardware and Metal, by a practical mechanic who is constantly in touch with new problems which are arising in the sheet metal trades. These articles are a weekly feature in Hardware and Metal, Canada's only weekly hardware paper.



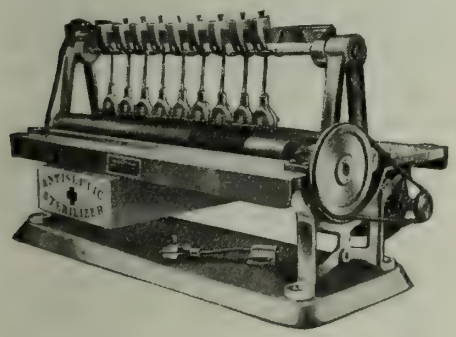


PLATE 28

New Hardware Goods

Offered Canadian Hardwaremen

THE HENDERSON MACHINE.

THE Henderson Machine Co., Cincinnatti, Ohio, offers to the trade the Henderson automatic razor blade sharpening machine. The makers state that the machine is so constructed that it gives an eighteen inch diagonal stroke to the blade each time that it comes in contact with the finishing rollers, which it is said, means the same as though a barber drew the razor from the upper outside to the lower inside on an eighteen-inch strop. The pressure is applied gradually from zero or no pressure, to the maximum or greatest pressure, and then gradually diminishing off to zero or no pressure. The holders in the Henderson machine are suspended from a suspending bar and adjust themselves automatically to the conveyer. The blades, as being sharpened, can be removed and replaced while the machine

Henderson Razor-Sharpening Machine.

is running, without any danger of cutting and spoiling the rollers. The makers also claim that the Henderson machine occupies less space for the number of blades it will hold than any other machine. It measures 30 inches long; 18 inches wide; 18 inches high and weighs 125 pounds. It holds eight blades and the makers claim it will sharpen the blades just as fast as they can be fed into the machine. The blade holder is a "Universal Self-Adjusting," and will hold any blade irrespective of size or shape.

It is said that the amount of current required to run the machine is equal to a 16 candlepower incandescent lamp. There is also a grinding attachment, that can be used on the Henderson machine, for sharpening scissors, knives, edge-tools, etc.

COLT AUTOMATIC PISTOL.

Colt's Patent Fire Arms Mfg. Co., Hartford, Conn., have brought out a new automatic pistol, the Colt, calibre .22 Target Model here illustrated.

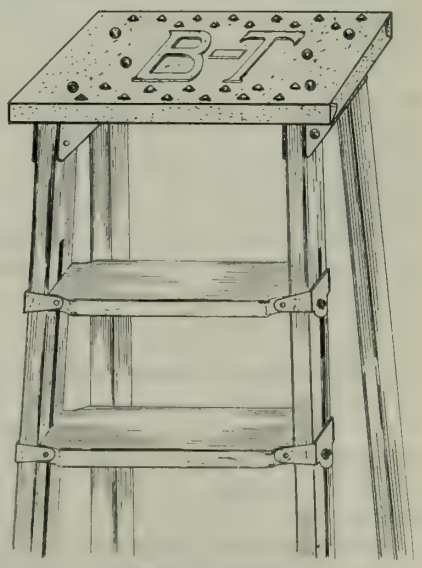
The makers claim that this is the only

Colt, Calibre 22 Target Model.

automatic pistol now made to handle the standard calibre .22 long rifle cartridges. They claim that with its adjustable target sights, long barrel, light trigger pull and splendid balance, it possesses all the advantages of a single-shot target pistol, with the additional features of automatic action, obviating the necessity and inconvenience of reloading for each shot, and furthermore, permitting unlimited practice in that present popular branch of shooting—rapid fire and snap shooting.

The pistol is equipped with a Safety Lock which, when the arm is cocked, may be pushed upward, thus positively locking hammer and slide. This Safety Lock is located within easy reach of the thumb of the hand holding the pistol and may be instantly pressed down when raising the pistol to the firing position. It also acts as an indicator showing whether or not the pistol is cocked.

The slide may be readily removed from the frame, permitting the arm to be quickly and easily cleaned from the breech.



An extension of the frame at rear serves as a guard to prevent the hand of the shooter from slipping upward and being injured by the recoiling slide; this also acts as a guide to keep the hand in the same position for each shot, thereby aiding in accurate shooting. The grip or stock slants at a correct angle in relation to barrel and line of sight, giving the shooter the proper "hold" of the piece without wrist strain.

The magazine is provided with a thumb grip or pin which projects on the right side and enables the operator to compress or relieve the tension on the magazine spring to facilitate loading the magazine.

The specifications of the new pistol are: capacity of magazine, 10 shots; length of barrel 6½ inches; length over all 10½ inches; weight 28 ounces; finish full blued; checked English walnut stocks; sights, bead front sight, adjustable for elevation; rear sight, with adjusting screw, adjustable for windage; distance between sights 9 inches; cartridge, .22 long rifle, rim fire (greased cartridge only,) either lesmok, semi-smokeless or smokeless. Greasless cartridges may be used provided shells are slightly lubricated.

STEEL TOP LADDER.

Beatty Brothers, Ltd., Fergus, Ont., are introducing to the trade a new step ladder with a galvanized top. The makers state that the top of a ladder is its very heart and if it is not durable

Steel Top Ladder.

the legs will not be held firmly, and soon the whole ladder will wobble. The claim is made that the steel top will not warp or crack and that it greatly strengthens the ladder. The accompanying illustration shows the new ladder.

Current News

Readers are requested to send in, for publication on this page, news items of interest to the trade.

Moved Offices.

Montreal, Que.—The Sweeper-Vac., Ltd., Mappin Building, Montreal, have moved to the Windsor Arcade.

Announcement of Removal.

The Remington Arms-Union Metallic Cartridge Company announces that on May 1st, 1915, with the purpose of increasing its accommodations, it will remove its New York offices to the Woolworth Building, 233 Broadway, 26th floor.

Personals.

E. K. Spinney, Yarmouth, N.S., was a visitor at the Montreal office of Hardware and Metal this week, and spoke in optimistic manner of conditions in Nova Scotia.

F. A. Fisher, son of W. S. Fisher, president Enterprise Foundry Co., Sackville, N.S., was a visitor at the Toronto office of Hardware and Metal this week. Mr. Fisher stated that trade in the Maritime Provinces is about normal.

Business Changes.

Parkhill, Ont.—J. Houghton, hardware merchant, has sold out.

Sonewall, Man. — W. Montgomery, hardware, has been succeeded by E. Williams & Son.

Rhein, Sask.—Jacob Kinzel has sold his interest in the Rhein Hardware Co. to Geo. Propp.

Toronto, Ont. — W. F. Porter, hardware and tinsmith, has been succeeded by D. Guffin & Co.

Carberry, Man.—Jas. White, lumber and hardware, has sold the hardware department to B. McCormick, Ltd.

The Johnson Hardware Co.,
Fort Frances, Ontario,
April 19th, 1915.

Hardware and Metal,
Toronto.

Dear Sirs,—

Enclosed please find $2.00 for our subscription up to March 31st, 1916. We are delighted with your Spring Number of Hardware and Metal, it is a very complete copy and a useful edition.

Yours truly,
JOHNSON HARDWARE CO.,
(Signed) W. G. Johnson.

HARDWARE LETTER BOX

Electric Light Sockets.

The Sayer Electric Co., Montreal, Que.—Can you give us the names of manufacturers in Canada who make Electric Light Sockets, other than the two names given below?

Munderloh & Co., Ltd., Montreal, Que.

Benjamin Electric Mfg. Co., Ltd., Toronto, Ont.

Canadian General Electric Co., Ltd., Toronto, Ont.—Editor.

Repairs for 9-24 Aberdeen Warrior Cook Stove.

E. T. Coleman & Co., New Dundee, Ont.—Please tell us where we may be able to get repairs for 9-24 Aberdeen Warrior Cook Stove?

The McClary Mfg. Co., London, Ont., can supply parts for the 9-24 Aberdeen Warrior Cook Stove.—Editor.

Aluminum Letters and Figures—Stamped and Cast.

A. T. Fife & Co., Kenora, Ont.—Will you kindly advise us as to the names of manufacturers of Aluminum Letters and Figures, both stamped and cast?

Hamilton Stamp & Stencil Works, Hamilton, Ont.

Toronto Stamp & Stencil Works, Toronto, Ont.

Thos. Davidson Mfg. Co., Limited, Montreal, Que.

Patterson & Heward, Toronto, Ont.

Martel Stewart Co., Montreal, Que.

L. F. Grammes & Co., Allanstown, Pa.—Editor.

Carriage and Wagon Wood.

The W. W. Cooper Co., Swift Current, Sask.—Kindly let us know the names of manufacturers of Carriage and Wagon Wood?

Merritt & Co., Chatham, Ont.

D. G. Latta, Limited, Edmonton, Alta.

D. Ackland & Son, Ltd., Winnipeg, Man.

Victoria Wheel Works, Galt, Ont.

Canada Wheel Works, Merriton, Ont.

F. Bacon & Co., Montreal, Que.

Luger Gravel, Montreal, Que.—Editor.

Fireplace Grates and Tile.

Campbell & Best, Peterborough, Ont.—Kindly let us know where we can secure Fireplace Grates and Tile?

Grates — Barton-Netting Co., Ltd., Windsor, Ont.

Galt Stove Co., Ltd., Galt, Ont.

Enterprise Foundry & Machine Co., Ltd., Sackville, N.B.

Tile—Barton-Netting Co., Ltd., Windsor, Ont.—Editor.

Electric Cooking Stoves and Ranges.

Henry Gilles, St. Jacobs, Ont.—Kindly give me the names of manufacturers of electric cooking stoves and ranges.

The Mainer Electric Co., Ltd., Winnipeg, Man.; National Electric Heating Co., Ltd., Toronto, Ont.; Moffat Stove Co., Ltd., Weston, Ont.; Hotpoint Electric Co., Toronto, Ont.; Canadian Westinghouse Co., Ltd., Hamilton, Ont.; Landers, Frary & Clark, New Britain, Conn.; Renfrew Electric Mfg. Co., Renfrew, Ont.—Ed.

Wood Handles, Small and Large.

Strachan, Oswell & Co., Ltd., 32 Front St. West, Toronto, Ont.—Will you please give us the names of firms making wood handles?

J. H. Still Co., Ltd., St. Thomas, Ont.

Chapin-Stevens Co., Pine Meadow, Conn.

E. B. Salyerds, Preston, Ont.

Lachute Shuttle Co., Lachute Mills, Que.

Canada Spool & Bobbin Co., Ltd., Walkerton, Ont.

Lyster Wood Box & Enamelling Co., Ltd., Lyster, Que.—Editor.

Makers of the L. P. G. Shotgun.

L. D. Merriam, Chatsworth, Ont.—Would you be good enough to give me the name of the firm who makes the L. P. G. shotgun?

This gun was formerly made in Belgium, but owing to the state in which that country now finds itself, it would be impossible to secure any from them. Caverhill, Learmont & Co., of Montreal, Que., and Decatur, Bull & Co., Montreal, Que., can supply you with these guns.—Ed.

Selling Poison Preparations

Prosecutions of Hardware Merchants Who Have Not Conformed With the Law Governing the Sale of Poisons—How Packages Should be Labeled.

GOVERNMENT officials have recently prosecuted a number of retail hardwaremen who sold poison preparations in packages which did not conform with the requirements of the law governing the sale of poison preparations. Hardware and Metal has, on several occasions, pointed out the advisability and necessity of having poisons, particularly wood alcohol, and Paris green properly labeled.

Merchants not observing the provisions of the various acts governing the sale of poisons are liable to heavy penalties, and ignorance of the law is not accepted as an excuse.

Selling Wood Alcohol.

All provinces in Canada come under the Inland Revenue Act, as far as the sale of wood alcohol is concerned. Section 266 of the Act states that, "Every person who uses spirits containing methyl alcohol in any form in any pharmaceutical or medicinal preparations for internal use, shall be liable to a penalty of five hundred dollars." This section of the Act has been amended by adding the following subsection thereto, "Every person who uses methyl alcohol, or spirits containing methyl alcohol, in any form, in any pharmaceutical, medicinal or other preparation for external use shall affix to the vessel containing the said preparation a label stating in **BLACK LETTERS NOT LESS THAN ONE-FOURTH OF AN INCH IN HEIGHTH**, the presence of methyl alcohol therein, and every person violating the provisions of this subsection shall incur a penalty not less than fifty dollars and not exceeding two hundred dollars.

Hardwaremen should note particularly the following from section 10, "All vessels containing the word alcohol whether in the possession of the manufacturer or other person, shall have affixed thereto a label bearing the words "Wood alcohol Poison," in black letters not less than one-fourth of an inch in height. Any person who holds in possession, sells, exchanges or delivers any wood alcohol contrary to the provisions of this section shall incur a penalty not less than fifty dollars and not exceeding five hundred dollars. In Prince Edward Island wood alcohol comes under the Prohibition Act.

Selling Paris Green.

Regarding the sale of Paris green the pharmacy acts of the various provinces are much alike and may be summed up as follows, "Nothing in the Act shall prevent the sale, by persons not registered, of paris green, hellebore, tincture of iodine, arsenate of lead, carbolic acid not exceding a five per cent. solution, and London purple, if such articles are sold in WELL SECURED PACKAGES DISTINCTLY LABELED WITH THE NAME AND ADDRESS OF THE PERSON PREPARING OR PUTTING UP SUCH PACKAGES AND DISTINCTLY LABELED WITH THE NAME OF THE ARTICLE AND MARKED "POISON." When sold by retail, then also the name of the proprietor of the establishment in which the poison is sold.

LANDING THE FISH.

There is a breath of spring in the air, there is a damp odor in the woods and there is a gurgle in the boiling creeks and streams that is calling gently but insistently and persuasively to the disciples of Isaac Walton. The calendar—which no real angler need consult—tells us that the season of hook and line, of rod and reel and of landing net and carrying basket is at hand.

Let the season have a significance for the hardware man. If he is a sentimentalist let him not dwell upon the question of monetary gain by fostering the longings of the fisherman; let him, if necessary, think that he is doing the ardent angler a favor in supplying him with the paraphernalia of war — or whatever it might be called; but whatever his mental attitude may be on the fine points of feeling involved, let him get busy and hit the iron while it is hot—or land the fish while it is hooked, if that is more appropriate. So long as there are fish or places where fish might be suspected of frequenting, there will be fishermen, and so long as there are fishermen there will be a demand for tackle. But the fish in the stream to the angler is like the angler in the street to the hardware man if he does not put out his bait. Try a window display to tempt business to the hook.

And here is something else. The war may not have affected the fish, but it has the fishing tackle. The prices have advanced about 10%. Why? Because fishing tackle is imported. But while the dealer knows of the increase and the angler will probably be aware of it, there has been no serious damage done. Whisper. Because, in the style of Bud Fisher, THE FISH DON'T KNOW IT.

The price of bent pins still remains about the same. The barefoot boy who, in the fish story, catches the sparkling, speckled string while the angler in the catalogue uniform and armed with double-barrelled, gold-mounted, ninety horse-power whale ensnaring equipment wets his trousers considerably above the knees, will still be allowed to barefoot his way through the streams of romance without additional financing. However, there is reason to believe that even the fish have heard of those stories and have developed tastes for something more in keeping with the advancing cost of living—why should not a fish live as expensively as possible and demand some entertainment if he is to provide the sport? Therefore, believing that anglers are getting as wise as the fish, there should be no reason why the demand for fishing tackle should not be as strong this spring as ever and at the higher price. The barefoot boy still has his bent pin and the angler will not mind a litte extra for his equipment.

In fact the signs would appear to be an evidence that angling will be a more than ever popular sport this season. The papers, the woods (and why not the streams) are full of suggestions for providing a means of entertainment for the travel-seeking wealthy, who are being refused admission to the theatre of war for this summer. Why not let them hunt fish—that is not the right expression, for you catch fish, but you have to hunt the place to fish, which is only changing a noun to a verb. The evidence is that through the warmer days there will be many of the wealthy who will find their way to the summer resorts and learn the art of angling. Angling and even fishing may be distinct from catching fish—but they require tackle to be successful failures.

And then there is the man of moderate means. His vacation this year may not take him to the resorts. He may be attached to his job—if any—throughout the summer and for him there will be week-end jaunts with opportunities for indulgence in the pleasant pastime at small expense.

Altogether let us advise the hardware man to get a good stock of fishing tackle and display it well. He is looking for the angler and the angler is looking for the fish—there is one born every minute, it is said, which can be applied to either.

AN EXPLANATION.

In last week's issue of Hardware and Metal an announcement was made to the effect that a new assortment of electros would appear in this week's issue. Owing to an unavoidable delay the electros were not ready at the time of going to press. They will therefore appear in next week's issue.—Editor.

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

Although country trade is close to normal there is still a quietness in the larger cities, and although there is a good demand for spring goods, there is very little demand for building materials. However, spring business is regarded as being very satisfactory under present conditions. The metal markets are still erratic. Spelter quotations have reached a high figure—in fact a record price. There is really no market—sales being made to the highest bidder. Stocks are very low, spot stocks having disappeared as if by magic. No doubt, there will be further advances in the price of many hardware lines, in the manufacture of which spelter is used. Copper has advanced in price very rapidly, and the consumption is heavy. Tin remains unchanged from last week and is in fair demand. Antimony has advanced 4 cents per pound during the week. Many manufacturers have been forced to advance prices on certain products, owing to the record high prices of some metals. Winnipeg reports that business during the past week has been quiet, this being apparently due to the fact that farmers are busy finishing seeding. Linseed oil advanced 3 cents per gallon at Winnipeg. Iron pipe and Paris green have also advanced.

MONTREAL.

MONTREAL, April 29.—Although the spring shipments to country points are practically all off the books, the hardware trade is still very busy. With the season about ten days ahead of the schedule, and with the retailers generally carrying short stocks, sorting orders have followed closely upon the placed business—and have followed strong. The result is that, while there is but little, if any, improvement in the city trade, and the larger orders which represent construction and industrial contracts are lacking, there is a volume of small orders which represents a comparatively light movement of goods in proportion to the activity entailed.

Altogether, however, spring business is regarded as being satisfactory in view of the general conditions prevailing, and there is no complaint. Orders for builders' hardware, builders' material, construction supplies, etc., were not to be expected, but there is an improvement over a year ago noted in the general country lines, and there is the satisfaction of knowing also that stocks are low and that anything like a brightening of the conditions in the cities and manufacturing centres as well as country points will be directly followed by orders; the nature of the sorting business being done is a good indication of this condition in the trade.

Warm weather has forced the sale of lawn goods and certain lines of farm tools, such as forks and hoes, and there is a better inquiry for plumbers' lines and roofing materials, while ice-cream freezers, garden tools and housecleaning lines are still moving. Price changes are few, with the exception of the metals, and the announcement has been made by the shovel manufacturers that the advance decided upon for the 1st of May will be deferred indefinitely, the present prices to continue until further notice.

MONTREAL QUOTATIONS.

Tin	54c-56c
Spelter	15c
Copper	19½c
Lead, Imported, cwt.	5¾c-6c
Antimony	35c
Solder, ½ x ½	27 to 31
Solder "strictly"	29 to 33
Aluminum, Ingot	23c lb.
Aluminum, Pattern	24c lb.
Wire Nails	$2.40 base
Cut Nails	$2.50 base
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp	12½c base
Sisal	10½c
Lath Yarn	9¾c

The Metals—The metal markets have ceased to surprise the trade for the reason that there is scarcely anything that might take place that has not occurred. Advances weekly are now taken much as a matter of course, and although tin and lead this week are without change, copper, spelter and antimony have jumped up the price scale in a manner which compares with anything in their recent performances. The demand for ammunition is steadily increasing with the prospects for a protracted war and the limit of the purchasing of the belligerent nations seems to be bounded only by the capacity of the manufacturers.

Tin—The market locally is holding firm at 54 to 56c with visible supplies limited, despite the fact that the New York situation continues to show an easier tone and the quotation of 42c compares with 46c a week ago and 57c the week previous. This decline was partially brought about by the arrival of certain cargoes regarded as uncertain. The American situation is still complicated by the British embargo which necessitates the guarantee that importers are consumers. The market is firm, but quiet, with unrestricted spot supplies very scarce.

Copper—With the foreign market for copper advancing in a manner which would seem to indicate that there is no limit to the movement, the local quotation has been taken up from 18¾c to 19½c, and seems likely to go higher. New York is up from $17.50 to $18.62½, which is 4c a pound in the past six weeks and 6c since the first of the year, and consumption is greater than ever. War orders indicate a demand well into the future and higher prices seem to be in order.

Spelter—An additional 2c has been added to the price of spelter on the local market, making a quotation of 15c. This compares with 14c quoted in New York and 10c in that market two weeks ago. American makers note a demand as far ahead as November on the strength of war orders and there appears to be some difficulty in placing even that far in the future. Indications certainly do not point to lower prices, but rather to the contrary.

Lead—The lead market is about the only branch of the metals that is quiet. There is no particular change in the conditions or prices of the past couple of weeks. If anything, the situation is easier. Local quotations are around $5.75.

Antimony—The embargo against the exportation of antimony from England is having the effect predicted. The top appears to be off the market, so far as price is concerned, and a rise of 5c is noted both locally and in New York, while in the latter Hallets has been withdrawn altogether. With the shortage of British stocks Chinese and Japanese brands have been advanced rapidly and are now quoted around 30c. There appears to be no limit to the price which may obtain for antimony if the present war demand continues.

Builders' Hardware—The movement of builders' hardware is slow for the season, although there has been noted a continued demand—but not a heavy one—for the cheaper grades of lock sets. The new price lists are still being awaited and in the meantime business has settled down to general readjustments to cover the tariff increase.

Building Materials—A fair demand for metal sheets and roofing paper is about the only improvement that can be noted in an otherwise weak market for building materials. The opening of navigation and unusually spring-like weather are no doubt factors in the improvement.

Bar Iron and Steel—The demand for bar iron and steel in the hardware trade is very light, but the prices are on a strong basis. The base of $2 for bar iron is well maintained.

Nails and Fencing—There is a fair demand for nails from country points continuing and the prices of $2.40 for wire and $2.50 for cut are well maintained. Fencing orders have been pretty well cleaned up and the trade is well satisfied with the business done.

TORONTO QUOTATIONS.

Tin	50c
Copper	20c
Lead	5¾c
Spelter	14c
Antimony	35c
Aluminum Ingot	23½c
Aluminum Pattern	24½c
Solder, ½ x ½	33c lb.
Wire Solder	35c lb.
Wiping Solder	27c lb.
Tinker's Bar Solder	35c lb.
Wire Nails	$2.35 base
Cut Nails	$2.70 base
Poultry Netting	45%
Pure Manila Rope	14½c base
British Manila Rope	12½c base
African Hemp Rope	12½c base
Sisal Rope	10½c base

Spades and Shovels—A couple of weeks ago shovel manufacturers sent out new price lists to go into effect on the list of May covering a general advance. These lists, however, have been withdrawn and the old quotations will continue until further notice. It is reported that the action has been due to a cut in prices announced by American shovel makers.

Bolts and Nuts—The demand for bolts and nuts is quiet and promises to continue so with the industrial depression prevailing.

Plates and Sheets—There is an improvement noted in the demand for sheets for roofing purposes. This came with the opening of navigation and the arrival of warm weather. Galvanized sheets are likely to be further advanced in price now that the spelter market is rising to new price levels.

Iron and Lead Pipe.—There is an improvement in the demand for iron and lead pipe noted in common with plumbers' lines in general. This improvement, while not very material, is encouraging. Prices are firm. Lead pipe 8c and lead waste pipe 9c, net.

Rope and Twine—There is a fair demand for rope from country sections and more interest is being displayed in twine. The market is very firm in view of the rather precarious outlook as regards raw material.

Tools—The demand for precision tools continues and good business is being done, although the extent to which the requirements for these "war" tools will extend is questionable.

Seasonable Lines—A further improvement in the demand for lawn tools is noted with the warmer weather and there has been interest displayed in forks, hoes and other farm tools required in the spring and early summer agricultural operations.

Utensils—Higher prices for galvanized and copper ware would seem to be the logical development of the present situation in metals. As yet there has been no intimation that changes are to take place, but it is understood that stocks are low and in the case of galvanized ware the existing market for spelter would warrant an increase of 15% to 20%.

TORONTO.

TORONTO, Ont., April 29.—The reports recently received from the battle front have had a somewhat depressing effect in business circles on account of the casualties, and consequently the hardware trade has experienced a rather quiet week. There is no sign of discouragement, however, but rather more complete realization of the extent to which this country is involved in the struggle and a fixed determination to see it through to a successful finish. This quietness is of a temporary nature, and the present seasonable weather will have a stimulative effect on business and a more optimistic spirit will prevail in hardware circles. Although conditions, generally speaking, are hardly up to the normal, there is a gradual improvement taking place and prospects look brighter. A considerable amount of the present activity is due to the orders for war materials, but at the same time the volume of ordinary business is increasing. This is more noticeable as regards the country trade, as conditions in the rural districts are far more favorable than in the industrial centres. The purchasing power of the agricultural community is, therefore, greater than that of the industrial sections. In the farming districts conditions are very favorable for the crops, and prospects were perhaps never better. The city trade, on the other hand, is suffering from the general industrial depression and financial stringency, with little prospect of any pronounced improvement for some time to come.

Seasonable lines are moving freely, there being a good demand for gas, oil stoves, ice cream freezers, refrigerators, garden tools, etc. The building trade, although dull, is showing some improvement, and there is a better demand for builders' supplies. Copper rivets have advanced sharply, and higher prices may be expected for copper and galvanized goods if the present prices of raw materials are maintained.

The Metals.—There is a better demand for metals, more particularly for those used in the manufacture of ammunition, such as copper, antimony and lead. The copper and antimony markets are very strong, but tin is much easier, although the situation has not improved. There is a continued scarcity of spelter, which is becoming serious for makers of galvanized producers. Although tin has declined, solders have not changed, but there is a possibility of lower prices. Aluminum is unchanged at 23½c per pound.

Tin.—The situation is unchanged, but the market is slightly easier, largely the result of the considerable delay experienced in obtaining export permits. Spot tin is scarce, but the expectation of considerable quantities of Banca tin arriving in New York will relieve that market. Tin has declined 5c, and is being quoted at 50c per pound, which price, however, is nominal.

Copper.—The market is very active and advancing, and the already heavy demand for copper is increasing. Producers have increased production, but it is believed that they are sold up for some time to come. As long as the war lasts the demand will be heavy, and may continued for some time after hostilities

have ceased. The market is very strong, and has advanced 1c, being quoted locally at 20c per pound.

Spelter.—The market is excited, and is again advancing. A serious scarcity of spelter is being experienced, there being practically no spot spelter to be had, as smelters are sold up at least two to three months ahead. Prices have advanced 1c, and quotations are nominal at 14c per pound.

Lead.—The market continues very quiet at unchanged quotations. Lead is quoted here at 5¾c per pound.

Antimony.—There is a heavy demand for antimony for war munitions, and the market is in a sold-up condition. Surplus stocks have already been liquidated, and the demand is increasing, which points to still higher prices. The market is strong, and prices have advanced 2c. Quotations are nominal at 34c per pound.

Solders.—Notwithstanding the decline in tin, there has been no change in solders. Although if the weakness in the tin market continues, solders will no doubt be affected. Prices are given in panel and current market quotations.

Scrap Metals.—There is a fair demand all round for scrap, more particularly for copper and brass scrap. Prices are firm, but unchanged, and are given in the current market quotations.

Pig Iron.—Dull conditions continue in the pig iron market, and the outlook shows no signs of any immediate improvement. Foundries are quiet and operating at considerably reduced capacity. Victoria and Hamilton brands are quoted at $19 per ton.

Bar Iron and Steel.—Conditions in the steel trade do not show any material change except for the increasing demand for rounds for shells. Manufacturing interests are not using much tonnage, and the building trade is still comparatively quiet. Prices on Pittsburg bars, plates and shapes have advanced to $1.20. Canadian mills are holding prices firm on bars at $2.05 base.

Lead and Iron Pipe.—The demand continues light, due to the dullness in the building trade. Prices are firm, however, due to the high cost of lead and spelter, the latter, of course, affecting galvanized pipe only. Lead pipe is quoted at 8c and waste pipe at 9c. Iron pipe prices are given in the current market quotations.

Wire Nails.—The situation is unchanged and the market is quiet, but firm. Wire nails are being quoted at $2.35 base and cut nails at $2.70 base.

Stoves.—A brisk demand is reported on oil and gas stoves, but there is very little business passing in furnaces, the slackness in the building trade being to a large extent responsible for this.

Kitchen Utensils.—There is a fair demand for all kinds of ware and other shelf lines, more particularly from the country trade. There is a possibility of an advance in prices of galvanized and copper ware, due to the increasing cost of spelter and copper, and in the case of spelter a scarcity of supplies.

Copper Rivets.—A sharp advance in the price of copper rivets is to be noted due to the increasing cost of copper. The new discount is 27½ per cent. as against 35 and 5 per cent., the old discount.

Poultry Netting.—A fairly active demand for netting is reported and prices are very firm. It is becoming increasingly difficult to obtain English netting on account of labor conditions being affected by the war. The spelter situation is also seriously affecting netting manufacturers.

Rope and Twine.—There has been quite a brisk demand for rope and prices are very firm. The situation in Mexico is very unsettled, and if it does not improve soon will seriously affect the sisal market. At the present time it is almost impossible to obtain sisal from that country, and stocks here will soon be depleted. Prices are given in the current market quotations.

LONDON.

LONDON, Ont., April 29.—Business continues good and retailers are all busy with spring lines. The chief price change this week is in linseed oil which advanced two cents per gallon. The discount on shoe rivets has also been changed.

The price change expected on shovels on May 1 will not take place.

At the advanced prices linseed oil is now quoted:

	Raw.	Boiled.
1 to 2 barrels....	81c	84c
3 to 5 barrels....	80c	83c
6 to 9 barrels....	78c	82c

Lead remains unchanged, and is quoted for Government pure grade in ton lots at $9.10 per 100 lbs. and in less than ton lots at $9.40 per 100 lbs.

Turpentine remains unchanged and is quoted in single-barrel lots at 73c per Imperial gallon and 72c in 2 to 4-barrel lots; 5-gallon lots are quoted at 80c per gallon.

Wire Nails, Etc.

Wire nails are in fair demand. The present price is $2.35 base for wire and $2.70 base for cut nails. Most of the larger buyers booked for wire nails some time ago when quotations ranged around $2 base. Wire from stock is quoted as follows:

	Per 100 lbs.
Barb	$2.55
No. 9 soft, galv.	2.30
No. 12 soft, galv.	2.45
No. 13 soft, galv.	2.55
9-coil spring	2.35
Oiled and annealed, No. 10	2.35
Oiled and annealed, No. 11	2.52
Oiled and annealed, No. 12	2.60

Galvanized fence hooks are quoted at $3 per 100 lbs. and $3.25 per 100 lbs. in $25-lb. boxes. Fence staples, bright, are $2.60 per 100 lbs. in kegs; $2.85 per 100 lbs. in 25-lb. boxes; galvanized, $3 per 100 lbs. in kegs, and $3.25 per 100 lbs. in 25-lb. boxes. Poultry netting remains at 45 per cent.; screen wire is quoted at $1.55 in 100-ft. rolls and $1.60 in 50-ft. rolls.

Rope, Twine, Etc.

Rope quotations are unchanged and are as follows:

Pure Manila	14½c lb. base
British Manila	12½c lb. base
African Hemp	12½c lb. base

Prices on twine are as follows:

650 ft.	12¾c lb.
600 ft.	10½c lb.
550 ft.	8¾c lb.
500 ft.	8½c lb.

⅛c per pound allowance on 5 tons.

¼c per pound allowance on 10 tons.

Terms November 1.

Harvest Tools, Etc.

Lawn and garden tools are in good demand and retailers are finding a ready sale for these lines. Harvest tools are quoted at 40-12½ per cent. Spades and shovels are quoted: 1sts, 60 per cent.; 2nds, 55-2½ per cent.; 4ths, 45 per cent.

WINNIPEG QUOTATIONS.

Canada Plates:	
Half Polished, 6-7 inch	$3.80
Full Polished, 6-7 inch	4.95
Solder	32c-33c lb.
Linseed Oil, raw	95c gal.
Linseed Oil, boiled	98c gal.
Poultry Netting	40% off
Galvanized Iron, 28	
Apollo and Fleur de Lis	$5.25
Queen's Head	5.60
Corrugated Sheets, 28-gauge galvanized	$3.45
Rope, Pure Manila	16c
Sheet Zinc	16c
Iron Pipe:	
Galvanized, 1 inch.	$8.15
Black, 1 inch	$5.75
Lead Pipe:	
Coil,	$8.25 less $9.25
Lead Waste	$8.75 per cwt.
Barb Wire per Spool:	
Lyman 4 pt., Ft. William	$2.25
Winnipeg	$2.60
Paris Green:	
1-lb. pkgs. (case lots)	25½c
Blue Stone, per lb.	7c
Window Glass:	

	Sgle.	Dble.
Up to 25 in.	$6.25	$9.00

WINNIPEG.

WINNIPEG, April 29.—Business is quiet this week, this being apparently due to the fact that farmers are very busy on their land, finishing seeding. When this work is once completed—and it is very near completion now—it seems likely that there will be considerably more activity in the towns. Still price changes are coming with considerable frequency. Perhaps the most important to be struck this week is that with relation to iron pipe, but a number of other lines have been affected.

Linseed Goes Up 2 Cents.

It was stated a little time ago that linseed oil, owing to the peculiar position whereby the profit which used to come from the by-product of linseed cake has been entirely lost, will likely rise in price rather than decline. Such an advance has already come, oil having moved up this week to 95c for raw and 98c for boiled. There seems nothing to look for but a strong market with little or no chance of reductions and every chance of further advances.

An advance of minor importance relates to Borax, which has moved up 1½ to 8c per lb. This will be of importance to those supplying blacksmith shops.

Clippers on Higher Scale.

Stewart clippers have been advanced, these now being quoted at 17½% off the Canadian list in place of the old quotation of 25% off.

Paris Green up 2 Cents.

In Paris Green also there has come a change, the advance probably being due to the general rise in copper. In 100-lb. drums Paris Green is now selling at 23¼c in one-lb. pkgs. (case lots), at 25½c. and in ½-lb. pkgs. (case lots), at 27½c.

Pipe Changes.

The change in iron pipe, both black and galvanized, is more in the nature of an adjustment than an actual price change. Some lines remain at the quotations formerly struck. Other sizes are quoted higher now, while still others are upon a lower basis. It seems a case where the sanitary engineering trade and the hardware trade have gotten together to make their prices more standard.

The new quotations are as follows:

	Black.	Galvanized.
¼-inch	$ 2.65	$ 3.85
⅜-inch	2.70	3.90
½-inch	3.40	4.70
¾-inch	3.85	5.65
1-inch	5.75	8.15
1¼-inch	7.80	11.25
1½-inch	9.30	13.50
2-inch	12.50	18.00
2½-inch	19.80	28.80
3-inch	25.65	37.80
3½-inch	31.05	45.00
4-inch	36.90	53.10
4½-inch	45.00	63.00

Shot still continues at the high prices quoted a fortnight ago. Loaded shells are much stronger this week, having advanced 10%. This is undoubtedly due to the scarcity of all products used in manufacturing.

The stove trade seems to be improving considerably as the spring advances. There is, however, nothing very striking to report in this connection. The same is true of the paint business. From the country orders are very satisfactory, and even from the city there has been an improvement in the demand.

INSPECTION OF WHITE LEAD.

(Continued from page 48.)

per cent. of the collection, consists of material sold as white lead, and containing amounts of barytes varying from about 25 to over 90 per cent. Thirty-two of these samples contain over 50 per cent. of barytes. All of these are sold as white lead, although it is true that none of them claim in so many words, to be pure or genuine. I have marked them, in the table, as containing barytes, without declaration. Ten other samples contain no white lead.

Three other samples are found to contain no lead; but although invoiced by our inspector as white lead, and apparently sold as such, examination of the label shows that these samples are not named white lead, but as zinc white, colonial white, or American white. They must, therefore, be regarded as genuine. Thirty samples sold as white lead are found to be true to name. The results may be synopticized as below:—

	Samples.
Genuine, as being white lead ...	30
Genuine, not being labelled white lead	3
Questionable, as containing barytes or other cheaper substance while sold as white lead	71
Total ... .104	

In connection with this subject, the following citation from Lunge and Keane's "Technical Methods of Chemical Analysis," Vol. III., p. 917, may be put in evidence:—

"Since technically pure white lead is too expensive for many industrial purposes, it is treated with white "fillers."

As long as these adulterated qualities are described as such, no objection can be made against them. It must be taken for granted that the comparatively low covering power of these qualities is known. Two methods are in use for denoting these products: special names, or distinguishing appendices (numbers, letters) to the name "white lead." Included in this group are the commercial varieties; Venetian white, which contains equal parts of white lead and heavy spar, or "blanc fixe:" Hamburg white which contains 1 part of white lead and 2 parts of heavy spar; and Dutch white, which contains 1 part of white lead and 3 parts of heavy spar. According to the second method of designation, the technically pure pigment is described as white lead "pure," and the adulterated varieties are denoted by numerals I, II., III., or 1st, 2nd, etc."

The method of distinction above named would undoubtedly serve the purose of informing the initiated as to the true composition of the article. But it cannot be claimed that the public generally would be much wiser on being told that the sample offered was white lead number 1 or number 2. The word mixture or compound would seem to be more to the purpose; but honesty requires that the presence and amount of barytes, or other ingredient, should be plainly stated on the label.

In view of the explanations made in the earlier part of this report which seem to dispose of any suspicion of intentional fraud on the part of the manufacturers or dealers; the chief analyst respectfully commends to the consideration of the department the following propositions:—

1. That no action be taken in the case of samples herein reported.

2. That section 38 of the Act be deleted, or so modified by revision, as not to conflict with the fundamental principle of truth to name.

3. That the name white lead on the label of any package shall be understood to mean that white lead as defined in schedule 4, is contained in such package, unless the word compound or mixture is plainly printed on such label; or the actual content of the package is specifically declared."

The bulletin gives the names of vendors and manufacturers of the lead purchased by the inspectors and the results of the analysis.

PRACTICAL COURSE OF SHEET METAL WORKERS.

(Continued from page 40.)

an eavetrough round the base of a roof hip.

If there are both inside and outside mitres required, all of which are square, or 90 degrees, they can be procured by careful cutting as shown in Figs. 1 and 2. To make an outside mitre, two pieces of pattern, Fig. 1, would be needed. And to make an inside mitre, it would take two pieces of pattern, Fig. 2. Thus it will be seen that if there is sufficient material left on each pattern the four pieces will make one inside and one outside mitre.

Paint Department

Inspection of White Lead

Inland Revenue Department Issues Report on the Inspection of White Lead in Oil in Small Packages—Small Percentage of the Samples Tested Was Found Genuine.

THE Inland Revenue Department, Ottawa, has issued a report on the inspection of white lead as sold in small packages.

The collection was made in May and June of last year, and was consequent upon repeated complaints having been made to the department that substitutes for White Lead were widely offered for sale under names which did not correctly describe them, or give the purchaser to understand that he was buying another article than white lead. Most of the samples now reported were purchased in one-pound tins, this being the usual mode of selling the article as complained of. The report says in part:

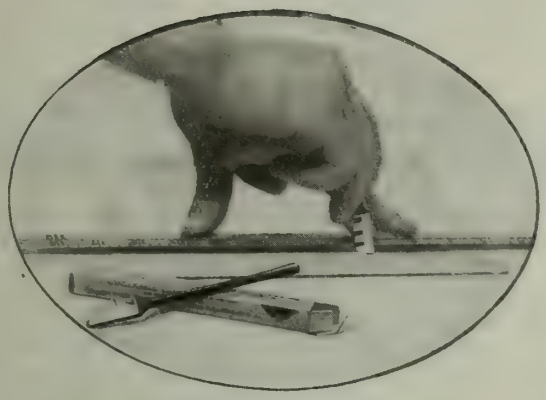
"The sale of substitutes for an adticle which like white lead, is employed for many uses in the arts, cannot condemned, except where fraud or deception are in evidence. The chief use to which white lead is put, is as a paint material; but subsidiary uses are as a lute in joining pipes; as a whitener in putty; as a filler preparatory to painting; as a lubricant and fixative in dowelling, etc. It would appear, from evidence which has been furnished that it has become customary to regard the article when put up in one and two-pound tins, as intended for these subsidiary uses. White lead, intended for use as a paint material proper is seldom purchased in smaller quantities than ten pounds, and it has come to be accepted that the small package is intended to subserve a purpose for which a cheaper material may be even better suited. The name "White Lead" is retained, not for purposes of deception, but from established custom, and the change in character of the article, has been a gradual one, proceeding from a small substitution of other substances for carbonate of lead, to the total replacement of lead by sulphide of zinc, barytes, and other material.

Growing out of recognition of the facts, as stated, it has become customary to distinguish between white lead and pure, or genuine white lead; a distinction entirely at variance with the fundamental principle of the Adulteration Act, which requires that every article shall be true to name, unless specifically labelled to show that it is a compound, mixture or substitute.

The fourth schedule to the Adulteration Act defines dry white lead as follows: "Basic carbonate of lead prepared by the corrosion of metallic lead." White lead in oils defined as "dry white lead ground in pure linseed oil, in the proportion of 90 to 92 per cent. of the former, to 8 to 10 per cent. of the latter."

This definition appears to be sufficiently explicit. They must, however, be read in connection with section 38 of the Act. (R.S. 1906), as follows: "Every person who marks, brands or labels any article or package containing any article mentioned in the first column of the fourth schedule to this Act, with the word pure or genuine, or any word equivalent thereto, or sells or offers or exposes for sale any such article or package, unless such article, or the contents of such package are pure within the meaning of the second column of the said schedule, shall, for every violation, be liable to a penalty not exceeding one hundred dollars."

It is apparent from the results of this inspection that manufacturers and vendors of white lead, in admixture with barytes or other substances, have proceeded upon the assumption that they did not render themselves liable to penalty by labelling such mixtures as white lead so long as they did not describe it as pure or genuine; and it must be confessed that section 38 seems to afford some basis for such an interpretation. As already pointed out this interpretation is however entirely at variance with the fundamental principle of the Act, which demands, that the purchaser of any article shall be supplied with the thing he demands, and that he shall be made aware, by the label, or otherwise, of the nature of the article supplied to him. This is made clear, so far as foods are concerned by section 3, which states the conditions under which food shall be deemed to be adulterated, within the meaning of the Act. Sub-section (b) defines as adulteration, the substitution of any inferior or cheaper substances, wholly or in part, for the articles demanded. This is modified by Section 24 (d) which permits the sale of mixtures or compounds, if these are distinctly labelled in accordance with the facts.



Although section 3, applies specifically to foods, it is reasonable to infer that the principle of explicit and truthful declaration is intended to apply as well to the articles named in schedule 4, as to foods. In other words; just as when an article is sold as pepper or coffee or butter, it is required to be pepper, or coffee or butter, unmixed with foreign matters, so an article sold as white lead, should be simply white lead and not a mixture of white lead with barytes or other cheaper substance. It should not be necessary that the purchaser ask for pure pepper; his demand for pepper assumes that pure pepper is wanted, and requires that pure pepper be tendered. So it should not be necessary to ask for pure white lead, in order to receive such article. A demand for white lead should be sufficient, and if a mixture of white lead with barytes is offered, the article should be labelled in such a way as to show that barytes is present; or at least to show that a mixture, and not simply white lead is offered.

If, in the light of section 38 of the Act, it is not sufficiently clear that the sale for white lead of a mixture of white lead with barytes, or other cheaper substance constitutes adulteration, then it is evident that the Act must be amended in such a way as to make the matter quite clear. It is certain that purchasers of white lead are continually deceived in being induced to believe that they buy genuine white lead when they are really supplied with a mixture containing 50 per cent. or more of barytes; or, in some cases, containing no lead at all.

Sixty-one samples, or more than 58

(Continued on page 47.)

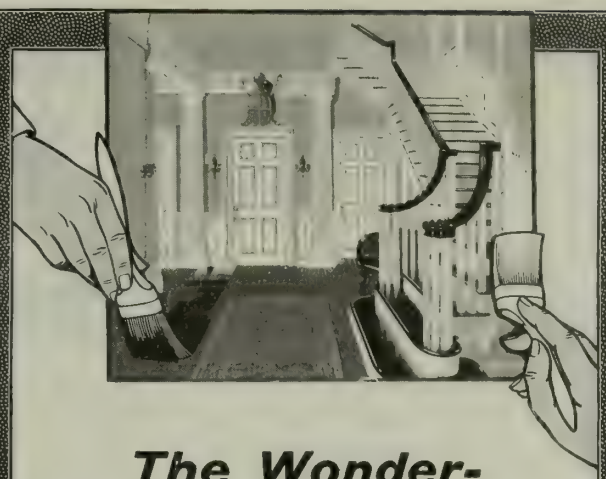
MILLERS FALLS TOOLS

Cuts Clean and True

—and cuts to a depth that insures a perfect break—no skips—no shallow cutting. Your customer will see in a minute the quality of this new line of

MILLERS FALLS GLASS CUTTERS

Backed by the reputation of all Millers Falls tools for durability and reliability. Fitted with Millers Falls "Perfect Cutting" Wheels of just the right hardness, and the right edge for clean cutting and long service and requiring only the lightest pressure. Scientifically tested, two tests to each wheel; they cannot vary.



Made in eleven different styles. No. 7—illustrated herewith — has iron handle, polished cutter head, single Millers Falls "Perfect Cutting" Wheel, each cutter packed in an individual box and retailing at an attractive price. No. 300 has hardwood handle, stained and enameled; nickeled head with six removable Millers Falls "Perfect Cutting" Wheels. Write now for folder showing this new line complete.

Other Quick Sellers of Millers Falls Make

You should carry in stock Breast Drill 200, Hand Drill 1980, Extension Bit Holder 6 and Hack Saw 1027 —all new tools of Millers Falls make with improved features that satisfy a recognized demand.

The Wonder-Working Finishes

Liquid Granite

Lasting Waterproof Floor Varnish

The work of a good floor varnish is two-fold. It should both protect and beautify the surface it covers. Liquid Granite has been doing this two-fold work in homes and public buildings for over half a century. Its lustre enhances the beauty of natural woods and its extraordinary toughness defies the effects of water, weather and hard wear.

White Enamel Luxeberry

Whitest White—Stays White

The same qualities of toughness and elasticity that mark Liquid Granite also distinguish Luxeberry White Enamel. And whether you prefer a finish of porcelain-like brilliancy or dull ivory in tone Luxeberry produces a surface that shows no trace of brush marks and refuses to crack, chip or turn yellow no matter how hard the wear.

You can assure your customers certain satisfaction and yourself sure profits by supplying these well-known brands. If you are not now handling Berry B others' products, write for our dealers' proposition.

Weekly Paint Markets

MONTREAL.

MONTREAL, April 29.—There have been few changes of importance—that is of importance in relation to the unsettled conditions existing—in the paint trade this week. The fact is that from the makers the impression is gained that they have been too busy filling orders to give much attention to the price lists, except to check up the staple lines. Following the general advance in the base prices, to which full reference has been made, there have, of course, been changes more or less general in varnishes, enamels, and miscellaneous products, but these have been largely in accord with individual policies and it is not considered possible that the market will return to anything like a normal state while the war conditions continue.

The spring rush with the country orders has been accentuated by the fact that the season is about ten days in advance of the usual, while the advance in prices and continued buying on the hand-to-mouth basis has prevented the clearing of the decks. Makers report rushing conditions and the oil refiners find confirmation of a strong demand in the consumption of their product.

However, taking the situation as a whole, business is not considered as being quite up to last year. The rush is due to the country demand, which in Eastern Canada, is somewhat brisker than it was last spring, but this does not fully offset the slackness in the city business and the falling-off of industrial consumption, while Western Canada improves, but slowly.

The recent advance in prices has not checked buying to any noticeable extent, although the present demand may not continue. It is indicated that the trade generally adhered to the close buying policy which has been in vogue for some months and this has resulted in continued ordering following a pace behind the seasonable public consumption.

Linseed Oil.—The oil situation remains much as a week ago, with quotations firmly maintained by crushers in view of the strength of the flax market. Deliveries to the city paint trade are heavy. The spread in the market between dealers continues as a week ago, with one house still quoting 80c and 83c as a basis, while 88c and 91c is the top of the market.

	Raw.	Boiled.
1 to 2 barrels	81-88c	84-91c
3 to 5 barrels	80-87c	83-90c
6 to 9 barrels	79-86c	82-89c
10 bbls. and over ...	78-85c	81-88c

Gasoline and Benzine—Early opening of spring has also helped the demand for gasoline, and deliveries have been fairly heavy, while orders are also good. Prices continue at 15c in drums and 14½c tank wagon.

Turpentine—The turpentine situation continues very firm, with steady prices. Some dealers are quoting under the refiners on the strength of stocks secured before the recent rise. The range is as follows:

	Per gal.
½-bbl. lots	70-72c
1-bbl. lots	67-69c
2 to 4-bbl. lots	66-68c
5 to 10-bbl. lots	65-67c

Lead and Zinc—Deliveries of lead and zinc continue fairly heavy and prices are very firm. Lead is $8.95, with 30c advance for broken tons, and zinc is quoted about 14c in 25's.

Glass and Putty—The glass market continues ragged and unsettled with the last official price list continuing as the basis, although these figures are considered as being little better than nominal. Putty continues firm, but the demand is not heavy.

Dry Colors, Etc.—There is little change in the situation as regards dry colors, and the future is very uncertain, becoming daily more serious as the war continues without prospect of an early conclusion. Bright reds and other imported shades are only quoted on request and makers generally prefer to hold stocks for their own consumption. Some items are already being crossed from the catalogues by firms which have had to cease their manufacture.

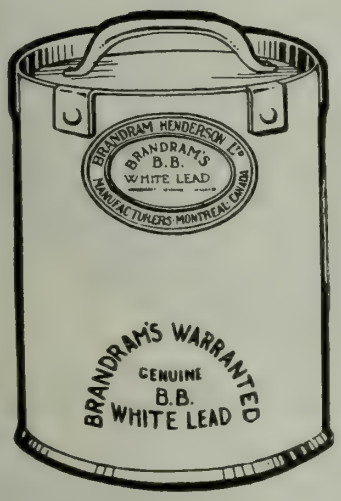
TORONTO.

TORONTO, Ont., April 29.—The paint market has been rather quieter this week due largely to the reports recently received from the war zone. The seasonable weather, however, will soon improve conditions and create a better demand. The city trade is improving and a considerable quantity of paint is being purchased in small lots from hardware stores indicating that householders are not employing regular painters to the same extent as is usual but rather doing the work themselves. Conditions in the country districts are very satisfactory and prospects are exceptionally good for the coming season. There are no price changes of importance to note this week but the situation as regards dry colors has not improved and a further revision may be necessary on account of increasing cost of raw materials. Gasoline is moving freely but coal oil is dull. The glass situation is unsettled and a revised schedule of prices is under consideration. Collections are slow.

Linseed Oil.—Flaxseed is holding firm and crushers are maintaining prices. Local quotations are somewhat irregular for although 80c is being generally quoted one dealer is offering oil as high as 88c. The higher figure more nearly corresponds with the present price of seed but the limited demand is holding prices down. Stocks of cheap oil on hand are also tending to depress the market. The following prices are being quoted in Toronto.

	Raw.	Boiled.
Single barrels	80	83
3 to 5 barrels	79	82
6 to 9 barrels	78	81

Turpentine.—Stocks are light locally and buying is of a hand-to-mouth character. Prices, however, are firm and unchanged. In the South the market is firm, stocks are being depleted and the quantity of new turpentine coming in is light. The following prices are being quoted in Toronto. Single barrels, 73c; 2 to 4 bbls., 72c, and 5-gallon lots, 80c per Imperial gallon.



Dry Colors.—There is no improvement in the situation in dry colors which is still very unsettled. Some colors are becoming very scarce, making prices subject to fluctuation.

Gasoline.—The demand continues to improve and the market is firm. Gasoline is quoted at 18c per gallon.

Glass.—The situation continues very unsettled. The present list is generally considered to be unsatisfactory owing to the way in which the American manufacturers have arranged their schedule of prices. A revised list is being considered by local dealers but no definite announcement has been made.

A Chapter on White Lead

The Can And Its Con-tents

What is in the Can?

If it is as good as the can looks it is very good in-deed.

How neat that rich brown looks, with the Brass Embossed la-bel. What does it say?

"Bran-dram's B. B. Gen-u-ine White Lead!"

Pry up the lid—it's very white and very fine—that's what we like to see; there's nothing like it.

This is the famous Bran-dram's B. B. Gen-u-ine White Lead, well known in ev-ery quar-ter of the Globe.

The leading White Lead of the Bri-tish Em-pire.

The most ec-o-no-mi-cal be-cause it covers most and is most dur-able.

Made by the orig-inal Bran-dram pro-cess of corrod-ing.

By this process through pro-per matur-ing methods, the lead be-comes best fit-ted to meet all clim-atic con-di-tions with-out losing its elas-tic-ity.

This is the White Lead every-body is asking for to-day.

Are you prepared to supply the demand?

About painting the front of your store with

TRADE MARK

CANADA PAINT

It makes a good ad. for your business, and is bound to bring in some profitable trade, not only in paint, but other lines as well. Dress a Canada Paint window, showing the attractive advertising features. Paint the store front—get busy at once. Put a card in the window drawing attention to the paint you use on your own property, and talk Canada Paint to every property-owner who comes into your store.

The electros we furnish free of cost, will get attention when printed in the local paper, showing your name. Newspaper advertising brings probably the largest return for the local dealer of any advertising medium. Mail us a postcard to-day if you want three or four newspaper electros.

Get after business and you will be agreeably surprised at the large quantity of Canada Paint your customers will buy these fine painting days.

THEY COME BACK FOR

MURESCO

"The Best Wall Finish"

The price is all right—dealer price and consumer price—but the great big advantage in selling Muresco is that

You Are Selling Satisfaction

Show your customers the beautiful tints on our sample color cards, and you will start a big run on Muresco, especially as it will not crack, peel or rub off. Muresco is something you can guarantee. Write for terms and discounts on quantities, and for folders, booklets and sample cards.

BELT PERFECTION

Stitched Cotton Duck Belting Makes Business

Trade comes with confidence. Why? Because "Maple Leaf" costs much less than leather, rubber or Balata belting; is stronger and more efficient, and its durability has been thoroughly demonstrated.

We give the dealers every help possible in securing and holding belting business.

The dealer who wants to make a big **paint** profit should stock a **complete** line of paints, varnishes and supplies.

He must handle a product of **known** worth, that will give satisfaction to householder, contractor and painter—a product that will bring his customer back for more and add to the good reputation of his store.

Since 1842 dealers have found that it is an easy matter to hold the whip hand in the paint trade of their district if they handle

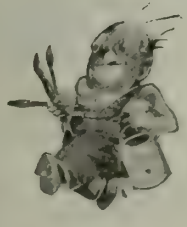
Stephens

HOUSE PAINT

Stephens House Paint is made by experts for the use of both the Painter and Consumer.



The professional painter, as well as the amateur, is a steady user of "Stephens House Paint" because it saves him time and money, and always gives satisfaction. Stephens House Paint has wonderful weather-resisting qualities and no superior as a surface coverer.

If not already represented in your town we will be glad to explain our exclusive agency proposition. Write us about it.

PAINT AND VARNISH MAKERS

WINNIPEG and CALGARY

Handle your Oils and Gasoline with the

Wayne Pump

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness.

Throws a pint, quart, half-gallon or gallon, and measures exactly.

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts accurately machined and thoroughly tested, and are interchangeable.

If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

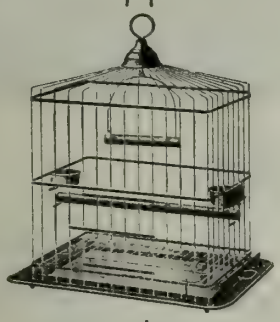
Money In Salesmanship

The trained salesman is practically independent. Scores of business houses seek his services.



It should, therefore, be the aim of every young man to qualify himself for a higher position. He can accomplish this in his spare time, just as hundreds have done.

No work so quickly develops poise, self-reliance, ease, ability to grasp situations, instinct to meet the demands of the moment, and the capacity to meet men of their own level, as representing MACLEAN'S.

This work puts you in touch with the prominent men of each town, a connection of inestimable value. We require representatives in nearly every town and centre of population in Canada. You can make from $5 to $10 per week in addition to your regular salary. We give you a practical training that is worth consideration.

Write us to-day for particulars.

AND HARDWARE SPECIALTIES

More Hammock Sales With Less Effort

An easy proposition wherever

Hohlfeld Hammocks

are the line that's carried.

The harmonious blending of colors and the distinctive design invariably make Hohlfeld Hammocks sell on sight to people of critical taste.

The yarn used is the very best high-grade cotton, hard spun, containing the most tensible strength. Triple strength where the greatest strain prevails.

SATISFACTORY SERVICE.

THE HOHLFELD MANUFACTURING CO.
PHILADELPHIA, PA.

Ingersoll Opportunity

There is to-day, perhaps more than at any other time in the history of Canada, a general changing of conditions. While some lines of business have been completely upset, other lines are booming ahead as never before.

Bolster up your business with profitable specialties. Enterprising hardware men are realizing more and more that attractive specialties which sell easily and without bother are making their stores really profitable.

The popularity and ready salability of the Ingersoll Dollar Watch need scarcely be spoken about. The sale of over 4,000,000 Ingersolls a year testifies for those qualities better than words can.

Ingersolls fit in well with the lighter lines of hardware. Like cutlery, sporting goods, and automobile accessories, these low-priced watches are finding an ever-increasing sale in hardware stores.

The reason is because the classes of people who patronize hardware stores are the classes which use Ingersolls. Carpenters, mechanics, sportsmen and business men, as well as women and boys, all require the Ingersoll combination of accuracy, durability, and economy.

Gather in some of this trade by showing a display of Ingersolls. Order them from your wholesaler or direct from us.

The investment is small—the profit is big—and sure.

Robt. H. Ingersoll & Bro.

200 McGill St., Montreal, P.Q.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

You can talk across the continent for two cents per word with a WANT AD. in this paper.

A Straight Talk From the Manager

The other day a large jobbing house told us that March had been a splendid month with them, and April promised to be the best in their history.

"How do you account for that," we asked, "when general business appears to be considerably below last year's level?"

The answer was: "*We have taken on some new lines.*"

Taking on a New Line

And that is the solution for many a hardwareman's business problem, just now. Under prevailing conditions he cannot hope to hold up sales in some of his staple lines. But there are a great many articles closely allied to hardware that he will find good sellers if a reasonable amount of energy is put behind them.

Just what new lines to take on is in itself a big problem. But the hardwareman who studies the advertisements in Hardware and Metal will find it greatly simplified. Manufacturers have long recognized that when they have a high-class new line suitable for hardwaremen, the best way to tell about it is in the advertising pages of Hardware and Metal.

In this very issue there are many new lines advertised. Don't neglect to study the advertising pages, and to write the advertisers at once for more detailed information on any lines that interest you.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

WANTED TO HEAR FROM OWNER OF good hardware store for sale. Send price and description. D. F. Bush, Minneapolis, Minn. (14)

TINSMITH WANTS POSITION—GOOD ON furnaces, troughing, cisterns, general bench work, clerking if necessary; married; good references. Box 231, Kindersley, Sask. (19)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

J. H. McCOMB LIMITED
MONTREAL

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

YOUR GUARANTEE

GIPE-HAZARD STORE SERVICE CO., LTD.
97 Ontario St., Toronto, Canada

INSTALL Gipe-Hazard Carriers — use them ten days—put them to every test—and if they do not give quicker, better and more satisfactory store service than any other system, they may be returned at our expense. Fair enough, is it not? Investigate our modern Electric Cable Cash Carrier and Pneumatic Dispatch Tubes.

Send for our new Catalogue F.

A Few Dollars More a Week

makes a big difference in your yearly income.

Have you ever thought how you might add to your weekly salary without interfering with your regular work?

Will you let us solve this problem for you?

So far this year, we have shown seventy-five enterprising and ambitious clerks how to make $5.00 a week more during their spare hours. They will each make additional salary every week this year, and longer should they wish.

If you would like us to show you, write to-day.

This is genuine.

The "Easy" Washer

Easy to Sell—Easy to Operate

Strong, durable, noiseless.

Works by suction—not friction. Removes all the dirt without injuring the finest fabrics. All metal. Will not rust. Sanitary—(will not absorb moisture or impurities).

Ask us to tell you all the advantages—they go to make good sales with but little effort, and they mean highly pleased customers everywhere.

Drop a line for full particulars on our Hand and Electric Power Washer and our Agency Proposition.

EASY WASHER COMPANY

6 Clinton Place, Toronto, Ont.

Builders of Hand Power and Electric Washers, for Canadians, in Canada.

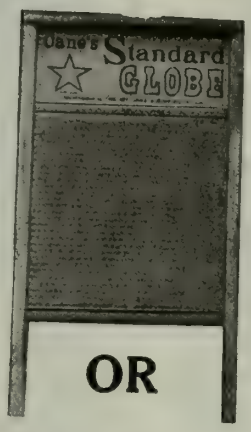
THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Easy Seller Because--

It is exceptionally convenient, quick acting and an oil saver.
Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted as the flow of oil stops the instant the pressure on the plunger stops.
A sure good sale and splendid profit. Order it now.

R. E. BLOOMER



KEITHSBURG, ILL.

Advertising

"Advertising is the education of the public as to who you are, where you are, and what you have to offer in the way of skill, talent or commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service."—*Elbert Hubbard.*

"It's an ill wind that blows no good"

ALUMINUM

ZINC

OR

The War—

has raised the price of zinc and consequently the price of washboards—

BUT

the BIG CANE VALUE IN WASHBOARDS IS BIGGER THAN EVER because it has come to a point where we can use aluminum in place of zinc.

ALUMINUM IS LESS LIABLE TO CRACK, SPLIT OR CARRY DEFECTS THAT WILL TEAR THE CLOTHING BEING WASHED ON IT, AND IT PRESENTS A MUCH BRIGHTER APPEARANCE THAN ZINC, AND IS MORE ATTRACTIVE ON THAT ACCOUNT.

We are prepared to deliver our standard brands of washboards with aluminum washing plate at **the same price as that of zinc** ones on receipt of instructions from our customers, through the jobbing trade. ORDER NOW.

The Wm. Cane & Sons Co., Limited

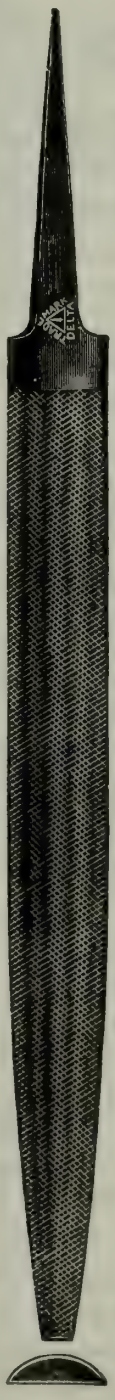
Newmarket, Ont.

R. BIRD & CO.

Crewkerne, England

Wholesale. Orders through merchants.

WEBBING



Manufacturers of

Cotton, Linen and Woollen Webs, Straining Webs, Ready-Made Girths, Rollers, Surcingles and Horse Clothing of every description for the Saddlery Trade; also of **Chair, Tray, and Cocoa Binding Webs**, for Upholstery Purposes.

Awards:
Gold Medals, Calcutta, 1883; International Exhibition, 1885; and First Order of Merit, Adelaide.

The extraordinary deep cut and life of DELTA FILES

is a big attraction for file users

First sales invariably result in regular business.

And this regular business will help you sell mill supplies as well to same customers.

The Delta File is thus not only a profit maker, but a business builder for the wide-awake hardware merchant who handles and pushes it.

The only line of files from 3 to 24 inches made absolutely of crucible steel.

A shape and size to meet every demand.

Let us join forces now—write for details re the agency of your vicinity.

The No. 96 Torch
THERE IS A GROWING DEMAND
for Kerosene Torches. C. & L. No. 96, quart size, produces a steady blue flame of intense heat, devoid of smell and smoke. The burner is made of special metal and so constructed that perfect generation is obtained, and it is sure to please the user. The tank is made of seamless drawn brass, fitted with large automatic brass pump, which quickly supplies the required air pressure. The No. 96 is strong and durable, and where Kerosene as fuel is desired, will give perfect satisfaction. All leading jobbers will supply at factory price. Send for catalog it's free.

GEO. W. LAIDLAW, Vancouver, B.C. HARRY F. MOULDEN, Winnipeg, Man.

EUREKA GLASS TANK SPRAYER

STRONGLY MADE. WELL PAINTED. ATTRACTIVELY FINISHED. For Spraying Potatoes, Tobacco, Small Shrubs, and all disinfectants in poultry houses and on live stock, this will be found an excellent sprayer.

The pump cylinder is supplied with an air chamber, which prevents any of the solution being drawn back into the valves, and also greatly increases the pressure when spraying. Discharge tubes are brass—no corrosion. Pump rod is hard steel. Plunger leather is of special type, and is made from heavy calf leather. Equipped with regular crown jar and ordinary rubber ring.

FULLY GUARANTEED. PRICES ATTRACTIVE.

Drop a line for Catalog on Sprayers.

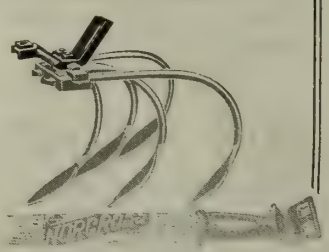
9 and 11 Pitt St. East, Windsor, Ont.

Made in Canada
Sold in 5 Continents

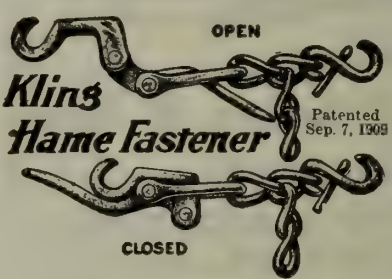
This is *our* record. Ross Rifles have won a market in 5 continents on merit alone. In Canada we naturally expect to be favored somewhat, because, sentiment aside, it's an advantage to buy a rifle which you can get duplicate parts of, repairs, etc., without delays or customs vexations.

Have you any of the Ross Cadet .22 Calibre Rifles on hand to fill the Summer demand ?



Ross Rifle Company
QUEBEC, CANADA

"NORCROSS" Cultivator-Hoes and Weeders



Lead in Quality, Finish and Features, and pay a good profit.
Price is nearly as low as imitations and the ordinary hoe, but the service is decidedly better.

By means of our Patented Detachable Ferrule and Universal Connection, our 5-prong will attach to Standard Wheel Plows, an exclusive "NORCROSS" Feature. (See cut.)
Get our 16-page interesting Cultivator Booklet.
A Postal will bring it, with address of nearest Canadian representative.

C. S. Norcross & Sons
Manufacturers
BUSHNELL ILL., U.S.A.

MADE IN CANADA

Like the British Navy, there is no getting away from it. Always ready for instant use. On or off in a jiffy. Holds like grim death. So simple a child can fasten it. Keeps the hames always uniformly tight. Safe and Strong. A fast seller, with a big profit for the dealer.

All Jobbers should or do sell it. $2.25 per dozen.

COLLINS SPRAYER
IMPROVED AUTOMATIC COMPRESSED AIR

Easy and Very Profitable Sellers

The strongest sprayer of its kind on the market, bottoms of heavy 22 gauge, seams riveted, guaranteed against blow-outs.
The nozzle is worked by a lever, a slight pressure of the hand makes it spray. Nozzle and coupling of solid brass castings.
One of the great features in this machine is our COUPLING, CONTROLLED BY US, constructed in such a way that the handle does four operations.
Cylinder is absolutely non-leakable. Valve cannot blow out and is so simple that it cannot get out of order.
Be sure to write for particulars now.
Every one guaranteed. All jobbers sell them.

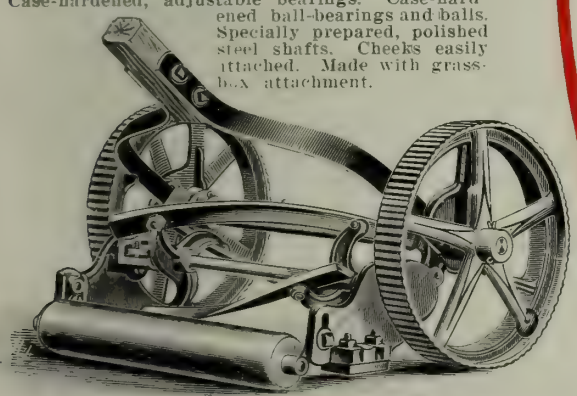
TAYLOR-FORBES LAWN MOWERS

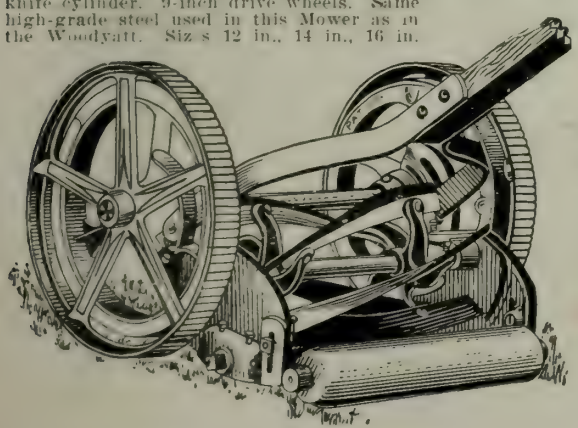
"MADE IN CANADA"

Over 40 Years' Specialization, Best Quality Workmanship and Material, and the Most Modern Mechanical Facilities have resulted in Lawn Mower Quality, Finish, Service and Distinctive Mechanical Features that have won "High Place" in the estimation of all who know.



When you buy T.F. Mowers you buy CANADIAN-MADE GOODS—you keep Canadian workmen busy and YOU HELP YOURSELF, because you get extraordinary quality and you keep the money in Canada, which helps to better conditions and your business.

THE WORLD IS OUR FIELD.



THE "EMPRESS"

Open four and five-knife cylinder. 10½-inch wheels. Special tool steel knives, oil tempered. Case-hardened, adjustable bearings. Case-hardened ball-bearings and balls. Specially prepared, polished steel shafts. Cheeks easily attached. Made with grass-box attachment.

THE "STAR"

Cast steel knives, oil-tempered. Adjustable half-box bearings on cylinder shaft. Adjustable bottom knife. Wood rollers of hard maple. Three and four-knife cylinder. 9-inch drive wheels. Same high-grade steel used in this Mower as in the Woodyatt. Sizes 12 in., 14 in., 16 in.

THE "WOODYATT"

Open four and five-knife cylinder. Tool steel knives, oil tempered. Bearings are extra long and adjustable. Best quality material used throughout its construction. Made with grass-box attachment. This mower has been on the market longer than any other high-grade mower in the world.

WHEELER & BAIN, Toronto

The UNIVERSAL Vacuum Bottle

Its Many Points of Superiority

By test and comparison shows the highest efficiency in the maintenance of temperature.

The filler is made from the best glass that can be obtained for the purpose and in actual tests shows the greatest resistance to breakage.

The support between the walls of the filler is the best thing yet devised for preventing vibration of the inner bottle.

The filler is supported in the case by a patented spring steel retainer and shock absorber which not only protects the sealing tip and base of the bottle, but by holding the bottle firmly in the outer case, protects the sides as well.

All models are of separable type with interchangeable parts and may easily be taken apart for cleaning or repair.

In the nickel-plated bottles the seamless, drawn brass case is of a heavier grade than is generally used. It receives a coating of copper before being nickel-plated, which gives it a superior appearance and more lasting finish.

The cases used in the lower-priced bottles are of extra strong material, finely finished.

UNIVERSAL Vacuum Bottles are the most sanitary in the world, as rubber or felt pads, cork rings and cement fastenings form no part of their construction.

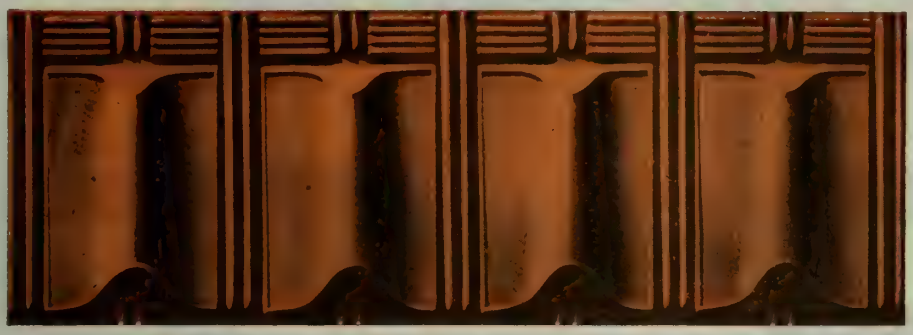
Sectional View showing correct principles of construction.

NOTE—The support between glass walls preventing vibration of the inner bottle.

NOTE—The location of sealing tip at point where nothing can touch it when bottle is in case.

NOTE—The non-rusting spring shock absorber which supports bottle in the case, protecting both bottom and sides.

NOTE—The close-fitting gasket at neck of bottle which positively prevents entrance of liquid at this point.



Extreme simplicity of construction, unusual strength, absolute cleanliness and unequalled efficiency are combined in the line of UNIVERSAL Vacuum Bottles and Accessories.

Prices $1.00 and upward.

SARNIA ART KRAFT SHINGLES

No. 4
WINIR" TILE

Full Size Section 14x41½ inches, Covers When Finished 12x40 inches
Size of Individual Tile 10x14 inches
Made in Galvanized Iron, Painted Iron, Tin or Copper

COMPLETE "WINIR" ROOF
Composed of "WINIR" Tile, Gable and Hip Finials, Cresting Blocks, Ridge and Hip Moulding and Hip End Finish
Made in Galvanized Iron, Painted Iron, Tin or Copper

"ART KRAFT" Metal Shingles will absolutely set your roof free from the expensive deterioration and objectionable limitations of wood shingles and actually cost less by comparison.

The first cost is the only cost—No repair bills.

Your investment is safeguarded and your roof satisfaction grows with the age of the building. In fact, we urge you to take these points into consideration when selling steel shingles to your customers.

We hope you will send at once for our bulletin on Sarnia "Art Kraft" Shingles, which explains in detail our shingle and its advantages over wood.

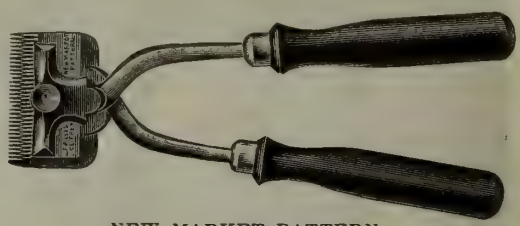
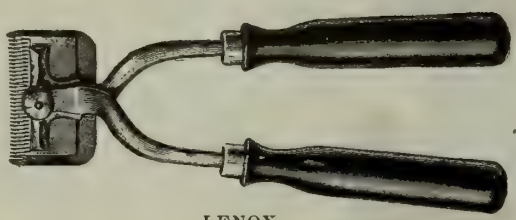
Makers of the Ford Metal Garage

PRIEST'S HORSE and TOILET CLIPPERS



Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.



Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to cut hair, not break it off by main force.

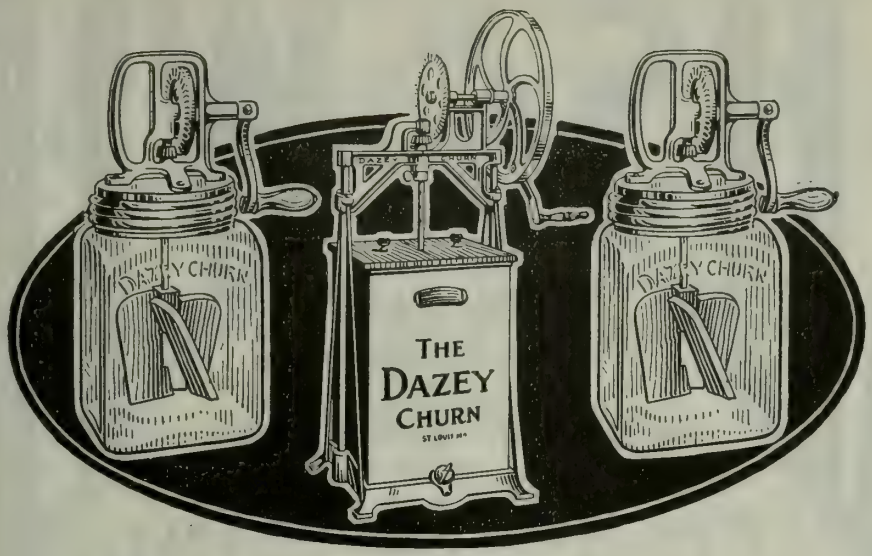
New Machines with an Old Trade-Mark

Both are Cummer-Dowswell's

Always use C-D Wringers with C-D Washers. The Combination gives Unequalled Results.

The "MAGNET" is one of the easiest running and most convenient to operate hand washers of the many we have produced. It can be operated sitting or standing. The mechanism is attached to side of tub (instead of cover), and can be belted to either gas, gasoline, steam engine, windmill or electric motor power without any change to gearing. Cover can be lifted without removing belt or stopping power.



The "NEW CENTURY JUNIOR" is a swinging tub hand washer built on the well-known and time-tested NEW CENTURY principle, but without a rod up through centre, leaving nothing inside the tub but two rubbing boards.

Both have the same perfection in construction, materials, easy running and lasting qualities that have made our products known and used from Halifax to Vancouver.

Facts About Dazey Churns

More than 350,000 are now in use in hundreds of thousands of homes, in every part of the world.

In practically every town in the United States and a great many Canadian, responsible Dealers in Hardware sell and recommend Dazey Churns.

Are carried in stock by more than 150 of the Largest Hardware Jobbers in the United States and many foreign countries.

That they are undoubtedly the greatest advancement of the last century in churn making — combining Simplicity with a Scientific Principle of separation of butter-making properties of the cream —resulting in the production of a perfect granular butter in the marvelous time of 2 to 6 minutes.

That they have revolutionized butter-making — actually resulting in nothing short of a national conversion.

Special Prices to the Canadian Dealers. Catalog and information on how to increase your churn business will be sent upon request.

The King's Plate

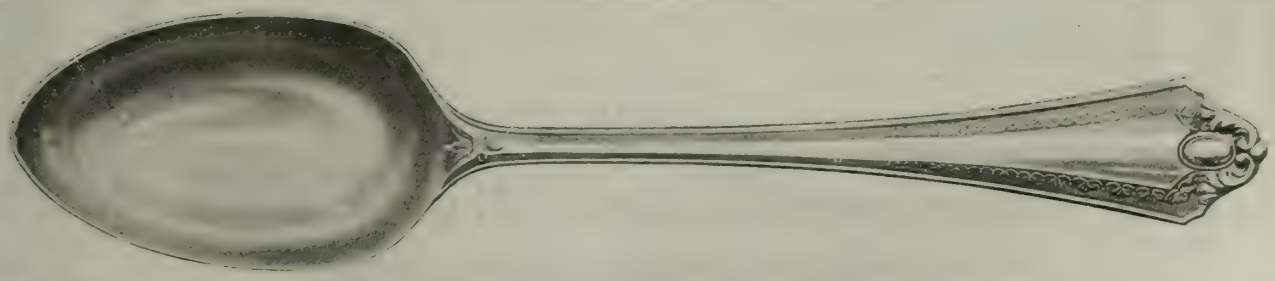
MADE IN CANADA

A Triumph in Plated Ware

An All Canadian Achievement

Any high standards that the name—The King George—may suggest to your mind are more than fully borne out by the superlative character of the plated ware thus named.

In design, in workmanship, in finish, the King George is an unreserved triumph—a triumph for Canadian skill and for Canadian capital.



In comparison with the plated ware produced in Europe or the States, the King George, designed and made in Niagara Falls, Ontario, is not surpassed. Indeed, few lines can approach it in all-round excellence.

Stanley Tools

Carpenters' Steel Squares—A New Stanley Line

Stanley Steel Squares are made with the same careful attention to detail and the same high quality of material and workmanship as distinguishes all STANLEY TOOLS.

Every square is weldless, or, in other words, made from **one** piece of steel, and all four edges are machined. Particular attention is called to the finish of all numbers and the depth and accuracy of the graduation.

Special care has been given to the simplifying of all tables used, so that the workman can get the measurements he desires with ease and rapidity.

They can be furnished in a number of different styles and the variety of finishes offered include Royal Copper, Blued, Nickel Plated, Galvanized and Polished. All Royal Copper and Blued finished Squares have white enamel figures and graduations.

Each Square is packed in an anti-rust wrapper and this stamp STANLEY appears on the face of all numbers.

The Fight for Durability

Chapter XIV.

There is no "let up" in the sheet mill in this fight for durability.

In heating the bars before rolling them into sheets perfect material may be ruined.

If a heavy scale is raised and afterwards rolled into the sheet, imperfection inevitably follows which hastens corrosion.

If carelessly rolled the sheet may come through buckled—dished—pinched and otherwise distorted.

If the rolling temperature is not guarded the sheets may stick in the pack, necessitating swording or a tearing apart, which again very greatly injures the sheet from a standpoint of durability.

Excessive cold rolling while leveling and smoothing out the scarred portions of the sheet is apt to cause hard spots—stresses and strains.

ARMCO IRON Resists Rust

A careful study and guarding against these causes of rapid corrosion would make a steel sheet last longer than one rolled in the usual manner.

It is the knowledge of these causes of defects in the finished sheet and their total elimination in the production of Armco-American Ingot Iron that insures its durability.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

"R-W" No. 100 Crackerjack

Jack Troubles End when the 'Crackerjack' arrives

MECHANISM.—Only one spring and that very strong. No small or delicate parts to get out of order. Fewer parts than any other. All working parts protected by 14 gauge steel body.

ACTION.—Eight strokes of handle will raise car three inches. (The ordinary screw jack requires 40 strokes to do the same.) Same motion for raising or lowering. When weight is off, the rack releases by tipping jack forward.

DETAIL.—Height at lowest point 10½ ins. Height at highest point 16¾ ins. Machine-cut rack, rotary cap. Every jack tested to 1000 pounds. Finish black enamel.

Retails in Ontario at $1.60 each.

3 MONEY MAKERS IN Auto HARDWARE for HARDWARE Merchants

Richards-Wilcox No. 297

SHOCK ABSORBERS

For Ford Automobiles

Will make the car ride easier, cut tire bills 25 per cent., and add years to life of the car. Cannot be injured by an overload, no caps to rattle or loose off. Has been thoroughly tested and meets with approval of all users. Their sensitiveness of action automatically absorbs jars and jolts, heavy or light, and prevents the rebound. Easy to apply. They take the place of the spring shackles and can be applied without removing wheels or tearing down axle.

Finish, Black Enamel. Weight per set 13 lbs.
Retails in Ontario at $8.00 per set of four.

The RIGHT time to PUSH these goods is NOW.

SAVE THE TIRES

By using a Set of

R-W 501 TIRE SAVERS.

They Pay For Themselves Quickly.

Car is lifted or lowered in twenty seconds—just one straight lift on each wheel. If used every night tire mileage is increased a third.

All steel, cannot crack. Leather-lined yoke prevents marring of hub.

Adjustable to fit any wheel up to 36 inches. Self-locking handle, cannot fly back.

Retails in Ontario at $4.00 per set of four.

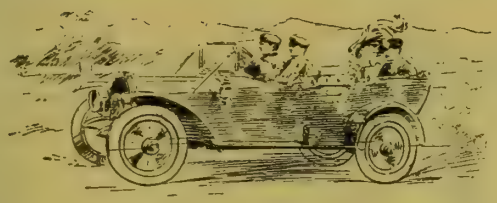
Sell the "Chemically Correct" Line of Automobile Accessories

Especially Sell

SE-MENT-OL

the original self-acting radiator cement

No accessory department is complete without it, and no hardware store is complete without an accessory department.

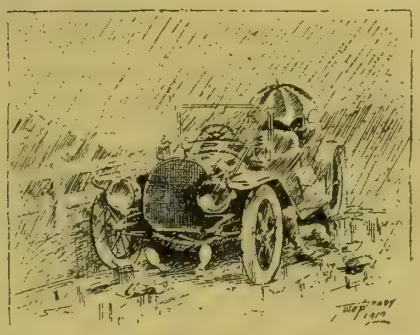


SE-MENT-OL, poured into the radiator, dissolves in the hot water. While in solution, it passes out through the leak. As it strikes the cool air at the cavity, it congeals, slowly depositing itself around the edges of the leak until the hole is closed with cement. *It takes about fifteen minutes and the repair is permanent.*

"Finds the leak and fixes it." No tedious tinkering with torch and solder. No removal of radiator. No material loss of time. No fine motoring weather missed. When the radiator stops leaking, you simply drain off the water and refill with fresh water. It couldn't be simpler.

SE-MENT-OL retails at 75 cents a can. It should be in every tourist's kit. The automobile tourists will demand it this year. Will you be ready?

Write to your jobber NOW.

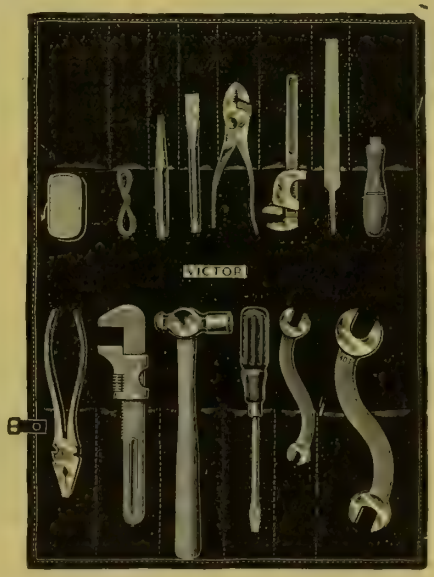


The Northwestern Chemical Co.
MARIETTA, OHIO

AUTOMOBILE TOOL KITS

Hardware Dealers in every town should stock these Tool Kits.

Every owner of an Automobile will buy one if it is drawn to his attention. He needs the Tools, and he can appreciate their immense value to him in case something goes wrong when on the road.



They Solve the Tool Problem

The Automobilist can be sure that he possesses all the tools likely to be required when he owns one of these kits.

In Bound Canvas Rolls

Each Tool in a Separate Compartment

VICTOR KIT No. 1.

The most complete and practical Kit made. Contains 16 pieces, and includes every tool necessary. Unquestionably as fine a set of tools as ever carried by an automobile.

VICTOR KIT No. 2.

A cheap Kit, which contains all the tools likely to be needed. The tools are high-grade, and the kit is not equalled at the price. Contains 14 pieces.

These Goods Need Only be Shown to Sell—Think of the Chance to Sell a Dozen or More Tools at One Transaction—at a Good Profit.

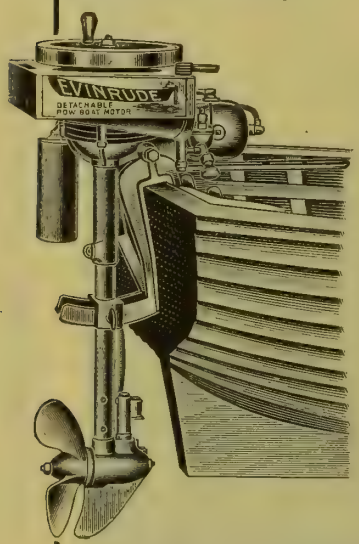
Your Opportunity

To Make Extra Profits



This Season

If there is any boating in or near your town you can profit by being the local agent for

Evinrude Motors

We are conducting an extensive advertising campaign in the following Canadian Publications:

Toronto Saturday Night **Canadian Magazine**
MacLean's Magazine **Rod & Gun**
Canada Monthly **Motor Magazine**

In addition to this advertising a large campaign is being carried in the

Saturday Evening Post

and other U. S. Periodicals, circulating generally throughout Canada. This advertising will greatly increase the demand for

THE EVINRUDE MOTOR

Every inquiry from your territory will be promptly turned over to you. We will mail personal letters and catalogues to prospects whose names you send us, requesting them to call upon ***you***—our Local Agent.

We will furnish you with "exclusive agents" window display cards. They make sales. It will be easy to sell Evinrude Motors with the help we give you, and you can fill your orders promptly, because these motors are carried in stock by our

CANADIAN DISTRIBUTORS.

There will be only one Evinrude agent in your town. Will you be that one? If so, write for particulars.

MELCHIOR, ARMSTRONG & DESSAU
Broad & Water Sts. **New York City**

THERE IS ALWAYS A DEMAND

for a good furniture and floor dressing. These are staple articles. Now, the housewife has come to recognize

IOCO
LIQUID GLOSS

as the most satisfactory. She heard of it through our advertisements, tried it, and now considers it the standard.

Ioco sells so well because it does more than merely polish furniture and floors. It collects instead of scattering the dust, and it keeps the varnish from cracking.

Ioco also has a large market with the automobile trade. It is excellent for the finely finished surfaces of motors.

Ioco Liquid Gloss comes in half-pint, pint, quart, half-gallon, and 5-gallon lithographed tins, also in barrels and half-barrels.

Use our advertising to increase your sales. For prices, write any branch of

Lamp Wick

The finest quality closely woven wicks for use in all makes of oil lamps. Nothing better on the market—they burn even and last longer than the ordinary cotton wick.
Each $0.03 **Per doz. $0.15**

Fig. 12

Acetylene Burners

ALCO No. 12

The largest seller and best known Lamp Burner in the world. Always made of Genuine Lava, warranted unsurpassed in Candle Power or Life. Used by practically all the important Auto Lamp Makers. Carried in ½, ⅝, and ¾ ft. Standard is ¾ ft. (Wt. 1oz.) **Each $0.20**

Fig. 13

Jet-Lac

A quick air-drying enamel for lamps, horns and brass work of any kind. Produces a fine black (dull or bright) finish that is durable and elastic and will not scratch or chip off. Heat, oil or grease will not affect Jet-Lac.
Pint can (Weight, 2lbs.).....**Each $1.50**

Fig. 14

Metal Polish

A metal polish that not only cleans but produces a brilliant, lasting lustre.

Wonder-Worker Polish cleans quickly and easily. All polishes require more or less rubbing to produce results; with very little exertion, brass is given a fine burnished appearance when Wonder-Worker is used.

Pint can.....(Weight, 2lbs.) **Each $0.25**
Quart can.....(" 3lbs.) " **.50**
Gallon can.....(" 10lbs.) " **1.25**

Fig. 15

Electric Headlights

Specially designed for the Ford, these lamps are strong, sturdy and handsome. Regularly fitted with one bulb. Another bulb for dim light will be fitted at extra cost. (Weight, 5lbs.)

E. 44—Black & Brass.....**Each $5.50**
Black & Nickel..... " **5.50**
For 2-bulb lamp add " **1.25**

Electric Lighting Outfit

Fig. 16

A high grade outfit for changing gas lamps on Model "T" Ford cars to electric.

Consists of two highly polished silver reflectors, two genuine tungsten electric bulbs, Edi-Swan sockets, connectors, switch, wiring, tape. Complete, ready to attach.

Any one can install this outfit. Designed to operate perfectly with the magneto and cannot injure the ignition system in any way. (Weight, 3lbs.)

No. 1—Outfit complete.....**Each $3.00**

Fig. 17—No. 3

Adapters

Bayonet socket fitted to adjustable nickel plated brass clips.

Do not interfere with regular oil burners.

Simple and durable.

Fig. 18—No. 1

No. 1—Oil attachment. **Each $0.40**
No. 3—Changes lamps with candelabra screw base to fit bayonet socket. **Each $0.20**

Fig. 19

Copper Tubing

Finest annealed tubing for oil or gasoline lines. Can be bent in any position without fear of cracking or breaking.

O.D.	Gauge	Wt.	Per ft.
¼	22	1oz. per ft.	$0.06

Fig. 20

Ever Ready Switches

are made in response to a large demand for a switch at once compact and attractive. They are particularly suitable for cars carrying dynamo lighting sets, and are absolutely to be depended upon for effective service. They have a positive snap action with wiping contact.

No. 1447—One way (Wt., 5oz.)**Ea. $0.80**
This is not a flush type of switch.
" **1724**—Two way (Weight, 7oz.) **1.75**
" **1724**—Three way (" 8oz.) **2.60**

Fig. 52

Klaxet Horns

The Klaxet is the ideal signal for use on small cars and runabouts. It is made in but one type as shown above.

It is the only high grade and thoroughly efficient motor-driven electric signal selling at a low price.

(Weight, 8 lbs.) **Each $13.00**

Hand Klaxon

Fig. 53

Operates instantly and easily and gives a loud penetrating tone.

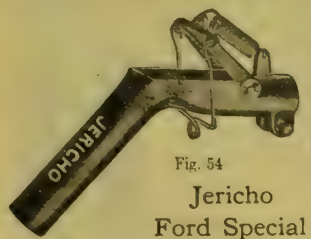
Finished in black, black and brass, or black and nickel.

Type "L" (weight, 8 lbs.) **Each $9.00**

Hand Klaxonet

(Not Illustrated)

The latest addition to the Klaxon family. **Each $5.50**



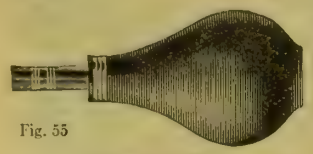


Fig. 54

Jericho Ford Special

No. 00—A most effective exhaust horn for Ford cars. Supplied with proper fittings ready to attach.

(Weight, 2 lbs.) **Each $3.65**

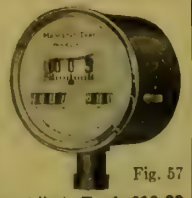
Fig. 55

Horn Bulbs

Finest quality rubber, chemically cured, making them soft, pliable and springy.

No. 12—(Weight, 1 lb.) **Each $0.60**

Fig. 56



Ford Horn Reeds

Finest quality non-corrosive, vibrating reed fitted with threaded collar.

Made especially to fit the horns that are furnished as equipment on Ford cars.

(Weight 1 oz.) **Each $0.25**

Stewart Speedometers

Fig. 57

Model 100—2½ inch dial, 60 mile speedometer, 100,000 mile season odometer, 100 mile trip register. (Wt. 11 lbs.) **Each $16.00**

Speedometer Parts

	Each
Swivel joint	$3.37
Flexible shaft	3.85
Flexible shaft casing	2.35
Flexible shaft chain, with end con	1.69
Clutch for chain (speedometer end)	.14
Sliding bar fitting (swivel joint end)	.27
Wh el gear, with washers and screws	1.35
Pinion on small gear (steel or fibre)	.34

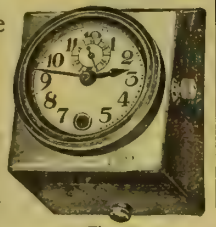
Juno 1 Day Clocks

Fig. 58



A high grade timepiece; good reliable movement, warranted in every respect. 2½ inch porcelain dial, plain readable figures, with second hand.

Brass case, 3⅝ inches high. Stem wind and set. Safety attachment for dash.

Finished in brass, black or nickel.

(Weight 1 lb.) **Each $1.85**

Suwanee 8 Day Clocks

Fig. 59

These clocks are practically dust and water tight, and have outside hand sets.

The special attachment for securing to dash board goes with each clock. It prevents the removal of clock without using a special key. Key wind.

8 day time, 2½" porcelain or silver dial. Beveled glass. Screw bezel. Height, 4½". Width, 3½". (Wt. 3 lbs.) **Each $7.50**

"G.H." Cut-Out Outfit

Fig. 60

The "Gray-Hawley" is the simplest and highest grade cut-out manufactured. Its outlet is very large, can be so attached as to throw the exhaust downward at an angle of 30°. Recommended for high grade requirements and consists of a cut-out proper, locking foot pedal, cable and spring.

Style 5-B (Weight 4 lbs.) **Each $2.25**

Fig. 61

Front Spring License Bracket

Consists of two strong steel brackets that fasten to the spring bolts. Simple, neat and durable.

Easily attached. Holds license securely and does not rattle.

(Weight, 8 oz.) **Per pair $0.30**

Fig. 62

Front License Bracket

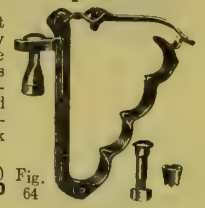
A practical and substantial bracket for holding the front license number on Ford cars. Attaches very quickly to right hand headlight bracket and remains secure.

(Weight, 2 lbs.) **Each $0.40**

Will not hold plate over 15 inches long.

Fig. 63

Rear License Bracket



Hold license tags firmly in position and illuminate rear number as required by law. Any make or style of lamp can be readily attached to these brackets.

Furnished in black enamel. (Wt. 2 lbs.)

No. 22—Regular **Each $0.50**

Bair Bow Top Holder

A device that automatically holds rigid the top and makes rattling impossible. Finished in highly polished black enamel.

Fig. 64

(Weight 5 lbs.) Set of 2 **$3.00**

Fig. 65

Starting Handle Holder

Prevents handle swinging. Also keeps it clean. Made of oak leather. Is adjustable to any length necessary. (Wt. 3 oz.)

No. 1—"G.K." Oak Grain Leather **Each $0.30**

Fig. 66

Fan Belts

Made of best material, oil proof, cut and stretch proof. (Weight 3 oz.)

Fabric (Thermoid) **Each $0.40**

"G.K." Oak Tanned Leather " 0.5

Fig. 21

Bosch Plugs

For magneto or batteries.

The special construction absolutely prevents all leakage. Nickel alloy electrodes are made to withstand the intense heat of the Bosch magneto spark and consequently long life of the points is secured.

Particularly effective on motors where too much oil reaches the plugs. Made in all threads. (Weight, 6oz.) **Each $1.35**

Fig. 22

"Champion X" Plugs

Not only a low price plug, but well made and reliable, and especially adapted to Ford cars.

Made of best materials and guaranteed to give satisfaction. All threads.

(Weight, 4oz.) **Each**

Plug complete **$0.75**

Extra porcelain **.40**

Fig. 23

J-D Ford Special

Will give the best possible service on Ford Cars.

Bushings and Packing nut are case-hardened, insuring long life. Porcelains of the highest grade heat-proof composition.

The all-metal packing forms a perfectly tight joint and eliminates all asbestos or other shrinkable materials. Made in all threads. (Weight, 3oz.) **Each $0.75**

Extra porcelain " **.40**

Fig. 24

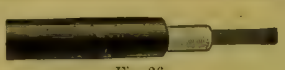
Vital Plugs

The big powerful plug that gives lasting service and satisfaction. It has solid nickel electrode and contact points, careful provision for contraction and expansion is made, preventing porcelain breaking from heat. Made in all threads. (Wt., 3oz.) **Each $0.75**

Extra porcelain " **.40**

Fig. 25

Champion Priming Plugs



Absolute necessity on cars without priming cups. In construction identical with the regular "Champion" Spark Plug, except fitted with a special priming device as illustrated.

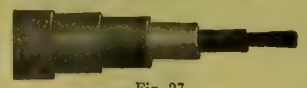
(Wt. 5oz.)

Made in all threads. **Each**

Fig. 8 **$1.25**

Extra porcelain, **Each .40**

Fig. 26

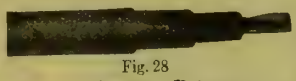


Standard Ignition Cable

Good grade materials, perfect in every respect. A good reliable rubber-covered cable at a low price; stands a high voltage test and will give fine service: **Per ft.**

Primary	5 mm	O.D. (Wt. 1oz.)	**$0.04**
"	7 "	" (" 2oz.)	.06
Secondary	9 mm	O.D. (" 2oz.)	.10
"	12 "	" (" 3oz.)	.15

Packard Cables



A high grade ignition cable used on many well-known cars. Autoists in general are familiar with this cable, making unnecessary any detailed description of its merits.

Fig. 27

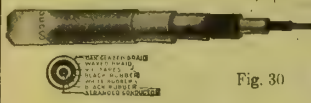
High Tension Magneto

Designed especially for magneto use. Made to stand a break-down test far more severe than its requirements.

(Weight, 2oz. per ft.) **Per ft. $0.20**

Fig. 28

Low Tension Primary

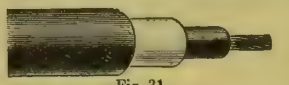


Composed of stranded tinned copper wires covered with two windings of cotton thread, two layers of cambric, three coats of enamel paint, four coats of enamel and four bakings. (Wt. 1oz.) **Per ft. $0.10**

Fig. 29 Strand.

Low Tension Primary

Regular low tension primary cables insulated as above, but under one cover.



Two strand	(Wt. 2oz.)	**Per ft,**	**$0.20**
Three strand	(" 2oz.)	"	.30
Four strand	(" 3oz.)	"	.40

Fig. 30

Dominion Cable

Insulated cable for primary and secondary wiring, soft drawn copper wires covered with semi-cured India rubber and wound with a special braid, which is acid, oil, grease, water and to a great extent fireproof.

	O.D.	Wt.	Per ft.
Primary	¼ in.	1 oz.	$0.04
Secondary	7-16	2 oz.	.10

Fig. 31

Bosch Magneto Cable

This is a high grade rubber-covered cable made to specifications for the manufacturers of Bosch magnetos. There is no better cable of this kind sold at any price. **Per ft.**

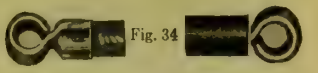
Low tension 5 mm (Wt. 1oz.) **$0.11**

High " 7 " (" 2oz) **.14**

Fig. 32

Copper Terminals

Standard styles and sizes. Extra heavy, the simplest and most substantial terminals made.



No.	Wt.	Per doz.	Per hun.
0 Small Primary	1oz.	$0.10	$0.30
1 Large "	1oz.	.15	.35
2 Secondary, Mag. Size	2oz.	.20	.70
3 " Heavy	3oz.	.25	1.00

Fig. 33

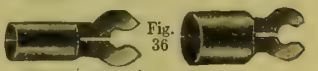
Magneto Terminals

Made of brass, the most durable and efficient terminal for magneto work. The pointed end is forced into end of cable, the wire is slipped under loop and soldered.

A most positive connection, eliminates all possibility of short circuits or loose connections; one size only. **Per doz. $0.25**

Fig. 34

Bosch Loop Terminals



The most perfect terminal made. Best results secured when attached with Bosch Terminal Tool illustrated below. Made with ferrule for small braided cable.

High or low tension terminals **Each .04**

Fig. 35

Bosch Terminal Tool

A particularly neat and effective tool for forming the Bosch Loop Terminals shown above. A small descriptive booklet fully describing this tool will be sent on request. **Each $17.50**

Fig. 36

Spring Slip Terminals

Made of brass. A practical and serviceable style. Will fit every standard make of plug. Please order according to outside diameter of cable, giving size in thousands of one inch. (Wt. 3oz.) **Per doz. $0.50**

Fig. 37

Copper Terminal Outfits

Contains 50 each No. 0 and 3, 100 each No. 1 and 2 terminals and 100 Standard battery connectors, all enclosed in a strong substantial case. (Wt. 3lbs.) **Per box $2.00**

The Canadian Fairbanks-Morse Co., Limited

Fig. 84

Ford Piston Rings

High grade rings, cast individually from a special gray iron mixture, close grained and tough.

Perfectly and accurately machined and finished. (Weight, 2 oz.)

¼ x 3½..... **Each, $0.20**

Fig. 85

Piston Ring Compressor

A device that makes it easy to set piston rings, no matter how stiff the ring. A slight pressure gives a powerful leverage, simple and durable. **Each, $0.60**

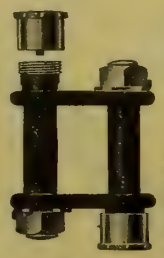


Fig. 86

Spring Shackle for Ford Springs

This shackle has an integral lubricator, and is made in two sizes—one for front and the other for rear springs. It has drawn bolts, hardened and carbonized. It is especially designed for grease lubrication, as grease is preferred by most Ford owners.

Net price, front or rear, **Each, $1.80**

Specify when ordering, whether for rear or front spring.

Ford Oil Gauge

A necessity for Ford cars. Shows the oil level at all times, prevents the excessive use of oil, lack of lubrication; eliminates smoke and decreases the possibilities of carbon deposits upon spark plugs.

Replaces lower pet-cock in crank case; the pet-cock is placed in gauge and acts as a drain.

(Weight, 4 oz.)

Each, $0.35

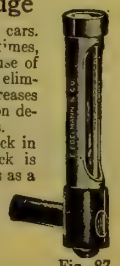

Fig. 87

Dashboard Oil Gauge

All inconveniences in ascertaining the level of oil in a Ford crank case are overcome by using this dashboard oil gauge. Shows level of oil in sight-feed glass on the dash. This gauge is made of the best material. all parts being solid brass, the glass indicator tube being extra heavy, and the cork float of an extra large size. It is an ornament to the car, and can be attached in a very few minutes. (Weight, 6 oz.)

Each, $2.00

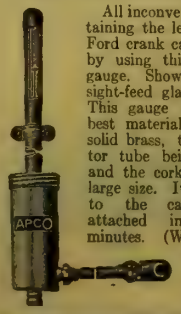

Fig. 88

Wolf's Head Oil

"Wolf's Head Oil" is made from Pennsylvania crude. It is distilled, filtered, and refiltered until it is absolutely free from the injurious free carbon which clogs so many cylinders.

Wolf's Head Oil is recommended by the makers of more automobiles and motor boats than any other oil. The result of their investigations is an unqualified endorsement of Wolf's Head Oil, as the best motor cylinder oil on the market and they recommend Wolf's Head Oil exclusively for use in their motors.

LIGHT OR MEDIUM GRADE FOR FORD CARS

1 Imp. gal.	**Per can $1.00**
5 Imp. gal.	" 4.50
Bbl.	**Per gal. 0.80**

Wolf's Head Grease

Fig. 90

Especially suited for compression cups on universal joints and wheels. A pure, soft yellow grease. Absolutely free from acids or other injurious chemicals, and is particularly recommended as a very high grade product that will give perfect lubrication.

1 lb. can (wt., 2 lbs.)	**Per can $0.30**
5 lb. can (" 7 ")	" 1.20
10 lb. can	" 2.40

Fig. 91

Boulevard Grease Guns

Made to handle light greases as well as all grades of oil. A very practical and handy gun for general use.

Capacity 8 oz (Weight, 2 lbs.)

Each, $2.50

Oil Cups

Fig. 92

This oil cup is especially adapted for Ford cars, and can be placed in most any angle. Cap fits perfectly tight, and will not jar open.

No. 2 D—⅞ inch cap, ⅛ in. diam., 32 pitch. (Wt., 1 oz.)

Each, $0.10

Grease Cups

Fig. 93

These cups are designed to take the place of the present grease cups on the Ford rear axle, steering post, etc.; they also take the place of the oil cups on the springs and steering knuckles. They are much more efficient than the oil cups, as they absolutely force the grease to the point that requires the lubrication and they leave nothing to chance.

No. 101—1 P. size (wt., 1oz.) **Each $0.20**

Set of 15 (wt., 1 lb.) ..... **Per Set, $2.50**

Gasoline Gauge

Fig. 94

A combination filler cap and gasoline gauge made from the finest material by skilled workmen; installed and removed as easily as the regular filler cap which it replaces.

The dial is graduated in tenths giving a clear and accurate reading of the exact contents of your tank at a glance.

(Wt.,10oz.)**Each, $3.25**

Spring Lubricator

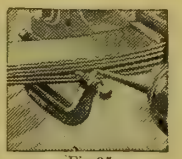

Fig 95

A practical and valuable device, spreads the leaves for lubricating, and thus prevents rusting, squeaking, freezing, or adhering.

Drop forgings, nickel plated and highly polished.

(Weight, 1 lb.) **Each, $0.70**

Foot Accelerator

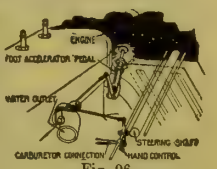

Fig. 96

Foot control of the carburetor is by far the most satisfactory method. It enables the driver to get the car under way, quicker than with the hand control and leaves both hands for steering. Positive in action, quickly attached, easy to operate and there is nothing to get out of order.

(Weight, 2 lbs.) **Each, $2.00**

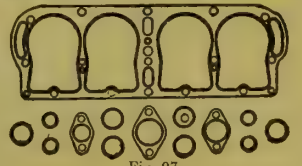

Fig. 97

Copper Gasket Sets

These gaskets are made of the best copper and brass and filled with pure asbestos and are especially designed to fit the various parts of Model "T" Ford cars.

(Weight, 1 lb.)

11 Gaskets..... **Per Set $0.60**

Cylinder Gasket only..... **$0.45**

Gasket Cement

An exceptionally fine grade of cement, prepared especially for auto repair work.

Can be used on gaskets of any material and a good, clean, tight connection is assured.

Perfect connections increase the efficiency and prevent excessive wear of the engine.

(Wt., 8 oz.) Fig. 98

4 oz. swab bottle..... **Each, $0.30**

Clutch Release

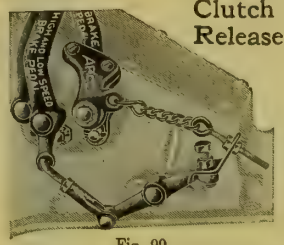

Fig. 99

This simple device automatically releases the clutch when the foot brake is applied. This device will be found a great help to amateurs, as with it, it is impossible to apply the brake without first throwing out the clutch. Can be applied in 10 minutes.

(Weight, 12 oz.) **Each $0.75**

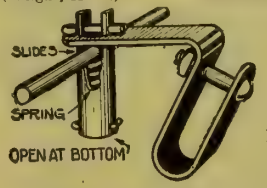

Fig. 100

Brake Rod Supports

A device that will save lots of annoyance and trouble.

Made of best quality bronze, will not wear out or break. The steel ball is held in tension against brake rod, prevents vibration, but does not wear or interfere with action.

(Weight, 2 lbs.) **Per pair $0.90**

Fig. 101 Fig. 102

Fender Braces

Made of steel, enameled black, and furnished with screws and nuts.

Stops the squeak, rattle and noise, holds fender firm and prevents breaking by vibration.

Front Brace

Designed to fasten front fender to running board shield. **Each $0.15**

Rear Brace

Designed to fasten over rear fender support rod of Runabout. **Each $0.10**

Fig. 103

Radius Rod Anti-Rattler

Made of solid bronze, fitted with steel spring and ball socket with screw adjustment.

Automatically takes up all wear, prevents rattling, but does not interfere with the action of rod.

Easily attached and once on there is no further trouble or annoyance.

No. 1.—(Weight, 1 lb.) **Each $0.75**

Fig 104

Steering Rod Anti-Rattler

Made exactly like the radius rod type, but smaller in size.

Takes the place of steel cap on ends of steering rod connection.

Makes the car steer easier, prevents all rattle and vibration—does not bind or affect proper action of rods.

No. 3.—(Weight, 8 oz.) **Each $0.60**

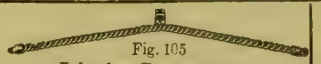

Fig. 105

Little Steersman

Automatically takes up lost motion between steering wheel and road wheels. Particularly invaluable when steering connections are worn. Keeps the road wheels in perfect alignment. Assists the driver to better and quicker control, also invaluable in traveling over rough roads.

(Weight, 3 lbs.) **Each $3.50**

Ford Trunk Rack

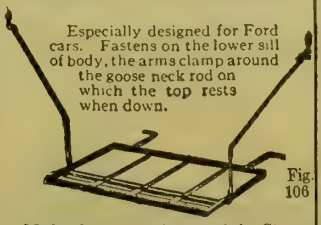

Fig. 106

Especially designed for Ford cars. Fastens on the lower sill of body, the arms clamp around the goose neck rod on which the top rests when down.

Made of steel, black enameled. Strong and durable. Folds up against body out of the way when not in use.

30 inches long, 18 inches deep.

Each $4.00

Fig. 107

Ford Trunks

Light weight, handy traveling luggage, made of heavy black enameled duck on best quality trunk board, steel frames top and bottom. Edges leather bound and sewed. Hinges and handles hand riveted. Solid leather corners. Fitted with 2½" trunk trays. Heavy harness leather straps all around, long enough to go under trunk rack of car, with extra leather trunk handles at the sides, while the bottom is protected with hard wood trunk slats.

Base dimensions, 28" long x 14" wide, 12" deep.—**No. 12** **Each $10.00**

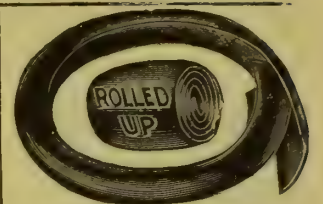
Fig. 108

Ford Tire Trunk

A waterproof and dust proof trunk, basswood body, trunk board rim, fitted with straps to fasten to the spare tires. Holds more than a suit case.

(Weight, 10 lbs.) Style F. **Each $7.50**

Fig. 109



Ford Tire Covers

First quality material, black enameled, dust and waterproof.

Snap button style, with flat steel band inclosed in flap.

Sizes, 30 x 3½ in. and 31 x 4 inches.

For clincher tires (Wt. 2 lbs) **Each $1.00**

Tire Reliners

Fig. 110

A durable and serviceable inner shoe made of high grade fabric.

Covers the whole inside of casing from bead to bead and extends all the way around, making a permanent, serviceable and efficient protection for the entire shoe and tube.

30 x 3½ (Weight 4 lbs.)	**Each $2.50**
31 x 4 (Weight 6 lbs.)	" 3.00

Running Board Tire Holder

Fig. 111

Made of malleable iron, black enamel finish. Strong and durable, very neat in appearance. Carries one or two tires and furnished complete with straps.

No. 87—(Weight, 8 lbs.) **Per set $2.50**

Combination Rear Tire Holder Lamp and License Bracket

Fig. 112

A substantial Rear End Tire Holder that in addition to rigidly carrying either one or two tires, has in combination with it a supporting bracket to which the license bracket is attached and which also supports the Tail Light and carries it in the proper position.

Tire Holder only	**$3.00**
" with Lamp Bracket	**3.50**
" Lamp and License Bracket	**3.75**

Fig. 113

Rubber Tire Bands

The best constructed repair band. Made of high-grade fabric and rubber after the style and form of the tire itself, the heaviest and most durable band made. Many a tire would be saved actual destruction if a reliable tire band were used in time.

3½" or 4" (Wt. 1 lb) **Each $1.25**

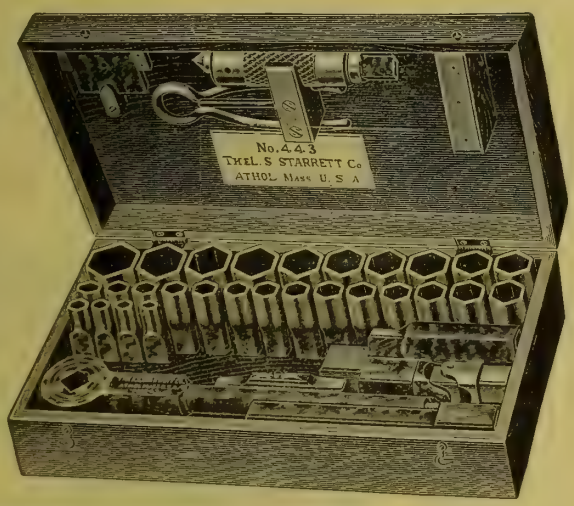
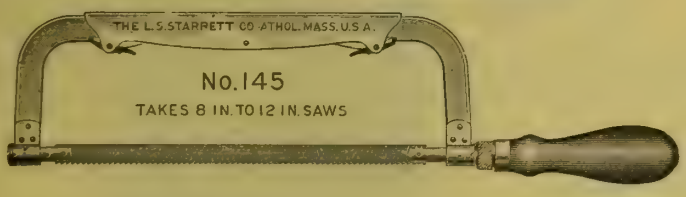
Starrett Tools for Motorists



Each year as more and more car owners become familiar with automobile mechanism, they look after their own repairs and adjustments. They can cut out many garage bills that way and they feel safer when on the road. To make these repairs they need more and better tools and hardware dealers who are making an effort to get accessory business will find Starrett Tools and Hack Saws are in demand by such men. Starrett Tools are recognized everywhere as the finest mechanical tools made.

Here are a few items well worth putting in your show window :



Expansion Pliers

These wonderful pliers have adjustable jaws so that they may be opened to take any work us to 1¼" and still retain the handles in perfect position to squeeze. The pliers are well suited to motorists in working about the engine for turning nuts and bolts, drawing cotter pins and making numerous adjustments on stiff thumb screws, pet cocks, etc. Price $2.00.

Ratchet Wrench Set

Every motorist should have this ratchet wrench set for making all sorts of repairs and for overhauling his car. Set includes 28 sockets for any standard Hex nut; ratchet handle with reversible pawl, drilling attachment for square shank drills up to one-half inch diameter, extension for reaching otherwise inaccessible nuts or bolts, screwdrivers, spark plug socket, etc. This is the most serviceable set of ratchet wrenches on the market, not to be compared with trashy sets at low prices. Price $15.00.

Starrett Hack Saws

The motorist will find Starrett flexible back blades best suited to his work because they do not break readily as do all-hard blades. These hack saws are made in six to twelve inch lengths. Starrett frames are convenient in adjustment and extremely durable.

Send for a supply of catalogs No. 20-A to distribute to motorists. These 320-page catalogs describe 2100 styles and sizes of fine tools and hack saws.

The "Elgin" Wrench

This is an age of high-grade tools and their perfection and efficiency is so apparent that the most excellent article is the salable one. The special features of the Elgin sell it for you.

The adjustable jaws, ratcheting, rethreading attachment, dies, taps, nickel finish, etc., are attractive. Fully guaranteed.

Star Manufacturing Company
CARPENTERSVILLE, ILL.

A PROFITABLE SAFETY DEVICE

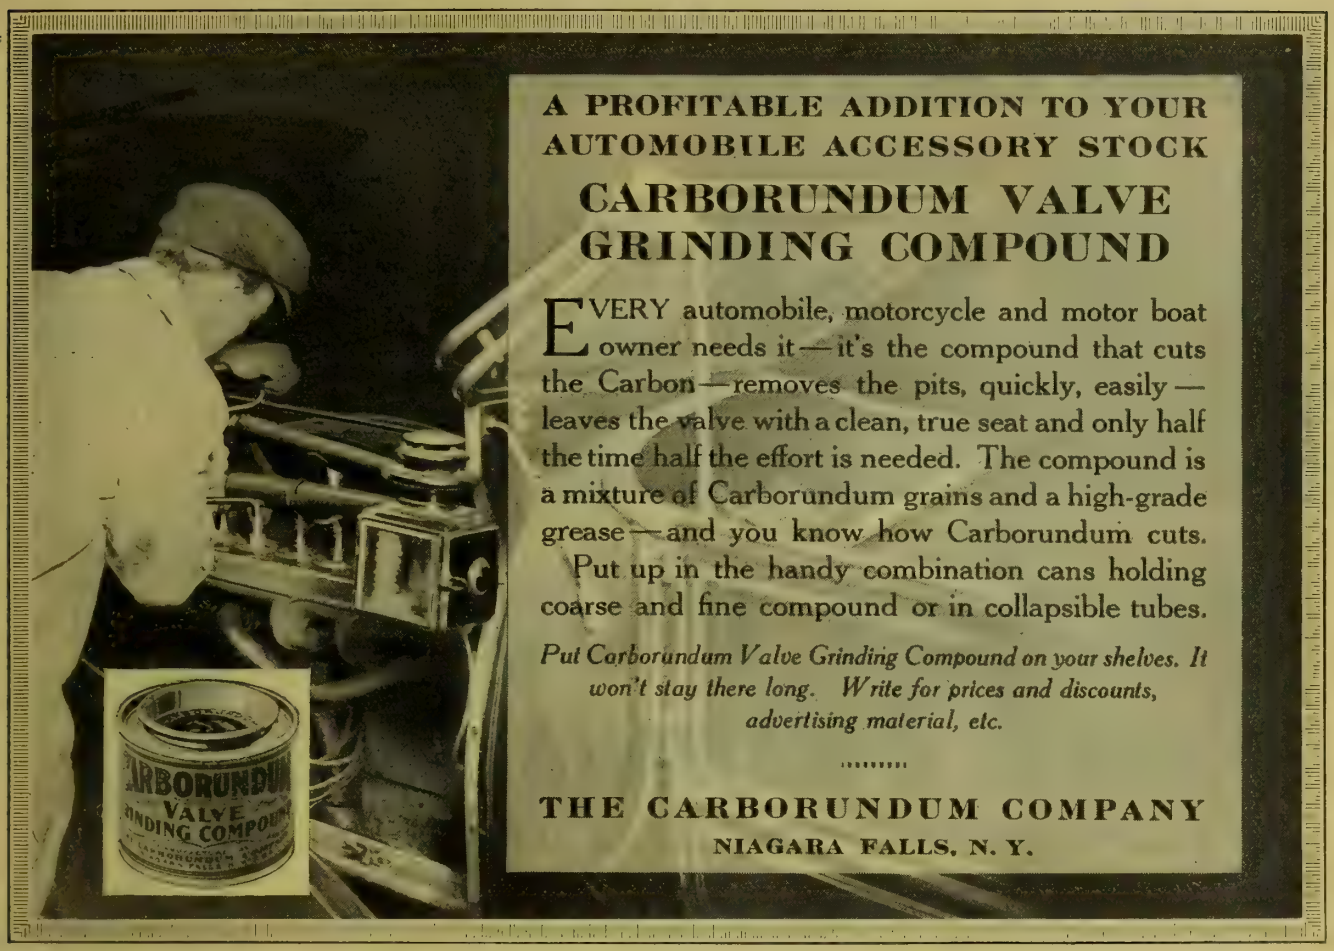
The wind is treacherous. A swinging garage door is dangerous. A bent mud guard, a broken lamp or radiator hurts your customer's pocketbook just as much as personal injury. SAFETY FIRST—He must take certain precautions to protect himself, and so he must do with his machine.

The Griffin Garage Door Holder

No. 1914. Patented

is a simple, strong, serviceable article designed expressly to HOLD THE DOOR OPEN. The only practical article ever placed on the market. Just throw the door open in the ordinary way and its stays there firm.

Get ready to demonstrate; there's money in it for you.



Made by

THE GRIFFIN MAN'FG. CO., ERIE, PA.

IT HOLDS THE DOOR OPEN

IS NEVER IN THE WAY

A PROFITABLE ADDITION TO YOUR AUTOMOBILE ACCESSORY STOCK

CARBORUNDUM VALVE GRINDING COMPOUND

EVERY automobile, motorcycle and motor boat owner needs it—it's the compound that cuts the Carbon—removes the pits, quickly, easily—leaves the valve with a clean, true seat and only half the time half the effort is needed. The compound is a mixture of Carborundum grains and a high-grade grease—and you know how Carborundum cuts.

Put up in the handy combination cans holding coarse and fine compound or in collapsible tubes.

Put Carborundum Valve Grinding Compound on your shelves. It won't stay there long. Write for prices and discounts, advertising material, etc.

THE CARBORUNDUM COMPANY

Hand Lanterns

FRANCO HAND LANTERNS

OF late a few so-called hand lanterns, equipped with 1½ volt lamps, have appeared and the public was led to believe that any ordinary No. 6 cell would give a strong, steady light and that it would give forty to fifty hours' steady service. Some claimed even as much as seventy-five hours. Our extensive tests proved only 10% of these claims. We have refrained from bringing out a similar lantern to burn on one No. 6 cell, knowing how useless it is for a practical purpose.

After extensive experimenting we have succeeded and have produced our new RADIO NITROGEN BATTERY, which will serve the purpose and give the desired results. The illustrated article used with our 1009 battery and our FRANCO lamps opens a new field in miniature lighting.

New Catalogue illustrating our complete line. Mailed on request.

Radio Batteries for Flashlights and Hand Lanterns.

The Premier Tire Investment

Tire Purchases are investments to all intelligent buyers. In making investments the first consideration is the dividend.

Dominion "*Nobby Tread*" Tires are the premier tire investment of the world.

because—they pay the biggest dividends in mileage, being the lowest final-cost-per-mile tires in the world.

because—"Punctures 90% less" means greatest security for amount invested.

because—they are real anti-skid tires.

True Tire Economy for Everyone

because—they can now be purchased for the price paid in former years for simply ordinary tires.

because—few to-day can afford the extravagance of buying "cheap first-cost" tires, when "Nobby Treads" have absolutely proven their ultimate economy on the basis of lowest final-cost-per-mile.

"Nobby Tread Tires" ARE ADJUSTED UPON THE BASIS OF 5,000 Miles

"Nobby Tread" Tires are to-day by far the largest selling high-grade anti-skid tires in the world.

Vol. XXVII. MAY 8, 1915 No. 19

Auto Accessories a Hardware Line

Twenty Thousand Auto Licenses Issued in one Province in Four Months—The Buying Power of Auto Owners—Hardwareman is the Logical Distributor.

FROM February 1, to May 1, 1915, approximately 20,000 automobile licenses were issued in Ontario alone. By the end of the year the total will probably reach 40,000. Last year the total reached over 35,000. These figures remember represent the Province of Ontario alone. In each of the other provinces of Canada several thousand licenses are issued annually. These figures are quoted simply to point out the vast number of people who possess cars, and to give some idea, if possible, of the buying power of this huge army of car owners.

The hardwareman when reading the above is liable to ask the question, "Where are these cars located?" Reference to the automobile directory will show that the car owners are well distributed throughout the province. A large number are located in the cities, but the most striking feature of the list, and the one that will interest the average hardwareman most, is that many thousands of the cars are owned by residents of the smaller towns and by agriculturists. With each succeeding year the number of car owners in agricultural districts increases with great rapidity. The farmer of to-day is just as eager to secure modern conveyances and conveniences as his city brother, and the automobile salesmen (many of them are retail hardwaremen) are devoting much time and attention to the development of trade amongst the farming fraternity.

Not a few of the car owners are retail hardwaremen and many of these merchants not only have cars for pleasure driving, but also for delivery purposes.

Now, when you try to figure the amount of money that is spent annually by 35,000 people on tires, spark plugs, pumps, gasoline, oils, polishes, and hundreds of other items called auto accessories, you will realize that a huge amount is expended each year. Let us suppose that each car owner in Ontario alone spends only $60 per year (this amount is very small compared with what is expended by the average car owner), the total is over two million dollars. These figures are based on one province only, and figuring an annual expenditure of only $60 per car. Who gets this business? Nearly all the accessories, gasoline, etc., could or should be sold by retail hardwaremen. Are retail hardwaremen getting as much of this trade as they should? Some hardwaremen are getting the trade—some are not.

It is well known that the biggest demand for auto accessories comes from the owners of Ford cars.

At the end of 1914 there were approximately 60,000 Ford cars in use in Canada. It is expected that this year the number of Ford cars turned out in the Canadian plants will number 30,000, and over 25,000 of these cars will be used in Canada, thus making a total of 85,000 Ford cars in this country at the end of 1915. These car owners are nearly all prospective purchasers of auto accessories. Who will get the business?

Many hardwaremen have found that trade this year, in some departments, particularly builders' hardware, has fallen off, and is below normal. Why not try to offset these losses by pushing auto accessories.

Study carefully the needs of the autoist and cater to him. The merchant need not invest in a heavy stock of accessories on the start. The average hardwareman has already in stock many articles which can rightly be called auto accessories. The autoist in addition to buying spark plugs, grease cups, pumps, jacks, wrenches, patches, cement, gasoline, oil, horns, tubing, oil cans, grease pumps, etc., also needs polishes, chamois, sponges, dusters, spoke brushes and dozens of other articles usually carried by the retail hardwareman.

The auto owner is usually a man or woman who can afford

(Continued on page 49.)

Main Entrance to Provincial Parliament Buildings, Toronto.

Accessories Over-Shadow Hardware

Hardware Store Opened 1901—*Motor Boat Supplies Added in* 1907 — *Automobile Accessory Department Opened This Year—Taking Advantage of a Strategic Position.*

WHO has not heard of Lachine Rapids, and read the stories, half legendary, half true, which are entwined around that region? It lies between Montreal and Lake St. Louis, whose banks are studded with the pretty country homes of countless Montrealers.

Anyone who has taken the Thousand Islands trip from Toronto to Montreal knows that the Rapids cannot be played with by a motor boat, and that to reach the city of Montreal, the best and only way is via the Lachine Canal. Similarly, to reach the lake (which is virtually the St. Lawrence River) from Montreal, the motor boat must come along the canal, and be transferred to the river at Lachine Locks.

Now there is another line of communication between the summer cottages of Lake St. Joseph and the Metropolis—a splendid stretch of road, which takes a sweep right at the locks, along which pours the automobile traffic, thicker and thicker year by year, between Toronto and Ottawa, and Montreal.

It will be seen then, that Lachine, and especially Lachine Locks where the boats are transferred to and from the river, is a strategic point for a hardwareman, particularly for one who handles automobile and motor boat supplies.

On the Look-Out.

Right at this bend where the traffic sweeps by at an obtuse angle, a hardwareman has occupied a strategic position. From his store he sees the motor boats as they are transferred from canal to river; he can observe whether they are equipped. If they are not, over he goes, grabs the owner by the collar and with pad in hand, says, "Now let's see, you'll want some gasolene before you go very far, you'll want an anchor, some rope, a paddle for when you are stalled near the rapids," and so on and so on, until he has the whole list down. The owner supplies the list gladly when he knows that this is W. E. Ranger, famed throughout the district as a motor boat racer.

Similarly he can see the automobiles passing. If one slows down, it is because he needs gasolene, and it only requires half an eye for anyone to see that this is headquarters for supplies, for it is emblazoned forth on both sides of the building. If it is a tire or gasolene, or a slight repair, Ranger can cater. If air is wanted, he has his electric pump at hand.

Ranger is a living refutation to the argument that the hardwareman is not the logical medium for handling automobile and motor boat accessories. He came to Lachine in 1901, and claims to have opened the first hardware store in town. Up to that time he had been a clerk in the employ of P. Deemers & Sons, Montreal.

Interested in Racing.

Coming to Lachine, it was not long before he became interested in motor-boating, for probably nowhere in Canada are there so many of these craft as on Lake St. Louis. In the town of Lachine alone there are said to be about six hundred motor boats. Mr. Ranger later began to interest himself in racing, and before long was recognized as one of the leaders in this sport, winning several championship cups, naming his boats Ranger No. 1, Ranger No. 2, and so on, just as Sir Thomas Lipton names his Shamrocks. His latest was a 200 h.p. boat.

With such a splendid knowledge of boats, it was natural that he should turn his attention to supplying accessories to the owners of boats who frequent the lake, and as he was known to practically every motor boat enthusiast in the district, he found his business growing at an enormous rate. Some idea of his importance in this line can be gauged from the size of his exhibits at the motor boat shows held in the Montreal Arena. Another indication is his claim to be the largest retailer of gasolene on the Island of Montreal. At any rate, his biggest profits have been made from gasolene and oil supplied to the hundreds of boats owned by wealthy Montrealers who live during the summer at the many lake resorts.

View in the Automobile Accessory Department of W. E. Ranger, Lachine.

Leaves Motor Boats Alone.

Mr. Ranger was never very successful with the sale of motor boats themselves, although successful in handling accessories. His experience has shown that to sell a novice a boat means that when anything goes wrong, he is called upon to send a man to make repairs. During the summer season the time of his men is too valuable for that. Eventually he was compelled to leave this end of the trade alone. His position on the lake front made a boat business almost impossible. His big profits came from men who had bought their boats elsewhere, and were too far away to call upon their dealer for every little thing that went wrong.

This does not prevent him, however, from handling engines. He is a frequent visitor to motor boats shows in Canada and the United States, and in

touch with everything that is new. With a new line of engine, popular because it can be easily attached to row boat or canoe, he has been unusually successful. There is money in this line, he says, if the customer is willing to pay cash, but they tie up too much capital if many are carried in stock.

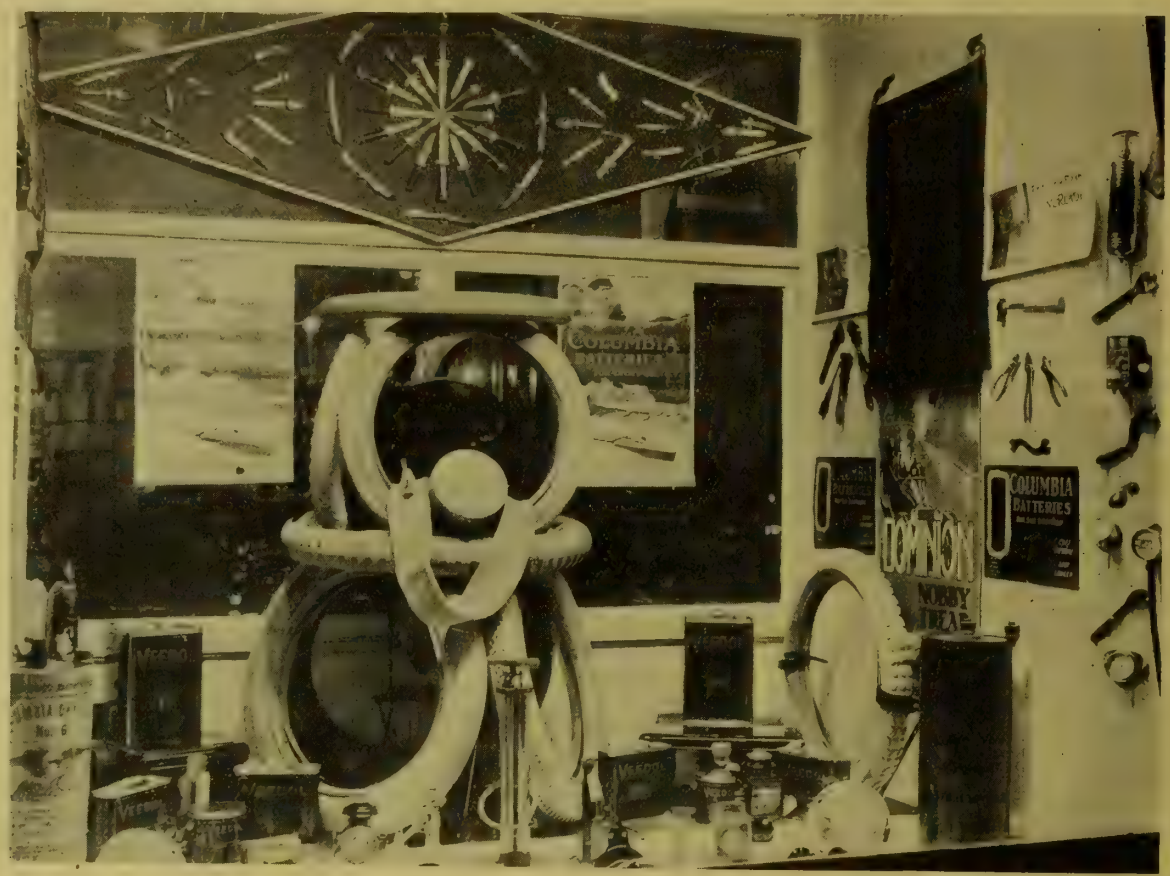
Talking to a representative of this paper, Mr. Ranger expressed the opinion that motor boat accessories were profitable as long as the hardware dealer has the right spot. Obviously there must be water, and there must be motor boats. It is also important that followers of this sport know that you are handling accessories. Judging by the way Mr. Ranger has featured his name around Lachine and the canal, he is anxious, apart from his fame as a racer, to get all the publicity he can.

Advent of Auto Accessories.

Two years ago, it became evident that there was going to be a big demand in Lachine for automobile accessories. Handling this line was easy for Ranger, having already paved the way by means of his motor boat supply business. At that time the number of automobiles in Lachine could be counted on two hands. To-day there are close on a hundred. The demand came not alone from these cars, but from the hundreds which passed through on their way to the lake resorts, as well as to Toronto and Ottawa. Motorists, seeking his gasolene signs, were beginning to stop, and were asking for tires, and other accessories, and he was literally pushed headlong into the business. Its importance can be gauged from the fact that although he has built up the premier hardware business in Lachine, it has become a side line when compared with his business in automobile and motor boat accessories. Hardware comes in very handy through in wintertime.

Mr. Ranger made a statement when asked what was the secret of his success in auto and motor boat accessories, which should be noted by all hardwaremen. "It is a business requiring hustle," he replied. "We see that the accessories supplied are those which will give the highest satisfaction, and we build our business on that reputation. When service is wanted, it is usually wanted in a hurry. Our clients in most cases are people who are out for a good time, and they have no time to lose. If we can save the afternoon for them by giving rapid and excellent service, they are quite willing to pay well for it. A man never forgets good service in time of trouble, and similarly he never forgives the man whose service is poor and slow."

Until this year, one of the faults of this store was that new departments had pushed themselves in to such an extent that hardware was losing its identity. Anchors fraternized with enamelware and paint tins were on equal terms of intimacy with tires and spark plugs. It became necessary to departmentalize. An addition was made at the rear, and in the shuffle, automobile accessories found themselves in a section all to themselves, and a special show case was handed over for the display of motor boat fittings. An oil pump was installed near the door in order to give quick service. Besides this, there is a gasolene tank on the water for boats, one on the road, one on wheels, and two reserve tanks in the ground. His lubricating oil is put up in cans, bearing the words "Ranger's 100-Mile Oil." His stock of accessories is probably as complete as can be found in any retail establishment in Canada.



The demand for tires comes mainly from car owners in Lachine or from travelers who have met trouble. This necessitates keeping a stock. Being within easy reach of Montreal, he is able to secure supplies quickly, thus enabling him to keep his tire stock down to a minimum.

A New Demand.

A change is taking place, which is going to have far-reaching effects on those who handle accessories. Until a year or so ago, practically the whole of the motor traffic passing through Lachine was in pleasure cars betwen lake resorts and the city. These have now been joined by business cars. Motor trucks are frequent passersby, and are repeatedly getting into trouble; all of which brings business to the Ranger store. He himself is president of the Ranger Auto Service Co., Ltd., which runs a service of two auto buses between Lachine and Dorval. Naturally the necessary gasolene, oil, and accessories are purchased right in the store. The commercial end is creeping in, even in motor boats. Considerable business is secured from a company operating a service of boats between Lachine and Caughnawaga—the Indian reserve on the other side of the St. Lawrence.

Display of Motor Accessories by W. E. Ranger of Lachine at the Montreal Mo tor Boat Show.

Window Display of Auto Accessories by Lariviere Inc., Montreal, Que.

Pointers on Carrying Auto Accessories

A Few of the Lines That are Popular Sellers—Lines Carried by One Firm—What Some Hardwaremen do—Getting Customers Interested.

BY T. E. HUNT.

WHEN considering adding auto accessories to your present stock, there is one thing to consider first—Are there sufficient cars in your town to warrant your starting this business? Can't sell accessories if there are no cars. Furthermore, there must be some Fords among them—in fact, the more Fords there are the better because, generally speaking, all other automobiles are equipped, and require very little, outside of pneumatic tires and tubes, and goods for repair work.

The Ford car is the most popular one (fortunately for the hardwareman), it needs the most accessories, and is likely to keep on needing them, because, judging by the way the price is being kept down, it is unlikely that they will be put on the market more fully equipped.

It is vitally important that a man going into this business try and familiarize himself with new lines that are likely to interest the motorist, thus he will avoid stocking up on accessories that become unsaleable.

Fashions and Accessories.

Automobile accessories, like millinery have their fashions, and just as the wise milliner never carries a heavy stock of hats which are not likely to be worn next season, so the hardwareman, by carefully studying the automobile situation, should avoid buying accessories which are likely to be left on his hands next year. Thus it will be seen that care is required in buying.

A good plan is to keep stock fairly low and renew often. Don't be tempted by quantity prices except on lines you know to be good sellers and for which you have an outlet.

Have Your Own Car.

There is no better way of getting a good knowledge of this line, and at the same time of displaying your goods, than by having a car of your own. Many accessories have to be "talked up" or demonstrated to sell. Order-takers cannot sell auto accessories. They require a salesman.

If you have a car equip it with the latest accessories. Then people will stop you wherever you go, and ask, "Where did you get that?" If they are inclined to buy, invite them to call at your store. Many sales are made in this way.

In discussing suitable lines to carry, mention will be made of many of which you require only one, and that one should be on your car. Thus your car becomes a sort of catalogue.

Selling By the Way.

We will assume that the hardwareman who is contemplating handling accessories, has already done considerable business in gasoline. That is one of the best tests of whether there is sufficient

(Continued on page 54.)

The Chauffeur, and His Commission on Tires

Montreal Hardwareman Relates His Experience with "Gentlemen" Who Drive Cars.

Written by a Montreal Merchant.

OF all motor accessories, I think tires pay the best. If they don't, they should. Going after this business it is wise to secure a list of automobile owners, and to go after them. But be careful how you do it. You will sometimes run up against a class of individuals who require careful handling. I mean the chauffeur.

There are good and bad chauffeurs. There are some whom I could take into my confidence; but there are some whose business I do not want. I would rather some chauffeurs did not come into my store than do business on their terms.

When they bring business to your store some of them demand a commission, amounting to four or five dollars a tire. Now you must either pay that yourself or charge it to his employer, or lose the business. There is still another course you may follow: You can advise the employer of what is going on, and suggest that he purchase his own tires. If a chauffeur is fired for taking his commission, he will be hired by someone else, and will continue to take his commission.

The owner of a car who can afford a chauffeur very often allows that man to buy his tires, and it does not matter much to him whether the chauffeur gets a rake-off from the dealer or not. If he comes to buy the tire himself, he naturally brings his chauffeur with him and asks his advice before buying. And what the chauffeur says, often goes. So that if he recommends your tires, you may confidently expect a visit from him the next day demanding his commission.

Go Direct to the Owner.

I have no doubt there are chauffeurs who are looking for good tires rather than commissions. If there are such, I welcome them, but, in the meantime, I am content to leave these "gentlemen" alone. The unfortunate thing about it is that these men are often among the best in the business, and are employed by owners of the best cars, men who have the money to spend. The only alternative is to go direct to the owner, show him that you are carrying the best lines, and have him instruct his chauffeur to get his accessories only at your store. Then, of course, the chauffeur can make it unpleasant. Either we have to please him by giving him a commission, or by making him a present of something. This is one of the biggest difficulties I have to contend with in the accessories business. The situation is the same as in the paint department where the painter sometimes demands a rake-off for buying his paints at the store. In the case of tires I absolutely refuse to placate the chauffeur. I simply will not do business on that basis; I prefer not to have it at all.

I recall to mind several cases of abuse on the part of the chauffeur. A gentleman drove up one day and asked to be shown some tires. He turned to his chauffeur, and said, "Do you think they are all right?" The chauffeur nodded, and the tires were bought. Sure enough, the latter called next day, and demanded his commission. It was refused, and I suppose I lost all future business.

Chauffeur's Real Function.

This practice is sometimes carried to lines outside of the auto accessory department. On another occasion a gentleman drove up and made a heavy purchase of sporting goods, which are carried in the same department as the accessories. His order amounted to close on two hundred dollars. Next day, around came Mr. Chauffeur with both hands open for his commission.

"Why should I give you a commission?" I asked.

"Did I not bring a customer to your store?"

I laughed.

"You sure did," I replied; "that's what you are paid for—to drive customers where you are told to drive them."

A friend of mine came to the store one day, and asked how it was that the cost of tires at garages was so much heavier than at the hardware store. I knew what was the matter instantly—the garages were adding the chauffeur's commission to his bill. I did not say anything about this, but asked him to send his man around to my store next time. He promised to do this, and in course of time the chauffeur arrived, accompanied by the owner. The tires were bought. The chauffeur came around the following day for his commission, which was promptly refused. Then I called up the owner, and told him exactly how things stood, and especially why he was paying more money to the garages. He wanted to dismiss his chauffeur at once, but I asked him to wait, for I was sure that, in a very short time, the chauffeur would denounce the tires as worthless. It came to pass as I expected. The chauffeur one day drew the master's attention to some big cuts in the tires. He immediately drove over to the store, and showed them to me.

"It is the work of the chauffeur," I said, "and to make sure, I want you to drive over to a tire expert."

I gave him the name of a firm with whom we were not doing business, so that their opinion would not be prejudiced; and he went. The expert opinion was to the effect that the cuts had been inflicted by a sharp stone or a knife —not by regular usage.

When he reached home, the owner got his chauffeur in a corner, and applied the third degree, eventually wrenching from him a confession that he himself had made the cuts.

Of course, I must say that although there are a great many chauffeurs looking for commissions, they are not by any means in the majority and I have cultivated the good will of a large number of chauffeurs who do not look for commissions. My store is located in one of the largest cities in Canada, and I meet a class of men, not encountered in the smaller places. I believe that the hardwareman in the smaller city or town can get very close to the car owners and thus eliminate this one objectionable feature "commissions."

USE OF POSTAGE STAMPS.

The Post Office Department, Ottawa, sent out the following notice a few days ago:

"Enquiries having been received in regard to postage stamps being used for the prepayment of war duties on bank cheques, bills of exchange, promissory notes, express money orders, proprietary or patent medicines, perfumery, wines or champagne, as well as upon letters and post cards, postal notes and post office money orders, notice is hereby given that this use of postage stamps is in strict accordance with the provisions of the special War Revenue Act, 1915, which provides that postage stamps may be used in lieu of Inland Revenue War Stamps in fulfilment and discharge of any requirement under the Act that adhesive stamps be affixed.

The public is at liberty at all times to use postage stamps for any purpose for which Inland Revenue War Stamps may be used, but it is especially provided in the Act that Inland Revenue War Stamps are not to be used on letters, post cards, postal notes or post office money orders, the only stamps allowed on these being ordinary postage stamps or postage stamps upon which the words 'War Tax' have been printed."

Hardwaremen Advertise Accessories

Hardwaremen are Using the Newspapers to Feature Automobile Accessories—What the Hardwaremen Feature in Their Advertisements—Many Items are Regular Stock Lines.

NOT a great many years ago it was the exception rather than the rule to find a retail hardwareman who used the daily or weekly newspaper to feature any one particular class of goods. Advertisements usually referred to the general stock of hardware staples carried by the firm. Once in a while, prices were quoted, and illustrations were used to attract attention and to show the goods, but there was seldom an attempt made at specialization such as there is to-day.

The hardwaremen of twenty years ago did not have the specialty side lines that are available to-day. In those days it was largely a case of pushing staple goods. To-day there are many side lines. Necessity, the mother of invention, has been responsible for the development of many new products during recent years, and fortunately for the retail hardware trade, many of these new lines are truly hardware lines. The average hardware store to-day carries an altogether different stock to the store of twenty years or even ten years ago.

If the hardwareman to-day finds that the building trade has dropped off to such an extent that sales of builders' hardware have declined seriously, he can very often offset a good portion of the loss sustained in the builders' department, by devoting more time and energy to the sale of specialty lines. It has therefore been quite customary during the past few years to see many newspaper advertisements featuring special lines. Electrical goods, dustless mops, vacuum cleaners, household utensils, and many other lines have become regular parts of hardware stocks and it is not uncommon to see these lines featured in special advertisements.

Perhaps the most recent development in retail hardwaremen's newspaper advertising is in connection with auto accessories.

Quite a number of firms are paying particular attention to the trade of auto-owners and are making every effort to secure a good share of the rapidly growing trade of auto owners. There are many forms of publicity that can be used by the retailer but one of the most popular is the daily or weekly newspaper.

On these pages are shown four newspaper advertisements in which automobiles or auto accessories are specially featured.

The advertisement of T. McAvity & Sons, Ltd., features a number of articles which should interest the auto owner. This ad. is well supplied with suitable illustrations, and in each instance a description is given of the article, together

Taylor's News

"OF HARDWARE DOINGS"

PUBLISHED BY THE GEORGE TAYLOR HARDWARE, LIMITED

COBALT

SATURDAY APRIL 3, 1915 PRICE—YOUR ATTENTION

MR. AUTOMOBILE OWNER—HOW ABOUT YOUR TIRES AND ACCESSORIES?

This is an important question particularly at this season. Car owners are busy having machines overhauled and naturally the question arises—and it is an important one too—concerning the kind of tires to be used this summer and the extra accessories to be added for the providing of comfort and efficiency. Believing you are interested in the efficiency and economy of service we mention for your consideration something about our Garage and the stock we carry. We can prove that you can save money by purchasing your supplies of us.

TIRES

We handle, without question, the biggest stock of Tires in this country, consisting of Goodyear and Dunlop brands. We have the former in plain and all weather treads, while the latter may be obtained in the plain, the Dunlop Special, and the Dunlop Traction. You can buy tires in Cobalt just as cheap as in Toronto and furthermore, you are assured of the quality. We sell no seconds. Every tire is of first grade and we stand back of every sale.

AUTO ACCESSORIES

If you require anything in the shape of an Automobile accessory come to us. We carry it and we do take pride in saying this stock is comprehensive and complete. Among the many articles carried are Tubes, Pumps, Horns, Cements, Patches, Number Holders, etc., etc.

OUR GARAGE

Our Garage, situated opposite the new Town Hall, is well equipped with competent workmen who know how to do the work you want. Our Garage is known as a "First Garage," but still we can do all kinds of repairs on any kind of a car and our prices are reasonable.

Newspaper advertisement of the George Taylor Hardware Co.

with the price. Advertisements of this kind are the ones that count, and that make an impression on auto owners. One of the striking features of this ad. is that although called auto supplies, a great many of the lines shown are regular stock goods. For instance the combination pliers, wrenches, machinists' hammers, breast drills, mechanics' vises, bolt clippers, hack saws, pulley blocks, etc., are stocked in the majority of hardware stores, and yet in many cases hardwaremen have overlooked the fact that car owners are interested in these lines. The space occupied by this ad. measured 11 x 20 inches. The ad. is well balanced, and is one that should pull business.

The advertisement of Sinclair Hardware, Paisley, Ont., occupied a space measuring 6½ x 6½ inches. This ad. states that the motorist can secure anything in the line of accessories from a spark plug to the car itself. Sinclair's hardware, has handled autos and auto accessories for some time past, and pays special attention to the needs of the auto owner.

The advertisement of the George Taylor Hardware Co., occupied a space measuring 6½ x 8 inches. No illustrations were used in this advertisement. The ad. emphasizes the fact that the Taylor stores cater to the auto-owner and carry in stock large assortments of tires. The Taylor stores do a large business in auto tires, and carry a heavy stock. The advertisement also refers to the Taylor garage, equipped with competent workmen who undertake all kinds of repair work.

The Cochrane Hardware, Ltd., advertisement features in a general way automobiles and bicycles. This firm has the agency for the car shown in the advertisement. A good assortment of accessories is carried in stock at all times. In some lines of tires samples only are carried. These are of course the large and high price lines. When an order is received a wire is sent to Toronto and the tires arrive in Sudbury the next morning. If the motorist is in a hurry he is allowed to take the samples. During a visit of a Hardware and Metal representative an order was placed for two tires at $73 each on Monday night. The tires arrived on Tuesday morning. The profit amounted to 15 per cent. Bicycles are also carried by this firm and about 30 were disposed of last season.

Only four advertisements have been shown here but they serve to show that some retail hardware firms at least are making a strong effort to secure the motorists' trade. These firms are typical of hundreds of other retail hardware firms in Canada.

AUTO ACCESSORIES A HARDWARE LINE.

(Continued from page 43.)

to spend a considerable sum yearly on supplies. In addition to the goods needed for the auto, the owner will need many other articles of hardware for his home, and if you secure his patronage for auto supplies, you will likely sell him other hardware and paint lines for the home.

Getting a List.

The hardwareman who wants to go after the autoists' trade should have a list of all auto owners in the community. This is very easy to get. By spending fifty cents for the directory and about ten cents for postage, the retail hardwareman can secure a complete list of auto owners with street address, in the Province.

This list is a good one to work for other lines as well as auto accessories. Why not get a list now. If you do not know where to send for the list, write to Hardware and Metal, and you will get full particulars by return mail. Each province issues a list of all auto owners in the province and this list is worth many times its cost to the retail merchant who will use it.

Bruce 'Phone 11 Sinclair's Hardware Bell 'Phone 30

Newspaper advertisement of Sinclair's Hardware, Paisley, Ontario.

In this issue of Hardware and Metal many auto accessory firms are advertising goods which could be profitably sold by retail hardwaremen to auto owners. Study the advertisements of these firms and write to them for particulars and prices regarding the goods offered for sale. The auto accessory lines is rapidly becoming recognized as a hardware line. The hardwareman is truly the logical distributor of auto accessories.

You will remember a few years ago how many hardwaremen resented the idea that electrical appliances were a hardware line, yet see how many hardwaremen are selling electrical irons, toasters, percolators, vacuum cleaners, tungsten lamps, etc., to-day.

A very few years from now auto accessories will form a part of every hardware stock and there will be a good demand for clerks who are thoroughly experienced in handling auto accessories. The auto-accessory line is being rapidly introduced into Canadian hardware stores. Have you looked into the possibilities of the auto accessory line or are you leaving it to your competitors?

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, MAY 8, 1915 No. 19

FARM TRADE is the backbone of the average hardwareman's business. He should cultivate it in every way.

* * *

ACHILLES WAS vulnerable only in his heel. Every man has his weak spot and the successful collector is the man who can find it.

* * *

KEEPING EXPENSES down is not the secret to success in the retail hardware business. Nevertheless the man who can get results on the lowest possible expenditure is the man who spends his declining years clipping coupons.

* * *

WHAT BANK manager will loan money without convincing himself in the first place that the applicant is thoroughly reliable? Why should a retail merchant give out goods, which represent so much money to him, without taking equal precautions?

* * *

THE MAN at the head of the business should know how to keep the men responsible for the various departments of his business "out of the ditch." In other words to keep employees from doing the wrong thing.

* * *

THOUSANDS OF men who have succeeded had no better chance, perhaps a chance not half so good as thousands of others who have failed. This fact is gradually becoming clearly and definitely fixed in the average modern mind.

* * *

THE RECOLLECTION of quality remains long after the price is forgotten. This saying has become a proverb. But it might well be added: The annoyance of a cheap purchase lasts long after the satisfaction over the lowness of the price has passed away.

* * *

A BUSINESS organization may be ever so magnificently constructed; may be organized with almost infinite perfection, yet a few erroneous policies will run this organization into an "iceberg," and the work of years, the experience of many men all go down in the mad whirl of business blunders.

* * *

A MAN SUCCEEDS because he thinks success. Because he has prepared himself through nights and days of work and study to take advantage of something worth while on the day it arrives. The man who frees his mind from rubbish, from self-complacency, is the only man who is in a physical, moral and mental state to accept something big when it comes his way.

Retailing Poisons

IN last week's issue of Hardware and Metal appeared a summary of the legal provisions governing the sale of poisons in hardware stores in Canada. Activity is being shown in certain quarters in the enforcement of the law with respect to the handling and sale of poisons, such as wood alcohol, paris green and arsenate of lead. Even where purely technical omissions have been made, the rigors of the law are being evoked.

Hardwaremen should be careful to see that they are living up to the letter of the law in their methods of handling these lines.

Selling Auto Accessories

DURING the past ten years many new specialty side lines have been added in Canadian hardware stores. As the sale for these side lines developed, they became a regular part of the hardware stock until to-day we find the hardware stock in the average hardware store much different to the stock carried a few years ago. During the past three years a new line has sprung into prominence —auto accessories. Hardware merchants are the most logical distributors of auto accessories. Supplies for the auto owner fit in splendidly with many of the other lines carried in the hardware store, in fact, many articles that have always been recognized as part of a hardware stock can really be classed as auto accessories. The patronage of the car owner is very desirable.

The number of car owners in Canada is growing by leaps and bounds. Of one car alone, there were 60,000 in use in Canada last year. Nearly 30,000 more will come into use this year, making a total of 90,000 cars of one make alone in use in Canada. Many thousands of dollars' worth of supplies are well needed annually for this particular make of car alone, not to mention the many thousands of other cars in use throughout the Dominion. Hardware jobbers are now taking up auto accessories and a number of jobbing firms are carrying special assortments of auto accessories, whereby for a modest investment the merchant can secure a representative stock of popular selling accessories. Every merchant can secure a list of auto owners in his district with their address. The Provincial Governments issue directories of all auto-license holders and these can be secured at a very reasonable cost. The merchant, by going through the list, can secure a very valuable mailing list of auto owners in his vicinity.

In this issue of Hardware and Metal a large num-

ler of accessory manufacturers and jobbers are advertising auto accessories. Every hardwareman should study the advertisements and where interested should get in touch with the advertiser.

Auto accessories, as a retail proposition, carry a very healthy profit. They are rapidly becoming recognized as part of the modern hardware stock and many of the best hardware firms in Canada have regular automobile supply departments.

Something For Nothing

EVERY once in a while some new and practically unknown concern circularizes the retail hardware trade, making tempting offers, and telling the hardwareman how, by following out certain instructions and signing his name to a document which is enclosed, he can make a large amount of money, in fact the literature sent out would almost lead one to believe that some charitable institution had been started, especially for the benefit of the retail hardwareman. Very few firms can afford to give "Something for Nothing." We therefore advise every retail hardwareman to fully investigate the "business reputation" of any firms making extraordinary offers through the medium of circulars with "enclosed agreement," which the merchant is asked to sign.

Some very tempting propositions (according to the literature distributed), are being offered to Canadian hardwaremen at present. Be sure and investigate them before you bite or get bitten.

The Metal Markets

THE metal markets are still in a very unsettled condition. There is a good demand for some metals used in the manufacture of war munitions, but ordinary business is quiet. During the past few days there have been large inquiries but very little actual business has been transacted.
